Dear Mr Clacher,

Your doctor would like you to have a urine test. The test form and sample pot are ready to collect from Reception. Please use one of the stickers from the top LHS of the form to label the pot).
Regards,
Weavers Medical Centre

The patient, with a history of COPD, diabetes, ischemic heart disease, opioid dependence, and previous chest infections, presented on 03/02/2026 with difficulty breathing and possible overdose, having been treated with nebulizer therapy (5mg salbutamol and 500mcg ipratropium bromide) and transported to Kettering General Hospital for further assessment. New diagnoses include a Capillaria aerophila chest infection and suspected overdose, with noted missing medications (buprenorphine, diazepam, pregabalin) and a reported unwitnessed seizure on the same day.

The patient, with a history of opioid dependency and overdoses, was found on 03/02/2026 with missing quantities of pregabalin, diazepam, and buprenorphine, which they admitted to obtaining illicitly due to ongoing pain; carers were unaware these medications were in the patient's possession. No procedures were performed, but the referral highlights concerns of neglect and risk of further overdose, with the information shared with the patient's GP and adult safeguarding services.

Short message service text message sent to patient (XaMiI)

Dear Mr Clacher,
Ref: CKD monitoring
Your doctor would like you to have a routine blood tests for monitoring purposes. Please click this link to make an appointment https://www.northnorthants.gov.uk/keeping-healthy/blood-tests
Alternatively you can book an appointment at North Northants Council by calling 0300 126 3000 (9am - 5pm Mon - Fri). There is no need to take a test form with you as the forms are on the system and can be printed at your appointment.

Kind regards,
Weavers Medical Centre

Describe the problem: COPD getting worse and I have run out of my inhaler TRIMBOW i checked with the pharmacy who said I cannot collect one until 14th November. This is affecting my breathing without it.
Attach a photo: No file attached
How long has it been going on for? Is it getting better or worse?: last week or so
Have you tried anything to help?: I regularly use my inhaler but do not feel that I am given enough TRIMBOW - I do have a COPD appointment booked for 18/12.
Is there anything you're particularly worried about?: Breathing without my inhaler Trimbow
Expectations: Prescribe more Trimbow as I have run out. Can I see a GP about being supplied with a nebuliser machine as I feel I am getting worse
When are the best times to contact you: Please call support staff on 01536 353436 as I live in supported accomodation
Contact method preference: Phone call
Preferred clinician to contact them: Anyone
Proxy name: Lamb, Jessica
Proxy contact number: 07917 352460
Proxy relationship to patient: Support worker
Patient preferred contact number: 07917 352460

NHS number: 6488167464
Patient name: Clacher, Duncan Campbell
Patient DOB: 21-05-1958
Patient gender: Male

Discussed homemade high cal high protein milkshakes that the support workers could prepare with Duncan - will send diet sheets with more suggestions of high cal snacks and drinks.
One of Duncans support workers asked if I could give build up shakes but advised that at this stage, whilst Duncans BMI is 28 and his weight appears to be stable/increasing, supplements not indicated. Discussed our aim to meet his requirements through food first approach. Both support workers understood and agree.
Agreed to review to check intake but advised if weight and BMI still stable at review will likely aim to discharge.
Social circumstances (XaIVT)
Pt has been living in Pennels supported living for drug/alcohol recovery for the last 12 weeks. Likely will be a resident there for up to 2 years until ready to live in the community again.
Support workers try and encourage Duncan with E&D and make sure he is involved in cooking/prep of food
Clinical history and observations (X76sV)
PMH from referral: Chronic obstructive lung disease (H3...), Sep 1993
O/E - depressed (2257.), Dec 2002
Asthma (H33..), Aug 2003
Gallbladder calculus (X308A), Sep 2007
Laparoscopic cholecystectomy (78105), May 2008
Type II diabetes mellitus (X40J5), Aug 2011
Prolapsed intervertebral disc (X70Cg), Jun 2018
Acute non-ST segment elevation myocardial infarction (XaIwY), Jun 2018
Alcoholic fatty liver (J610.), Sep 2020
Acute exacerbation of chronic obstructive airways disease (H3122), Feb 2021

Hx of drug and alcohol abuse and overdose. Pt currently living in MIND pennels rehab accommodation.
Duncan also heavy smoker - support workers think smoking not helping with his appetite.
Reason for referral (XaIpS)
GP referral - I would be grateful for your review on this this 67-year -old gentleman.
He is a known diabetic (Type 2), COPD/Asthma. He attended today to see me with his support worker with concerns about poor appetite and requested to have some nutritional shakes issued to him. He still manages to eat a little and he reported some weight loss.
Body weight - observation (X76C7)
Duncan unsure of his current weight, he feels he has lost weight however support workers feel that he has been maintaining weight since he got to Pennels 12 weeks ago
Last weight on S1 (86.6kg) indicates 5kg gain since referral weight in August (81.6)
Encounter administration (XM1Tp)
Tel call with Duncan and Sophie - support worker
For future appointments, call carers on 01536 353436
Letter sent to patient (9NC3.)
Action plan (community) (XaIjW)
Plan:
1. Aim for little and often approach with eating - aim to have small meal, snack or drink every few hours
2. Use nourishing drinks and high cal snacks diet sheets for more suggestions
3. Aim to have 1 fortified homemade milkshake per day
4. Continue to encourage and prompt oral intake
5. Review in December
Sources of information (XaIKS)
Nourishing drink ideas
Nourishing meal ideas
Dietary advice (8CA4.)
Patient encounter status (XaAEl) - Molly, Duncan, Sophie (support worker) and other support worker in background
Malnutrition universal screening tool score (XaJv3) 0
Body mass index index 25-29 - overweight (22K4.)
Informed consent given (XaLQR)
Preferred priorities for care discussed (XaXUA) - Difficult to understand patient clearly over the phone - very short answers and limited conversation. When speaking to Duncans support workers, they reported an increased dietary intake compared to Duncans reported intake.
Community Pharmacy - Amendment via PDSPrevious data: Ise Pharmacy, 75 St. Johns Road, Kettering NN15 5AZ Tel: 01536 519911
Activity: Remote Assessment/Treatment (45 minutes) Telephone with Patient

Dietary history (1F...)
Duncan reports his appetite up and down. Trying to eat a bit more now
Diet history reported by Duncan:
B: cereal
L: trying to have something, sandwiches, soups
D: no dinner
Snacks - no snacks
Drinks: lot of milk (full fat) - few pints per day

Carers diet history:
Duncan often has 2 meals per day and then lots of grazing on snacks
B: weetabix
L/D: cheese on toast, pie, corned beef and tomato sandwiches, ready meals
Snacks: tin of pringles, crisps, chocolate
Drinks: lots of milk
Carers report one day he ate a whole tin of pringles, other day he had whole cheesecake, however some days no interest in food. Intake very hit and miss.

Suggested food first approach - aim to have snack/drink/small meal every few hours.

Patient reviewed (6A...)
Plan (XaIVg) - No further concerns
Overview Notes (Y0028) - Attended by Dr Stuart Pavey, Helen Lorimer, Godson Asamani, Registrar

| 23 Sep 2025 13:43 | Surgery: AGBEJA, Yetunde (Dr) (Clinical Practitioner Access Role) |

Clinical history and observations (X76sV)
Here with his support worker
Has had a mole on the right forearm for years, unahcnged
noted marked increase in size this week and wanted it checked out
nil bleeding, itching,oozing
Nil chnage in color
Nil recet subnathing or trael to sunny areas
smokers, has quit alcohol
Consultation (Xa1qL)
Plan (XaIVg)
advised he looks like he knocked or itched it as it appears to have a surrounding erythema rather than an extension of the mole itself
advised to watch it, likely erythema will resolve or improve in next 1-2 weeks
agreed review in 2weeks with no changes at all
tcb if notices change in color, bleeding from the site
Clinical examination (XB001)
rt forearmL
Approx 0.5cm mole in the ventrasl aoet of the forearm, near the wrist
surrounded by a minimal erythema ?bruising
skin colored mole, nil vbleeding
hair follicles seen within
round, regular
nil sinister features

Urgent (X78uK)
GP referral
I would be grateful for your review on this this 67-year -old gentleman.
He is a known diabetic (Type 2), COPD/Asthma.
He attended today to see me with his support worker with concerns about poor appetite and requested to have some nutritional shakes issued to him.
He still manages to eat a little and he reported some weight loss.
Weight: 81.6 Kg ( 12 st 12 lb)
BMI: 26.55 Kg/m²

Although he has a recorded history of seizures, he is not currently on antiepileptic medication.
A review of his records shows that a neurology referral was made previously, but the only available letter indicates non-attendance at his scheduled appointment, and there is no clear evidence of subsequent specialist assessment.

Clinical Examination:
- Notable bilateral upper limb tremors
- No rigidity or bradykinesia
- Normal gait with appropriate arm swing

Investigations:
- Blood tests: generally unremarkable
- Mild renal impairment
- Low folate

In view of his progressive functional decline, possible seizure activity, and unclear neurology follow-up, I would be very grateful for your assessment and further management advice.

Many thanks for your time and support.

