Additional Protocol entry Alert displayed - steroid card (v18.7) (Ardens)

Document eMED3 (2010) new statement issued, not fit for work
Fit Note Document (Diagnosis: Depression; Duration 07-Apr-2025 - 21-Apr-2025)

History *History* more SOBOe mornings and evenings - wheezy. h/o asthma. O/E RS clear, Sats 98% air, hr 90, no leg swelling. Recommended re-start inhlaers - for MART - bloods and CXR. Pt is needle phobic so declined bloods (warned cannot fully assess/diagnose without) but will have CXR. FU with nurse

Problem Asthma

History *History* low mood ongoing. Not started sertraline as was concerned about list of SE. Thinks will start now - warned may cause nausea at first. No thoughts of self harm. Back at home with partner now. Struggles to leave hoem due to anxiety. Discussed a lot of this could be worse with alcohol intake - 250ml bacardi daily - and says shakes/sweats in mornings. Discussed again should contact Achieve and not drive/inform DVLA. Review 2 weeks.

Problem Alcohol dependence

11-Mar-2025 Dr Haitham Darwich (HD) Crompton View SurgeryGP Surgery

Document eMED3 (2010) new statement issued, not fit for work
Fit Note Document (Diagnosis: anxiety; Duration 11-Mar-2025 - 10-Apr-2025)

Problem Anxiety state

History **History** Feeling very anxious, having daily panic attacks, mainly due to memories of last year, has been going on for a few weeks, not sleeping much at night but sleeping during the day. Not leaving the house as not wanting to meet people. Was accused of ***** last year by his ***** and spent one year ***** his car before proved innocent. Now living again with his ***** in his property. No thoughts of harming himself or harming her. Wishes to have a medication. Not been through psychological therapy, not keen to try. Discussed option of starting sertraline, discussed possible side effects and the possibility of a dip in his mood over the first 2 weeks, will review in 2 weeks to check on progress. Has number for Samaritans and crisis team, will contact them if has any dark thoughts

17-Jan-2025 Dr Thomas Kneen (TK) Crompton View SurgeryGP Surgery

Additional Protocol entry Alert displayed - NSAID new prescription (v18.6) (Ardens)

History **History** Face to face appointment as FU

History **History** Has found omeprazole very helpful in controlling his symptoms, keen to continue, issued

History **History** Hadn't been taking thiamine as didn't want to pay prescription charges for a vitamin, however now receiving UC and doesn't pay for prescriptions, discussed importance of thiamine due to alcohol and issued

History **History** Reports has reduced his alcohol intake to 2.5 small glasses of Bacardi per night, no shaking or withdrawal symptoms

History **History** Has not yet contacted talking therapies, encouraged William do this soon as likely to be a waiting list

History **History** Ongoing issues with back pain, not helped by having been sleeping in car for prolonged periods until recently, has developed pain over left shoulder, 'like a trapped nerve', eased by ibuprofen, requesting more as no longer pays for prescriptions. Agreed to issue, FU with MSK if no improvement.

History **History** No thoughts of self-harm or suicide

History **History** Requesting repeat of MED3, issued

History **History** Enquired about driving and William informs me he is no longer driving, doesn't intend to until his health is in a better place, encouraged this and advised would be unsafe to drive at present

Document eMED3 (2010) new statement issued, not fit for work

Document eMED3 (2010) new statement issued, not fit for work
Fit Note Document (Diagnosis: Depression; Duration 17-Dec-2024 - 21-Jan-2025)
History Patient review Been ***** car last 9 months after ***** made accusations to Police - these have now been dropped and patient moved back into home 1/52 ago. Tearful. upset. No suicidal ideation. Been drinking heavily over this period - up to a bottle of spirits (700ml) per night. Often bit shaky feeling in morning but only drinking in evenings. Feels needs counselling. Advised should consider Achieve but patient doesn't want to stop drinking at the moment. Agreed med3, omeprazole as nausea/off food, thiamine; gave number for Achieve/counselling services. Advised should have bloods and review again. After consultation realised did not warn patient not to drive/inform DVLA. Tried to ring twice with no answer so left voicemail to contact surgery. Pt called back and informed sadly needs to stop driving and contact DVLA - pt acknowledged and will do so.

25-Jan-2024 Dr Thomas Kneen (TK) Crompton View SurgeryGP Surgery

History History Face to face appointment, 3/7 ago had a fall at work, works completing maintenance, was litter picking to prepare the grounds when tripped over some wood, fell backwards and landed on back

History History Felt immediately okay afterwards, then 2/7 later after a hot bath felt pain in neck and lower back that has continued

History History No new limb weakness / paraesthesia, no bladder or bowel changes / red flag CES features

History History Not taken any analgesia

Examination Examination Appears well systemically, independently mobile

Examination Examination No C/T/L/S spinal process tenderness, mild lumbar para-spinal tenderness to deep palpation of musculature

Comment Comment Imp: - Muscular injury, reassuring was immediately okay and pain several days later

Comment Comment Advised simple analgesia with paracetamol, however William reports not good with tablets. Discussed NSAIDs but issues with alcohol and prev haematemesis. Ibuprofen gel issued as alternative.

Comment Comment Advised if no improvement in 4/52 to return for re-review, keep moving in interim to avoid muscle spasm, analgesia to help move. If deteriorating / new symptoms to seek re-review

History History Also took opportunity to discuss USS result from November as note difficulty facilitating appointment for this so far

History History William reports was due to difficulty with the job he had, then getting let go, then finding and starting a new job

History History Discussed USS result and how shows severe fatty liver

History History Discussed alcohol, William reports drinks 1x bottle of bacardi every weekend, no alcohol during the week, although used to be significantly more than this a few years ago following bereavement of his *****

Comment Comment Discussed how alcohol likely cause of liver damage, needs to cut down and stop completely or liver damage will progress, discussed how can cause scarring and liver failure which will cause ascites / jaundice / pruritus and ultimately death

Comment Comment Discussed need for blood test (note needle phobic) to assess severity of liver disease (AST for FIB-score) and whether needs referral to gastroenterology, William agreed will book this appointment at reception as leaves and cancel appointment with Dr AH to discuss USS as we have done this now

Comment Comment FU with blood results, ?FIB-4 ?start statin ? refer to gastroenterology

Test Request Unknown specimen

Problem Alcoholic fatty liver

 Quantitv faecal immunochem tst 1.4 ug Hb/g (Range: <10)

02-Oct-2023 Dr Antoni Pomian (AP) Crompton View SurgeryGP Surgery

History Patient review PR bleeding weekly since last seen. Didn't manage to get FIT or bloods done. No change in bowel habit. No weight loss. O/E AS soft non tender - no masses. declined PR (warned can make difference if something found). Plan - forms still on for bloods/FIT test. Will do this and then FU 1/52. Redice alcohol intake to 500ml bacardi over 2d once weekly.

