Our Ref: 100920
Re: Scottish Redress Application - Mr Colin James McKay
DOB: 5 September 1979
Application Reference: APP567348

Dear Sir/Madam,

Covering Letter - Witness Statement and Supporting Exhibits

We write in connection with the above Scottish Redress application. Please find enclosed the Witness Statement of Mr Colin James McKay, together with the supporting exhibits referred to within the statement.

The purpose of the witness statement is to provide Mr McKay's own account of his childhood care placements, the abuse and neglect he describes experiencing while in care, and the impact this has had on his childhood and adult life.

The statement is submitted in support of his application to The Scottish Redress Scheme and should be considered alongside the application form and supporting evidence bundle.

We respectfully draw attention to the fact that Mr McKay is a vulnerable applicant. His statement describes general anxiety, separation anxiety, panic attacks, suicidal thoughts, depression, flashbacks, nightmares, addiction and a history of substance misuse.

Mr McKay also explains that revisiting his childhood experiences has been distressing and triggering. We therefore ask that all communication and engagement with him is conducted sensitively, using a trauma-informed approach and through his appointed legal representatives wherever appropriate.

The statement explains that Mr McKay was placed into care in Scotland at approximately 11 years old. It records his background before care, the circumstances of his entry into care and his placements at Ailsa in 1992, Newfields Assessment Centre in 1994 and Geilsland in Longriggend from 1995 onwards.

In summary, the statement describes Mr McKay's account of physical and emotional abuse and neglect. This includes allegations of being hit, slapped, punched, kicked, thrown, pulled, stood and kneeled on, struck with objects, forcibly restrained, locked in rooms, isolated, threatened, humiliated and deprived of food or drink while being punished.

The statement records that these experiences occurred across his care placements, that other children were also affected and that the treatment became more severe as he grew older. It also records that complaints were discouraged and that concerns raised with staff did not result in effective protection or intervention.

The enclosed exhibits include care records relevant to Mr McKay's placement history, GP and mental-health records relevant to the impact described, medication evidence and related correspondence. Some records are redacted where appropriate and should be read together with his account.

The statement refers to Mr McKay having been prescribed Mirtazapine, Sertraline, Citalopram, Duloxetine, Nortriptyline, Amitriptyline, Zopiclone, Olanzapine and Gabapentin. These medications are referred to in the context of his reported anxiety, depression, OCD, panic attacks, sleep difficulties and wider mental-health history.

Mr McKay attributes his continuing anxiety, depression, panic attacks, flashbacks, nightmares and related difficulties to his experiences in care. The medication and treatment evidence may assist Redress Scotland when considering the claimed long-term impact. This is not intended as a medical opinion, but as a summary of the evidence and its relevance.

The statement also describes the effect of the alleged abuse on his education, employment, relationships, trust in authority, housing, finances, criminal involvement, addiction and substance misuse. It records that he continues to experience shame, guilt, fear and significant emotional distress.

We respectfully request that Redress Scotland considers the enclosed witness statement, exhibits, application documents and wider evidence bundle when determining Mr McKay's application.

Brief overview of enclosed document

Section / document part	Brief contents
Witness statement	Mr McKay's personal account in support of his Scottish Redress application.
Background and entry into care	Personal background, life before care, entry into care and family circumstances.
Care placement account	Ailsa, Newfields Assessment Centre and Geilsland, including approximate dates, daily life, staff conduct, punishments and care arrangements.
Abuse, neglect and reporting	Alleged physical and emotional abuse, neglect, excessive restraint, isolation, food deprivation, threats and reporting difficulties.
Impact evidence	Childhood and adult impact, including mental health, relationships, education, employment, flashbacks, nightmares, suicidal thoughts, addiction and substance misuse.
Supporting exhibits	Care records, GP and mental-health records, medication evidence and related correspondence.
Payment Authority Letter	A signed mandate allowing MMA Legal, as my legal representative to obtain monies in their client account on my behalf.

Yours faithfully,

James Taylor - Claims Operations Manager

Investigations Team

WITNESS STATEMENT OF COLIN JAMES MCKAY

Application to The Scottish Redress Scheme

Applicant: Mr Colin James McKay

Date of Birth: 05 September 1979

Application Reference: APP567348

Support Person Present: No

Background

1. My name is Colin McKay. My name as a child was Colin McKay.
2. My address is 9 Waterloo Place, Inverness, IV1 1NB.
3. I make this statement in support of my application to The Scottish Redress Scheme.
4. The contents of this statement are true to the best of my knowledge and belief.
5. Where I cannot remember exact dates or details, I have made this clear.
6. I confirm I have provided as much detail as I am able to recall.
7. I understand that this statement will be considered as part of my application, together with my application forms and any supporting documents or records provided.
8. Where necessary, I have exhibited extracts of the supporting documents obtained to this statement to support my application.
9. I am happy for this statement to be submitted to the Scottish Redress Inquiry.
10. I do not need any support to conduct this statement today and I do not need anybody with me to complete the statement.
11. I understand the purpose of this statement and that it is in support of my Scottish Redress Application.
12. I have been in and out prison and all of my convictions are spent.
13. I was placed into care whilst under the age of 16. The care setting was based in Scotland.
14. At the time, I was living in a care setting as part of the care arrangements.
15. I was approximately 11 years old when I went into care.
16. I am unsure who placed me into care or why I was placed into care.

17. The placement I was in was a children's home, Children's Residential and Young Offenders Institutions.

Life Before Care

18. I grew up in a place called Mary Hill, North Glasgow. I lived in a set of high-rise flats with my parents and siblings.
19. My mum and dad split up when I was around 4. I remember being brought up by my mum and my mum's boyfriend. After a while, I remember being brought up by my mums' boyfriend only.
20. My relationship with my parents was ok. I grew up with my mum mainly and seen my dad regular and stuff. Everything was ok in that way.
21. We didn't really have much growing up. We came from a poor area. No one in my area had anything you know. The only ones who did have something is the ones that were up to no good, they were the only ones with money.
22. I was around 4 years of age when everything started to change in my family. That was what age I was when my father left when my mum kicked him out or whatever happened.
23. I was in good health prior to being taken into care. I had anemia but other than that I was ok you know.
24. I went to school. Well, I was meant to go to school, but I was always dodging. My parents thought I was in school mind.
25. Before entering care, my general wellbeing was ok. I never had a lot of things, but my life was ok.
26. I didn't have any learning difficulties or disabilities or any other relevant health backgrounds.

Entry Into Care

27. The local authority placed me into care. I was placed into care because I was mad about cars.
28. I was stealing cars all the time and would never learn my lesson.
29. I kept going around in circles, robbing cars, getting into trouble, being told off and do it again until eventually the local authority got sick of me and put me into care.
30. I can't remember if I got told I was being taken into care. I do remember a panel and remember being told that I wasn't going back to my parents, but I was never told where I was going.

31. I know that I was placed into care by Glasgow City Council, Ayrshire and Renfrewshire City Council over the years.
32. Growing up I had siblings. I had an older sister and then after a few years a younger sister too.
33. My younger sister ended up in care for bad behavior. My older sister never went into care. She was always good.
34. I remember I was doing prison time when my younger sister was placed in care.
35. At the time of being placed into care it was during the night. I didn't know what was going on and was confused and nervous.
36. I woke up in a strange building with other kids in a bedroom with me. It was a room of mixed boys and girls. It was really scary.
37. I was never given any dates or amount of time that I would be there for.
38. I have attached a copy of the care records I have been able to obtain. These can be seen at **"EHIBIT 1".**

Detailed Account of Each Placement

Ailsa – Paisley, Johnston 1992

39. I was placed in Ailsa some time in 1992. I have made attempts to obtain evidence but have been unsuccessful in doing so.
40. I stayed at Ailsa for a few months before I was moved again.
41. I was told that I would be at Ailsa for 3 weeks for an assessment but ended up being there for 3 months.
42. After this I went home again for a bit before I went to my next care setting.
43. I remember Ayrshire Council placing me in this care setting.
44. This care setting was a Young Offenders, residential school setting.
45. Whilst I was at Ailsa, I learnt the routines pretty quickly. You would get up in the morning and maybe have breakfast and stuff like that.
46. The staff gave you cereal, toast and stuff you know.
47. Sometimes you would have appointments to go and see a social worker or an appointment or whatever. Otherwise, you just sit about in the house all day and there was nothing to do. Literally nothing to do.
48. I do remember being a wee bastard like, I did deserve to be punished but I remember thinking hand on a minute, I'm a wee fucking child you know. It shouldn't have been happening.
49. Ailsa was a big place, a big house. It was massive.
50. It had been converted; it had to have been it was huge. It had big huge foyers and kitchens and stuff you know. Multiple bathrooms and bedrooms.

51. The people that worked there were just called staff really.
52. Some of the staff were alright and did the job right. But there were some there who were there for a different reason.
53. Some of the staff didn't know how to leave their personal life and anger issues outside of work, you know. They couldn't leave stuff at the door and would take it out on the kids in the home.
54. Other routines were normal you know. Fed at certain times and you had to be in your room at certain times and stuff.
55. If you were caught out of your room, you would be punished.
56. Sometimes the staff wouldn't give you any food at all if you had misbehaved.
57. I was locked in my room and so were other children if you carried on or whatever.
58. I think the food was actually ok. It wasn't bad or like slop food, you know it was actually decent.
59. You could always go and get something to eat; well you could ask for snacks and stuff.
60. The home itself wasn't the cleanest and wasn't best kept.
61. I stayed in a dormitory with maybe 4 or 5 beds in it. There was stuff lying all over the place and the floors and stuff it was never kept clean, neat and tidy.
62. I had regular baths and showers. I also had toiletries to keep clean. You could use these whenever you needed to.
63. I remember feeling confused about all of this. When I was in this care setting, I wasn't far from my home. It never felt right being there because I was so close to my home.
64. It wasn't until I actually got into the care home and experienced all of this that I realise that I really didn't like it.
65. I experienced treatment which I would now consider as abuse, neglect and harm.
66. There was plenty of violence and being locked in your room for excessive amounts of time with no food or drink and stuff.
67. The staff would lock children away with no food or drink. They would lock them in the home and bedrooms and stuff or put them in segregation.
68. This type of punishment could happen at any time of the day. It did normally happen when you were cheeky or naughty.
69. This type of punishment also happened every time you were naughty or stepped out of line.
70. This type of punishment also happened the whole time I was placed in this care setting.
71. The abuse stayed the same over time and didn't worsen or become less abusive.

72. Right before this would happen I would have been naughty somehow. You would then just be taken away from everyone.
73. The staff would try and restrain you, but what they were doing wasn't restrained, it was clear abuse. They were all fully grown adults and sometimes it would be a few of them onto one kid you know.
74. After they would abuse children, they would act like nothing had happened.
75. Some of the staff would try and justify it and lecture you after it like trying to fucking guilt trip you or something.
76. Whilst I was in this care setting, I was threatened, bribed, isolated and punished on many occasions. I think you could say assaulted to end the bargain.
77. I suffered pain, injury, ran away a lot, fear, shame and humiliation. I lost count of how many times I ran away.
78. Some of the injuries weren't visible and were hidden. They would be on your back, ribs, arms, bottom and stuff. They did this on purpose, so it wasn't visible, they knew what they were doing.
79. I remember having bumps and lumps all over me and my head you know.
80. I never received any medical attention for any of it. The staff wouldn't take you to get checked obviously because they caused it.
81. I was threatened to be punished all the time. Or threatened to be moved or sent to segregation. Staff would say stuff like "oh ill stop you doing this" or "ill stop you having any dinner tonight".
82. I was always told I was being bad or that I was at fault.
83. When it came to contacting people outside, they couldn't stop your mail or your phone calls but they would limit the number of calls you could have a week. They did that to me a number of times.
84. On birthdays and Christmas, they would give us gifts. But if you were naughty or misbehaving you wouldn't get anything at all.
85. Although I personally was never forced to watch others being abused or humiliated, I did see it happen to other boys on multiple occasions.
86. I felt so frightened, isolated, humiliated, threatened and powerless.
87. I was never protected from things, bullies, violence, sexual abuse and unsafe adults.
88. I was ever supported by schooling, homework or future opportunities.
89. I never received comfort, affection, encouragement or emotional support.
90. One of the most important things for me is that I never felt safe.