Regards
Plan (XaIVg)
For folic acid
review with diabetic nurse
Refer Neurology
Clinical history and observations (X76sV)
Reviewed
With support worker from MIND
Bloods discussed
He reported that he hasn't taken alcohol for several years and wanted to stop Thiamine and Bco strong
Also his support worker mentioned that he seemed to have "sleep seizure" this morning - eye closed but was shaking both hands and did not seem to respond initially. He has a history of seizure on record but not on any medications. Reviewing noted and letters confirmed the history and also a referral to the Neurology team. However, the only clinic letter from the specialist was to done to inform his GP about his non-attendance of his scheduled appointment. It is unclear if he never saw any specialist on the same issue again.
Consultation (Xa1qL)

Dear Mr Clacher,

Your blood tests show that your folate levels are low. We recommend increasing your dietary intake of folate (see the link below). We have also done a prescription for folic acid supplements which you can start now. This has been sent to your usual chemist.

Plan: Dear Colleague,

Many thanks for reviewing this 67-year-old gentleman with a complex medical history.
Background Medical History:

1. Type 2 diabetes
2. COPD
3. Asthma
4. Past history of excessive alcohol consumption
5. Depression
6. ? Seizure disorder (previously recorded, not on treatment)

He attended today accompanied by a support worker from MIND. He reported a 5-year history of tremors, which have now progressed to the point of significantly impairing his activities of daily living—he is unable to hold a cup or use a spoon effectively. He denied any family history of tremor. The tremor appears to be worsened by action or intention.
While he admitted to a history of excessive alcohol intake, he has been abstinent for several years.
His medication includes Uniphylline, which is known to potentially contribute to tremor.
Notably, his support worker reported what seemed like a "sleep seizure" earlier today—he was described as having his eyes closed, with bilateral hand shaking and an unresponsive period.

Eosinophil count - observation (42K..) 0.3 10^9/L [0 - 0.5]
Full blood count (424..)
Haematocrit (X76tb) 0.486 [0.4 - 0.54]

Plan: Referral to dietician

Dear colleague,
I would be grateful for your review on this this 67-year -old gentleman.
He is a known diabetic (Type 2), COPD/Asthma.
He attended today to see me with his support worker with concerns about poor appetite and requested to have some nutritional shakes issued to him.
He still manages to eat a little and he reported some weight loss.
Weight: 81.6 Kg (~ 12 st 12 lb)
BMI: 26.55 Kg/m²
In view of his history and request, I would be grateful for your review.
Many thanks
Yours sincerely
Clinical examination (XB001)
Alert, well
Notable tremors as before

Major: Chronic kidney disease stage 3 (XaLHI) (Ongoing Episode)
Chronic kidney disease stage 3 (XaLHI)

Jessica is doing medication.
He wil run out of nefopam and unphyllin in next few days.
Wil also need meds put on repeat - I will do.

Jessica also states very tremulous.
Has been like this since arrival.
Plan: uniphyllin and nefopam issued.
I will update repeat prescription.
From looking at notes looks like tremor longstanding - but Jessica will arrange F2F BP review.
Nefopam 30mg tablets - 84 tablet - 2 To be taken Three Times Daily
Uniphyllin 200mg prolonged-release tablets (Ennogen Healthcare International Ltd) - 42 tablet - take two in the morning and one at night

NHS number: 6488167464
Patient name: Clacher, Duncan Campbell
Patient DOB: 21-05-1958
Patient gender: Male
Patient postcode: NN16 9QR
Phone number: 07565 494416
Registered at: WEAVERS MEDICAL (K83051)
Describe the problem: Duncan has just moved in. We are struggling to get his medication sorted as prescription was cancelled according to Ise Pharmacy and we don't know why. also he has very bad shakes in his hands, he reports that he has always suffered with this but it has got so much worse and he is unable to eat and drink properly
Attach a photo: No file attached
How long has it been going on for? Is it getting better or worse?: Duncan reports he has always had the shakes. We have only known him two weeks (He is living in supported accomodation through Kettering MIND) and we would like him to have review of his health and meds. He was signed to your practice on 22nd July.
Have you tried anything to help?: He has only just come to live at Pennels 175 Beatrice Road
Is there anything you're particularly worried about?: He is finding it increasingly to eat and drink - He cannot hold a cup properly without spilling it everywhere even with a straw. eating is so hard for him unless it is toast
Expectations: Have an urgent appointment
When are the best times to contact you: anytime - call Kettering Mind (Pennels office) on etiher
01536 353436 or mobile 07917 352459 ask for Jessica Lamb (Support worker)
Contact method preference: Phone call
Preferred clinician to contact them: Anyone
Proxy name: Lamb, Jessica
Proxy contact number: 07917 352459
Proxy relationship to patient: Support worker
Patient preferred contact number: 07565 494416

Previous GP - Lakeside Healthcare

1. GP share - Duncan would like an appointment to have a health check and from his presentation I think this is required. The Property is a HMO with Risk of other males potentially taking illegal drugs and other risks as NNC have been updated by Duncan that people come to the property invited by other tenants and cause a problem.
GP appointment - Duncan will be able to get a taxi to the surgery and would need to be given time and not miss the appointment due to his mobility and breathing/pain.
Also requires check on Diabetic Care.

However, was discharged from KGH yesterday and moving to Kettering today.
Adult safeguarding concern (XaXP4)
Plan (XaIVg) - Telephone call to Debbie SW on 07880 138317 who advised that the pt has moved to Kettering today and she will update me, appointment not required at this time. Debbie was with another client so unable to discuss further so I advised I would await further contact.
Action taken (YA794)
GP Sharing Information received from SW Debbie Dykes and attached to the records.
Pt to be moved to a rehabilitation placement 17/07/25 in Kettering.
S2S to remain involved.

History: spoke to the EMAS -Tech- Dave
he confirmed the name/DOB / address of the patient.
ambulance was called by the social worker.
reason- SOB, because of medical and social issue
due to the Mold in the property.
the Technician has advised hospital admission but he declined.
the chest sounds global crackles.
productive cough.
he was able to walk up and down. and he was not breathless.
the patient is on the phone to another social worker. now
and they are insisting that the property is not suitable for living and if he goes to hospital then they can arrange an alternate housing.

he now agreed to attend hospital with the crew.
Plan: the crew will take the patient to ED now

History: Thu 22 May 14:15 - Pavandeep Hundal
Assigned to Reception
Dear Team,

Following a recent medication review with this patient, I have concerns about their overall wellbeing and safety

Patient appears confused during the call when i called him drowsy? and disclosed suicidal thoughts by his house mate
Lives with a housemate but has no reliable support network.
Reports that others are taking his money and medication.
Currently smokes 40 cigarettes/day and does not want support to reduce.
Admits to non-adherence to medications, sometimes taking double doses when forgotten.
Has a crisis line but no consistent engagement or external support.
Is experiencing low mood, poor appetite, and general instability.

Given these concerns, please can this patient be referred to the social worker as a priority for a holistic assessment and support?
Many thanks

Dear Duncan,
We are contacting you about a trial looking at the safety and effectiveness ofÂ an approved medication for COVID-19, to see if it can help prevent long-lasting or recurring COVID-19 symptoms in those at high risk for severe illness. We are seeking participants both with and without COVID-19. Please read the attached brochure, and if you are interested, kindly contact us via email at research.k83002@nhs.net, with the subject line â€œCOVIDâ€?. Kind regards, Lakeside Healthcare Research."

Problem: Type II diabetes mellitus (X40J5)
Problem: Chronic obstructive lung disease (H3...)
History: SVGP List-pls increase metformin to 1g bd if agree and also needs copd rescue pack abx, has chest infection
(I called SW-checked that his A1c is suddenly up > 50%. she says she has checked for osmotic sx-none. also no abd pains or weight loss) likely cause is non compliance as gets mixed with meds. she has referred to SG.
Plan: I have tasked GP who filed the latest A1c for their attention and follow up.
For dossette box he needs to d/w his GP.
Issue of chronic obstructive pulmonary disease rescue pack (XaW9D)

| 15 May 2025 13:38 | Surgery: WALDEN, Stacey (Ms) (Nurse Access Role) Entered at: Lakeside Healthcare |

History: D/W safeguarding regarding medication concerns, asking for dossett box, advised that need o go through phramacy team, tried to call nominated chemist 264014, did not answer
Benefit from dossett box.
Paient seemed to have capacity during my assessment, but recognised that he sometimes gets muddled with medications, so doesnt comply
His Dm has deteriorated so now increased meds so would defineitely befit from dosse box.

Overview Notes (Y0028)
Tue 13 May 12:15 - Emma Kibble
Hi,
This patient handed in a letter to me today during his appointment from his friend. Patient wishes to be referred and agrees wi9th what has been said. Permission given to discuss with patients friend Shane Searle regarding. Please see letter below.
'To whom this may concern,
My name is Shane Searle and I live with Duncan. I can attend this appointment today as I am busy. But I would like yo express my concernabout Duncans health, his medication and his living environment. He really needs to be moved to sheltered accomodation so he can be looked after. If you would like to know more please feel free to contact me on 07730 779001 between 9am-2pm Wednesday-Friday'
Patient states living in a shared accommodation (HMO) with 7 other people, landlord is not very good. Half of them are drunk and half are on drugs. Black mould on the walls, not getting enough air but has working appliances within his room e.g show, toilet and sink.

Pt/friend can refer to ASC and outline what support the pt requires.
Unclear whether pt has consented to referral other than to the internal safeguarding team.
Housing concerns.
Medical concerns - requires a memory assessment with GP if this is a concern - unclear if this has been booked.
Task back to request pt is contacted.
Can be sent a link to ASC if that is what is required.
Discussed with Safeguarding Nurse BH.

Overview Notes (Y0028)
Wed 14 May 13:55 - Emma Kibble
Assigned to Ms Krista Alford
Hi,
Apologies for the confusion, the patient consented for me to send the referral to our internal safeguarding team, I am unsure about anything further than that. I will inform patient or friend to make a GP appointment regarding memory as I don't think I have done this yet.
Would you still like me to contact regarding adult social care?