 Ultrasound

15-Sept-2020 Dr Sarfraz Tariq (STAR) Crompton View SurgeryTelephone consultation

History History Telephone consultation undertaken. This was
 due to recommendations in place nationally due to
 coronavirus pandemic. Identity confirmed.
 History History re: bloods review - Deranged LFTs (ALT102,
 AST:60, ALP:81, Bilirubin normal) mildly raised ferritin (469). has had fluctuating LFTs for long time. had
 screened for antibodies to SM/mito/LKM, connective
 tissue disease, serum electrophoresis, hep c & Hep B all
 normal.
 History History Feeling fine, eating and drinking fine. No
 jaundice, No bowel habit change, No melena, no abd
 swelling, No rash, No wt loss, he has 9 year hx of on and
 off vomiting with some blood. awaiting for gastroscopy -
 there is a letter dated 4/3/2020 stated that he was
 assessed by colorectal consultant who changed his 2
 weeks referral to routine. Karen called the secretary of
 consultant who said that pt is on their list but don't know
 when patient will get appointment. Drinking alcohol 32
 units/week./ also trying to reduce.
 Examination Examination sound well on phone
 Comment Comment Keep hydrate, eat healthy balance diet, repeat
 bloods in 1 month time including AFP, transferrin
 saturation, copper, booked USS abd, advised about
 reducing alcohol and advised about alcohol and driving.
 safety netted, abd pain, melena, haematemesis, jaundice,
 wt loss, unable to tolerate food then call us or 111/999.
 happy with plan.
 Test Request Unknown specimen

Procedure	Blood sample taken	
Examination	Body weight	80 kg
Examination	Standing height	163 cm
Examination	Body mass index	30.11 kg/m ²
Examination	Alcohol consumption	42 U/week
Assessment	Current smoker	25 /day
Assessment	Cigarette smoker	25 /day
Assessment	AUDIT-C score - frequency of drinking alcohol	4 /4
Assessment	AUDIT-C score - units of alcohol drunk on a typical day	3 /4
Assessment	AUDIT-C score-freq drunk 6+units (fem)/8+units (male)	4 /4
Additional	last yr	
Additional	Smoking cessation advice declined	
Result	AUDIT-C (Alcohol Use Disorders Identification Test - Consumption) score advised he needs to cut down, he is trying to have alcohol free days	11 /12

08-July-2020 Dr Antoni Pomian (AP) Awaiting clinical code migration to EMIS Web

Lab Results	Full blood count - FBC	h/o raised ALT/inflamm markers at A&E attendance
	Full blood count - FBC(AP) - No action required:	
	Total white cell count	9.6 10 ⁹ /L (Range: 4 - 11)
	Haemoglobin estimation	147 g/L (Range: 130 - 180)
	Platelet count	430 10⁹/L (Range: 150 - 400)
	Red blood cell (RBC) count	4.56 10 ¹² /L (Range: 4.5 - 6.5)
	Haematocrit	0.448 (Range: 0.4 - 0.54)
	Mean corpuscular volume (MCV)	98.2 fL (Range: 79 - 100)
	Mean corpusc. haemoglobin(MCH)	32.2 pg (Range: 27 - 32)
	Red blood cell distribut width	12.2 (Range: 11.8 - 14.8)
	Neutrophil count	4.7 10 ⁹ /L (Range: 1.7 - 7.5)
	Lymphocyte count	3.6 10 ⁹ /L (Range: 1 - 3.8)
	Monocyte count	0.7 10 ⁹ /L (Range: 0.3 - 0.8)
	Eosinophil count	0.46 10⁹/L (No range available)
	Basophil count	0.1 10⁹/L (Range: <0.1)
	Percentage nucleated RBCs, 0.0	(Range: <1)

08-July-2020 Dr Antoni Pomian (AP) Awaiting clinical code migration to EMIS Web

Lab Results	Serum electrolytes	h/o raised ALT/inflamm markers at A&E attendance
	Serum electrolytes eGFR units are ml/min/1.73 m ² . Results persistently (>3 months) between 60-90 mmol/24 hour with other evidence of kidney damage suggest Chronic Kidney Disease stage G2 (CKD G2). Multiply eGFR result by 1.212 if Afro-Caribbean. NB: meat meals in the previous 12 hours can increase creatinine and falsely reduce the 'eGFR' result. Please note : CKD EPI equation for calculating eGFR in use from 5th October 2018, as per NICE guidance (CG182).(AP) - No action required:	
	Serum sodium	140 mmol/L (Range: 133 - 146)
	Serum potassium, 4.0 mmol/L	4 mmol/L (Range: 3.5 - 5.3)
	Serum creatinine	103 umol/L (Range: 59 - 104)
	GFR calculated abbreviatd MDRD	73 mL/min (Range: >90)
	Liver function test(AP) - TCI Doctor - Routine:	
	Serum bilirubin level	14 umol/L (Range: <21)
	Serum ALT level	91 u/L (Range: <40)
	Total alkaline phosphatase	77 u/L (Range: 30 - 130)
	Serum albumin	45 g/L (Range: 35 - 50)
	Serum C reactive protein level(AP) - TCI Doctor - Routine:

30-Apr-2020 Sister Julia Bartholomew (JB) Crompton View Surgery Telephone consultation