Newfields 1994

91. My second care placement was Newfields Assessment Centre.

92. I was only supposed to be at Newfields for 3 weeks but turned into a few months, I think.
93. It was Glasgow City Council who placed me here.
94. Daily life here was practically the same as Asila, I would just sit about the unit every day.
95. I remember there were about 3 or 4 units altogether.
96. I can't remember all the unit names. I know I was in Lowman unit; I think that's what it was called anyway.
97. I remember there were girls in one of the units. Some mixed but one all girls one.
98. I also remember there was a little dining area, and everyone would have to sit down at nighttime and eat dinner and stuff.
99. When it came to staff, that's what we called them, staff. Again, some of them were ok and would take you out and stuff but them some of them were horrible bastards.
100. When it came to rules, you weren't allowed certain things you know, like you couldn't drink or smoke and stuff.
101. Punishments here were bad too. If you were ever punished, you'd be "restrained" and locked in a room.
102. The worst part about that here is that there was a young boy who hung himself in one of the rooms and no one wanted to go in that room ever, even staff. The staff would lock you in there as like a mental torture. I got put in there all the time I hated it.
103. I won't sit here and lie about the food because it wasn't actually bad.
104. We had beds and bedding, clothes and stuff you know. Nothing special just basic needs.
105. I can't remember many staff in Newfields, but I do remember getting a few wee beatings in there.
106. The staff were abusing me all the time. They were doing this because they had authority over me.
107. This wasn't just one member of staff to, it was all of them and it was all the other children being affected too.
108. I was threatened, blamed, isolated and punished whilst being placed in this care setting.
109. I suffered pain, injuries, bleeding, fear, shock, shame, nightmares and ran away on a number of occasions.
110. Most of the injuries again would not be visible or purposely given in an area of the body that wouldn't be seen.
111. I was hit, slapped, punched, kicked, thrown, pulled, struck with objects and physically harmed.

112. I received cuts, bruising, swelling, burning and other injuries whilst I was in this care setting.
113. I never felt safe, looked after or wanted whilst I was in Newfield.
114. I was placed into care by an authority that I should have been able to trust and I was let down on multiple occasions.

Geilsland – 23/09/1995 onward

115. I entered Geilsland in Longriggend on 23 March 1995.
116. I was placed here by North Ayrshire Council.
117. I was in Geilsland for around a year and a half I think.
118. Day to day activities around here were different. Because this was a young offender you had to do different stuff not like sit around and stuff.
119. I had to go to education and workshops like engineering and carpentry and stuff. Mechanics and painting and all kinds.
120. Other than that, you would just sit in your room watching tv or playing pool or handing inside with pals you know.
121. I remember there was a unit called whitehouse which was the oldest building. When I first got there, new units had just been built.
122. All the buildings here had different names. I remember my building being the worst building. It was all old and used.
123. The staff here were ok. There was a mix of men and women staff.
124. I remember one guy, Max, he would just terrorize all the kids. He had long black curly hair, he was a big guy you know.
125. He would do stuff with the kids, you know entertain them and do nice things with them, but then he would just start terrorizing the kids or showing off to other members of staff.
126. He would just start tormenting you, pushing you over, making a fool of you.
127. The staff also would ambush your room. They would lock me in sometimes when they were doing their checks and they would get physical and really lay into you.
128. Youd be locked in your room in agony all night all fucking sore and stuff.
129. The food was alright here to be fair. It wasn't great but it was what you'd expect.
130. The clothing wasn't too bad either. Every now and again you'd get a grant for clothes. Some kids seemed to get them all the time, but I think I only got it once or twice.
131. If you wanted to shower, they would normally let you unless it was like late or something. They were good when it came to hygiene.
132. Whilst I was at Geilsland, I was hit, assaulted and physically harmed by the staff.

133. Out of all the placements this one was by far the worst.
134. The abuse I received here was next level.
135. I was slapped, twisted up, kicked, kneeled on, stood on, hair pulled, thrown, pushed, stuck with objects, locked up. It was horrible, you'd have fully grown adults all stood on you at one.
136. Every punishment here was excessive. All men pinning you down laying into you, it was humiliating.
137. This happened to every child there. It went on the whole time I was there and got worse and worse every beating.
138. All the staff knew what was going on.
139. This place was bad; it was the one I remember the most because of how bad it was.

Frequency, Duration & Patterns

140. The above abuse I was victim to happened in each care setting I was placed in by the local authority.
141. The abuse I received in each care setting went on from entry to exit dates an accumulated into years of abuse.
142. I remember it escalating as the older you got.
143. There was no set pattern, it would always just come as a sort of surprise.

People Involved, Witnesses & Siblings

144. I remember the people who did this, well, some of them.
145. I remember Max from Geilsland.
146. I remember a Phillip Dunlock.
147. I remember another guy, he was Italian or Spanish or something, I think he was called Sal.
148. The people who were abusing were staff members, social workers, and supposed carers.
149. I know it happened to other children in every setting I went to, like it was just normal.
150. It was common knowledge to staff what was going on in these homes. They would all boast about it and laugh. Even the women were doing it.
151. They would say stuff like "the cheeky wee bastard deserves it".
152. When the staff were doing this to other kids, you'd shout stuff you know, tell them to stop and they would just tell you to mind your own business, ignore you or punish you.

Reporting & Responses

153. I did tell staff members what was happening and pals and stuff, but nothing ever happened it just carried on. Nothing was changed.
154. I never told my parents because they would have been down there but at the same time it was being who was a wee bastard.
155. Apart from this I had never reported it to anybody else.
156. I know complaints were discouraged.
157. I didn't tell the police, when you're a child you don't really think of these things, you know.
158. I have spoken to a lot of professionals in my adult life though. I have had Psychologist and stuff you know.

Impact On Life Past/Present/Future

159. The abuse I received has and remains to have an impact on my life.
160. Because of the way I was treated in these care settings, violence is all's I've known in my adolescence. How to punish people, its easy, if you have authority over somebody you can punish them you know.
161. All of this stuff has affected my trust with people, especially people who have authority like GP's and Councils and stuff.
162. I always feel like people are still trying to control me.
163. I know my behaviour got worse whilst I was in care and I believe this was due to how I was being treated.
164. I know I was going to be locked up eventually anyway.
165. My school life was affected which altered my potential.
166. I was moved around a lot, I didn't have the same people around me for long periods of time.
167. I had unstable living arrangements.
168. Every relationship I have had, sexual, family or friend, has been affected by this abuse.
169. This has been affected because I could never get help, especially back then when it was happening. I was constantly punished.
170. I have suffered with and continue to suffer with general anxiety, separation anxiety, Panic attacks, suicidal thoughts and some depression.
171. I also still experience fear, shame, guilt, flashbacks, nightmares and addictions.
172. My addictions have been in use of heroin, cocaine, cannabis, alcohol, methadone, buvidal, buprenorphine and suboxone.

173. This has led to me being medicated with multiple mental health drugs such as Mirtazapine, Sertraline, Citalopram, Duloxetine, Nortriptyline, Amitriptyline, Zopiclone, Olanzapine and Gabapentin.
174. I have had issues with substance misuse over the years. This has affected my finances, housing, criminal involvement and offending.
175. I still take issue with anybody in authority now. I get triggered easily.
176. I have evidence both my GP records and medication sheets at **"EXHIBIT 2".**
177. I think about this daily but I try not to think about it.
178. I do think it's all part of being in care and wonder where it went wrong. But it's all part of my life now.
179. I do believe my life would have been somewhat different. It was different back then but no one should be treating kids the way they did.
180. This has had an everlasting effect on me.
181.
182. The anxiety, OCD and depression that I've dealt with has stemmed from my time in care.
183. I don't know what my life would have been like if I hadn't been put in care. I believe my mental health is in the condition it is due to my time in care.

Long-Term Impact on My Adult Life

184. The physical, emotional abuse and neglect I experienced in care has had a lasting impact on my life.

185. The impact has included:

Mental health: General anxiety, separation anxiety, Panic attacks, suicidal thoughts and some depression
Relationships: Difficulty trusting and relationship breakdown.
Education and employment: Missed opportunities and difficulty holding employment.
Identity and self-worth: Shame, guilt, feeling different, self-consciousness.

I have received the following treatment/medication: Mirtazapine, Sertraline, Citalopram, Duloxetine, Nortriptyline, Amitriptyline, Zopiclone, Olanzapine and Gabapentin.

Supporting Evidence & Records

186. I understand that records and documents may be considered alongside this statement. I have exhibited, as necessary, documents to this statement.
187. I have also provided a bundle of evidence in addition to this statement, these are all of the relevant documents my legal representatives have been able to obtain on my behalf, from relevant institutions, local authorities, and medical practices.

188. Some records may be incomplete, missing, or unavailable due to the passage of time. Where records are missing, I ask that my own account still be considered carefully. I have done all in my power, with the assistance of my legal representative, to obtain and provide as much evidence as possible.

189. I have had my legal representative to redact any information that's not relevant to my Scottish Redress Application.

Difficulties with Memory and Gaps in Evidence

190. The events described happened many years ago. Some dates, names and details are difficult for me to remember.

191. My memory has also been affected by the trauma of what happened to me.

192. Where I have used approximate dates or descriptions, I have done so honestly and to the best of my recollection.

193. I have not intentionally exaggerated or included anything that I do not believe to be true.

Why Am I Applying to the Scottish Redress Scheme

194. I am applying because I experienced abuse and/or neglect while I was a child in care in Scotland.

195. I want my experiences to be acknowledged.

196. The abuse and neglect I suffered has had a significant and lasting impact on my life.

197. I am seeking redress in recognition of what happened to me and the harm that I have lived with since.

Final Statement

198. Overall, I wish this never happened.

199. I would like for it not to happen again to any other child.

200. I want the people who did it to be held accountable.

201. It should be justice made, money part aside.

202. I have never made a previous civil claim, criminal injury claim, Redress application, advance payment application, complaint, police report, inquiry statement, or claim to another scheme about this abuse.

203. I have never received any payment, apology, response or settlement in respect of my Scottish Redress Claim or abuse.

204. I have never signed any waiver, settlement agreement, discharge, or acceptance form in respect of my Scottish Redress Claim or abuse.

205. Going through this again has been triggering and something that I want to disappear when this is over. I'm done with it all now.

206. I have tried to provide a full and honest account of my experiences, to the best of my knowledge and belief.

207. I ask that Redress Scotland considers this statement, my application forms, and the supporting evidence I have submitted when determining my application.

Statement of Truth

I believe that the facts stated in this witness statement are true.