No consent for a referral to ASC, await update.

| 14 May 2025 15:27 | Surgery: KIBBLE, Emma (Health Professional Access Role) Entered at: Lakeside Healthcare |

History: Patient attended reception thinking I was trying to call him
Saw patient to discuss task response
Patient wearing same clothes as yesterday - appears unwashed
Examination: Discussed with patient following task response from safeguarding.
Patient wants help leaving his accomodation. Advised to fill out form or contact Adult Social Care regarding this on the link/number provided. Sattes he cannot sleep at home unless during the day due to police and general noise.
Says he is unable to clean up as he is constantly distracted.
Patient requested I send this information to his friend Shane as unable to get hold of on the phone.
Request fro Shane to also assist patient in making a GP appointment regarding memory issues as has been seen before here for this issue. Unsure to lack of follow up.
Plan: Task sent to Safeguarding with update

Summary Care Record Update - This patient's preference is for only core items to be included in their Summary

called back after diccussion with senior GP. explaiend to his house mate that we are unabel to prescribe the Subutex medication from OOH.
seeing as he is having withdrawl symptoms they will have to contact A&E/ambulance.
Mr.Shane stated that Mr clacher has some Xananx that he was wondering if he can take them to feel better. I have explained that Xanax is not for withdrawl tereatments and can have its own seideffects and withdrawl symptoms and can make him feel worse.
Mr. Shane stated he is concerned about hisother medications and they are not sure how he self administers his medications and they are concerned that he does not have a safety/social worker for him. I have explaiend that he will have to cotact his GP for these concnerns and for better continuity of care.
Plan: 1-to go to A&E for withdrawl symptoms.
2- safety netetd for worseing of teh symptos.
3- contact OWN GP for concerns regarding his repeat medications usage and the safe and efective way to have them.

Dear Mr Clacher,
We have received a letter from S2s suggesting you may need a review and pain management review. Please book an appointment when convenient for you.
Did you know that, as well as calling or visiting the practice, you can use our online consultation platform called Anima on our website at https://www.thelakesidesurgery.co.uk/news/anima-change to get in touch with us? It's convenient, secure, and could save you time.
Best wishes, Dr Jaroszkiewicz

Plan: SMS sent to patient to book in for review- See NJ 2/2/25
Relevant current medication (Y2447) - 14mg of buprenorphine daily
Comment note (XaIg6)
We are writing to inform you that Duncan Clacher is currently prescribed 14mg of buprenorphine daily. We kindly request that no opiate medications be prescribed to him while he is on buprenorphine.
Duncan has expressed a desire to begin reducing his buprenorphine dosage but has reported experiencing pain. As we work on reducing his buprenorphine, we would appreciate it if you could explore appropriate pain management

History: - OOH GP
- Right lower quadrant pain (Xa84T)2/7. Pain resolved now, no current pain.
- Felt hot earlier.
- No N/V
- last opened bowels yesterday.
- No diarrhoea, No pr bleed.
- No dysuria, no frequency of urination, no haematuria.
- better now.
Plan: - offered f2f appointment at the base but declined, says better; safety netting - seek urgent medical attention if pain ongoing.....

| 05 Sep 2024 11:48 | Surgery: SHARRATT, Alisha (Care Co-ordinators) Entered at: Lakeside Healthcare |

patient unable to account for the medications he got yesterday says he wants more
i asked why is it because of pain but he simply repeated he wants more because he wants it
i explained i will be unable to provide any more as its a controlled substance and he is been unable to provide a logical reason for wanting more
patient was not happy with this
i advised they contact their own gp
i notice a letter from s2s march 2024 which recomends bupronorphine to the patients own gp and as tommorow is a normal working day the patient can contact their surgery
at the time of my assesment the patient did not appear intoxicated or under the influence but i was not able to do a more through exam as the patient became unhappy and decided to leave .
has capacity in my judgement to decide matters related to his health at the time of my assesmeent he gave me no reason to think he is not of sound mind and he denies having taken any other drugs that would influence his reasoning ability .
will send a task to the safeguarding team toi ensure this patient gets support if he needs it or agrees to have some

Short message service text message sent to patient (XaMiI)

Dear Mr Clacher,
We will shortly be inviting you to book your annual review appointment. As part of your review we would like you to have some blood tests. To book a blood test appointment please go to https://bit.ly/3uCbLCc
A form is not needed for the test.
Kind Regards
Lakeside Healthcare

Short message service text message sent to patient (XaMiI)

Dear Mr Clacher,
Lakeside Healthcare operates a system to review the health and medication of all patients on repeat medication and with a long term health condition.
As part of your ongoing care and safe prescribing of medication we are required to ensure the medication you are taking remains both appropriate and effective.
Another message will follow with a link to book your initial review. You do not need to have your blood tests before this review.
Kind Regards
Lakeside Healthcare
Patient telephone number (9159.) - 07902 310611

Short message service text message sent to patient (XaMil)

Dear Duncan,
This is a message from Lakeside Healthcare Research. We are contacting you to make you aware of a new study we are conducting into preventing cardiovascular events that you may be eligible to participate in. If you would like to declare an interest or request further information, please feel free to contact us directly by emailing research.k83002@nhs.net and quote the reference â€˜PREVENTâ€™ and one of our team will be in touch.

Kind regards,
Lakeside Healthcare Research

Dear Duncan,
This is a message from Lakeside Healthcare Research. We are contacting you to make you aware of a new study we are conducting into a new treatment for people who have Asthma that you may be eligible to participate in. If you would like to declare an interest or request further information, please feel free to contact us directly by emailing research.k83002@nhs.netÂ and quote the reference â€˜FLASHâ€™ and one of our team will be in touch.

Kind regards,
Lakeside Healthcare Research

History: S2s letter 27/3/24; suggestion or ref to pain clinic.
I note he was seen by them previously last in 2022 but discharged as didn't want to take their suggestions.
Rang today to see if we could support/re refer but phone off/no answer on mobile & his old recovery worker answered the alternate phone number.
will send sms to see if we can offer him support/consider re referral.

Dear Mr Clacher,
We have received a letter from s2s to see if it would be worth considering re referral to the pain clinic. Unfortunately I couldn't get hold of you today to discuss this but when it is convenient for you please book an appointment to speak with us if you would like us to re refer you.
Did you know that, as well as calling or visiting the practice, you can use our online consultation platform called Anima on our website at https://www.thelakesidesurgery.co.uk/news/anima-change to get in touch with us?
Best wishes, Dr Jaroszkiewicz
Lakeside Healthcare

|---|---|---|
| 15 Feb 2024 11:30 | Surgery: Auto-filed Entered at: Lakeside Healthcare | Entered: 20 Feb 2025 14:44 |

Clinical Information: Alcohol Withdrawal
Platelet count - observation (42P..) 206 10^9/L [150 - 450]
Full blood count (424..)
Red blood cell distribution width (XE2mO) 14.6 % [9 - 15]
Mean cell haemoglobin level (XE2pb) 28.9 pg [27 - 33]
Mean cell haemoglobin concentration (429..) 33.3 g/dL [30 - 36] - This value has been converted from: 333.0 g/L
Total white blood count (XaIdY) 9.6 10^9/L [4 - 11]
Red blood cell count (426..) 4.99 10^12/L [4.5 - 6]
Monocyte count - observation (42N..) 0.8 10^9/L [0.2 - 1]
Eosinophil count - observation (42K..) 0.3 10^9/L [0 - 0.5]
Mean platelet volume (42Z5.) 9.9 fL [7.5 - 11]
Lymphocyte count (42M..) 2 10^9/L [1.5 - 4]
Neutrophil count (42J..) 6.4 10^9/L [2 - 7.5]
Haematocrit (X76tb) 0.433 [0.4 - 0.54]
Mean cell volume (42A..) 86.8 fL [76 - 97]
Haemoglobin concentration (Xa96v) 144 g/L [130 - 180]
Basophil count (42L..) 0.1 10^9/L [0 - 0.2]
Nucleated red blood cell count (4266.) 0 10^9/L [0 - 0.1]
Full blood count Report, Normal, No Further Action. Review done by MORJARIA, Anisha (Dr) at Lakeside Healthcare (NHS Northamptonshire Icb - 78h) - 21 Feb 2025 10:16

GP Assessment Notes (Y1461)
I called and spoke to Duncan this afternoon for a follow up call (3rd attempt).
Duncan said he isn't doing too good. Duncan said he has a loose tooth in the back of his mouth. I asked Duncan if he has been to see the dentist. Duncan said he doesn't have a dentist. I have advised that Duncan could contact the Bupa Dental Care at 8am any day for a same day emergency appointment. I will send Duncan the contact number for Bupa Dental Care via SMS.
I asked Duncan how things have been since we last spoke. Duncan said he was suppose to go for a scan on his back but he wasn't sure where it was so he didn't attend. Duncan said he have of preferred an appointment at Kettering. I asked Duncan if he contacted the hospital appointment contact centre to ask for an alternative location as he would of been able to do that. Duncan said he didn't. Duncan said the pain is really bad and the pain medication isn't helping. Duncan said he feels he needs to see the GP again to discuss his back pain. I look at the pre bookable appointments and I have booked Duncan an appointment on 13.10.23 at 16:15pm with Dr Rai (Forest Gate). I have sent an SMS confirmation text. Duncan asked if I could send this appointment in a letter to him. I will type and send a letter via the post.
I asked Duncan if there was anything I could support him with that wasn't medical related. Duncan said no he is ok with everything else. We have agreed to discharge from the Social Prescribing team as no further support is needed at present.
Social prescribing offered (XaaEA)
GP Assessment Notes (Y1461)
I have sent Duncan the contact number for Bupa Dental Care via SMS

