Attendance category: 1. Unplanned First Emergency Care Attendance for a new clinical condition (or deterioration of a chronic condition)

Referred Details

Referrer Details:

CLINICAL NARRATIVE

PRESENTING COMPLAINTS OR ISSUES

Presenting Complaint: R ear & double vision R eye - 2 week BG trigeminal neuralgia

Chief Complaint Group: Neurological

Chief Complaint: Numbness / tingling (parasthesia)

Chief Complaint Additional Information: Patient presented to hospital with right sided ear pain , jaw pain and headache .

She has BG of Trigeminal neuralgia , and was seen under Dr Chiroka , she was last seen more than one and half year.

Her pain before 3 weeks was occurring twice a week and for 45 minutes . She was able to manage that, but recently the frequency and duration of these attacks increased to attacks happening everyday for more than 2 hrs

PROCEDURES

DIAGNOSIS

- GP to refer patient to community pain services
- warning signs explained

MEDICATIONS AND MEDICAL DEVICES

DISCHARGE DETAILS

Date & time of discharge: 14-Aug-2025 15:25

Discharge Status Group: Treatment complete

Discharge Status: Treatment complete

Discharge Destination Group: Discharged

Discharge destination: Usual place of residence / family members

Discharge Follow Up Group: Community

Additional Clinical Information: Got a call from on call Neuro cons – Dr Omar

He says the patient can be added on lamotrigine 25mg OD and dose can be increased to 50mg BD at maximum for pain to relieve.

Patient has been started on pregabalin 300mg TDS dose by meddoc which is a supratherapeutic /toxic dose . Patient needs to be told that this is a very high dose and she can be only be on this if this is helping with her pain symptoms .

Her GP needs to wean off her pregabalin dose once she had her lamotrigine for some time .

The meddoc should be given the feedback for such high dose .

I explained the patient regarding the side effects of increased pregabalin dose . I explained she has been wrongly prescribed supra therapeutic dose. It will be her informed consent whether she wants to take high dose and let lamotrigine build up in her system or keep on taking her routine dose. 100mg TDS .

She says she will continue to take her 100mg TDS dose and will start taking lamotrigine

I further requested Dr Omar to book patient under neuro for a f/u. He says he will let Dr Chiroška's secretary know about this and will book her for OPA .
