Dear Doctor

Patient Name: MARGERY, Katrina (Miss)
Patient NHS No: 400 067 0514
DoB: 24-May-1967
Address: 1 Wing House, Wing Road, Leysdown-On-Sea, Sheerness, Kent,
ME12 4QR

Thank you for your recent referral for the above patient. The patient was referred for a respiratory review. Unfortunately, the Respiratory Team is unable to accept this referral.

Spirometry report 2015 (No VC information provided) to fully review the spirometry report.

FEV1 / FVC : 0.73 (pre)
FEV1 / FVC : 0.77 (post)
LLN 0.69. As FEV1/FVC is > LLN there is no confirmed obstruction, as per ARTP guidelines.

Previously the patient was seen for a one-off review as requested by Dr Paramothayan (Respiratory Consultant) stating likely COPD/asthma, pending further investigation. No further confirmation was provided to confirm a respiratory diagnosis of COPD.

Unfortunately, the Swale Respiratory team are only commissioned to review patients with a confirmed diagnosis of COPD, Bronchiectasis or ILD. I would suggest a further spirometry with reversibility, and re-refer to the service if required. We would accept a letter from Respiratory Consultant, confirming COPD, ILD or bronchiectasis.

I apologise for any inconvenience caused, if you require any further information, please do not hesitate to contact the Respiratory team.

Yours sincerely

Swale Respiratory Team