Assessment	Asthma annual review Telephone consultation undertaken. This was due to recommendations in place nationally due to coronavirus pandemic. Identity confirmed. Diagnosed with Asthma in 1988 has had ICS in passed. Has been using PRN salbutamol over the last few year and ordering inhalers on line as more convient. Recently lost buisness so can no longer afford to order online. Was asked to have spiro revers by AIB due to long smoking hisotry unable to do due to current COVID 19 situation. Discussed with NG Plan for trial of ICS Clenil 100 2 puff BD and review in 4-6 weeks. Red Ifags discussed know to contact me if any concerns. Will do baseline spiro when safe to do so. Strongly adviced to stop smoking for long term future health	
Assessment	Asthma causes daytime symptoms most days	
Assessment	Asthma sometimes restricts exercise	
Assessment	Asthma not disturbing sleep	
Assessment	Asthma control test score	18 /25
Assessment	Inhaler technique - good talked me through technique sign posted to Asthma Uk website to double check also	
Social	Moderate cigarette smoker (10-19 cigs/day)	
History	Asthma management	
Comment	Smoking cessation education

28-May-2021 COVID-19 Vaccine Vaxzevria (ChAdOx1 S [recombinant]) not less than 2.5x100,000,000 infectious units/0.5ml dose suspension for injection multidose vials (AstraZeneca UK Ltd) Acute Medication (Past)

1 dose - 1 dose by Intramuscular Injection

28-May-2021 COVID-19 Vaccine Vaxzevria (ChAdOx1 S [recombinant]) not less than 2.5x100,000,000 infectious units/0.5ml dose suspension for injection multidose vials (AstraZeneca UK Ltd) Acute Medication (Past)

1 dose - 1 dose by Intramuscular Injection

18-Mar-2021 COVID-19 Vaccine Vaxzevria (ChAdOx1 S [recombinant]) not less than 2.5x100,000,000 infectious units/0.5ml dose suspension for injection multidose vials (AstraZeneca UK Ltd) Acute Medication (Past)

1 dose - 1 dose by Intramuscular Injection

18-Mar-2021 COVID-19 Vaccine Vaxzevria (ChAdOx1 S [recombinant]) not less than 2.5x100,000,000 infectious units/0.5ml dose suspension for injection multidose vials (AstraZeneca UK Ltd) Acute Medication (Past)

1 dose - 1 dose by Intramuscular Injection

15-Sept-2020 Ventolin 100micrograms/dose Evohaler (GlaxoSmithKline UK Ltd) Repeat Medication (Past)

1 x 200 dose - 1 TO 2 PUFFS UP TO FOUR TIMES DAILY AS REQUIRED

15-Sept-2020 Clenil Modulite 100micrograms/dose inhaler (Chiesi Ltd) Repeat Medication (Past)

1 x 200 dose - Two Puffs To Be Inhaled Twice A Day

30-Apr-2020 Ventolin 100micrograms/dose Evohaler (GlaxoSmithKline UK Ltd) Repeat Medication (Past)

1 x 200 dose - 1 TO 2 PUFFS UP TO FOUR TIMES DAILY AS REQUIRED

30-Apr-2020 Clenil Modulite 100micrograms/dose inhaler (Chiesi Ltd) Repeat Medication (Past)

1 x 200 dose - Two Puffs To Be Inhaled Twice A Day

30-Apr-2020 Ventolin 100micrograms/dose Evohaler (GlaxoSmithKline UK Ltd) Repeat Medication (Past)

1 x 200 dose - 1 TO 2 PUFFS UP TO FOUR TIMES DAILY AS REQUIRED

30-Apr-2020 Clenil Modulite 100micrograms/dose inhaler (Chiesi Ltd) Repeat Medication (Past)

1 x 200 dose - Two Puffs To Be Inhaled Twice A Day

11-Mar-2020 Ventolin 100micrograms/dose Evohaler (GlaxoSmithKline UK Ltd) Acute Medication (Past)

1 x 200 dose - 1 TO 2 PUFFS UP TO FOUR TIMES DAILY AS REQUIRED

11-Mar-2020 Ventolin 100micrograms/dose Evohaler (GlaxoSmithKline UK Ltd) Acute Medication (Past)

1 x 200 dose - 1 TO 2 PUFFS UP TO FOUR TIMES DAILY AS REQUIRED

22-May-2018 Cyclizine 50mg tablets Acute Medication (Past)

28 tablet - 1 TABLET THREE TIMES DAILY

22-May-2018 Cyclizine 50mg tablets Acute Medication (Past)

28 tablet - 1 TABLET THREE TIMES DAILY

22-May-2018 Lansoprazole 30mg gastro-resistant capsules Repeat Medication (Past)

28 capsule - 1 EVERY DAY

22-May-2018 Lansoprazole 30mg gastro-resistant capsules Repeat Medication (Past)

28 capsule - 1 EVERY DAY

08-Aug-2017 Clobetasone 0.05% cream Acute Medication (Past)

30 gram - APPLY THINLY 1-2 TIMES DAILY

08-Aug-2017 Zeroderm ointment (Thornton & Ross Ltd) Acute Medication (Past)

125 gram - APPLY AS REQUIRED

08-Aug-2017 Zeroderm ointment (Thornton & Ross Ltd) Acute Medication (Past)

125 gram - APPLY AS REQUIRED

08-Aug-2017 Clobetasone 0.05% cream Acute Medication (Past)

30 gram - APPLY THINLY 1-2 TIMES DAILY

Test Results

17-Sept-2024 Mrs Julie Ritchie (JAR)

Result: BCS: FOB result *FOBT Non-Response. Sent when Discharged for non-response to initial Test Kit(JAR) - Already dealt with*
No response to BCSP invitation (No range available)

03-Nov-2023 Dr Antoni Pomian (AP)

Result: Standard chest X-ray *XR Chest Clinical History : Slightly raised platelets. Smoker. CHEST Normal heart and mediastinal outlines. Lungs show no focal active lesions. Some background chronic airways disease is noted. Reported by Dr R Razzaq FRCR Consultant Radiologist GMC 3278831 Reported by : RAZZAQ Rubeena Dr / RMCHOLLA(TK) - Normal*

06-Oct-2023 Miss Rafah Abdorab (RAFAH)

Result: Serum gamma GT level *(AP) - TCI Doctor - Routine*

06-Oct-2023 Miss Rafah Abdorab (RAFAH)

