12-Jan-2023 Ms Tricia Murray Other

Administration (P3) Consultation Request for abx by treatment room nurse. Note no abx issued here previously. i have attempted to call patient to determine allergies but number is incorrect. I note a dc letter in docman where he was issued flucloxacillin previously on dc following wound suturing.

12-Jan-2023 Miss Gail Robertson Other

Intervention (P3) Dressing of wound Patient attended practice for dressing review. Patient has a small dry crusted wound on his R side forehead. Wound cleaned using normasil, due to the wound being dry and crusted over, it has been left undressed. Suspected localised infection, will request anti-biotics from GP. Patient is happy to keep wound undressed and clean, has been advised to attend out of hours if it gets worse over weekend. Next review Monday 12th.

10-Jan-2023 Miss Monica Stark Other

Intervention (P3) Dressing of wound Patient came to practice to accompany ***** to her appointment. Patient had small wound on right side of his forehead, no clinical signs of infection at this time. Wound was cleaned using saline, intrasite gel applied and small dry dressing in place. For review on Thursday.

4. HOW WE USE YOUR INFORMATION

The information you have provided will be used by the GP Practice to carry out its various functions and services including scheduling appointments, ordering tests, hospital referrals and sending correspondence.

Your information, including your name, gender, date of birth and address, will be passed to NHS National Services Scotland where it will be held on the Community Health Index (CHI). This information is used to register you with the GP Practice, transfer your medical records between GP practices in the UK, make payments to GP Practices for medical services provided, and to process and issue medical cards, medical exemption certificates and entitlement cards.

NHS National Services Scotland shares information about you within NHS Scotland to assist in the provision and improvement of NHS services and the health of the public. When we do this, we make sure that the information which identifies you as a person and your health information are separated or anonymised. Health condition and treatment information which could identify you will not be used for research purposes by the NHS unless you have consented to this.

For more information on how NHS National Services Scotland uses your personal information visit www.nhss.org. If you have any queries or concerns about how your personal information is used by the NHS please ask for the leaflet 'Confidentiality - it's your right', visit the Health Rights Information Scotland website at www.hris.org.uk or ask your GP surgery.

NHS National Services Scotland is the common name of the Common Services Agency for the Scottish Health Service.

5. PATIENT DECLARATION

I declare that the information I have given on this form is correct and complete. I understand that, if it is not, appropriate action may be taken.

To enable NHS National Services Scotland to confirm my eligibility to lawfully register with a GP and for the purposes of prevention, detection, and investigation of crime, relevant information from this form will be disclosed to the NHS Business Services Authority, NHS National Services Scotland, the Home Office, Identity and Passport Service, HM Revenue and Customs, the General Register Office and Local Authorities.

Dear Dr Lal

Patient Name: Duane McMillan
Patient date of birth: 28/06/1990
Patient Address: 44 Woodstock Road, Lanark, ML11 7DJ

Diagnosis: Right Weber B fibula fracture.

Outcome: Moonboot, review in 4 weeks' time.

Duane fell off his motocross bike approximately 1 week ago landing heavily on his right leg. He had a closed fracture of his lateral malleolus. There was no other injuries. He has been in a moon boot since then and has been partial weight bearing with the aid of crutches. He described no other injury. On examination his foot was neurovascularly intact. There is no significant swelling. He was tender over the lateral malleolus only with no medial tenderness. He had x-rays performed in his boot and weight bearing today. There was no evidence of talar shift. His fracture is well aligned. I think we can continue with this management plan and he can weight bear as comfortable through the boot. We will review him in 4 weeks' time to ensure that he has gone on to unite. Duane is happy with this plan.

Yours sincerely

Consultant: Virtual fracture clinic

Dear Dr Lal

Patient Name: Duane McMillan
Patient date of birth: 28/06/1990
Patient Address: 44 Woodstock Road, Lanark, ML11 7DJ

Please accept our apologies for the delay in receiving this letter. There was an IT issue which has now been rectified and appropriately DATIX

Diagnosis: Undisplaced Weber B fracture right ankle (12/10/20)

The ED notes and imaging have been reviewed.

As per the ED notes, he was on a dirt bike and fell causing an inversion injury to his ankle. He is a part-time roofer. There is no drug history or medical history.