Signposting to GP (general practitioner) (XagO6)
Referral by nurse practitioner (XaAqZ)
Social prescribing offered (XaaEA)
Goal identification (Ua1LR)
GP Assessment Notes (Y1461)
I will request a ventolin inhaler for him via the lakeside prescription box
GP appointment on 25.08.23 at 4pm (Forest Gate)
We have agreed to follow up after his GP appointment (11.09.23)
Shared decision making (XaYjg)
General wellbeing - Satisfactory (Y0967)
Date (Xa0ck)
GP Assessment Notes (Y1461)
I called and spoke to Duncan this afternoon for a triage call.
Duncan said he is doing fine. I explained who I am and why I was calling.
Duncan said he has run out of blue inhalers. I have advised Duncan I will request a ventolin inhaler for him via the lakeside prescription box.
Duncan said he is mainly struggling with back and leg pain which is making it difficult for him to walk. Duncan said he would like to see a GP about his back and leg pain. Duncan said he would like to try pain patches but the surgery has things on his record that shouldn't be on his record. Duncan said the surgery has him down as an alcoholic and a drug user but he doesn't use drugs and he hasn't drank in 7 years. Duncan said he was referred to S2S a few years and he attends regular. Duncan said S2S want to start him on injection but he would rather pain patches. I advised Duncan to speak to the doctor about this. I had a look for a bookable GP appointment and I was able to book a GP appointment on 25.08.23.
Duncan said everything else is ok. Duncan said he has applied for PIP 6 months ago and he received a letter stating it could take up to a year to get a decision.
Duncan said he takes a lot of medication and would like to discuss this with me. I have advised that I am not medication and he would need to discuss this with a GP or Pharmacist.
I asked Duncan if there is any other support he feels he needs from a social element. Duncan said he is doing ok.
We have agreed to follow up after his GP appointment to see how things are going.
Patient given advice (8CA..)

Social prescribing offered (XaaEA)
GP Assessment Notes (Y1461)
I called Duncan this morning for a triage call following a task from a nurse practitioner. No answer when I called at 9:30am.
I tried to call again at 9:40am and no answer. I have left a message to let Duncan know I tried to call. I will rebook Duncan's triage call in my next available telephone slot and I will send an SMS with details on.

Referral to social prescribing service (XaaEC)
Initial patient assessment (XaIBH)
Wed 12 Jul 16:23 - Mrs Sharon Webb
Assigned to Social Prescriber
under investigation for early dementia
states no his own
no support network
could do with your input
thanks sharon

Short message service text message sent to patient (XaMiI)

Dear Mr Clacher,
A blood test has been organised for you.
The form has been sent electronically and does not need collecting.
Blood tests for adults are via booked appointment only using online or by phone.
https://www.kgh.nhs.uk/phlebotomy-department-blood-tests
Phone: 01536 494411 (0930-1500)
If you have been advised your blood test is urgent please use phone line to book.
Thanks, sharon webb

Problem: Chronic obstructive lung disease (H3...)
History: URGENT List-07902 310611 forgot to order inhalers - called 111
called on mobile-says not got his Trimbow and the blue inhaler. gets 2 blue inhalers at a time.
Examination: sounded comfortable over the phone-didnt stop to cough or catch breath.,
Plan: Noted trimbow and 2 SABA issued on 22 June. says he checked with his chemist and they havn't got them. Tried toe xplain that he should have them at the chemist. for safety issued 1 SABA inha. Spoke to Jackie-supervisor about this call-she will ring him and explain about the issue. also noted journal entry of 4th July-COPD nurse calling him for review. He needs to have a review re use of inhalers.
Ventolin 100micrograms/dose Evohaler (GlaxoSmithKline UK Ltd) - 200 dose - inhale 2 doses as needed (this is additional inhaler issued in addition to the 2 inhalers issued on 22 June)

Blood test due (41B1.)
Short message service text message sent to patient (XaMil)

Dear Mr Clacher,
According to our records you require a blood test to continue safe prescribing of certain meds. Please have the blood test done as soon as possible to avoid any delay in future issues.
The form has been sent electronically
Blood tests are via booked appointment only using online or by phone.
https://www.kgh.nhs.uk/phlebotomy-department-blood-tests

Dear Mr Clacher,
We are running a Clinical Trial looking at the effectiveness of a new treatment for COVID-19 Infections. If you test positive for COVID-19 and would like to take part, please read the poster attached to check it is suitable for you and call the Research Team on 01536 748282. One of our clinical team will then speak to you to confirm if you are eligible to take part and book you in to see one of our Research Doctors.

Thank you for reading this message and the attached information.
Yours sincerely,
Lakeside Healthcare Research Unit

Short message service text message sent to patient (XaMil)

Dear Mr Clacher,
A blood test has been organised for you.
The form has been sent electronically and does not need collecting.
Blood tests for adults are via booked appointment only using online or by phone.
https://www.kgh.nhs.uk/phlebotomy-department-blood-tests
Phone: 01536 494411 (0930-1500)
If you have been advised your blood test is urgent please use phone line to book.
Thanks,

test done as soon as possible to avoid any delay in future issues.
The form has been sent electronically
Blood tests are via booked appointment only using online or by phone.

Dear Mr Clacher,
Our records indicate your urine test is now due.
Please arrange to collect the associated pathology form and urine sample container from The Lakeside Surgery on Cottingham Road or our Forest Gate branch site on Forest Gate Road at your earliest convenience.
Please return the sample bottle to either of the surgeries once completed.
It is important you supply this sample.
Kind Regards
Lakeside Healthcare

Short message service text message sent to patient (XaMil)

Dear Mr Clacher,
A blood test has been organised for you.
The form has been sent electronically and does not need collecting.
Blood tests for adults are via booked appointment only using online or by phone.
https://www.kgh.nhs.uk/phlebotomy-department-blood-tests
Phone: 01536 494411 (0930-1500)
If you have been advised your blood test is urgent please use phone line to book.
Thanks,
Lakeside Healthcare

Patient telephone number (9159.) - 07902 310611
Short message service text message sent to patient (XaMiI)

Dear Mr Clacher,
According to our records you require a blood test to continue safe prescribing of certain meds. Please have the blood test done as soon as possible to avoid any delay in future issues.
The form has been sent electronically
Blood tests are via booked appointment only using online or by phone.
https://www.kgh.nhs.uk/phlebotomy-department-blood-tests
Phone: 01536 494411 (0930-1500)
Kind Regards
Lakeside Healthcare

Dear Mr Clacher,
Our records indicate your urine test is now overdue.
Please arrange to collect the associated pathology form and urine sample container from The Lakeside Surgery on Cottingham Road or our Forest Gate branch site on Forest Gate Road at your earliest convenience.
Please return the sample bottle to either of the surgeries once completed.
It is important you supply this sample.
Kind Regards
Lakeside Healthcare

Dear Mr Clacher,
A blood test has been organised for you.
The form has been sent electronically and does not need collecting.
Blood tests for adults are via booked appointment only using online or by phone.
https://www.kgh.nhs.uk/phlebotomy-department-blood-tests
Phone: 01536 494411 (0930-1500)
If you have been advised your blood test is urgent please use phone line to book.
Kind Regards
Lakeside Healthcare

Dear Mr Clacher,
Our records indicate your urine test is now due.
Please arrange to collect the associated pathology form and urine sample container from The Lakeside Surgery on Cottingham Road or our Forest Gate branch site on Forest Gate Road at your earliest convenience.
Please return the sample bottle to either of the surgeries once completed.
It is important you supply this sample.
Kind Regards
Lakeside Healthcare

Dear Mr Clacher,
We are contacting you with regards to a new Asthma study which we think you may be eligible for and which we are running in our Research Department. If you would be interested in hearing more about the study then please email us on research.k83002@nhs.net and quote the reference 'LOGOS', and we will be in touch with some information about the study. Please find attached a brief information sheet regarding the study.

Dear Mr Clacher,
We would like to share this useful inhaler guide with you. Our priority is ensuring that your asthma control is at its best. By doing this and also potentially switching you to an alternative type of inhaler, we can help you make a great environmentally friendly switch for the climate. Please view the attached leaflet.

To reduce medicine waste PLEASE CHECK YOUR PRESCRIPTION IS CORRECT BEFORE YOU LEAVE THE PHARMACY. Medication returned before you leave the pharmacy can be given to another patient. If medicines are taken home they have to be destroyed. Please also ensure you return any inhalers to your pharmacy for correct disposal.
Thank you for your help reducing waste.

History: depressed due to back pain 07902 310611

pt has been having back pain for a long time
seen in Pain clinic - suggested to have a medial branch block but denied at that time - see letter
Plan: explained to th epatient that medications will not help and if he wants to go for the procedure suggested by Pain clinic I am happy to put referral for that- pt understood and said that he will think about it

Dear Mr Clacher,
On review of our records, it has been identified by the Surgery that you may benefit from loaning one of our home blood pressure machines on a long term basis. By monitoring your own blood pressure at home, this can become an invaluable tool for the optimisation of your condition in collaboration with the Clinical Team here at Lakeside Healthcare. If you feel this is the case, a blood pressure machine can be collected from the Lakeside Surgery on Cottingham Road between 9am â¬_ 5pm Monday to Friday. A relative may also collect this on your behalf.