Result: Bone profile *Adjusted Calcium is unreliable in acidosis/Alkalosis. (AP) - Normal*

Serum calcium	2.46 mmol/L	(Range: 2.15 - 2.62)
Calcium adjusted level	2.35 mmol/L	(Range: 2.2 - 2.6)
Total alkaline phosphatase	86 u/L	(Range: 30 - 130)
Serum albumin	50 g/L	(Range: 35 - 50)

06-Oct-2023 Miss Rafah Abdorab (RAFAH)

Result: Serum electrolytes *GFR category G2 (60 to 89 mL/min/1.73 m²). Suggest repeat within 2 weeks to confirm eGFR if previously >60 mL/min/1.73 m². Advise adults not to eat any meat in the 12 hours before testing eGFR. Interpret eGFR with caution in adults with extremes of muscle mass. NICE NG203 Chronic kidney disease (2021). (AP) - No action required*

Serum sodium	143 mmol/L	(Range: 133 - 146)
Serum potassium	4.6 mmol/L	(Range: 3.5 - 5.3)
Serum creatinine	103 umol/L	(Range: 59 - 104)
GFR calculated abbreviated MDRD	71 mL/min	(Range: >90)

06-Oct-2023 Miss Rafah Abdorab (RAFAH)

Result: Liver function test *(AP) - Normal*

Serum bilirubin level	4 umol/L	(Range: <21)
Serum ALT level	35 u/L	(Range: <40)

06-Oct-2023 Miss Rafah Abdorab (RAFAH)

Result: HbA1c level - IFCC standardised *NOTES FOR GENERAL PRACTICE Identification of Diabetes in Bolton - for patients not previously coded as diabetic HbA1c 39 - 41.9 CODE AS: At risk of diabetes HbA1c 42 - 47.9 CODE AS: Non-diabetic hyperglycaemia (NDH) HbA1c >= 48 Consistent with Diabetes - the patient should be coded as either Type 1 or Type 2(TK) - Normal*

05-Oct-2023 Miss Rafah Abdorab (RAFAH)

Result: APTT *(AIB) - Normal*

APTT	29.7 s	(Range: 25 - 36)
APTT ratio, 1.0	1	(No range available)

05-Oct-2023 Miss Rafah Abdorab (RAFAH)

Result: Prothrombin time *(AIB) - Normal*

Prothrombin time	10.9 s	(Range: 9.6 - 12.4)
International normalised ratio	0.9	(No range available)

05-Oct-2023 Miss Rafah Abdorab (RAFAH)**Result:** Full blood count - FBC(AP) - TCI Doctor - Routine

Total white cell count	9.4 10 ⁹ /L	(Range: 4 - 11)
Haemoglobin estimation	161 g/L	(Range: 130 - 180)
Platelet count	414 10⁹/L	(Range: 150 - 400)
Red blood cell (RBC) count	5.21 10 ¹² /L	(Range: 4.5 - 6.5)
Haematocrit	0.479	(Range: 0.4 - 0.54)
Mean corpuscular volume (MCV)	91.9 fL	(Range: 79 - 100)
Mean corpusc. haemoglobin(MCH)	30.9 pg	(Range: 27 - 32)
Red blood cell distribut width	12.3	(Range: 11.8 - 14.8)
Neutrophil count	4.7 10 ⁹ /L	(Range: 1.7 - 7.5)
Lymphocyte count	3.8 10 ⁹ /L	(Range: 1 - 3.8)
Monocyte count	0.6 10 ⁹ /L	(Range: 0.3 - 0.8)
Eosinophil count	0.27 10 ⁹ /L	(No range available)
Basophil count	0.1 10⁹/L	(Range: <0.1)
Percentage nucleated RBCs, 0.0		(Range: <1)

05-Oct-2023 Miss Rafah Abdorab (RAFAH)**Result:** Serum lipids(AP) - TCI Nurse - Routine

Serum cholesterol	6.9 mmol/L	(No range available)
Serum triglycerides	4.4 mmol/L	(Range: <1.8)
Serum HDL cholesterol level	1.09 mmol/L	(Range: >1)
Se non HDL cholesterol level	5.81 mmol/L	(No range available)
Calculated LDL cholesterol lev	3.8 mmol/L	(No range available)
Serum cholesterol/HDL ratio	6.3	(No range available)

05-Oct-2023 Miss Rafah Abdorab (RAFAH)**Result:** Thyroid function test(AIB) - Normal

Serum TSH level	1.31 mu/L	(Range: 0.2 - 5)
Serum free T4 level	13.1 pmol/L	(Range: 10 - 24)

05-Oct-2023 Miss Rafah Abdorab (RAFAH)**Result:** Serum vitamin B12(AP) - Normal**05-Oct-2023 Miss Rafah Abdorab (RAFAH)****Result:** Serum ferritin(AP) - Normal**05-Oct-2023 Miss Rafah Abdorab (RAFAH)****Result:** Serum folate(AP) - TCI Doctor - Routine**04-Oct-2023 Miss Rafah Abdorab (RAFAH)****Result:** Quantitv faecal immunochem tstPlease note this test is not currently UKAS accredited under ISO:15189.(AH) - Normal

Quantitv faecal immunochem tst Negative		(No range available)
Quantitv faecal immunochem tst	1.4 ug Hb/g	(Range: <10)

13-Aug-2020 Dr Charlotte Loftus (CL)**Result:** ANTIBODIES TO SM/MITO/LKMAntibodies to SM/Mito/LKM performed by MRI Immunology.(AP) - Normal

Red blood cell (RBC) count	4.56 10 ¹² /L	(Range: 4.5 - 6.5)
Haematocrit	0.448	(Range: 0.4 - 0.54)
Mean corpuscular volume (MCV)	98.2 fL	(Range: 79 - 100)
Mean corpusc. haemoglobin(MCH)	32.2 pg	(Range: 27 - 32)
Red blood cell distribut width	12.2	(Range: 11.8 - 14.8)
Neutrophil count	4.7 10 ⁹ /L	(Range: 1.7 - 7.5)
Lymphocyte count	3.6 10 ⁹ /L	(Range: 1 - 3.8)
Monocyte count	0.7 10 ⁹ /L	(Range: 0.3 - 0.8)
Eosinophil count	0.46 10⁹/L	(No range available)
Basophil count	0.1 10⁹/L	(Range: <0.1)
Percentage nucleated RBCs, 0.0		(Range: <1)