[illegible] Reports has no thoughts of suicide or self harm and states has not considered using drugs/Opioids/[illegible] lengthy period of [illegible] which there is currently no resolution to, developing a sense of hopelessness, also frustration with lack of access to [illegible]. Recommend to consider recommence antidepressant [illegible] also refer to clinical psychology. Mr Andrew Mctaggart
23/03/2023 Administration. [illegible] Mental Health referral received Ms Angela Dewar
20/03/2023 Consultation [illegible] Dr Kathryn Clark
08/02/2023 Seen by nurse. Spoke to Colin regarding Vit B 12 injection which he has declined recently. No longer wishes to take this injection- informed choice and patient has capacity. Treatment refusal form to be signed. [illegible] This seems to have been an issue intermittently since 2012. Current prescription expired - [illegible] GP [illegible] appointment is required. Ms Anne Wilkinson
18/11/2022 Consultation. Pelvis x-ray result - minor degenerative changes affecting both hips. Otherwise normal. Letter sent to patient. Dr Kathryn Clark
15/11/2022 Seen by nurse. Patient listed for vit b12 injection but refused, will retry. Ms Stacy Morley
08/11/2022 Consultation. Seen by nurse on return from Hospital appointment for x-ray. Patient reports being advised that result would be forwarded on to health centre when ready. Ms Louise Stary
02/11/2022 Administration. Hospital appointment [illegible] November 2022 at Inverclyde Royal Hospital - X Ray Dept - Pelvis AM. Third appointment. Ms Angela Dewar
02/11/2022 Patient reviewed. DNA letter for pelvic xray, re-dnas refused, please reappoint. Dr Katie Usher
20/10/2022 Drug addiction therapy. Seen Colin today in [illegible] following from being off [illegible] for 3 weeks. He appeared to be very sleepy, [illegible] however, stated that he has had a few hours sleep in the past week or so. I advised him to take his [illegible] as prescribed to try and regulate his sleep pattern which he stated he would do. I sent Colin to health centre for review and also to be taken due to his presentation and stating he had seen GP today and call from [illegible] regarding presentation. Colin stated that he wanted to stay [illegible] as he feels [illegible] He feels that he will continue to isolate himself as he stated this is the best way to get out of prison [illegible] being involved in any conflict among other prisoners. Colin stated he was not feeling depressed and that he has always been "the same way". Strongly denies any current thoughts of suicide or DSH. Sent to health centre for review by A McTaggart. Miss Kylie Rodgers
20/10/2022 Drug addiction therapy Mr Andrew Mctaggart
19/10/2022 Consultation. [illegible] Struggling with [illegible] as discussed [illegible] 3 weeks. Determined to stay off and allow body to find natural rhythms again. Obviously sleepy this morning. Insomnia is thing struggling with the most. [illegible] natural light. [illegible] agreed to take [illegible] for 1 week Dr Kathryn Clark
18/10/2022 Seen by nurse. Colin handed back his monthly medication. States he no longer needs it. Miss Kelly Joyce
13/10/2022 Administration. Hospital appointment - 20th October 2022 - Inverclyde Royal Hospital - X-Ray Dept - Pelvis AM. Ms Angela Dewar
12/10/2022 Seen by nurse. Colin continues to struggle with not having any opiates but remains determined to abstain. He continues to present as [illegible] but was dressed and had been out walking in the fresh air prior to our consultation. Reports minimal effect from Zopiclone. Had discussed his situation with Dr Clark who said the only option he could be offered was to restart Espranor 2mg on alternate days for a short period of time. Colin declined this as he feels it would be a backward move. [illegible] difficulties and agreed to contact staff if he feels unable to cope. Denies any thoughts of suicide or self harm and talks freely of his future, a parole hearing in 8 weeks and then eventual release at some point. Ms Anne Wilkinson
10/10/2022 Mental health review. Met with Colin this morning in Chetwoold after medications. Concern from was raised by [illegible] staff regarding Colins presentation, [illegible] A Wilkinson, [illegible] Writer and Colin met [illegible] this morning in Chetwoold managers office. Colin presented in nightwear, [illegible] Colin explained that he is currently struggling from not having any opiates. He reports this is to be expected and the only way to resolve this would be to take opiates which is something Colin is not prepared to do. Colin reports he is due for Parole hearing in 8 weeks and wishes to attend stating he is well and substance free. Colin also advised he has come off his Mirtazapine 30mg as he feels that was making him worse at the moment. Suggested this was not ideal and urged Colin to reconsider, [illegible] however he declined this. Agreed to be signed off work for the [illegible] to see if this helps him sleep and work through this. Colin on more than one occasion categorically denies any self harm or suicidal ideation. Colin will seek additional support from staff should he begin to struggle. No further action in regards to the concern form at this time. Written by N Thomas HMP Greenock [illegible] Nurse. [illegible] Thomas
03/10/2022 Administration. Hospital appointment on 11th October 2022 - Inverclyde Royal Hospital - Xray Dept - Pelvis AM. Ms Angela Dewar
04/10/2022 Drug addiction therapy. Seen Colin today in Chetwoold and he stated that he is finding it difficult to sleep at present, however he does not feel tempted to use illicitly or find strong [illegible]. He reported that he expected to have a bit of a rough time as he is aware of opiates coming out his system and happy to continue with his plan to remain drug free. Discussed sleep hygiene, reducing caffeine intake, getting out for exercise, [illegible] a good routine, eating a healthy balanced diet and attending the gym [illegible] No current thoughts of suicide or DSH reported. Will list for 17/10/22 to review. Miss Kylie Rodgers

24/03/2020 Drug addiction therapy [illegible] about contract on his head. Feels not point in life as expecting to be killed within the next 18 months [illegible] mirtazapine 30mg at the moment, been on them for a while, helps with sleep a bit but mood still very low. Physically appears very pale but otherwise in good health.PLAN : Mirtazapine increase to 45mg, Blood to exclude organic cause: vitb12, vitD, FBC, TFT, LFT U+E and testosterone. Dr Dominique Van Den Moortel

17/03/2020 Drug addiction therapy Seen patient on 5/3/20. Spoke about various issues including methadone dose. Has since went from 70mls to 80mls. Colin [illegible] asking for further increase in dose. Still feels he is struggling and does not feel stable. He feels if he increased a little and stabilised he will start reducing when he feels a bit better. Has been downgraded before for using subutex and MDMA- not current use and does not want this to happen. Kardex put in for GP to increase to 85mls. Ms Kirsty Byng

05/03/2020 Drug addiction therapy Situation- Seen today in health centre for review/referral. Background- Requesting to speak about methadone dose/ ongoing support for mental health/addiction issues.Assessment- Colin was attacked last week [redacted] spoke a bit about this, states he is "used to this". Attack appeared unprovoked and Colin reports that he did not fight back. Colin again spoke at length about his frustration with the prison system and the situation he is in with his co accused. He reports he constantly thinks about getting murdered and this never goes away. Currently not working and he reports the overthinking has gotten worse recently. Reports he does not feel great physically, skin appears very pale. Is on vitamin B12 injections for this but Colin has not been leaving his cell very often. Avoids rec, exercise and education due to threats that are made against him. Reports that Parole hearing did not go well and he threw the letter from them in the bin as he knew he would have gotten a "knock back". Continuing to work with forensic psychology. Feels as if he is wasting my time by seeing him however advised that I was here to support him and help with "here and now" issues to try and help him cope a little better. Spoke about increase in methadone. would like to go to 90mls as he reports he is feeling "rough" in the morning. Shivery, watery eyes, runny nose etc. Has been on 90mls before. Advised that I would increase to 80mls as of 6/3/20. Strongly denies any thoughts/plans of suicide/self harm today just feeling frustrated and stressed. Advised to keep busy and distract himself as much as possible.Recommendation- To increase methadone to 80mls. Will list for addiction clinic to speak about methadone/testosterone query. Will review in 1 months time. Colin appeared happy with this. Ms Kirsty Byng

05/03/2020 Consultation Discussed this morning at addiction allocations meeting. To be seen by addictions nurse. Ms Kirsty Byng

28/02/2020 Patient reviewed at hospital. Seen on return from Hospital injury sustained to right eye during an assault on the 27/02/20. History of previous facial injury. Alleged assault with weapon last night to right side of head. Previously fractures right zygoma/maxilla and thinks this feels the same. No visible swelling, bruising or injury. Normal cranial nerve examination and visual acuity. States all of his gums are numb bilaterally. XRs facial bones show nofracture. No injury or abnormality detected. Ms Louise Moyes

28/02/2020 Consultation : ATSPHx assault last night with multiple punches on the face. now feels that his Rt eye socket if broken , also taste blood in his mouth as well. states that his jaw may be broken. States that he had similar assault in the past in HMP Barlinnie while he broke his jaw and eye socket, was seen by max fac and had a procedure , states that it feels the same.O/E: Apprexial , looks comfortableGCS 15/15Swelling at the Lt lower jaw areaP/: I advised the client be assessed in A&E for Xray facial bone. Dr Zahid Shah

27/02/2020 Consultation Reviewed at halls- states was assaulted- not witnessed- hall staff reviewing cctv. on review- alert/orientated, no visible injuries. states punched in eye and has fractured eye socket- states that this has happened in past numerous times and knows when dislocated. not wanting any treatment carried out, not wanting to be sent to hospital, not wanting review by gp. discussed with hall staff who states will talk to colin later tonight after cctv footage reviewed. Mr David Morse

18/02/2020 Consultation Time 19:15 hrs location Health centreS~ listed for vit B 12 injection B~ last had in October 2019 A~ prescription not current so not given will ask MO to review also appears very pale and may need bloods checked Has been listed for Dr Dominique on Friday for assessmentR ~ ask Doc to comment Ms Jillian Scott

28/01/2020 Drug addiction therapy Written in retrospect 27/1/20 Situation- Seen in Link Centre for review and to speak about addiction referral. Background- Ongoing support for mental health/addiction issues. Assessment- Colin spoke mostly about his ongoing emotional issues regarding his parole/ co accused. This is a big part of Colin's low mood and he struggles to not think about it. Last session we discussed to possibility of having advocacy represent him at his Parole meeting however this could not be possible as Colin is only allowed one representative and this would be his lawyer. Strongly denies any thoughts/ plans of suicide/self harm in conversation. This session was mostly Colin venting his frustration and worries regarding the prison system. Spoke about his addiction referral and him wanting to reduce off his methadone. Advised Colin that it may be best to wait until he is back in Chelmsford to start reduction as it may be more destructive for him. Colin did disclose that he is finding quite rough in the morning and it may be the wrong time for him to start reducing. Colin agreed with this and reports that he will have a think about it. He also was asking about testosterone levels and how methadone can affect this. Advised Colin that I would have to look into this as he feels it may be contributing to his low mood if his testosterone is affected. Recommendation- No change to methadone dose today. Will review in 1 months time. Colin appeared happy with this. Ms Kirsty Byng

24/01/2020 Drug addiction therapy Listed for review and referral today- could not be seen this morning due to lockup. Will write Colin a letter explaining that appointment is moved to next week. Ms Kirsty Byng

18/01/2020 Consultation Discussed this morning at addictions allocations meeting. To be reviewed by addiction nurse to discuss methadone reduction. Ms Alison Black

18/01/2020 Mental health review Written in retrospect 8/1/20 due to time constraints. Situation- Colin asked a member of staff if I could come to see him. Background- Ongoing support for mental health/addiction issues. Assessment- Colin appeared low in mood in consultation. He recently received a victim notification letter from the victims mother as Colin is due for Parole in March 2020. There are allegations made about Colin that he reports are not true as he does not speak to any of his co-accused and he deliberately avoids them. He is worried that this will prevent him for getting Parole however advised Colin that this would be investigated if the SPS thought there was any truth in this. Tried to challenge Colin's negative thinking in consultation however he was evidently upset over this issue. Strongly denies any thoughts/ plans of suicide/self harm in consultation. Colin believes that he will have to try and disprove these allegations at the Parole hearing however he understands this will be very hard and does not know how to do this. Advised Colin that advocacy may be a route to go down if he feels he is not being properly supported especially due to his situation in having a contract on him. Spoke at length about this and Colin has given me permission to speak to the advocacy service to see if they can help him. Colin also advised me that he would speak to his lawyer. Recommendation- Will contact advocacy regarding this and will list Colin for 3 weeks time. Colin appeared happy with this. Ms Kirsty Byng

09/01/2020 Administration hospital appointment 28/01/20, Neurology - QEUH

27/12/2019 Mental health review Situation- Seen today in health centre as planned for review. Background- Ongoing support for mental health/addiction issues. Assessment- Colin reports that not much has changed since we last met. He feels his ICM didn't go great as he feels no one is listening to him regarding his situation. It was suggested that he could attend the Dick Stewart project in Glasgow when he is released however Colin has reservations about this. He feels it is too near where his co accused stay and he feels a hostel would not be good for him. Spoke about his [illegible] and he reports that this isn't too much of an issue at the moment. No risk disclosed/reported in consultation today. Recommendation- Agreed to meet again in 3 weeks time and he would like to discuss coming down off methadone. Colin appeared happy with this. Listed for 3 weeks. Ms Kirsty Byng

23/12/2019 Administration Patient refused to attend Neurology on 23/12/2019.