Dear Mr Clacher,
The JCVI have advised that some people would benefit from a 3rd dose (This is different from the booster dose). See link below. https://bit.ly/3iYk8C0
You have been identified by NHSE as possibly requiring a 3rd dose. If you wish to have the 3rd dose, please contact us on 01536 204154. The Vaccination Centre will then contact you to arrange an appointment. You may wish to discuss with your specialist about when would be the best time to have this dose in line with your treatment program.

History: TPC during Cv19 Pandemic
ATSP "s2s want our gp to contact their gp re pain management for this pt, the s2s contact is russell kennedy - 07827984008, the gp is Dr Verona Govender - 07917442383 as per task"
Spoke to Dr Govender (GP @ S2S) @ 0929 - in a meeting, adv to call back in 10 mins. Called back at 1024 - confirmed pt demographics - On max dose of Buprenorphine for many years. Not tested positive for any other drugs - did test +ve for Benzo. Whenever tried to come off Buprenorphine c/o pain.
Steady decline in memory and cognition noticed by S2S worker, only met Dr Govender a couple of times so she is not sure and not done AMT/6CIT
Pt states not sure if drinking etoh, but states to S2S that gets Pabrinex when goes into hosp - communication re recent admission not clear from pt so Dr Govender not sure.
Dr Govender would like pt to have Ax by Pain/Othopedic team re Optimisation of back pain - on pregabalin (max dose) or advise on what can be done to hopefully can reduce Buprenorhine use as concerned re long term impact on liver.
Diagnosis: ? Cognitive decline ? vascular dementia
? worsening prolapsed disc/back pain
Plan: Adv Dr Govender - pt should be booked for double appt to rv memory and PMH of prolapse disc and how that be optimised or managed. Adv to req Russel/pt to book double appt via reception with GP. Nil appt with myself available today

Short message service text message sent to patient (XaMiI)

Dear Mr Clacher,
I had tried to call on a couple of occasions regarding our consultation 13/08/2021 to assess how well you have responded to your new inhaler but it had gone to voicemail. Please could I ask if you could contact the practice to arrange another appointment to discuss this further.
Thanks, Amir Morjaria

Dear Mr Clacher,
I will re-issue the medications that you have misplaced to be collected from our nominated pharmacy. Please store it in a safe place so you don't lose it again.
I will send you a steroid card as you are on prednisolone.
Please view your document here (link will expire in 28 days): florey.accurx.com/d/92yvjbz7fh
You'll need internet on your phone (or you can open the link on a computer). If you cannot open it, please contact us.
Thanks,
Neville Varghese

OOH Incident Report to Lakeside Healthcare

| | |
|---|---|
| 29 Apr 2021 09:20 | Surgery: KANYANGARARA, Fadzai (Dr) (Clinical Practitioner Access Role) Entered at: Lakeside Healthcare |

History: Please see OOH Report - (Own GP: Needs Urgent Appointment)

TPC- C19 pandemic

called OOH - had abx for chest infection - feels coming back again after a week

thinks he has another chest infection - ongoing issues with chest - has COPD - cant cough up the phlegm - coughing all the time last day - knows he has chest infection - wheezy when goes to bed - feeling SOBOE - no ankle swelling - no PND - no orthopnoea - no weight loss- Smoker (137R.)- DNA for CXR - treated with co-amoxiclav 12/4/21 second cause
Examination: speaking in full sentences - no audible wheeze
Diagnosis: ? COPD
Plan: Smoking cessation advice (Ua1Nz)- f2f appt for examination in view of already had 2x abx

Dear Mr Clacher,
We have been trying to contact you to advise you to attend the pathology department at the Diagnostic Centre for a blood test as per letter we have received from KGH. Please advise when you have had the test so we can book a follow up with a GP.
Thanks, Anne

History: Telephone triage during covid pandemic.
PC- Patient requesting antibiotics for chest infection
HPC- Commenced on doxycycline 100mgs x2 initially then 1 daily and prednisolone 30mgs for days on the 7/2 for a chest infection. On the 24/2 was prescribed co-amoxiclav for 7 days. Also had BT and C-Xray and advised to book appt with own gp
Examination: Patient is able to talk in full sentences, no cough during duration of call, no anxiety detected, talking in a calm/relaxed manner.
Diagnosis: ? Chest infection NOS (XE0Xs)? exacerbation of copd
Plan: Discussed with patient due to recent several antibiotic courses, its best to see for face to face to do chest auscultations.
Patient states he will attend CUCC today as open till 8.

|---|---|
| 24 Feb 2021 11:30 | Surgery: COLLIER, Martyn (Nurse Access Role) Entered at: Corby Urgent Care Centre |

c/o: Malaise
History: Recent attendance to ED after accidental OD - took extra meds to combat SOB.
Sent home - NAD.
Attended today as does not feel well.
Feeling shaky and states that his speech is slurred.
ED placed patient on to ABX and steriods ? which - patient unsure of name.

PMHx noted
Allergy status noted
Examination: Triage observations noted.

Appears systemically well.

Normal colour to skin.
Not sweaty or clammy.
Alert and orientated.
Moist mm
CRT < 2 seconds.
FAST NEG - no abnormal gait.
Patient does have minor pill like tremour to both hands.
GCS 15/15

No signs of trauma to chest.
There are no visible lesions or scars.
No cough or fever.
No cyanosis.
No SOB/DIB/DOE – no PEAK flow necessary.
Able to speak in full sentences and normal sitting position - no use of accessary muscles/tripodding.
Good equal chest movement - no crepitus. No flailed segment.
No pain on palpation or movement.
Hands – NAD.
Pain score 1/10.
Chest - minor rubs throughout.
Chaperone offered and declined.
Investigation: Full blood count
Urea and electrolytes
C-reactive protein measurement
Electrocardiographic procedure
Diagnosis: LRTI
Treatment: Advice given
Length of illness and expectations discussed.
Can return if acutely concerned to UCC but otherwise if unresolved must seek GP for advise/further management.
Red flag advise given, discussed and understood. If symptoms develop patient to seek urgent ED/999 assessment.
To take low level analgesia as necessary.
Patient is happy with the plan and understands.

History: Nton/OOH: states that he left his Pregabalin at his sister's in [redacted]: neither Duncan [redacted] possesses a car, bus travel is impossible etc. Not totally clear why he took all his pregabalin capsules to his sister's? Long list of medication noted, says he is OK with all of those which doesn't make a lot of sense to me. Issue = 'excruciating pains above me hip'.
Diagnosis: Medication requested (8B3H.)
Plan: Adv that I'll send a prescription to Mr P for four capsules (at Duncan's request); following this it transpired that the computer doesn't allow me to issue in view of recorded sensitivity ('drowsiness' which is hardly an unusual side effect of pregabalin??) VM left twice advising him we can't issue a prescription.

History: Telephone triage during covid pandemic
spoke to pt obtained I.D. and consent.
spoke to pt, h/o COPD, c/o on going cough with breathlessness for 2/52, about to finish his 2nd course of ABX's, has had 2x courses of oral predisolone.
Says his chest has improved but remains slightly breathless.
pt not in any distress, able to complete sentences with ease.
unable to expextorate any phlegm (requesting a script for Carbocisteine to help with this, which he has had in the past, also ran out of his ventolin inhaler in the night. )
pt able to do his daily activitiues, washing and dressing etc.
no sats probe at home, unable to record his RR, says no fever.
uses fostair and ventolin inhalers.
Was seen earlier this week by the Rocket Team, and spoke to his own GP.
PMH:COPD, Diabetes type II, Prolapsed disc, M.I.
Smoker.
Meds: see System 1 ( listed on previous entry)
Allergic to Pregabalin.
Diagnosis: excerbation of COPD, (improving) request script for meds.
Plan: pt reassured, advised rst, to monitor symptoms and if any worsening symptoms to review/ sos
continue using inhalers as directed.
Continue with current ABX's.
Issued a script for longer course of ABX's: Doxycycline 100mgs o.d. 7/7, Ventolin inhaler 2xpuffs when breathless, Carbocisteine 2x caps tds , script sent to pts Pharmacy, offered code, pt declined the code.
advised f/u review with either GP or Rocket Team.
any problems over weekend to ring back on 111/ sos
Carbocisteine 375mg capsules - 120 capsule - Take 2 three times a day for 1 week then 1 three times a day
Doxycycline 100mg capsules - 8 capsule - two now then one daily
Salbutamol 100micrograms/dose inhaler CFC free - 200 dose - Take one or two puffs when required for breathlessness

Plan: In view of breathing issues and worsening COPD control, offered HV, pt is happy with this, will add to visit list.

| | |
|---|---|
| 09 Jul 2020 17:07 | Surgery: BRAY, Sarah (Ms) (Nurse Access Role) Entered at: Lakeside Healthcare |

