Redress Comments:

Return for redress to the left lower leg. Patient states that dressing fell off so she had to change it. O/e wound appears very wet, patient advised that wound has to keep dry but the plastic top dressing is making wound too moist. Wound has level off at the top now. No signs of infection/swelling/heat. Advised to return in 3/7. Sooner if concerned.

Examination:

Left Lower Leg

Treatment:

K-lite bandage, Gauze (Single Use), Atrauman, Cleaned with Saline