20/12/2019 Third party consultation Discussed Mr McKay's first contact meeting with Dr [illegible], Principal clinical Psychologist. He has not been accepted for assessment or intervention at this time. A letter will be sent to referrer and patient informing them of same. Karen Muir, Mental Health therapist Ms Karen Muir

13/12/2019 Mental health review Discussed this morning at the MDS/MHT meeting - agreed to remain on caseload. Ms Alison Mctaggart

12/12/2019 Psychological assessment Met with Mr McKay at 10.30am within the link centre for his first contact session with the clinical psychology interventions service. Mr McKay reported that he is unsure how psychology can support him as all his anxieties stem from situational circumstances which are outwith his control. He reported that he has been dealing with these stressors for 15 years and that he feel he is coping with it as best he can. stated that he had previously received support from Dr Joy Kerr, Clinical Psychologist whilst in HMP Shotts, however it was mutually agreed to end treatment as his anxiety was situational rather than mental health related. Informed Mr McKay that he would be discussed in supervision and informed of outcome by letter. No risk of harm factors identified. Karen Muir, Mental Health Therapist Ms Karen Muir

09/12/2019 Mental health review Written in retrospect 5/12/19 due to time constraints. Situation- Seen in Links Centre for mental health review. Background- Was on TTM for a few weeks due to suicidal ideation. Agreed at case conference to have mental health support/input. Assessment- Colin attended today, a bit better in mood, good eye contact and conversing freely. Was frustrated and a bit upset about a meeting with his outside social worker. It appeared they had a disagreement and she had told him that she was not there to support him. Colin seemed a bit distressed about this. Asked if there was a possibility he could get another social worker however he did not think this was possible. Spoke to P. Brindley (manager) today about this as he was aware about the situation. He advised that changing social worker would be quite difficult at this stage. Due an ICM this month- writer has been invited to attend this. Looking towards the future- has a job to go to when he gets out. Due for parole next year however understand that he may get knocked back but is accepting of this. Spoke a little about his childhood- spent a lot of his time in prison and was in and out of care since age 11. Very interested in Physics and will start to study again when feeling a bit better. Strongly denies any thoughts/plans of suicide/self harm in consultation. Spoke about a potential referral to Psychology and Colin was in agreement with this. Understands not much of his situation will change and it is outwith his control however he is willing to accept the help and support that is being offered to him. Recommendation- Plan to meet again in 3 weeks time. At this session will speak about psychology referral. Colin appeared happy with this. Ms Kirsty Byng

04/12/2019 Mental health review Attended Links Centre this afternoon for review. Review to follow, strongly denies any thoughts/plans of suicide/self harm today. Ms Kirsty Byng

03/12/2019 Mental health review Spoke with Colin today at methadone round. Advised that I would ask for him to be seen at Links Centre today with myself. Colin informed me that he does not have suitable clothing as everything is still in Christwell. Asked if appointment could be moved onto tomorrow. Will relist for tomorrow. Ms Kirsty Byng

02/12/2019 Suicide risk assessment Situation- Case conference (21) held today in Allan hall with FLM J McCormick. Background- Placed on TTM a few wks ago due to suicidal ideation and plans. Assessment- Colin Appeared brighter today in mood. Eye contact and body language better today. Had a settled weekend and no complaints/concerns offered by staff. Colin is starting to get back into the hall routine and get reintegrated back into normal prison life. Strongly denies any thoughts/plans of suicide at present. He now sees a future for himself whereas before he did not see any future. Appears to have learned from his mistake regarding his downgrade and he does not want to be put in this position again. Colin appeared happy to come off TTM today and it was agreed with case conference members to close TTM. Have also agreed to give Colin mirtazapine back in possession now that TTM has closed. Advised that the MHT will see Colin in a few days time for extra support and he will speak with staff if any issues arise. Recommendation- TTM paperwork completed today. Agreed to close TTM and MHT will see Colin in the next few days. Colin appeared happy with this. Ms Kirsty Byng

Colin Mckay **05/09/1979** **Male** **8500756095**

31/7/2019 Suicide risk assessment. Situation:- Case conference (3) held today in Arlin hall along with A.Mcnamee (RMN) S.Devlin (PLM), W.Sweeney (Unit Manager), P.Brierley (Manager) and J.Marsh (Officer). Background:- Placed on TTM on Friday after adverse RMT as Colin had a severe assault his uncle. Assessment:- Colin appeared low in mood today, poor eye contact at times and closed body language. Colin is aware that he is due to be downgraded and he is finding this hard to process due to his actions last week (bringing takeaway in from placement).When Colin spoke it was evident that he has lost hope and does not see a future for him. He states that he has [redacted] He does not see the point in living anymore. When we asked Colin about his thoughts of suicide/self harm he states that he wants to die as he does not see any other way out. He has lost motivation and drive in his life. Staff tried to speak about how he may only be downgraded for 12 weeks however he staunchly has a hit on his head and this is a big worry for him. Was not taking medication over the weekend however is taking these now. Colin due to be transferred to Shotts on Friday. When asked what we could do to support him - he reports that there is nothing we can do to make things better. Recommendation:- Agreed with staff to remain on high 15 minute observations in safe cell with safer clothing. No sharps/shoe laces to be in cell. Agreed to support Colin by giving him books and newspapers to distract him. Advised to speak to staff if anything changes. Mr Kirsty Byng

06/11/2019 Consultation: TTM Case conference.Reviewed colin at bells- appeared low mood, pale, lethargic, communicating well, states head was all over the place yesterday due to been told that he would be downgraded back to shotts prison. states does not know if he would have carried out with suicide if not intervened by officers. Is going overcome with safety and says has #0 is beauty on his head. States does not wish to further self harm or suicide. Plan- remain in safe cell, safety clothing. 1:1 mins obs. allowed books/newspapers to read, to review monday 11/11/19.

Mr David Moyse

Asked to review colin at arlin hall- found in cell by officer with shoe lace around neck. on review colin not wishing to commit suicide says no injuries, settled had another 5 mins to carry out suicide attempt. took reviewed, slight redness, plan- placed on TTM- 15 mins visual/verbal obs, safe cell, safe clothing, plan case conference tomorrow 9/11/19. Mr David Moyse

24/10/2019 Administration: Hospital appointment 23/11/2019, Neurology - West Glasgow ACH.

20/09/2019 Failed assessment. The client came up to the HC and opted out to see me. Please refer. Dr Zahid Shah

03/09/2019 Mental health assessment. WRITTEN IN RETRODISPLAY FROM 29/08/19 SITUATION:- Seen today in health centre following referral.BACKGROUND- History of anxiety and depression, worrying about current circumstance and effects on his parole.ASSESSMENT- Colin stated he has "an empty" and has "classic signs of depression". He states he is losing interest in things in general compared to what he used to be like. Colin states that he "has a couple of comments on him, 99 grand" due to his previous mental life and has been attacked on and off for the past 15 years while in prison as there is a prisoner who blames him for him being jailed. Discussed referral to psychology as previously discussed with mental health, however, Colin states that due to the time frame and him having previously seen them he does not wish to complete the referral at present. Advised to inform mental health if he changes his mind.Colin states that he is ok at night sleeping as he can lock his door and knows no-one can get in to him. He states he tries to get to the gym, exercise and socialising when he feels up to it. Encouraged to maintain a good routine and focus on the positives in his life at present. Colin states that he is unsure what can be done for him at present as it is situational and "no one can change what has and will happen". Encouraged him to speak to any staff if he feels threatened, however, he states that he will end up off worse for opening his mouth and it is not worth it. Colin strongly denies any current thoughts of suicide or self harm at present. He would like to focus on getting off methadone than gabapentin at present.RECOMMENDATION- Colin advised to inform mental health if he feels he needs any further input and if he feels he would like to engage with psychology which he stated he would do.K.Rodgers MH nurse. Mr Louise Moyse

19/08/2019 Consultation Discussed this morning at mental health allocations meeting. To be seen by mental health nurse to complete psychology referral and discuss with psychology colleagues at next weeks allocations meeting. Mrs Alison Black

12/08/2019 Consultation: S- patient attended nurse clinic for an injection.B patient has psychiatric anorexia A- following injection BP- 80/48, Exp 12/2019 in left deltoid. Colin asked how to be seen by mental health team.R- Mental health nurse Kirsty Byng spoke to Colin and advised him on the process of referring to mental health. Colin feels it short for case Hydroxycobalamin in 3/12 Miss Lorraine Kiernan

23/07/2019 Drug addiction therapy Situation- Approached myself this morning at medication round. Background- Currently on 8mls of methadone and on reduction plan. Assessment- Colin states that he would like to go back up to 20mls. When I asked him about this he states that he didn't think the time was right at the moment and he mentioned something about a "grant". He tells me he would feel more stable if he managed back to 20mls and then lower it at this dose for a while. Happy to increase back to 20mls however will have to do in 2 stages. Will increase to 18mls as of 24/7/19 and then to 20mls as of 29/7/19. Recommendation- To ask GP to amend Eanbra as of 25/7/19 and then review thereafter. Colin appeared happy with this.

Mr Kirsty Byng

02/07/2019 Drug addiction therapy Approached myself at medication round. Colin feeling ready to reduce again. Currently on 16mls. Would like to come down to 8mls reduction over week to start a plan is stay over week. Appears to be stable on this dose and happy to reduce further. Mr Kirsty Byng

01/05/2019 Consultation: asking to get his testosterone levels checked. says his libido was low many yrs ago but then on testosterone restored. on problems with erections until recently. was getting morning erections, masturbating ok but recently normal erections are not as good as they used to be in past. no urinary sx, no constipation, no drug/urgency, no set loss. will observe; on nortriptyline, gabapentin and methadone. Into on drugs all his life. likes to come out of methadone as want to be sober. I had a good look at his notes on doctorate and recently five very high, all our last levels of testosterone. he had low 013 in 2013/2014 but then got replacements and repeat levels in 2017/2018 normal. already on colchicine for low Vit D in past. plan: no specific reason for testosterone levels. ? drugs reported ? MH related. pt agreed, if this gets worse then will do other blends and testosterone both. agreed. WBG. Dr Imran Ilyas

26/04/2019 Administration: Administration. The Health Centre, PO Box 19605, PA15 9EZ Greenock Intl Referral Form Addictions Mr Tony Burns

30/04/2019 Consultation: Bell referral requesting bloods as chest investigations were much as steps were previously low. Unable to find only Alcohol results on Vision or GGC Clinical. Portal regarding this. Listed to see GP 10/5/19 to discuss further Mrs Anne Welborne

10/04/2019 Consultation: 20/m consultation/Wants to stop OBT. Has been on methadone for 17 years and fed up with side effects. Previously down at 10ml and struggled. Now at 15ml. Has previously been downgraded and addressed years in prison. Now back in Greenock and due to start SCL's. Fixed idea that wants to switch to Buprenorphine for no amount of time and states from that within the time limit - will sign a contract.We discussed my concerns that this approach is not evidence based at being more successful. also not prison policy. My concerns would be that stability in pregnancy if wanting to progress and this jeopardises this. Tried to talk about all aspects of recovery. States mental health good - on nortriptyline. Working in bike sheds and attending education - physics. Talked about his suggested approach simply delays struggle and will still get withdrawal symptoms. Evidence would be continue reduction in methadone. I am concerned that Colin does not have internal resources at present or mindset to stay away from illicit drugs if settling. Persistent requests was used for help when really struggling which seems to be methadone/drug focused. Dr Kathryn Clark