History: visit requrst in view of ventolin use and rev of COPD.Was treated for chest infection in June with good effect.Pt is on polypharmacy-??full concordance. Pt reports that he has run out of ventolin-/?not had for the last month although there have been issues. a theophylline level blood test was also suggested but pt hjas not had this done.PT also c/o painful back and nerve type pain in both legs-is taking Pregabalin 150mg-x3/day according to pt. Looking at records, it was suggetsed that he take 300mg BD.
Pt lives in shared accommodation-has his own room. Continues to smoke-he reports x10/day. lAST cxr IN mAY WAS nad. Has been under S2Steam for coccaine use
Examination: Pt fully alert and conversant, no respiratory distress noted, no cough
O/E: equal AE, scattered mild creps and wheeze as expected, slightly tachycardic(??if pt has ventolin and has ben using but he reports he has run out), well perfused.General anxiety about chest symptoms and back pain-he also takes sertraline.Discussed rationale for inhalers and the use of a spacer to aid effectiveness-pt seems aware that ventolin is for PRN use only. ??if Rockett have been involved-pt is willimng tyo be s/b them for review of COPD management
Discussed pain control and the use of Pregabalin-adv to incr to x2 BD as per script-monitor effects-contact surgery if not controlling pain adequately
BM was elevated-is on Metformin 500mg BD-will check last Hba1c-i suspect his diet is poor
Diagnosis: poorly controlled COPD
Pain
Plan: new script for ventolin plus a spacer device
??refer to rockett for review
Rev DM meds-?/up to date bloods
??pain clinic rev

Discuss meds - 07902 310611

Worsening back pain recently- Known chronic back pain.
Pain in lower back and going down both legs.
no numbness/ change of sensation. no weakness, no saddle anaesthesia, Bowels and waterworks normal.
Worse when trying to walk up the stairs or standing for a long time
no sharp pain just dull ache in lower back
no UTI symptoms.
no red flags.
Wants patches- noted s2s letter 7/01/2020- oopiod depedence syndrome
discussed that acute pain - tried OTC medication - advised to try gel to help wth localised pain.
Examination: alert, speaking in full sentences
Diagnosis: Back pain
Plan: 1. If no improvement/ worsening symptooms incl red flags discuss with GP
Patient happy to try gel . Sent exercises via text
Additional SCR dataset uploaded under COPI Regulations (Y237d)
Fenbid Forte 10% gel (Advanz Pharma) - 100 gram - apply 3 times/day

Dear Mr Clacher,
Here's some simple back exercises and stretches you can do at home. This will help ease lower back pain and prevent the symptoms returning:
https://www.versusarthritis.org/about-arthritis/conditions/back-pain/#exercises-to-manage-back-pain
Kind Regards, Dr Sohal

History: TPC during cv-19 pandemic:
PC: request for medication.

[redacted].
Whilst in Leeds accidentally left his medication there, therefore requesting his regular medication and S2S medication.
Under S2S
Has done this once before in april
otherwise well in himself
Examination: alert, talking in full sentences, calm polite, no resistance
Plan: 1) Explained i will issue his regular medication today but will not be issued early again if re-occurs
2) Will not be able to issue the S2S medication as he is unsure of name - advised to contact S2S
Additional SCR dataset uploaded under COPI Regulations (Y237d)
(R) Aspirin 75mg dispersible tablets - 28 tablet - take one daily
(R) Atorvastatin 40mg tablets - 28 tablet - take one daily
(R) Beclometasone 50micrograms/dose nasal spray - 200 dose - two sprays to both nostrils twice a day, when symptoms controlled reduce to one spray twice a day to both nostrils
(R) Bisoprolol 2.5mg tablets - 28 tablet - take one daily
(R) Fostair 200micrograms/dose / 6micrograms/dose inhaler (Chiesi Ltd) - 120 dose - two puffs twice daily
(R) Gabapentin 300mg capsules - 168 capsule - take 2 tds
Stopped 05 Jun 2020 Clinical grounds (started pregabalin) by KANYANGARARA, Fadzai (Dr)
(R) Glyceryl trinitrate 400micrograms/dose pump sublingual spray - 180 dose - one to two doses under the tongue,

being an anxious man. smoker--says that he has cut down to 10 roll-ups a day, but his record shows that some years ago, he admitted to smoking six a day.Has a chronic dry cough, no phlegm, says its stuck in his chest. He denies heamoptysis; he has had 1 episode of Rt sided chest pain that resolved with belching after drinking fizzy squash. No anemaia, no JVP elevation; no cervical Ln, no Virchows node. Using his salbutamol many times a day. Chest auscultation: poor AE at rt base but otherwise poor AE globally, no creps or wheeze. No abdo pain. Nocturia ++ so he says that he has cut down on the amount of fluid he drinks to reduce this. Sats 92%, desaturates to 90% on walking 20 metres; HR 102 reg; 167 / 101mmHg (was 140/70 in December). Last CXR was 2014.He says that he does not feel unwell enough to be in hospital.
Diagnosis: 1) anxiety exacerbated by over use of salbutamol inhaler. 2) Viscous phlegm related to poor fluid intake
Plan: 1) Counselled as to the impact that poor fluid intake makes on his phlegm and risk of constipation and in the long term kidney disease. 2) Advised that his smoking is making his COPD worse, and there are risks of lung cancer--he says that he will try and stop. 3) Trial of carbocisteine. 4) I will discuss with the referrer GP FK the merits of having a CXR. 4) Counselled to reduce salbutamol to max QDS. Keep taking the Fostair: it is working, but is not designed to alleviate the problem that he presents with today. 5) Called Pickfords chemist---there are still manufacturing supply issues with theophylline, so will need to stay on uniphylline for the moment.

| 06 May 2020 15:56 | Surgery: BEEKEN, Harry (Nurse Access Role) Entered at: Lakeside Healthcare |

History: The pt feels that he can't cough up his phlegm, is more SOB when he lays down. He has had 2 courses of Doxycyline and prednisolone which he says have not helped at all. He has recently had his Fostair increased to 200/6 but he says that is not helping either. Recently his Theophylline was swapped to uniphylline because of manufacturing supply issues---he wants to cahange back to the original drug. PMHX COPD, asthma, smoker, obesity---chronic disc prolapse. MI (2018)
Examination: The pt seems anxious, sweating, fine bilateral tremor which he says he has had before--he admits to

Overview Notes (Y0028) - have rang pt , had a chat pt wanted a gym refer, said cannot do he refer at the moment because of the COVID19, however, i can put on waiting list and will do the refer when open. pt happy for this.

of weeks, not sure if has chest infection, has a chesty cough and wheeze. Otherwise well in self. Still smoking- reports around 10 a day
Examination: Alert and comfortable, no signs of respiratory distress, able to speak in full sentences without any issues, chest- scattered wheeze and creps bilaterally
Plan: Prescribed course of doxycycline and prednisolone, ensured patient understood how many to take daily of each- i.e. doxcycline- two capsules today and one capsule once daily from tomorrow, prednisolone- 6 tablets to be taken once a day. Patient has understood this. Advised seek medical attention if symptoms no better in 3 days time or seek urgent medical attention sooner if symptoms worsening or any other issues at all. Advised return for a COPD review after completing current course of abx and steroids. Strongly advised smoking cessation, signposted to smoking cessation service in the practice. Discussed manufacturing issue with theophyllin, exp;ained uniphyllin is equivalent medication, and as patient has chest infection on board at present, return for a COPD review after completing course of abx and steroids. Patient is happy with this.
Capillary refill time (XSFup) < 2 Seconds
Pulse rate (X773s) 78 bpm
Temperature (X75Xk) 36.6 C
Blood oxygen saturation (calculated) (XaIai) 97 %
Respiratory rate (X774f) 16 breath/min
Doxycycline 100mg capsules - 8 capsule - take two capsules today then one capsule once daily from tomorrow
Prednisolone 5mg tablets - 30 tablet - take 6 tablets, once a day

History: ongoing lower back pain for many years.
has got progressively worst.
some confusion with physiotherapy - had DNAs
MRI June 2018 - L5/S1 nerve root impingement.
some weakness in and numbness in the toe.
no saddle paraesthesia.
has woken up at night because of the pain. long standing. no night sweats or weight loss.
come for some pain relief options as pain not tolerated.
unable to cope at home due to pain resulting in reduced mobility.
Examination: alert/orientated
lower back - no midline tenderness.
lower extremities - reduced power 4/5 l5/s1 myotome left side. myotomes otherwise intact. reduced sensation l5 left side. dermatomes otherwise intactr.
Diagnosis: Radiculopathy (XSEKr)
Plan: 1. number given for physiotherapy.
2. refer to spinal team.
3. increase pregabalin to 75mg 2tds (from 2 bd)
4. if any concern/deterioration - review sos.

History: spoke to paramedic James as 111 sent them as patient called for morphine prescription and also mentioned sob-paramedic has confirmed patient identity.
patient was given espranor on the 2/5/19 by S2S service for chronic back pain, would like that again. paramedic has assessed him for sob and his obs are rr-18, sao2-96%, hr-77, bp-113/61, t-36.8, bm-7.9, gcs-15-James says patient is calm, not sob, obs as above
No fever or colds or coughs
no SOB or chest pain
Smokes 15/day
No recent Travel history
No nausea/vomiting/diarrhoea
E/D- well
Passing urine ok
PMH-copd, asthama, benzodiazepine, dm, mi, intervertebral disc.
Medications-GTN spray, clenil, ventolin, aspirin, atorvastatin, beclometasone, bisoprolol, lansoprazole, metformin, monomil, pregabalin, ramipril, sertraline, ticagrelor, theophylline
Allergies-cats
Plan: I cannot see on si any espranor prescription being issued-patient saying he was given them by s2s service-cant understand why not given any other meds-patient needs to be assessed at base and as he lives in corby cuc is better for him-he will go to cuc-happy with advise. any changes/worsening can assess 111 again

History: spoke to patient on phone
has been seen in urgent care center 4 days ago with sob - trop taken and negative
given antibiotics and steroids which have now finished
no chest pain at present but had pain in chest on breathing in earlier
history of copd
tonight feeling sob again - cannot finish own sentance
Plan: suggested patient come to be seen in a&e however he said he is alone and cannot come
patient happy for me to call 999
worsening advice given and to call back to 999 if symptoms worsen or concerned whilst waiting for ambulance