08-July-2020 Dr Antoni Pomian (AP)**Result:** Serum electrolytes GFR units are ml/min/1.73 m². Results persistently (>3 months) between 60-90 mmol/24 hour with other evidence of kidney damage suggest Chronic Kidney Disease stage G2 (CKD G2). Multiply eGFR result by 1.212 if Afro-Caribbean. NB: meat meals in the previous 12 hours can increase creatinine and falsely reduce the 'eGFR' result. Please note : CKD EPI equation for calculating eGFR in use from 5th October 2018, as per NICE guidance (CG182).(AP) - No action required

Serum sodium	140 mmol/L	(Range: 133 - 146)
Serum potassium, 4.0 mmol/L	4 mmol/L	(Range: 3.5 - 5.3)
Serum creatinine	103 umol/L	(Range: 59 - 104)
GFR calculated abbreviated MDRD	73 mL/min	(Range: >90)

08-July-2020 Dr Antoni Pomian (AP)**Result:** Liver function test(AP) - TCI Doctor - Routine

Serum bilirubin level	14 umol/L	(Range: <21)
Serum ALT level	91 u/L	(Range: <40)
Total alkaline phosphatase	77 u/L	(Range: 30 - 130)
Serum albumin	45 g/L	(Range: 35 - 50)

08-July-2020 Dr Antoni Pomian (AP)**Result:** Serum C reactive protein level(AP) - TCI Doctor - Routine

18-Mar-2021	Read Code	Short message service text message sent to patient Dear <firstname2> Crompton View Surgery would like to fully reassure you about the safety of the Covid vaccines we are using. We know it has been discussed in the media this last few days. All the GPs are fully behind these vaccines and have no hesitation in recommending them. As a group of local GPs we have given 15,000 of them now and there have been 100,000 given across Bolton. We kindly ask you to attend as planned for your scheduled appointment.
17-Mar-2021	Read Code	Short message service text message sent to patient Appt reminder: Mar 18 at 2:23pm for Covid vaccination. This will take place at TONGE MOOR HEALTH CENTRE. Face masks are compulsory.

13-Feb-2021	Read Code	Short message service text message sent to patient Dear <firstname2>, We are doing really well with Covid vaccination and have now moved onto group 6. This is pulling staff away from the surgery and we continue to be extremely busy. Please only book an appointment if it's necessary or we have asked you to. If you have worrying symptoms like unexplained bleeding/weight loss or a lump that won't go away please do contact us.
20-Jan-2021	Read Code	Short message service text message sent to patient Dear <firstname2> <surname>, From Crompton View Surgery. Our reception team is overwhelmed with people calling to ask about the Covid vaccination. Please do not call us about this. We will call you when your time has come. We are vaccinating as fast as we can get supplies and no one has been forgotten or missed. Please do not call us about this matter. Many thanks.

CROMPTON VIEW SURGERY

DR A POMIAN, DR N GOLDRICK & DR A ISAT-BADAT

**CROMPTON HEALTH CENTRE
CROMPTON WAY
BOLTON BL1 8UP
TELEPHONE
01204 463090**

28 August 2025

Mr William Gallagher
36 Oldhams Terrace
Astley Bridge
Bolton
BL1 6RD

Dear Mr Gallagher

Unfortunately you have not responded to our invitations regarding your asthma check-up. It is important to monitor your condition and medication to ensure optimum treatment. This can help prevent deterioration of your asthma.

Please contact the surgery to arrange either an appointment at the practice or telephone consultation with one of the practice nurses.

If you decide not to take up this offer, we will invite you again next year; however, the doctor may need to speak to you regarding your prescription before this time.

If at any time you change your mind and decide you would like a review, please contact the surgery to arrange a telephone consultation. Please ignore this letter if you have already booked your asthma review or have attended for it in the last few weeks.

Yours sincerely

DRS POMIAN, GOLDRICK & ISAT-BADAT

eMED3 (2010) new statement issued, not fit for work

22-Apr-2025 Dr Antoni Pomian (AP)

Additional:eMED3 (2010) new statement issued, not fit for work

Fit Note Document (Diagnosis: Anxiety/depression; Duration 10-Apr-2025 - 20-May-2025)

**Statement of Fitness for Work
For social security or Statutory Sick Pay**

Patient's name Mr, Mrs, Miss, Ms William Shearer Gallagher

I assessed your case on: 22 / 04 / 2025

and, because of the
following condition(s): Anxiety/depression

I advise you that:

- ☒ you are not fit for work.
☐ you may be fit for work taking account of the following advice:-

If available, and with your employer's agreement, you may benefit from:

- ☐ a phased return to work- ☐ amended duties-
☐ altered hours- ☐ workplace adaptations-

Comments, including functional effects of your condition(s):

This will be the case for

or from 10 / 04 / 2025 to 20 / 05 / 2025

I will/will not need to assess your fitness for work again at the end of this period.
(Please delete as applicable)

Issuer's name POMIAN, Antoni (Dr)

Issuer's profession Doctor

Date of statement 22 / 04 / 2025

Issuer's address

Crompton View Surgery
Crompton Health Centre, 501 Crompton Way
Bolton, BL1 8UP
Telephone: 01204463090

Unique ID: Med 3 04/22 9AE97256-9ABE-485C-A596-051EA3F08681

What your advice means**'You are not fit for work'**

Your health condition means that you may not be able to work for the period shown. You can go back to work as soon as you feel able to and, with your employer's agreement, this may be before your fit note runs out.

'You may be fit for work'

You could go back to work with the support of your employer. Sometimes your employer cannot give you the support you need and if this happens your employer will treat this form as though you are **'not fit for work'**. You do not need to get another of these forms.

For more information please visit www.gov.uk and type **'fit note guidance for patients and employees'** into the search field. Fit note guidance for employers is also available.