Colin Mckay 05/09/1979 Male 0509796095

11/11/2019 Suicide risk assessment. Situation- Case conference (1) held today in Allan hall along with A.Mclachlan (RMN) S.Davie (FLM), W.Sweeney (Unit Manager), P.Bradley (Manager) and J.Marsh (Officer). Background- Placed on TTM on Friday after advice RMT as Colin had a [illegible] around his neck. Assessment. Colin appeared low in mood today, poor eye contact at times and closed body language. Colin is aware that he is due to be downgraded and he is finding this hard to process due to his actions last week (bringing tobacco in from placement). When Colin spoke it was evident that he has lost hope and does not see a future for him. He states that he has [redacted] [illegible] [redacted] He does not see the point in living anymore. When we asked Colin about his thoughts of suicide/self harm he states that he wants to die as he does not see any other way out. He has lost motivation and drive in his life. Staff tried to speak about how he may only be downgraded for 12 months however he currently has a hit on his head and this is a big worry for him. Was not taking medication over the weekend however is taking these now. Colin due to be transferred to Shotts on Friday. When asked what we could do to support him - he reports that there is nothing we can do to make things better. Recommendations- Agreed with staff to remain on high 15 minute observations in safe cell with safer clothing. No shampoo/razor items to be in cell. Agreed to support Colin by giving him books and newspapers to distract him. Advised to speak to staff if anything changes. Ms Kirsty Byng

09/11/2019 Consultation: TTM Case conference. Reviewed colin at halls- appeared low mood, pale, lethargic. communicating well. states head was all over the place yesterday due to been told that he would be downgraded back to shotts prison. states does not know if he would have carried out with suicide if not intervened by officers. On going concerns with safety and says has 40 [illegible] on his head. States does not wish to further self harm or suicide. Plan- remain in safe cell, safety clothing, 15 mins obs. allowed books/newspapers to read, to review monday 11/11/19. Mr David Munro

08/11/2019 Consultation. Asked to review colin at allan hall- found in cell by officer with shoe lace around neck, no review colin not wishing to communicate- says no injuries, wished had another 5 mins to carry out suicide attempt. neck reviewed, slight redness. plan- placed on TTM- 15 mins visual/verbal obs, safe cell, safe clothing, plan case conference tomorrow 9/11/19. Mr David Munro

25/02/2019 Consultation Gabapentin changed to supervised and SD. Dr Kathryn Clark

23/02/2019 Administration Administration In-Possession Medication Check Mr Gillian Mccullloch

23/02/2019 Consultation Medication spot check. Short of 1x Gabapentin 300mg tab and 1x Mirtazapine 30mg tab. Claims to have taken the night doses early however no medication check was at approx 14.30 this was much earlier than it should have been and not in accordance with his prescription. Kaitlin left for GP to review 25/2/19 Ms Anne Wilkinson

23/02/2019 Drug addiction therapy Written in retrospect 16/05/2019. Situation: Saw in Colin Centre following addiction self referral. Background- Has been on methadone for approx 13 years and currently on 30mls of methadone. Would like to start reduction plan. Assessment-Colin states he has reduced methadone before however he has been downgraded before the MDMA and tablets. First time in HMP Greenock and settling in well. States he currently has no temptation to use but would like to be off methadone before moving on to the open estate. Colin states that he would like to reduce by 5ml a fortnight until he is at 10mls and then review again. He states he is happy for nurses to decide when day to carries down. Would like this plan to start next week. Recommendation- Will start reduction plan on Wednesday next week and review by Tech per fortnight. Colin happy with this plan of action he can phone at anytime. Mr Kirsty Bjorg

10/12/2018 Mental health review Colin was seen today. Felt that he had lost some volition due to being down grated and returned to Allenton 1. as a result of this he had lost all interest in work. Felt he could not be bothered and felt that the system was holding him back from progressing. Advised that protocols had to be followed and that things always seemed to go slowly over the remote period. Initially colin wanted some pill down over the 3 weeks, by the end of the discussion he decided that it would be better if he remained in work as this would make the time pass quicker and he would earn some money. Advised to speak to the mental health team again if he felt the need. Entered by elizabeth gault BSEN Mr David Wood

Colin Mckay 05/09/1979 Male 0509796095

04/10/2018 Consultation: asking me to do a full body check up for him, just want to make sure he is fine. thinks may be sometimes, tummy aches or "chest pain". denies sob/vomiting/fever/vomiting/salivary or bowel prob. also states he used to be on sertraline in the community but not getting any more here. was also want to check about his fertility and if his semen is all good. no no have kids and a fiancé, not due to be liberated for the next 16 months or so. on methadone, gabapentin, mirtazapine etc. w/o-looks well, bp-120/80mmHg, p-70bpm, chest--clear, cvs s1s2 normal, abdo--soft, nontender. plans: well nurse clinic review done. Bloods: fbc, ucc, lfts, b12/folate/ferritin, glucose, lipids, electrolytes. review if any abnormality. advise healthy life style in the mean time. will ask nurse to provide him leaflet about fertility. Dr Imran Ilyas

18/09/2018 Consultation: declined to attend meeting with addiction caseworker. will refer. Ms Joyce Ross

19/09/2018 Administration: Requesting GP app - same made for 4/10/18. Also asking for 3 nights cheques Dr Shah has refused this. Ms Ann O'Neil

10/08/2018 Follow up substance misuse assessment: Clinical review Colin now feels ready to start reducing his methadone dose. Plans to reduce by 2ml/a every 2 weeks, will continue to be supported during this time Ms Delinda Haddow

15/08/2018 Administration: NOS 3CM information sharing Ms David Wood

02/08/2018 Consultation: self ref re: requesting to laid bed down overnight. discussed with health centre manager. bed down cancelled. Mr Gurdeo Majhanovi

01/08/2018 Self-referral: complaining of upset stomach, no nurse visit requested, requesting time off work, bed down x3days granted as per protocol for infection control purposes. Ms Alison Tschorn

10/07/2018 C/O - insomnia: Not sleeping again, probably for good reason. First parole hearing due soon as only has 4/52 of life sentence remaining. Hoping for Top End too. Proud that there has been a contract arranged against him & he knows that he will be targeted/killed. Sent to Psychology, home to MHT re sleep hygiene supposedly. I will give him 1/52 x Zopiclone, but he is aware that this will be, at best, an occasional remedy. Dr Stephen Conroy

03/07/2018 Follow up substance misuse assessment: clinical review due to reduce his methadone to 20ml/a at clinic this week. Colin has decided to stop at 20ml/a for the present will be further reviewed before any further detox Ms Delinda Haddow

26/06/2018 Sent by triage nurse: received self referral requesting GP appointment regarding insomnia. Listed for GP 10/7/18, Wishaw by A O'Brien. Ms Ann O'Neil

13/06/2018 Consultation: attended review with addiction caseworker, recovery plans discussed - support ongoing Ms Joyce Ross

12/06/2018 Follow up substance misuse assessment: Clinical review has coped with his recent reduction and feels stable on present dose of methadone Ms Delinda Haddow

02/05/2018 Third party encounter: Mr McKay attended appointment with Dr Joy Ross, Clinical Psychologist on the 1st of May 2018. He participated well in the session where he described his mood being relatively good and a reduced sense of hopelessness since receiving his new category. He reported his need to keep this level of category for a period of three months following which paperwork can begin to start the RMT process. We explored historical factors within a CAT framework to better understand why feeling powerless is particularly difficult for him and his impact on his mental state. We agreed to draw discussions around same to a conclusion at the next session and consider discharge if his mental state remains settled, with the plan of a review session at a later date. I also explored his referral to the mental health team. He stated this was specifically in relation to obtaining medication to aid sleep, which he said he had since received from the GP and was therefore no longer needing liaison with psychiatry. Next session:18.05.18. Dr Joy Ross

30/04/2018 Administration: Dr Coates has prescribed Colin another 3 days diazepam. Dosette dispensed. Ms Ann O'Neil

24/04/2018 Consultation: Continues to work with psychology. Anxious - ongoing ruminations over contract that has been placed on him - related to retaliation at conviction who received a 20 year sentence. Anxiolic heightening cyclically - poor sleep. 4 day course zolpidem unhelpful previously. For short course zopiclone - advised again in context of issues unlikely to help but I am only prepared to issue a short course. advised benzodiazepines would not be used in this context.Variable upt - ont fluids blood - sputum for C&S in first instance. Dr Michael Coates

20/04/2018 Consultation: attended review with addiction caseworker, recovery plans discussed - support ongoing Ms Joyce Ross

20/04/2018 Third party encounter: Mr McKay attended appointment with Dr Joy Ross, Clinical Psychologist on the 17/04/18. He participated well in the session. He reported to be feeling more settled and was demonstrating how he is now able to focus on short term rather than long term goals, in order to provide him with a greater sense of control of his life. He was keen to continue exploring formulation within a CAT framework. It was agreed he would be offered a further 2-3 sessions and then I would review with him what stage he is at in terms of whether he could be discharged., or passed to another member of the team for specific low intensity intervention to manage any remaining anxiety. I discussed his DNA on the 05/04/18. He said this was due to an argument he had had with a member of staff and did not refuse not wanting to engage. He was reminded that he could cancel and rearrange sessions if he was not feeling able to attend, however, further DNA's could lead to disharge from the service. Next session 01/05/18. Dr Joy Ross

20/04/2018 Mental health review: Shared information for 3CM report. Last MHT review 9/02/18, with main problem relating to downgrading/progression issues.Referred to Clinical Psychology and has been engaging with this service since 27/02/18. Ms John Grant

09/04/2018 Self-referral: self referred today asking for MO appt who changed from 23/4 to around 24/4. MO appt made for 24/4/18 - Letter sent back to advise of same Ms Rebecca Dyet

06/04/2018 Third party encounter: Mr McKay failed to attend his appointment with Dr Joy Ross, Clinical Psychologist on the 03/04/18. He did not provide a reason for same. I will attempt to see him again on 17/04/18. I plan to discuss DNA policy with him at this and appointment. Dr Joy Ross

05/04/2018 Administration: Self referral requesting a GP appointment to discuss mental health issues. Appointment on 23/04/2018. This was done on instruction of nurse practitioner Lisa Wallace. Ms Fiona Turvit

21/03/2018 Consultation: attended 1-1 review with addiction caseworker: Colin advises that he continues to cope well and self manage his recovery plans. Ms Joyce Ross

09/03/2018 Third party encounter: Mr McKay attended appointment with Dr Joy Ross, Clinical Psychologist. He continues to be engaged in assessment and formulation work. Using CBT framework to formulate case collaboratively with Mr McKay. Next appointment 20.03.18. Dr Joy Ross

23/02/2018 Third party encounter: Mr McKay attended for appointment with Dr Joy Ross, clinical psychologist. He engaged well in first appointment, plan to meet for a further six sessions to support management of mood. assessment report available upon request. Next session 06.03.18. Dr Joy Ross

09/02/2018 Mental health review: Seen on request, ongoing frustration and impact on general mood over his progression.We discussed practical solutions, he is working on these, also on personal stress management.I will discuss with CP services next week, Colin happy with his outcome. Mr David Wood