History: missed physio and discharged but pt denies received appt wishes to see them tasked FG secs to see if physio can see again, pregabalin making him drowsy at time but has helped pain whereas no effect with TCA or gabapentin, complaint with sertraline but only increased dose few days ago, no thoughts of self harm, pt happy to make an appt to see GP in clinic to go through pain needs and depression etc in meantime, i will ask FG secs to ask physios to see pt, ortho wont operate. pt happy with plan and stated would make an appt.
long chat about analgesics, pregabalin does help pain despite drowsiness, wishes to continue at current dose and states will let us know how he gets on as quality of life better on it,
Sensitivity: PREGABALIN - drowsiness

History: Pt in as "I want a patch for pain", "want to stop bupranorphine tablets " from S2S.
Cagey about drug and depence issues in the past- read letter from s2s together and established previous issues.
Today tells me he has chronic lower back pain associated with pain going down bothe legs. MRI confirms nerve entrapment.
has seen PT and ortho who will not offer any suregry as don't feel it would benefit him.
Discussed the options for analgesia are limited to amitriptyline/gabapentin/pegabalin and any thing prescribed- i will notify s2s. Pt accepts this.
No features of ces.
(Substantial broad L5/S1 disc protrusion, narrowing the
lateral canal recess on either side, particularly the left side, with
impingement on the traversing left S1 nerve root. Broad L4/5 disc
bulge, narrowing both lateral canal recesses to a moderate degree,
with impingement on the traversing right L5 nerve roots. )
Examination: Normal gait (stick noted).
Diagnosis: Chronic back pain associated with disc prolapse x2
Plan: As above- letter to s2s, and rv in 6/52 if no better.

History: recent MI 1 month ago. read leaflet for metformin as heart been racing now and again - has had some chest pains. called ambulance 2 days ago. was ok. has been drinking during daytime. wonders if because of that.
pmh and dhx noted.
Plan: adv no recent renal functions to comment but should be ok to take metformin. adv ideally to go to UCC to get ecg today if feels still has heart symps. adv also to speak to GP on monday re fresh bloods if worried.

General Letter to S2S

| | |
|---|---|
| 05 Dec 2017 11:23 | Surgery: SINGH, Shalini (Dr) (Clinical Practitioner Access Role) Entered at: Lakeside Healthcare |

History: duty clinic callback--spoken to colleen at S2S- asking re buprenorphine patches-patient has requested these.
s2s dont make recommendations, they feel he needs to be referred to pain clinic.
he DNAed appt yesterday, but spoke to ET.
advised he needs to see own gp and discuss pain and possible referral to pain clinic.
buprenorphine patches are not prescribed as effectiveness is similar to cocodamol, unless specifically advised by pain clinic.
Telephone encounter (9N31.)

tried to call Collen from S2S back, no answer machine. I have made an appt for patient with Dr Mellor on 18th Dec at 9.00am. I will ring again on Thursday when I am back in the offce to confirm this is okay.

| | |
|---|---|
| 08 Dec 2017 09:08 | Surgery: CROWTHER, Adam (Dr) (Clinical Practitioner Access Role) Entered at: Lakeside Healthcare |

History: discussed back pain he advised that perhaps that he is addcited to buprenorphine. he missed recent pain clinic referral
Diagnosis: Opioid type drug dependence (XE1YR) (New Episode)
Plan: advised back to s2s for help with his buprenorphine addiction and trial nefopam for pain relief in interim
Nefopam 30mg tablets - 30 tablet - take two 3 times/day
ETP FP10: Printed On Fri 08 Dec 2017 09:18 By Dr Adam Crowther

| | |
|---|---|
| 08 Dec 2017 10:53 | Surgery: CROWTHER, Adam (Dr) (Clinical Practitioner Access Role) Entered at: Lakeside Healthcare |

History: discussed with s2s explained that in my opinion and as mr clacher disclosed he has an addiction to buprenorphine hence starting him on buprenorphine patches whilst he is buying from the street is not appropriate. i have started him on an alternative pain relief initially and asked s2s to kindly mange his addiction to buprenorphine with a reduction regimen
Plan: advised that i am more than happy to have a conversation with S2Ss medic if they feel that would help in explaining my opinion

History: came in for med review. seen s2s in october not coem here sicne wants referral to pain team. not had any diazepam sicne december and manging ok. paisn radite to both legs at tiems. had a cruch injury 15 years ago to bakc. no baldder bwoel probelsm contineus to smoker. getting bepenorphien from the CRI team
says main probelsm is the back pain right now. feels stable from the mental health view point
Examination: 138 / 82mmHg left paraspinal spasm abd soft not tender no weakens in leg gait ok scitic stretch negative
Plan: plan 1. arrnage blodos and stool test.
2. mri spine.
3 refer pain management team.
4. red flags reg spien and cuada equina discussed. needs a&e if any.
5. arnrae blkodos and stool test and rev 3-4w. sos if cocnerns meanitme
Medication review done (XaF8d)
STarT (Subgroups for Targeted Treatment) Back Screening Tool (XaX6F) 9 -
1 My back pain has spread down my leg(s) at some time in the last 2 weeks: agree -1

History: Concerned about gradually decreasing ET. Now breathless on mobilising approx 150 yards. Salbutamol inhaler does not help.
Recently breathless at night when lying down (new symptom)- sleeps with one pillow. No PND.
Smoker approx 55g of tabacco/wk. Has been smoking for approx 44 years. No hx of haemoptysis. Productive cough- usual for him, white sputum.
States gets intermittent left sided chest pains- none now. Occur at rest at night- dull ache, no radiation. Last 10 minutes, completely resolve on their own
Applied for PIP- declined and told he doesn't have COPD. Requested test to prove has hx of COPD. Explained given long smoking history likelt that he does have COPD, rather they felt that it was not significantly affecting his ability to work.
Examination: able to talk in complete sentences. No increased work of breathing
sats 96% pulse 84bpm
HS 1+ 2+ 0
Chest clear on ausucltation
Plan: 1) BNP
2) CXR
3) routine ECG
4) review with results

| 06 May 2016 15:04 | Surgery: ABOUD, Karam (Clinical Practitioner Access Role) Entered at: Lakeside Healthcare |

History: Had USS atrophic right testes and 2x epidydimal cysts. No pain or new symptoms. has been having frequency of urine for a whole year including 7-8 times at night. Dribbling of urine (X76Y0)feelings of incomplete emptying of bladder. no dysuria. No sexually active. pain in lower back has been on-going for 3 weeks. no weakness in arms or legs. no numbness or tingling. no saddle anasthesia. no urinary or bowel incontinence. No weightloss.

| | | |
|---|---|---|
| | Entered at: Lakeside Healthcare | |

US scan of scrotum (585D.)
ULTRASOUND TESTES . . HISTORY: 2-3 weeks right testicular lump not painful. . . REPORT: No testicular masses are seen. Right testis appears slightly atrophic and marginally smaller in size compared to its counterpart. Otherwise, no testicular abnormalities are seen. Clinical swelling corresponds to a 6mm simple cyst in the head of the right epididymis. I further note a simple cyst in the head of the left epididymis measuring approximately 5mm. No other significant findings of note seen.
Reported by ACHARYA
US scan of scrotum Report, Abnormal, Need to speak to doctor (Patient Informed). Review not applicable

Appointment Letter to Mr Duncan Clacher

| | |
|---|---|
| 24 Aug 2015 11:33 | Surgery: WATKINS, Helen (Clinical Practitioner Access Role) Entered at: Lakeside Healthcare |

History: chronic rhino-sinusitis for over 5-10 years. worse at times, but no pattern that he can see.
no loss of sense of smell. no nosebleeds. tried nasal sprays years ago, unsrue if helped. no seasonal change.
Examination: no polyps in nose. no perforation or abnormal tissue seen
ENT - ears normal
Diagnosis: Chronic rhinitis (XE0Xx)
Plan: trial nasal spray
History: long standing back pain of over 10 years.
no red flags - pain radiates to right knee. no blader or bowel problems. no loss of sensation or power.
no recent change to pain. seeing s2S and they are weening down buprenorphine, so this is worsening pain some days.
no trauma to back.
patient said tried amitriptyline in past and did not work, no allergy as such.
Examination: reflexes normal.
SLR normal.
sensation normal
Plan: trial neuropathic and advised self refer physio.
see if any changes to pain or if not settling.
not suitable for buprenorphine patches (reasons as given in above consultation)
advised to book in with diabetic nurse for review
Amitriptyline 10mg tablets - 28 tablet - Take one at night
Stopped 24 Aug 2015 Change to medication treatment regime by WATKINS, Helen
(R) Beconase Aqueous 50micrograms/dose nasal spray (GlaxoSmithKline UK Ltd) - 200 dose - two sprays to both

and has withdrawal symptoms.
they amount of drug delivered is very variable, so he might withdraw.
keep on sertraline.
consider adding in amitriptyline/neuropathic to regimen.
(R) Sertraline 50mg tablets - 28 tablet - take one daily
Sertraline 50mg tablets - 28 tablet - take one daily

| | |
|---|---|
| 23 Jun 2015 11:14 | Surgery: WATKINS, Helen (Clinical Practitioner Access Role) Entered at: Lakeside Healthcare |

History: phone call from Natasha Swift at S2S.
currently on buprenorphine and they have managed to ween it down to 12mg, however may need to step up to 14mg as getting slight withdrawal
they are referring to MIND
discussed use of buprenorphine patches.
he says that he is still getting a lot of back pain.
explained that patches are not a good choice for uncontrolled/unpredictable pain, so if were to consider this, then would need to be stable.
also it may not be the best option for dealing with back pain (he is addicted to this and so built up a tolerance)
Plan: not for patches at moment,
they are transferring him to shared care to try and monitor his withdrawal.
to make another appointment to see what else can try for back pain (perhaps a neuropathic)

| 03 Jul 2015 14:44 | Surgery: WATKINS, Helen (Clinical Practitioner Access Role) Entered at: Lakeside Healthcare |

History: patient come in today, as thought should be started on bupronorphine patches and for follow up on mood.