Data from **page 1** of this form may be collected to learn about national patterns of sickness absence. Individuals will not be identified. Find out more at www.gov.uk/dwp/fit-note-data

Fill in the **Your details** section. You can ask someone to do this for you if you cannot fill in your details yourself.

Your details – Please use BLOCK CAPITALS

Surname	Mr, Mrs, Miss, Ms GALLAGHER
Other names	WILLIAM SHEARER
Address	36 OLDHAMS TERRACE ASTLEY BRIDGE BOLTON Postcode BL1 6RD
Date of birth	09 / 05 / 1970 Mobile
NI number	

What you need to do now

- **If you are employed:** Please show this form to your employer. You could get Statutory Sick Pay (SSP) which is paid by your employer. If your employer cannot pay you SSP they will give you form **SSP1** to claim benefits.
- **If you are self-employed:** You could claim benefits.
- **If you are already claiming benefits:** Please send this form to the office dealing with your claim.
- **If you need to make a claim to benefits:** Visit www.gov.uk/browse/benefits or phone **0800 328 5644** (8am to 6pm Monday to Friday). Textphone users call **0800 328 1344**.

**Statement of Fitness for Work
For social security or Statutory Sick Pay**

Patient's name Mr, Mrs, Miss, Ms William Shearer Gallagher

I assessed your case on: 07 / 04 / 2025

and, because of the
following condition(s): Depression

I advise you that:

- ☒ you are not fit for work.
☐ you may be fit for work taking account of the following advice:-

If available, and with your employer's agreement, you may benefit from:

- ☐ a phased return to work- ☐ amended duties-
☐ altered hours- ☐ workplace adaptations-

Comments, including functional effects of your condition(s):

This will be the case for

or from 07 / 04 / 2025 to 21 / 04 / 2025

I will/will not need to assess your fitness for work again at the end of this period.

What your advice means**'You are not fit for work'**

Your health condition means that you may not be able to work for the period shown. You can go back to work as soon as you feel able to and, with your employer's agreement, this may be before your fit note runs out.

'You may be fit for work'

You could go back to work with the support of your employer. Sometimes your employer cannot give you the support you need and if this happens your employer will treat this form as though you are **'not fit for work'**. You do not need to get another of these forms.

For more information please visit www.gov.uk and type **'fit note guidance for patients and employees'** into the search field. Fit note guidance for employers is also available.

Data from **page 1** of this form may be collected to learn about national patterns of sickness absence. Individuals will not be identified. Find out more at www.gov.uk/dwp/fit-note-data

Fill in the **Your details** section. You can ask someone to do this for you if you cannot fill in your details yourself.

In the event that the mandate is electronically signed please note that our electronic signature system is compliant with all relevant legislation and regulations relating to electronic signatures, including the eIDAS Regulation (EU 910/2014) and the GDPR (EU 2016/679). Our electronic signatures meet the criteria for 'advanced' e-signatures, as follows:

1. Authentication and Security; users are linked to the signature provided via a secure ID verification process which links the Unique ID number used to login into our Client Portal to their case reference number. The use of one-time passwords which are provided only to a confirmed personal account or device held by the user, further enhances the security of this process and the confidence of the user in engaging in the use of e-signatures.
2. Intent to sign; the relevant document must be securely accessed in order to provide a signature to confirm agreement of the same. A standalone action of the user printing their name and entering the date of signature is then required, in order to evidence their intent to sign.
3. Consent to sign; by printing their name and entering the date of signature on the relevant document, the user confirms that they consent to signing the document electronically. However, electronic signatures are not mandatory and users are given the option to opt out of this process if they would prefer to sign documents by hand.
4. Prevention of tampering; once a document has been signed and submitted on the Client Portal, it cannot be altered. If the user wishes for any amendments to be made after a signature has been provided, they will need to create a new version of the document containing the relevant changes. A further signature will then be required in order for the user to confirm the changes they have made.

If our client is not registered with you or you require further documentation, please contact us so we can expedite this.

If you prefer to send the original set of records, we will photocopy and return them.

We confirm that no action is contemplated against any Medical Practitioner or Health Authority/Trust or any employee of the same. We will maintain in confidence any information divulged to us, subject to the reasonable instructions of our client and compliance with any Court Order or the Rules of Court.

We consider that all the relevant information needed to enable you to progress this request has been provided. We therefore look forward to receiving the medical records from you **within one month** as required by the GDPR.

We have attached a confirmation receipt slip which we would be obliged if you could complete and faxback at your earliest opportunity, and a cover sheet to send back with the medical records. We thank you for your help in this matter and look forward to receiving these records as soon as possible.

Yours faithfully,

Patient's Reported Condition

III-5 DAYS AGO RECTAL BLEEDING NONE SINCE

Case Summary

Pathways Disposition: **Dx75**
 Must Contact A Local Service Within 3 Working Days

Consultation Summary:

Injury, illness or other health problem
 Illness - '5 DAYS AGO RECTAL BLEEDING NONE SINCE'
 Warm to touch
 Bleeding after bowel motion

Pathways Assessment:

An injury, illness or health problem was the reason for the contact.
 There was no blood loss.
 An illness or health problem was the main problem.
 User comment - '5 DAYS AGO RECTAL BLEEDING NONE SINCE'
 The individual was not fighting for breath.
 The main reason for the assessment was not an allergic reaction, heart attack, chest/upper back pain, probable stroke, recent fit/seizure or suicide attempt.
 The main reason for contact was not new confusion, declared diabetic hypo/hyperglycaemia, or ICD shock.
 The skin on the torso felt normal, warm or hot.
 Pathway selected - Rectal Bleeding
 There was no abdominal pain.
 Passage of a black, tarry bowel motion could not be confirmed.
 The rectal bleeding was not constant.
 Whether the individual had passed blood in a bowel motion could not be confirmed.
 There were splashes of blood in the toilet after defaecation.
 A sexual assault had not occurred.
 There was no retained rectal foreign body.
 The individual was not feeling faint or dizzy.
 There was no new spontaneous bruising or abnormal bleeding within the previous 2 weeks.
 There was no new painful anal or perianal lump.
 There was no anal/rectal pain on defaecation.
 There had not been an assessment of the problem within the previous 6 months.
 User comment - 'GP - Crompton View Surgery (Crompton Health Centre) - Bolton (Ho'

Advice Given:

Drink plenty of fluids.
 Have at least 5 portions of fruit and vegetables every day.
 Speak to a pharmacist for advice for suitable treatments.
 It's not always serious, but should be checked.
 If there are any new symptoms, or if the condition gets worse, changes or you have any other concerns, call us back.
 Remember to take a list of any current medications if you go to the out of hours surgery.