The Health Centre, P.O. Box 13605, Greenock, PA15 9ET

Colin Mckay 05/09/1979 Male 0509794095

30/01/2018 Mental health review. Seen on request whilst in the hall, speaking openly about his frustration with progression [illegible] future. Clearly [illegible] about his circumstances, he spoke about his emotions and the conflicts in his thinking. For further discussion within MHT and with SPS colleagues. Mr David Wood
22/01/2018 Administration NOS TTM case conference [illegible] no apparent risk. Mr David Wood
16/01/2018 Consultation. Severe pain ongoing, no benefit from duloxetine or carbamazepine. Previous [illegible] fracture. Has exhausted all other meds inc amitriptyline. Gabapentin 300mg tid max. Dr Michael Coates
10/01/2018 Follow up substance misuse assessment. Clinical review requested to discuss reduction plan, wishes to reduce by 5mls every 2 weeks stopping at [illegible]. Discussed the advantages of staying on a prescription, will continue to review. Ms [illegible]
04/01/2018 Administration. Self referral requesting Dr Coates to discuss seizures and meds. Appointment on 18/01/2018. This was done on instruction of nurse practitioner A Trotheras. Ms Fiona Trevit
28/12/2017 Administration. Triage: My mental health is very poor waiting on seeing a appointment to see phsycologist. Nurse mmed requests [illegible] Ms Margo Meyer
05/12/2017 Consultation. attended 1-1 meeting with addiction caseworker; drug awareness relapse prevention and recovery planning support ongoing [illegible]. Colin asked to speak to MH, passed on request to MH team as agreed. Support ongoing. Ms Jayne Bone
05/12/2017 Consultation. As previous - looking to restart gabapentin; recounts stabbing & shooting, also reporting previous epileptiform activity. Justifying reason for over use - was in pain due to facial injury. As previous - gabapentin not restarted - advised Carbamazepine has indications re pain and also ? epileptiform activity - states on this previously with ill effects - advised this is all I would initiate today. Dr Michael Coates
30/11/2017 Mental health review. Shared information for ICM report. Last contact with MHT, 6/11/17. Subsequent to this he was referred to Clinical Psychology and is awaiting an assessment. Mr John Grant
17/11/2017 Administration. Triage slip received today - states needs to see DR COATES - about pain in legs and severity of the pain. - [illegible] request for GP app to be booked - app [illegible] with DR COATES - patient informed. Ms [illegible]
10/11/2017 Self-referral. C/o leg pain. Cd/c] granted for today. Ms Lisa McMillan
06/11/2017 Mental health review. Seen in the hall following self referral to MHT. Remains very angry about the way he was treated at top end as there is a contract on his head. Feels he was unfairly treated there and this resulted in him taking illicit drugs. Kept asking what was the point in living as he could see no positives for the future. [illegible] he would commit suicide due to his protective factors namely his family. Stated that he was waiting to see a psychologist in [illegible] prior to his downgrading for a positive drugs test. Refer to Clinical Psychologist. Mr John Grant
01/11/2017 Consultation: [illegible] of the reason for appointment/Gabapentin issues. Further to the entry on 27/9/17, asking if gabapentin could be re-instated. Failed spot check and gaba stopped, States that he had been on gabapentin for 7 years for old stabbing wound with [illegible]. Was given various other neuropathic pain killers but states that these were not effective. Pt. I explained the failed spot check and signed [illegible] for spot check failure. I also offer amitriptyline or Lyrica but the client refused and left the room. - disputed outcome. - Dr Zahid Shah
23/10/2017 Administration. Self referral following health care that he had a seizure the other night and woke up on the floor causing him to have a lump to his face. He didn't report this at the time as he did not see the point. GP appointment on 01/11/2017 to discuss. This was done on instruction of charge nurse Elizabeth Holmes. Ms Fiona Trevit
16/10/2017 Consultation. attended 1-1 meeting with addiction caseworker: relapse prevention and recovery planning support ongoing. Ms Jayne Bone
16/10/2017 Consultation. Sr received requesting to see the GP to speak about stab wounds to legs. Will list for GP. Ms Ann O'Neil
12/10/2017 Consultation. [illegible] on MORS. [illegible] that he says it must make him "[illegible]" at night. He takes it last thing. On the night in question he says he took it earlier, hence the reaction. Was talking about getting gabapentin [illegible] for disciplinary reasons. Dr Stephen Conroy
12/10/2017 Consultation. Looking to restart gabapentin. Noted shortfall previously. States bullet injury and stabbings to leg - states severe division of nerve and was advised that Dr's previously were going to re-instate supervised. On examination old scarring apparent Lateral L thigh, slight [illegible] in anterior/posterior region, no muscle atrophy, no hair loss - granted there may be some disturbance of superficial cutaneous nerves. States was also prescribed gabapentin for [illegible] ? seizures. Again I can see no justification for this. States has [illegible] with [illegible] - [illegible] in keeping with illicit drug use - no change to meds made to the aggressive[illegible] of patient who left consulting room abruptly. Dr Michael Coates
07/10/2017 Consultation. Removed from MORS, no evidence of drug use. Fully orientated, will discuss effect of prescribed medication with MO at his next appointment. Methadone has been withheld today. Ms Elizabeth Holmes
06/10/2017 Consultation. Asked to attend A1 as hall staff felt Colin was under the influence of illicit substance. Colin states he was sleeping when we arrived at his cell. Temp checked 35.8 BP [illegible], pulse [illegible], sat 97%. Settled after 5 minutes became very verbal stating that he takes the drugs that we provide him with and this is why he is in the state he is in. Placed onto MORS and located in a empty cell as no obs cell available ([illegible]) [illegible] CC tomorrow. Walking talking standing arguing with staff, calmed down and accepted he was going to this cell. Ms Ann O'Neil
18/09/2017 Mental health review. Seen on request Known from previous history whilst at Shotts. For discussion with team and referral GP service. Mr David Wood
14/09/2017 Consultation. Medication now unsupervised - discussed with MoN DT. Appointment can be cancelled for [illegible] Ms Ann O'Neil
05/09/2017 Self-referral. Asking for MO appt regarding medication. Appt made for 21/9. [illegible] to advise patient on this. Ms Rebecca Dyer
28/08/2017 Medication requested was found short by 13 [illegible] which 7 was open capsule [illegible] [illegible] in [illegible] he suffered [illegible] injury to face & teeth [illegible] additional [illegible] bullet to right lower limb 6 years again [illegible] 22 years [illegible] [illegible] stopping amitriptyline [illegible] high risk of diversion cannot justify reinstating gabapentin [illegible] was allegedly on 300 [illegible] [illegible] aware that any difficulty with [illegible] he was short [illegible] had opened empty capsules [illegible] Dr [illegible]
21/08/2017 Mental health review. Seen in hall following submission of triage slip indicating his difficulty in dealing with [redacted]

The Health Centre, P.O. Box 19605, Greenock, PA15 9ET

Colin Mckay 05/09/1979 Male 0509796095

11/08/2017 Consultation: attended 1-1 meeting with addiction caseworker: relapse prevention and recovery planning support ongoing. Ms Joyce Boon
02/08/2017 Consultation: In for review after downgrade from Top End. He denies any illicit use & denies any wrong doing while in Redlands. Not keen to go back down the road of illicit use, so decided to increase his MTD to 20, in return to a dose that keeps him well. Advised, however, not to reduce dose to as low as 10 next time he has a chance to progress. Dr Stephen Conroy
01/08/2017 Administration: prescribed mirtazapine on kardex - note on kardex from top end - dulsextine and mirtazapine - nortriptyline stopped - kardex amended to nortriptyline and mirtazapine. Dr Michael Conan
31/07/2017 Follow up substance misuse assessment: Clinical review feels he would benefit from further increase in his methadone Colin is aware he has an appointment this week for addiction clinic and he can discuss any issues there — Ms Dolinda Haddow
26/07/2017 Follow up substance misuse assessment: Transfer back into Shotts downgrade from top end. At present on 20mls of methadone states he is struggling with this amount discussed further increase with GP methadone 20mls from tomorrow. Listed for next addiction clinic for review. Ms Dolinda Haddow
27/07/2017 Admission profile form completed — Mr David Douglas
27/07/2017 Admission profile form completed. Previous history of being prescribed Gabapentin but this discontinued following spot check. Mr David Douglas
27/07/2017 Prescription by GP: Methadone 10mls/Duloxetine 30mg (EP)/Mirtazapine 30mg(S) — Mr David Douglas
27/07/2017 No apparent risk of suicide — Mr David Douglas
27/07/2017 No thoughts of deliberate self harm. No history of self harm not happy with downgrade — Mr David Douglas
27/07/2017 Never injecting drug user. Took most illicit drugs but never injected — Mr David Douglas
27/07/2017 Suspected epilepsy. Taking diazepam in 2012 then partial seizures — Mr David Douglas
26/07/2017 Administration: Psychology referral completed and handed in to the MHT today. — Ms Yvonne Dunbar
26/07/2017 Mental health assessment: MHSAT/T: informed consent, explained, agreed and signed by Colin. Offence History: Reports a varied history of criminal offences such as car theft, assault, murder and gun crime. Currently sentenced to 14 years for murder. States that his tariff is up next year but he has no Life date and expects to receive another 5 years for drug offences whilst in prison. Presenting Complaint: States 'my head is bursting' due to be downgraded from Leftom hall to D hall, due to a failed drug test. Requesting methadone increase to reduce the risk of using in the hall. Low mood due to incarceration and states that he requested a referral to the psychologist around 7 months ago to discuss childhood issues but has not yet heard from them and would like me to chase this up for him. Mental Health History: Reports no formal diagnosis but believes that due to childhood trauma and being in prison for such a long time his mood is low. Family History of Mental Illness: None reported. Social History: Single with no children. Left school around the age of 12yrs old and moved from children's homes through to secure units and then into the prison system. Minimal alcohol use throughout history. Started smoking cannabis around the age of 12-13 and then went on to try 'every drug under the sun'. Never injected any substance. Previously on 90mls of methadone which has been reduced over the years to current level of 20mls. Current Medication: 10mls methadone, 30mg mirtazapine and 30mg duloxetine. Current Medical Condition? Ongoing Investigations: No current medical condition although reports a history of taking fits. However, No fits reported in the last few years. Mental State Examination: Presented well kempt, conversed appropriately, mood appeared on a good level. Good concentration and appeared to have good insight into why his mood is low. Highlights that his sleep pattern is poor and he has a cycle of broken sleep most nights. Also stressed that his appetite is not very good. Risk Assessment: Reports no history of self harm or suicide attempts. No current thoughts, plan or intent of self harm or suicide. States that he is currently not a risk to others and gets on well with peers. Provisional Diagnosis/ Current Problems: Low mood. Support in the Community: No prison visits received from family over the past year at own request. However, he does highlight that [redacted] on the phone. Summary: I will discuss an increase in medication with the Dr and follow up the psychology referral. Colin was happy with this outcome. Ms Yvonne Dunbar
18/07/2017 Dental care: Excod 8-. — Mr Mark Gallagher
18/07/2017 Consultation: Self referral requesting appointment with Dr Mcconnell, return and advising Dr is on holiday till 01/08/2017. Mr E Dennis
17/07/2017 Administration: Referral letter received and forwarded on to dentist. — Ms Holly Hobby
14/07/2017 Consultation: Dental referral received. — Mr E Dennis
13/07/2017 Complaints about care: Written in retrospect from 11.07.17 Interviewed in relation to a complaint Colin unhappy as he states the nurses are not always giving him his prescribed supervised medications as they can't find them in the medicine trolley. Colin states he has submitted several MHT forms and has not been seen. Colin advised he has been seen by addiction MHT previously and his recent referral has been discussed at the mental health allocation meeting. Colin advised he will be seen in due course. Colin happy with response, complaint signed off, form received. Mrs Kelly Robb
12/07/2017 Consultation: Seen at triage today following self referral. Patient looking for an update on previous appointment with GP on 27/6/17. States he was told GP would check back previous notes and get back to him with decision for medication. Advised I would pass this on to MO. Dr Joe Daly
11/07/2017 Dental care: Scheduled for dentist but patient not seen as a "mass prisoner movements" in place and patient could not be escorted in time before session ended. Rebooked. Mr Mark Gallagher
10/07/2017 Administration: Discussed at allocation meeting. Awaiting addictions/ssb assessment. — Mr D Graham
06/07/2017 Administration: Mental health referral received and added to database. — Mrs Margaret Millar

