Re: Trigeminal Neuralgia

I would be grateful for your advice on this 58 year old who at a recent presentation in A/E for her trigeminal neuralgia symptoms, she was discussed with one of your specialist registrar(Dr Omar) and he advised lamotrigine for her symptoms as carbamazepine hadn't worked in the past. A follow up appointment was supposed to be booked with you. Unfortunately, she had to stop the lamotrigine due to intolerable side effects. I wonder if you could advice on other options pending her appt with you.

Thank you

Yours sincerely

Dr T OGUNNOWO
GP