Statement of Fitness for Work For social security or Statutory Sick Pay

Patient's name Mr, Mrs, Miss, Ms William Shearer Gallagher

I assessed your case on: 02 / 02 / 2023

and, because of the following condition(s): Bereavement

I advise you that:

☐ you are not fit for work--☒ you may be fit for work taking account of the following advice:

If available, and with your employer's agreement, you may benefit from:

☐ a phased return to work--☐ amended duties--☐ altered hours--☐ workplace adaptations--

Comments, including functional effects of your condition(s):

Feels far better presently, no continued stress and feels fit enough to return to work in previous duties

This will be the case for

or from 02 / 02 / 2023 to 19 / 02 / 2023

I will/will not need to assess your fitness for work again at the end of this period.

What your advice means

'You are not fit for work'

Your health condition means that you may not be able to work for the period shown. You can go back to work as soon as you feel able to and, with your employer's agreement, this may be before your fit note runs out.

'You may be fit for work'

You could go back to work with the support of your employer. Sometimes your employer cannot give you the support you need and if this happens your employer will treat this form as though you are 'not fit for work'. You do not need to get another of these forms.

For more information please visit www.gov.uk and type 'fit note guidance for patients and employees' into the search field. Fit note guidance for employers is also available.Data from **page 1** of this form may be collected to learn about national patterns of sickness absence. Individuals will not be identified. Find out more at www.gov.uk/dwp/fit-note-dataFill in the **Your details** section. You can ask someone to do this for you if you cannot fill in your details yourself.

Help getting back to work if you are employed
 If you've been off work or are likely to be off work sick for 4 weeks or more, you may be able to have a free occupational health assessment. You will be able to discuss what advice and support you need to help you go back to work sooner. You can ask your GP or employer to refer you. For further information:

- in England and Wales visit www.fitforwork.org or phone **0800 032 6235**
- in Scotland please visit www.fitforworkscotland.scot or phone **0800 019 2211**.

What your doctor's advice means
'You are not fit for work': Your health condition means that you may not be able to work for the period shown. You can go back to work as soon as you feel able to and, with your employer's agreement, this may be before your fit note runs out.
'You may be fit for work': You could go back to work with the support of your employer. Sometimes your employer cannot give you the support you need and if this happens your employer will treat this form as though you are 'not fit for work'. You don't need to get another of these forms from your doctor.
 For more information please visit www.gov.uk and type 'patients and employees' into the search field.

Fill in the **Your details** section. You can ask someone to do this for you if you cannot fill in your details yourself.

Dear Mr Gallagher

Our records show that we have written to you several times asking you to book a blood test following some abnormalities in your liver enzymes several months ago. To date you have not booked an appointment. I would urge you to book this appointment so we can further investigate the matter. Without further investigations, it is not possible to exclude possible significant underlying health problems.

If you do not book this appointment, we will have to assume you do not wish any further investigations.

Yours sincerely

Dr Antoni Pomian

Astley Bridge
Bolton
BL1 6RD

Dear Mr Gallagher

Following your recent blood test, please would you arrange to have a repeat sample taken.

Blood tests can now be arranged at the surgery. Please contact us to book an appointment.

A blood form is on the computer and will be printed out at your appointment.

Yours sincerely

Drs Pomian, Goldrick & Isat-Badat

Mr Michie
Consultant Surgeon
Royal Bolton Hospital

Dear Mr Michie

**Re: Mr William Gallagher
D.O.B. 09-May-1970
Address: 36 Oldhams Terrace, Astley Bridge, Bolton, BL1 6RD
NHS No. 499 742 9937
Tel No. 07368336731**

I am aware obviously COVID is causing significant delays in non-urgent patient care. This gentleman was initially referred by my colleague for a two week wait but after discussion this was downgraded. He was however due to have a scope as a result of the referral but obviously this did not go ahead due to COVID.

He is having ongoing symptoms similar to when he was referred and I wondered whether the plan for the scope was going to go ahead in the future or if there is anything else that may help in the interim.

Many thanks.

Yours sincerely,

Dr Charlotte Loftus
GPST3

50M left arm cellulitis associated with likely horse-fly bite.

PMH: Asthma. Smoking and alcohol cessation advice given due to excessive use.

Bloods in keeping with cellulitis but ALT significantly raised >160 - abdomen soft non tender. Advised on alcohol reduction and to see GP in 7 days for repeat LFT's and inflammatory markers if arm symptoms persist.

Wells score 0 - no risk factors for DVT. Treated with anti-inflammatories, antihistamines and 7 day course flucloxacillin TTO.

Safety netting provided.

Dear Mr Gallagher

I forgot during our clinic appointment this week to mention that you will need to get MRSA swabs of your throat and groin to check that you are not harbouring MRSA if you are having a general anaesthetic. I would therefore be grateful if you could take this letter to your GPs practice to get this arranged.

With kind regards.

Yours sincerely,

Dear Dr Pomian

William Shearer Gallagher DOB 09/05/1970**36 Oldhams Terrace, Astley Bridge, Bolton, BL1 6RD****Hospital No: RMC01838159 NHS NO: 499 742 9937**

Thank you for asking me to see this man who had a 9 year history of difficulty swallowing under the 2 week rule for suspected bowel cancer. I had a rather weird conversation with him today. He says that he vomits everything that he eats which is surprising as he is a quite a well-built man with quite a high BMI. He is terrified of any form of investigation without an anaesthetic which is why he has not been seen sooner. He has no other medical issues of note. He says that when he eats the food is returned entirely identical to as it goes down suggesting that if there is a problem here of a physical nature it would lie in the oesophagus. I can't see any alternative than to do a gastroscopy under general anaesthetic. We will take biopsies to exclude eosinophilic oesophagitis as well. I am taking him off the 2 week pathway.