09/05/2017 Complaints about care. Pt interviewed following submission of complaint form. Unhappy with in possession medications states he is missing medication. No evidence to suggest pt is missing medications. Advised that I can arrange for medications to be dispensed supervised but pt declined. Pt appears angry but think this is due to being downgraded by [illegible]. Pt advised that I have arranged for medications to be synchronised- given a two day supply of Mirtazapine today as per prescription. Due all weekly medications on Wednesday hall nurse to order. No further issues. Ms Jacqueline Corrigan

20/05/2017 Mental health assessment. Written in retrospect/Seen during addictions clinic - 25/4/17. Colin stated he "doesn't know whats happening" in relation to his "downgrade" in clients. He reports he will consequently have another 8 years on to his sentence. Colin then reported he feels very guilty for what he had done, however didnt explain what he had done. Colin then reported he is feeling scared as "there is a bounty on my head". Colin stated he is due to see a psychologist and was put on the list by nurse G. Docherty, however he has not heard anything back yet. Requested writer to check. Will check his appointment. No other issues or concerns voiced during meeting. Explained if Colin required any extra support to complete a self referral form and a member of the nursing team will visit. Agreed with same. Ms Stephanie Hutchison

20/04/2017 Drug addiction therapy. Seen today during addictions' mental health clinic. Notes to follow. Ms Stephanie Hutchison

20/04/2017 Administration. Discussed at MDMHT meeting 13/4/2017. Discharged from addictions/mh caseload. Hall staff report anti-social/abusive and disruptive Mr V Purdie

13/04/2017 Administration. Discussed at allocation meeting. Ongoing support from addictions mht. Mr D Graham

13/04/2017 Consultation. He is serving life sentence, he is on Mirtazapine 15mg asking to increase as it is not helping him agreed Mirtazapine 30mg [illegible] Dr Khoda Bakah

12/04/2017 Administration. Op has been made for him to discuss possible increase in AD.. Referral has been placed for Life link to help with his bereavement issues. Colin has now been taken off current caseload and transfer of care to Hall nurse SH. Ms Geraldine Doherty

12/04/2017 [illegible] MENTAL HEALTH ASSESSMENT [illegible] consent to being assessed at MHRTM by given written confirmation to same.OFFENCE HISTORY -Colin has been in and out of custody since an earlier age for car theft followed by Raids for money to help fund his illicit drug use. He then progressed into selling drugs which further led to him committing murder which is his current sentence. He is due to appear to the Parole Board.DESCRIPTION OF PRESENTING COMPLAINT/PROBLEM:Colin reports to be at [redacted] and he can over think problems whereby he will pre-determine the outcome. He also struggles with bereavement mainly in relation to [redacted] MENTAL HEALTH HISTORY-Denies any previous history.FAMILY HISTORY OF MENTAL HEALTH [redacted] not unable to take unto bereavement he had [redacted] SOCIAL HISTORY [redacted] Colin became a drug dealer as [illegible] being [illegible] from his home and eventually he would dabble in illicit drug use. He was [redacted] and he did not complete his education. He has never had a job. [redacted] yet to deal with the bereavement and at times he will try to block it out by using illicit drugs.CURRENT MEDICATION - Methadone [illegible], Mirtazapine 15mg and Gabapentin 300mg CURRENT MEDICAL CONDITIONS/ ONGOING INVESTIGATIONS-Vitamin B12 [illegible]MENTAL HEALTH EXAMINATION:Colin can at times appear to be a clean and well kempt man and he can present as being distracted at times as he was been asked questions for the assessment. Throughout the assessment he appeared to be jovially at times. He has very good insight of problems and can manage them most of the time. His mood can fluctuate at times whereby he rated it as 6, but he is aware that this is due to his lifestyle and he is not overly concerned about it. He reports having poor appetite and sleep. No issues with his anatomy as he is able to state day, date and place. No evidence of distraction by hallucinations at this time. RISK ASSESSMENT:Denies any thoughts of DSH or suicide at this time and he has previous history in 2005 whereby he put a [illegible] and no history of DSH. Denies any risk to others.SUPPORT IN THE COMMUNITY [redacted] MENTAL HEALTH CARE PLAN PROBLEM- Bereavement and Risky Behaviour 1.Referral to Lifelink to address bereavement issues.2.Addictions/Mental Health to continue to monitor once [illegible] weekly.3.Review medication with the view of getting an increase on his AD4.Transfer of care to Hall nurse if Colin requires further support for same. Discussed upper immediate full denture with pt. Treatment plan: review palate, provide F/- immediate, extractions, BPE and sp, restorations. NV review palate only, pt advised. Miss Evelyn Inglis
12/02/2017 Consultation. Spot checked medication in hall. Passed spot check no discrepancy in mirtazapine or Gabapentin. Miss Claire Hill
09/02/2017 Substance misuse assessment. : met with client following self referral, life prisoner who has served thirteen years to date, back in closed conditions after providing positive drug test. Currently on subutex script (methadone) low dose and indicated that he will come off it soon, given what has just happened challenged client on this. States that he was not positive for opiates and is adamant that he does not have a drug habit and what happened was a one off bad decision on his part. Stated that when he was first downgraded he felt as if he was in a very dark place and was very disappointed with himself, now that he has had his adverse he feels more upbeat and is focusing on sentence progression. Displayed motivation to focus on behaviour change and sentence progression. Continue support. Mr Robert Watson
08/02/2017 Mental health assessment. Briefly seen Colin as per previous entry. He was advised by nursing staff GD that he is already on caseload and there is no need for more referrals as we had previously discussed 3/2/17. He informed staff that is anxious about his downgrade and keen to have the required assessments completed nursing staff empathised with him and he now has Hope. He engaged well with good eye contact, denies any thoughts of DSH or suicide at this time. In agreement with him he will be listed for clinic to complete MH and also he has been referred to CC for addictions. Mr Geraldine Doherty
07/02/2017 Consultation. Consultation - Colin requested to see author following [illegible] within the hall this duty. Colin reported to be feeling low in mood following confirmation of downgrade from Leithen hall to B hall. Initially appeared subdued with poor eye contact maintained during commencement of engagement, however became relaxed in manner as time progressed, and appropriate eye contact observed. Denied any thoughts or intent of self harm or suicide stating 'I couldn't do that now'. Colin reports that he is keen to engage with Nurse Doherty to discuss current issues. Advised that would make Nurse Doherty aware. Colin also keen to engage with Mental Health services - psychology and Lifelink. Advised that in first instance Colin must generate a referral in order to discuss with Nurse Doherty and if appropriate back referrals can be generated. Colin appeared accepting of same. Mr Allan Paul

NHS Confidential: Personal data about a patient

Colin Mckay 05/09/1979 Male 0509796095

07/02/2017 Consultation letter sent to Officer Gilmour Please could you provide qualifications: Jacek Ozdowski, General Practitioner/GMC 61398655 am a general practitioner with the above qualifications. As part of my role I carry out a medical practice within the West of Scotland prison establishments On 21 December 2016 I examined a patient PIN 17340 who attended at the NHS within Barlinnie Prison. I was advised by the patient that he had been kicked on the face by another prisoner. I examined the patient and found that the patient had facial pain to the right side of his face and jaw and I referred the patient to the Accident and Emergency Department who then referred the patient onto the Queen Elizabeth University Hospital I can confirm from the hospital notes that the patient was examined at the Maxillary department of the Queen Elizabeth University Hospital and found to have right sided peri orbital ecchymosis. No facial asymmetry is noted and a right sided anterior maxillary fracture has been recorded . There are no significant or cosmetic defects I can confirm that these notes are held on the patients record . The above is with reference to patient we discussed over the phonefrom Regards Jacek Ozdowski - Dr Jacek Ozdowski

06/02/2017 Administration Discussed at allocation meeting. Number first referral. Addictions MHT assessment. Mr D Graham

06/02/2017 Administration NOS. MHT Referral received by admin from MHT nurse. Patient added to waiting list and referral returned to MHT nurse. Ms Marion Graham

02/02/2017 Administration Seen Colin about his recent referrals and he informed nursing staff that he was asked due to his recent downgrade. He was further informed that he can transfer care to addiction hall nurse but declined as he was advised he will be refused for next available clinic in which he accepted. He was also requesting his CIP and he was told that this may come to him today and he was accepting of same . No further management issues at this time. Mr Geraldine Doherty

02/02/2017 Administration referral forwarded to mental health team and addictions as requested Ms L Boardman

01/02/2017 Mental health assessment telephone call from Hall staff requesting that nursing staff see Colin. Colin reports that he should be at his meeting tomorrow and he wanted to speak to nursing staff for support. He conversed well with good eye contact but at times appeared to be flat and on occasions he was jovial on discussing his mood he states that due to the possibility of a "downgrade back into the main hall" this was the main factor in his change of mood. He denied any thoughts of DSH or suicide at this time. He is currently on 30mg Mirtazapine for low mood in agreement with colin will discuss a possible change of medication and complete a MH assessment update. Mr Geraldine Doherty

27/01/2017 Mental health review Briefly seen Colin to discuss his outcome for apparently taking illicit drugs in Letham Hall. He reports that the meeting did not take place and may be next week. He appears to be bright presentation and conversed well . He denies any thoughts of DSH or suicide at this time. No further management issues noted at this time. Plan - Continue with 1/1 support and review in due course. Mr Geraldine Doherty

24/01/2017 Mental health review Written in retrospect. Briefly seen Colin in Hall as it appears that he has been transferred to another Hall due to possibly being at risk see previous entry. Colin appeared to be unhappy with the move and he feels that he should not have to be downgraded due to his behaviour as he felt he was at a turning point in his life. He however reports that he is more than happy to see what the outcome will be on Thursday for same. He engaged well throughout the meeting and had good eye contact . No management issues at this time. Plan - to review after Thursday at next available clinic. Mr Geraldine Doherty

24/01/2017 Administration Dental referral received passed to dental nurse for triage and appointment Mr Stacy Quail

19/01/2017 Consultation Sig ROutd patient states has no issues. Dr Dominique Van Den Meerssche

19/01/2017 Consultation Case conference, denies any thoughts or intentions of suicide or self harm at this time. Mood low due to present situation, concerned that he may be down graded. Alert and orientated and no signs of been under the influence of illicit substance. Remain on hourly observations and next case conference arranged for 23/01/2017. Mr J Morrison

18/01/2017 Drug addiction therapy Telephone call to SRU manager Brian McCluskey. Colin has been placed at risk and on 'talk to me'. Advised by SRU manager that he was placed at risk by Tony Brown, Moira Munro and Iain McKenzie. Advised that Colin had been found to have other sample secreted on his body. Unsure at this time if Colin requires to be placed on a management plan. Informed Kelly Robb of same and informed that hall nurse will complete care conference this morning and assess if Colin needs to be placed on management plan. PL/Methadone will be with held at this time until assessment has been completed and case conference held by hall nurse. Miss Gemma Scott

10/01/2017 Administration Dental referral received by admin Mrs Anne Marie Muir Muir

09/01/2017 Administration dental referral received, sent passed to dental services. Ms Mary Mitchell

06/01/2017 Consultation With reference to Police request and patient disclosure I contacted Police on 04/01/2017 and provided information as to 09/01/2017 and 21/12/2016 Dr Jacek Ozdowski