Examination: in the ED revealed bruising medially and laterally over the malleoli. There was a tender lateral malleolus. There was no tenderness over the base of the 5th metatarsal. The pulses were present. The CSM was satisfactory. The patient came into the ED using his own crutches. The x-rays done in the ED revealed an undisplaced Weber B fracture of the right ankle. The ED placed the patient in a moon boot.

Plan: Continue moon boot
Mobilise non-weight bearing with crutches
Review in fracture clinic in one week with x-rays right ankle, AP and lateral on arrival
To be reviewed earlier if there are any ongoing/residual issues
Nurse to discuss VTE prophylaxis

Yours sincerely

FTR. Apparently this youngster refuses to attend the Clinic and there have been 2 if not 3 phone calls to say that he therefore will not come.

I was uncertain of any definite diagnosis when I saw him in February and clearly that is now going to be discussed between him and the rest of his family.

I would of course be glad to see him back if there is any change of mind regarding attendance.

Dear Dr Porteous

DUANE MCMULLEN **86 EGLINGTON ROAD IRVINE (28/6/90)**

Diagnosis: minor buckle fracture of 4th and 5th metacarpal

History: This 14 year old boy attended the A&E Department on 16 November having hit his hand on a wardrobe.

Examination: There was swelling and tenderness around the ulnar side of his hand. X-ray showed minor buckle fractures.

Treatment: Volar slab, analgesia

Review: He has no pain today and has a full range of movement. No further treatment or review is required.

Yours sincerely

MR. R.G. SIMPSON

RGS/MMCC
863920A

27th January, 1999

Dr. A. Ali,
Health Centre,
201 Abercromby Street,
GLASGOW, G40 2DA

Dear Dr. Ali,

RE:- Duaine McMullan, c/o [REDACTED] 180 Baltic Street,
Glasgow, G40 3HH. 128/06/901Diagnosis:- Crushed finger-tip

This eight year old boy who is in care was treated on 24/01/99 after the tip of right ring finger had been trapped in a car door. There was a bursting laceration through the nail fold which has been sutured with two stitches and the nail plate has been removed. There is a minor underlying crack through the very tip of the terminal phalanx. His tetanus immunisation appears to be up-to-date and he has not been given a booster. He has been given and tolerating Co. Amoxiclav. His dressing has been changed today and he will be coming back next week to have his sutures removed.

Yours sincerely,

 R.G. SIMPSON,
Consultant Hand Surgeon.

Re: Duane McMullan, DOB - 28.6.90
Maxton Children's Home, 180 Baltic Street, Glasgow G40

Thank you for your referral of this child to the Department of Clinical Psychology, Royal Hospital for Sick Children.

This referral has been re-routed to the new One-Door Child Health System where arrangements will be made to see the child at the local C.D.C.

The presenting problems you describe in your referral do not require our specialist hospital based services. Clinical Psychologists are now also based in the Community and can be accessed, like other community child health services, through the One-Door System.

Please see enclosed information sheets regarding referrals and addresses for future reference.

Yours sincerely

Dear Dr Hunter

re: Duane Harding 94 Leven Drive Belfast BT5 7ED
dob: 28.6.90

I reviewed Duane in the outpatients clinic today. His left testis is down and normal. His right testis is normal in size and coming down to three quarters distance in the right scrotum, although it is sitting in the superficial inguinal pouch. I feel that there is no rush to do anything and we will see him again in another year to see if this situation continues to improve. His foreskin is retracting normally and there is no planned circumcision.

Yours sincerely

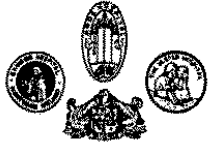

A P Charlwood SHO to

Dear Dr Hunter

Re: Duane Harding 94 Leven Drive Belfast BT5 7ED
dob: 28.6.90

Thank you for your letter about this boy. He has a right undescended testis, which is ectopic and therefore I would be inclined to wait and see. The left testis is in the scrotum now. As far as the prepuce is concerned it seems to be retracting normally and I would not again make any plans for this. I will review him in a years time.

Yours sincerely

S Brown FRCS
Consultant Paediatric Surgeon
