Redress Comments:

Discussed wound clinic with patient - patient will call Sittingbourne Hospital and ask to speak to wound medicine centre to find out where on the list she is and will then keep regular contact herself. Attended room alone, one day earlier than planned as duoderm had been leaking. No erythema, swelling, discharge or other indication of infection at this time. Stubborn slough remains to wound bed - wound area cleaned and redressed as before. To reattend in 3/7 or sooner if concerns as discussed.

Examination:

Left Lower Leg

Treatment:

Aquacel (Single Use), Duoderm (Single Use), Cleaned with Saline, Observation, Verbal Guidance, Elevation, Rest

Discharged to: Home