With kind regards.

Yours sincerely,

Mandatory Information – will be returned if not complete

Greater Manchester Hospital Trusts are continually reviewing their referral pathways to speed up diagnosis and deal with increasing demand. It is therefore likely that your patient will have investigations prior to having an appointment or during their first hospital visit. It is important that patients are aware of this and the reason for their referral.

		Yes	No
1.	Has the patient been informed they are on a suspected cancer pathway, given appropriate support and advised they need to be available within the next two weeks?	☐	☐
	If no, please explain why:		
2.	Have you ensured that the telephone contact details are correct?	☐	☐

Page

	Landline Number:			
	OR Mobile Number:			
3.	Accurate functional status is needed to assess the most appropriate investigation and treatment. Please select a score from one of the following and enter in the score field:			
	Rockwood Score 1-3	Managing Well. Not limited by any comorbidities		Score: 2
	Rockwood Score 4	Vulnerable, not dependant, symptoms limit activities		
	Rockwood Score 5	Mildly frail, evident slowing, need help with daily activities		
	Rockwood Score 6	Moderately frail, need help with all outside activities and bathing		
	Rockwood Score 7-8	Severely frail, completely dependent for personal care		
	Rockwood Score 9	Terminally ill, life expectancy of <6 months		
4.	Is the patient capable of giving informed consent?			
	If No, has the next of kin/advocate been asked to attend?			
5.	Is the patient taking anti-coagulants or is the patient diabetic and taking metformin?			
	If Yes please give details:			
6.	Current BMI of patient:			Value:
7.	Current eGFR of patient:			Value:
	If the value is not appearing this has not been recorded in the last 3 months, therefore has the eGFR been requested today?			No events found.
				Yes No
8.	Does the patient require Translation or Interpretation Services?			
	If Yes, which language:			
9.	Please list any other impairments requiring specialist help:			

Referral Reason

(please explain why you are referring this patient on a suspected cancer pathway and include any relevant Family History)

dysphagia

VOMITING 5 HOURS

Case Summary**Disposition:**

Call is closed with no further action needed
Dx108

Selected care service:

No referral made.

Rationale:

Illness
 Warm to touch
 Vomiting
 Nausea/vomiting, with diarrhoea
 Vomiting red blood
 Pain going to arm, neck or jaw
 Assessment ended: call transferred to clinician
 Clinician transfer, caller refuses disposition
 Ambulance disposition refused
 Assessment ended: caller declined further advice
 No response vehicle disposition reached

Pathways Assessment:

An injury or health problem was the reason for the contact.
 Heavy bleeding had not occurred in the previous 2 hours.
 An illness or health problem was the main problem.
 User Comments: VOMITING 5 HOURS
 The individual was not fighting for breath.
 The main reason for the assessment was not a heart attack, chest/upper back pain, probable stroke, recent fit/seizure or suicide attempt.
 The main reason for contact was not new confusion, declared diabetic hypo/hyperglycaemia, a probable allergic reaction or ICD shock.
 The skin on the torso felt normal, warm or hot.
 Pathway selected - Vomiting and/or Nausea
 The individual had vomited.
 The individual also had diarrhoea.
 The individual had vomited red blood.
 Ripping or tearing pain of sudden onset in the chest, back or abdomen could not be confirmed.
 There had been no previous diagnosis of aortic aneurysm or Marfan's syndrome.
 There was pain going to the arm, neck or jaw.
 Early Exit selected
 Assessment ended because transfer to a clinician was required.
 The reason for transfer to a clinician was: disposition refused.
 User Comments: SAID HE WANTS A GP APPOINTMENT
 An ambulance disposition had been refused.
 Early Exit selected
 Assessment ended because transfer to a clinician was required.
 The reason for transfer to a clinician was: disposition refused.
 User Comments: CHECKED WITH CDM MARK ADV TO QUEUE AS PATIENTS [REDACTED] IS UPSTAIRS BUT DOESNT KNOW HES CALLING US
 HE WANTS TO GET A GP APPOINTMENT
 An ambulance disposition had been refused.
 Instructions given were: I'll connect you with a clinician from our service now.
 Early Exit selected
 The assessment ended because the caller declined further advice.
 User Comments: AT TIME OF CLINICIAN CALL BACK PATIENT HAD ARRIVED AT BOLTON GENERAL HOSPITAL AND SAID NO FURTHER ASSESSMENT REQUIRED. WORSENING GIVEN AND CASE CLOSED
 An ambulance disposition had been reached before the assessment ended.
 The call is closed with no further action required.

Advice given:
 None recorded.

Dear Mr Gallagher

Our computer records suggest that you are currently a smoker. Smoking prevalence in Bolton is very high and it can cause many health problems. Stopping smoking at any age can benefit your health.

There are many ways available to help you quit. Please find enclosed details of smoking cessation services where help and advice is available.

If we hold out of date information on you then you can update your records at <https://www.mysurgerywebsite.co.uk/secure/survey.aspx?p=P82607>

Yours sincerely,

Drs Pomian, Goldrick & Isat-Badat

Dear Mr Gallagher

Happy New Year! With the Christmas festivities out of the way we wanted to invite you to have your free NHS Health Check.

The NHS Health check is your chance to get your free midlife MOT. For adults in England aged 40-74 without a pre-existing condition, it checks your circulatory and vascular health and what your risk of getting a disabling vascular disease is. Blood pressure, cholesterol and diabetes checks are taken. As we get older, we have a higher risk of developing something dangerous like high blood pressure, heart disease or type 2 diabetes. Your NHS Health Check can spot early signs and help prevent these happening to you, which means you'll be more likely to enjoy life for longer.

After having this check done, you will be sent a **personalised** report showing your risk profile. It will tell you exactly what **your** cholesterol and sugar levels are.

We have hundreds of these checks to do, and we don't know how long funding will continue for, so please call **now** to book an appointment. Ensure you tell the receptionist it is for a 'NHS Health Check' as we offer extra time for these appointments. If you cannot attend the practice during the daytime then we can offer a limited number of evening slots.

We look forward to seeing you soon.

Yours sincerely,

Drs Pomian, Goldrick & Isat-Badat