I spoke to s2s and think that maybe some confusion.
they are still altering the dose of bupro and so starting a patch is not suitable.
patches are useful for people with predicted and stable pain, which is not the case with this man.
think that other adjuvants such as amitriptlyine may help.

mood - feeling a bit better on sertaline, no thoughts of self harm. sleeping not great at night, but some of this may be withdrawl.
back pain on right side, radiation down leg to right knee. said had MRI many years ago, long standing back pain. (10 years)
no bladder or bowel disturbance. no acute change.
Examination: lumbar back pain.
reflexes and sensation normal
Plan: burponorphine patches are not suitable for pain which is not stable, particularly someone who is addicted to it

History: seeing substance 2 substance and they have suggested a few changes to his medication.
was addicted to duhydrocodeine, but now on bupronorphine from S2S team.
they have a hand written list (not signed by anyone) asking whether he should be switched to a buprenorphine patch.
he says he is currently on 14mg per day, all of which he is getting from s2s.
last letter from them however says he was on 22mg.
chronic back pain. no red flags. pain goes doen right leg to knee.

mood low and not feeling motivated. citalopram for many years and they have suggested trying a change in medication.
no thoughts self harm.
Plan: will discuss at de-brief changin him to patch, as isnt usually something that we do. also no formal letter from S2S saying this.
will get back to patient
change to sertaline, come of citalopram and change to this.
see again in one month for follow up, before if any wrosening of mood
Sertraline 50mg tablets - 28 tablet - take one daily

Standard chest X-ray (535..)
HISTORY: COPD. SOB.Clubbing. . CHEST: Heart not enlarged. There is a possible ill defined opacity projected through the left heart medially at the left lung base. This may be a combination shadow but given the history CT would be advisable to exclude an underlying lesion. Please let us have a request including recent renal function results. . Report telephoned/faxed to surgery.
Reported by PETERSON

| 26 Jul 2013 17:41 | Surgery: WEST, Rosaline (Dr) (Clinical Practitioner Access Role) Entered at: Lakeside Healthcare |

History: Lost Dihydrocodeine, Diazepam & Citalopram after collecting week's worth today. Re-traced steps, hasn't found them. Went to Police - no crime number as simply lost. Requesting more.
Diagnosis: Medication requested (8B3H.)
Plan: Explained unable to re-issue, advised OTC analgesia until next script due.

HDL & LDL Cholestero: The LDL Cholesterol has not been calculated because the serum
Triglyceride is greater than 4.5 mmol/l.
This equation is only valid if the patient is fasting.
AKI Stage: NA
Clinical Information: Type 2 Diabetes Mellitus (NIDDM) Fasting
Serum creatinine level (XE2q5) 76 umol/L [60 - 120]
Serum urea level (XM0lt) 6 mmol/L [2.5 - 7.8]
Serum potassium level (XE2pz) 4.8 mmol/L [3.5 - 5.3]
GFR calculated abbreviated MDRD (XaK8y) > 60 mL/min/1.73m*2
Serum triglyceride levels (XE2q9) 10.4 mmol/L [0.8 - 2.3]
Serum cholesterol level (XE2eD) 7.1 mmol/L [3 - 5.7] - !
Serum HDL cholesterol level (44P5.) 0.7 mmol/L [0.9 - 1.6] - !
Serum sodium level (XE2q0) 140 mmol/L [133 - 146]
Urea and electrolytes (X77Wi)
See www.emrn.org.uk for interpretation
of MDRD estimated GFR.

significant OCD symptoms reported.
Earlier this year separated from his partner of 9 years: says this was mutual due to her drinking; has grown up children [redacted] and grandchildren from a previous relationship; doesnt see them; states they want to see him but he cant be bothered. Sees his other children [redacted] at least 3 or 4 times a week; Has 2 brothers in [redacted] who he doesnt see; has one good friend;
Lives in a private rent with 3 other males since separation; doesnt really do much shopping "I cant be bothered, I dont like queues". One of his housemates does most of his shopping.
Says stays in most days watching tv.
I explained to him that based on info in this assessment it did not warrant a referral to a psychiatrist. He declined to complete PHQ 9 as did one on 26.6.12. I questionned if he wanted to make changes to his life and he said he does. Discussed options available. Does not want Well Being or bereavement counselling.
Plan:
1. He feels he would like to pursue counselling: given info to self refer to Mind and Safe Haven for counselling.
2. Advised to engage in pleasurable activities: He suggested going to the pub and I said these needed to be positive.
3. Encouraged to consider volunteer work to get himself out of the house.
4. He is chasing up his prescription for anti-depressants as he did not think they were on repeat.
5. I have given him an appt to review him on 7.8.12 at 10.30 a.m. to see if he is motivated to refer to counselling and make changes.
He is happy with plan. Task to Dr Whittaker updating him.

Referred by Dr Whittaker.
Clients view of referral: "Im not sure why Im here, I wanted to see a Psychiatrist, I feel low".
Past mental health history: States detained under Mental Health Act in late 70's in Scotland: "I smashed the house up". Says mum took him off the Section.
Been advised to consider bereavement counselling in past but did not do this. Well Being Team mentioned in 2010 but unclear if every referred to them.
Medication see screen.

Behaviour: initially avoided eye contact; reasonable rapport, says quieter these days. Says can easily get angry and irritable. Gives a history of being in prison "many times" for fighting, stealing, violence. Last in prison 3 years ago for 20 weeks for drink driving. No current violent or aggressive behaviour reported.
History of cutting arms when in teens. No previous suicide attempts reported. Currently has no thoughts plans or intent of self harm or suicide, able to guarantee safety; children are protective factor;
No illicit substance misuse reported. Says has drank heavily in the past but not really drank excessively since last Christmas.
No major cognitive impairment; has capacity to make decisions and choices;
Says has ongoing chronic bronchitis, thinks he may have COPD, asthma, says feels as though he constantly has a hand tremor; not obviously observable today;
No psychotic symptoms, no self neglect reported.
Reports having 4-5 hrs sleep per night, fluctuating appetite, says lost 2 stone in 3 months and GP aware of this; lacks motivation, enjoys watching TV.
Says his childhood was not great. Father was an alcoholic who verbally abused the children. Parents separated and are now deceased. Was sexually abused as a child by somebody outside of the family. Not sure where this person is now; sees no point in reporting it as it would be "his word against mine"; parents were never aware of this; [redacted] died earlier this year; states feels [redacted] death has brought feelings about his earlier years to the fore. No

Glycosylated Hb: Reference ranges:-
Normal 19 - 42 mmol/mol Hb (IFCC) or 3.9 - 6.0% (DCCT)
Target <53 mmol/mol Hb (IFCC) or < 7.0% (DCCT)
HDL & LDL Cholestero: The LDL Cholesterol has not been calculated because the serum Triglyceride is greater than 4.5 mmol/l.
This equation is only valid if the patient is fasting.
Result(s) telephoned
Liver Function Tests:
Clinical Information: Type 2 Diabetes Mellitus (NIDDM) Fasting
Serum urea level (XM0lt) 4.6 mmol/L [3.3 - 6.6]
Serum creatinine level (XE2q5) 66 umol/L [60 - 130]
Serum sodium level (XE2q0) 140 mmol/L [135 - 145]
Serum potassium level (XE2pz) 4.3 mmol/L [3.6 - 5]
Serum alanine aminotransferase level (XaLJx) 21 iu/L [5 - 40]
Serum albumin level (XE2eA) 45 g/L [35 - 50]
GFR calculated abbreviated MDRD (XaK8y) > 60 mL/min/1.73m*2
Serum total bilirubin level (XaERu)
NA
!
N/A (Lipaemic)
Haemoglobin A1c level - IFCC standardised (XaPbt) 62 mmol/mol - PLEASE NOTE:- dual reporting of Haemoglobin A1c from 15/6/09
Serum cholesterol level (XE2eD) 6.6 mmol/L [3 - 5.7] - !
Serum fasting glucose level (44f1.) 9.6 mmol/L
!
RAISED fasting glucose ( > 6.9 mmol/L).
Fasting
HbA1c level (DCCT aligned) (XaERp) 7.8 %
Serum LDL cholesterol level (44P6.) - NA
Urea and electrolytes (X77Wi)
See www.emrn.org.uk for interpretation
of MDRD estimated GFR.
Serum triglyceride levels (XE2q9) 14.6 mmol/L [0.8 - 2.3]
Serum HDL cholesterol level (44P5.)
NA
!
N/A (Lipaemic)
Serum alkaline phosphatase level (XE2px) 111 iu/L [30 - 120]
Serum TSH level (XaELV) 1.6 miu/L [0.35 - 5.5]
Serum fasting glucose level;Glycosylated Hb;HDL & LDL Cholestero;Urea and electrolytes;Liver Function Tests;Serum TSH level Report, Abnormal, Make an appointment to see doctor (Patient Informed). Review not applicable
