23/06/2026 Planned telephone contact DRUG problem clinic: Daniel says doing OK and doesn't want any changes currently

to his methadone dose. Will be reviewed by Dr Myton, Consultant Psychiatrist Addictions in the near future to look at ongoing prescribing. Daniel tells me

he thinks he may have a UTI again. Strong smell and frequency. Encouraged around hydration. He tells me he has a white topped bottle at home following

his difficulties last year with numerous UTI's. Will provide a MSSU for dip test. His friend will drop into Health Centre tomorrow. Daniel tells me he isn't

getting out much due to lots of stairs to his house (although says he can get out it just takes a lot out of him). His daughter is visiting next week so he is

looking forward to that. Miss Shirley Mearthur

11/07/2024 Home visit DRUG Problem clinic: Visited Danny at home due to poor mobility. He looks well and reports doing OK. Lots of stairs to his flat that he finds difficult but not sure whether he would like to move as he likes his home. Advised if we can help to let me know. Wants to continue on current dose of methadone. Continues to use heroin (smoking) but levels much reduced. Admits he doesn't get anything from it but it has become habitual. We explored strategies to help Danny move away from this ongoing use. Danny thinks he has a UTI. Unable to provide urine sample today but will do in the morning and ask his friend to deliver to me and I can dip test. Danny's mood appears good. Sees his friend daily and has better contact with this family. Relations here previously strained but things appear to have improved markedly. Plan: continue methadone at 90ml and review again at next clinic. Miss Shirley McArthur