04/01/2017 Consultation received a request to call Officer Amanda Gilmour with reference to authorisation for disclosure of medical records of the patient with reference to his assault in [illegible] on Maxillofacial letter On examination there was obvious resolving right sided peri orbital ecchymosis but apart from this no facial asymmetry right sided anterior maxillary fracture. There was no significant displacement or cosmetic defect obvious facial asymmetry tel 0141 532 4656 Officer not present Dr Jacek Ozdowski

22/12/2016 Consultation Phone call from police spotland for disclosure of medical details regarding recent injury Mandate with consent signed by patient.I advised them that pt was transferred to AE due to pain over jaw and swelling on 21/12/16. From portal - was sent to QEUH Max fax for review. No letter of discharge on portal so unable to inform them of official outcome at present. I advised they can phone another occasion to ask for the letter to be typed. - Dr Katie Aird

21/12/2016 Consultation Seen on return from hospital was sent out to GRI then transferred to the QEUH who he said stated his cheek bone was fractured but there was no further treatment anticipated as the bone had not moved. States at this time he has no thoughts of suicide or self harm. Ms Marion Orr

21/12/2016 Consultation Kicked to face in the evening 2 days ago No loss of consciousness,no nasal bleeding,pain and swelling in the area of zygomaticus - palpable as open mouth and move lower jaw [illegible] side of lower lip - 2 [illegible] NADno medication 10 mirtazapine 100 mg OD[illegible] 30 mg [illegible] AE referral Dr Jacek Ozdowski

20/12/2016 Consultation Reviewed Mr McKay this evening following complaints of headache observations stable BP 108/58 Pulse 68 Pupils reacting size 3. Has now taken paracetamol for headache. Advised to continue drinking fluids. Is in the doctors diary to be seen tomorrow. Mrs Angela Scott

20/12/2016 Consultation Was asked to review Mr McKay this afternoon following complaints of facial pain following assault last night. Right side of face appears very swollen having difficulty opening and closing mouth. ? fracture to mandible/cheek. Will ask doctor to review. Mrs Angela Scott

19/12/2016 Consultation Involved in an altercation with another prisoner. Small cut to bottom left corner of lip. No other injuries evident. No injuries reported. Mrs Angela Scott

18/09/2013 Consultation: Seen at triage, wanting time off work due to mental health problems. Spoke to [illegible] who advised me to tell him to continue going to work and time off was not the answer. Colin not happy about this & states that he feels like when at work he could be [illegible] as he is not in the right frame of mind just now to be there. Advised will speak to him again. No further issues. Ms Nicola Morton
06/09/2013 Third party encounter: Referred by MHT - persistent low mood, [illegible] bothered by things he has done, lots of enemies and does not see the future being any different when he gets out. Currently reducing his methadone and hoping to be off by Christmas. Very flat but also very [illegible] (also on gabapentin), [illegible] rather than tearful, not evidence of thought disorder though he is being tormented by nightmares and flashbacks of things he has done. Will be moving towards pre-release soon so changes are coming. Medication options discussed - not hugely keen on antidepressants etc and I agree in view of fact that he has h/o epilepsy and is already on meds. Encouraged to work with MHT to work through issues and can ask to be seen again if he wishes. CH Ms Nicola Morton
04/09/2013 Consultation: Bloods taken as requested Ms Elaine Rogerson
02/09/2013 Result: Results University Hospital Crosshouse Biochemistry Ms Elaine Ward

Dear Doctor

RE: COLIN McKAY - CHI 0509796895 - PRISON NUMBER 17345

I would appreciate your review of this 29 year old who has been noticed to have a low TSH with apparently normal T4, T4 and thyroid antibodies while being investigated for dermatitis with an extremely dry skin, pallor and previous microcytic anaemia.

Mr Mckay's medical history includes extensive reviews under psychiatry for possible paranoid symptoms (for which he was started on Olanzapine but the posterior reviews indicated that he does not have clear evidence of psychosis). He has a history of very aggressive behaviour and was also diagnosed with epilepsy in 1995, for which he was on medication for about 1 year and then decided to stop it; he had a normal EEG in 2008. He was also noticed to be Hepatitis C antibody positive in 2005 but his PCR was negative at the time, he also has a history of opiate dependence.

On examination he is pale and has maybe a minimal exophthalmos as well as the aforementioned dermatitis, otherwise examination is unremarkable.

I thank you in advance for your input in this case.

Please send any appointments to the Health Centre, HMP Perth, 3 Edinburgh Road, Perth, PH2 8AT.

Yours sincerely

Dr C Parth
Medical Officer

Dear Sirs

17345 COLIN McKAY (05/05/1979)

I would be grateful if you could kindly arrange to see Mr McKay who in 1995 was diagnosed with epilepsy. He started on Tegretol then changed to Epillin 300 twice daily. He stopped taking the medication about 10 months ago and continuously has not been taking anticonvulsants since. He now suffers from increasing jerking movements and becomes startled.

Recently (5th November 2007) after a psychiatric consultation Mr McKay started with Olanzapine 10mg nocte (provisional diagnosis given – becoming psychotic). In view of this development, I would appreciate it if you could see him to assess whether he requires any additional investigation (EEG, NMR?) and treatment.

He is otherwise generally fit and well, but has a history of heroin abuse and is currently on Methadone 90ml daily.

Thank you very much for your assistance.

Yours faithfully

Dr Maciej Golanek
Medical Officer

I reviewed Mr McKay at HMP Perth today along with one of the mental health nurses. He has been seen previously by my colleagues, Dr Tuddenham, Dr Thomas and by Dr Hilda Ho. There have been some concerns raised that he may have developed a paranoid psychosis 7in the background of drug abuse. He had had worries at that time that people were out to kill him. Subsequently, from information retrieved from the prison authorities, most of these beliefs appear to be based in reality and he is currently on paranoidal because of ongoing threats against his life. When he was first assessed there was no evidence of any other psychotic symptoms. He also complains of chronic problems with his sleep and poor concentration.

At interview today he was initially relaxed and spontaneous but he became irritable and walked out of the interview when I told him my plan to reduce his medication. Eye contact was reasonable. His speech was normal in rate, form and content with no evidence of any formal thought disorder. His mood was subjectively paranoid, objectively euthymic. Affect was reactive. His appetite was normal, his sleep pattern is chronically poor, there were no thoughts of life not worth living or suicide ideation. He continued to express concerns that other people are out to harm him. He told me that he realises this could happen and is based in reality. I could find no evidence of other delusional beliefs and was not convinced that his current worries were held to delusional extent. He also complained of some anxiety particularly in crowds, which again is reasonable given the threats on his life. There was no evidence, however, of any panic attacks. I was unable to elicit any other psychotic phenomena. There were no perceptual abnormalities, no evidence of any thought insertion, thought withdrawal, thought broadcasting, no passivity phenomena.

Impression
My impression was of a 28 year-old gentleman ~~with a history of paranoid episode~~, which has now been stable for the past six months, with no clear evidence of psychosis.

Plan
1. My plan would be to gradually reduce his Olanzapine whilst continuing to monitor his mental state and I have reduced it by 5mgs today.
2. I have asked the mental health nurses to continue to monitor his mental state closely and arrange assessment should his mental state deteriorate.
3. I will advise psychiatric review in two to four weeks' time.
4. I will continue to keep him under review and am reassured that his mental state has remained stable.

Dr Andrea Frist

Dr Hilda Ho

Colin McKay d.o.b. 05.09.79
Spin No. 172 68

Mr McKay has previously been seen by Dr Tuddenham and Dr Thomas. He is prescribed Olanzapine 20mgs per day for symptoms of paranoia.

On review today he reported that his sleep had improved although he complained of some early morning wakening. He had a good appetite. He was still refusing to go on to work placements because he was worried that someone would stab him. He told me that he had lots of enemies as he had done all sorts of things including assaults, shooting people, and being involved in this murder for which he is serving a life sentence. He denied any suicidal thoughts. He reported staying in his cell for most of the day to avoid being harmed and to prevent himself from lashing out at others because of his paranoia. He had no such worries about the hall staff. He was worried about there being a price on his head and is currently on protection. He certainly gets on well with his other cell-mate.

At interview he appeared at ease, his mood appeared normal. There is no evidence of formal thought disorder or hallucinations. His worries did not appear excessive considering his current situation. There was no clear evidence of overtly paranoid delusional thoughts. There was no suggestion of cognitive deficits.

Plan
I will review him monthly. I have asked Nigel to check his fasting glucose, fasting cholesterol and routine bloods, due to his being on the highest dose of Olanzapine at 20mgs per day. I have also asked for his weight to be checked monthly.

Dr Hilda Ho
Locum Consultant Forensic Psychiatrist

hence he may be genetically predisposed. His premorbid personality indicated borderline traits. His occupation in dealing in illicit substances, stolen cars, guns and fallout with the co accused are additional perpetuating factors.

Plan:

He has agreed to a trial of Olanzapine and has been started on 10mg nocte.
Details of his history of epilepsy needs to be obtained and a decision needs to be taken regarding restarting him on anti epileptics.

Dr C Thomas

Seen in HMP Perth on 06 March 2008 by
Dr Hilda Ho

Colin McKay d.o.b. 05.09.79

Mr McKay told us that he was having great trouble sleeping and claimed not to have slept at all for some time. He was very insistent that I prescribe him a sleeping preparation. He asked about Temesdol and appeared quite annoyed when I declined. He did not report any new anxieties or worries. When asked about his persecutory thoughts, he replied that they were much the same as before and he remained under protection.

He has not received any threats to harm him. He denies any auditory hallucinations. He accepts that he will always be worried about his safety because of his enemies out there.

Mr McKay was insistent that he remained on his Olanzapine 20mgs per day despite an explanation about the need to test him without antipsychotic medication.

He will need to be reviewed regularly with a view to negotiating a decrease of the antipsychotic medication and a gradual withdrawal.

Dr Hilda Ho
Locum Consultant Forensic Psychiatrist

Dear Sir/Madam,

By email/post: Email
Our Ref: 100920
Re: Scottish Redress Application - Mr Colin James McKay
DOB: 05 September 1979
Application Reference: APP567348

We act on behalf of Mr Colin James McKay in respect of their application to the Scottish Redress Scheme.

We write to confirm that our client has instructed and authorised MMA Legal Ltd to act as their legal representative in this matter. Our client has also confirmed that, should any redress payment be awarded, they wish for the payment to be made to this firm on their behalf, to be held in our regulated client account and thereafter transferred to them.

This request is made with our client's express authority and for practical and protective reasons, including:

- To ensure the funds are received securely into a regulated client account;
- To allow the payment to be properly identified, reconciled and recorded against the client's file;
- To reduce the risk of payment error, fraud, or delay;
- To allow us to assist the client with any final administrative steps following the award; and
- to ensure that the client receives the funds promptly and safely once received by this firm.

As our client's instructed legal representatives, we are authorised to receive monies on their behalf where the client has provided express authority for us to do so. Any funds received will be treated as client money and held strictly on behalf of the client.

We confirm that the funds will not be treated as this firm's money and will be transferred to the client following receipt, subject only to any lawful and properly authorised deductions, if applicable, and in accordance with our regulatory obligations and client account procedures.

For the avoidance of doubt, our client understands that any redress payment remains their compensation. The request for payment to be made to this firm is an administrative arrangement only, made with the client's authority, and does not alter the client's entitlement to the award.

Please therefore arrange for any redress payment awarded to Mr Colin James McKay to be paid to our client account using the details below:

Account Name: MMA Legal Limited Collections
Bank: Metro Bank
Sort Code: 23-05-80
Account Number: 45635503
Payment Reference: 100920 - Mr Colin McKay

We enclose/attach our client's signed authority confirming their instructions for this firm to receive the funds on their behalf.

Should you require any further confirmation from our client, please let us know and we will arrange this promptly.

Yours Faithfully
Jay Taylor
