Problem being referred

Dear Colleague,

Thank you for seeing this 54 year old lady who reports that following on from a cold some 9 weeks ago, she has noticed a change in her voice. She says that she lost her voice at the time of having the cold and doesn't feel that it has returned to normal. She is eating and drinking normally and is not complaining of any pain or discomfort. She has regular Covid tests and has never tested positive for Covid. She feels that her symptoms are not resolving and I would therefore be grateful for your further assessment and management at the earliest opportunity.

Many thanks.

Yours sincerely

Dr T Ogunnowo
