Medical History
01/05/2026 Seen in substance misuse clinic Substance misuse Dr Will Chambers
01/05/2026 Comment note Community service but no jail time. No heroin but using cocaine. Keen to attend NA. Sent meetings. See 8w. 90ml script. Dr Will Chambers
01/05/2026 SMS text message sent to patient https://meetings.ukna.org/meeting/search?postcode%5Bvalue%5D=3&postcode%5Bsource_configuration%5D%5Borigin_address%5D=eh13+9g... Dr Will Chambers
01/05/2026 Telephone encounter Says cousins funeral yesterday. See today for script. Dr Will Chambers
15/04/2026 SMS text message sent to patient Your prescription has been done and can be collected from reception. Dr Will Chambers
13/03/2026 Seen in substance misuse clinic Substance misuse Dr Will Chambers
13/03/2026 Drug therapy Take Home Naloxone= YES Dr Will Chambers
13/03/2026 Comment note Still using cocaine every 2 weeks or so. Updates about his kids from his sisters. Not in cntact with them. Using cocaine primarily to escape feelings of inadequacy re parenting. Discussed this paradox and how he can harness that into something useful. Go to a meeting or do something, anything, other than taking drugs. Will think about this. Dr Will Chambers
27/02/2026 SMS text message sent to patient 10:45 12th March. Dr Chambers Dr Will Chambers
26/02/2026 SMS text message sent to patient Please call the practice, I need to speak to you. Thank you, Dr Chambers Dr Will Chambers
28/01/2026 Telephone encounter Not in jail. Extend script by 4 weeks. See then. Dr Will Chambers
16/01/2026 SMS text message sent to patient Thats the prescription emailed to the pharmacy. Southfield Medical Practice .Do not reply to sms Mr Geddes Derek
14/01/2026 Seen in substance misuse clinic Substance misuse Dr Will Chambers
14/01/2026 Comment note Looks like he'll be going back to prison on the 27th Feb. Agreed script until then and if he stays out to give me a call and we can issue a further script. Dr Will Chambers
08/12/2025 Administration DD "chemist at Dears Oxgangs phoned saying pt was caught stealing perfume bottles from them so he's no longer welcome in their pharmacy and would need a new prescription for methadone to take elsewhere - they gave him this morning's dose but for tomorrow's he'd need new script" Asked to ensure definitely canceled their end. Further script done starting tomorrow for the remaining 35 days worth until due to see WC Dr Ruth Cannell-Whiteley
01/12/2025 SMS text message sent to patient Your practice tried to call you. Please call us back when you can. Southfield Medical Practice .Do not reply to sms Miss Anna Maguire
27/11/2025 Frailty Assessment Rockwood CFS Score=2 - well Dr Will Chambers
19/11/2025 Seen in substance misuse clinic Substance misuse Dr Will Chambers
19/11/2025 Comment note Not using heroin. Stable on 90ml. Used crack three times this week. Tied to house in the evenings due to tag. Expires on the 30th. Goes out in the day but mostly unoccupied. Needs CLW input. Desperate to be doing something productive but hampered by the crimal justice system for petty crimes from over a year ago. I will refer to Natalie. See in 2m. Dr Will Chambers
22/10/2025 Administration NOS Script issued unseen. Quite stable. Dr Will Chambers
22/10/2025 SMS text message sent to patient Please collect your script from the practice tomorrow. I will see you at 1030 on Wedensday the 19th of November. Thanks, Dr Chambers Dr Will Chambers
14/10/2025 SMS text message sent to patient Dr Chambers is looking for feedback on your appointments. This should take less than 2 minutes. Thank you. https://forms.office.com/e/pTigPhDjc8 {Patient Group Seen In Substance Clinic} Dr Will Chambers
08/10/2025 SMS text message sent to patient The telecoms fault has been fixed, fthank you for your patience. Please bare with us while we resume full service. Southfield. {Patient Group Active Mobile} Mr Geddes Derek
08/10/2025 SMS text message sent to patient Upfdatye - Telecoms fault across multiple NHS sites still unresolved. We have restricted access to phones and clinical records at Southfield Mediical Practice {Patient Group Active Mobile} Mr Geddes Derek
10/09/2025 Seen in substance misuse clinic Substance misuse Dr Will Chambers
10/09/2025 Comment note Not used heroinin 2.5 years now. Cocaine twice a week. Split with girlfriend. sofa surfing. With uncle at the moment. Looking to get back in work with his friend - labouring. See 6 weeks. Dr Will Chambers
30/07/2025 Seen in substance misuse clinic Substance misuse Dr Will Chambers
30/07/2025 Comment note Continues to live between Oxgangs and Northfield. Says no heroin but smoking cocaine. Discussed trends of drug related deaths at the moment. Including cocaine related heart attacks and strokes. Content on 90mls methadone daily. On a tag now. Curfew between 7 and 9. See 6w. Dr Will Chambers
23/07/2025 Administration NOS Script issued unseen. See next week. Dr Will Chambers
23/07/2025 SMS text message sent to patient Please collect your script. I need to see you next week at 09:45. Thank you, Dr Chambers Dr Will Chambers
12/06/2025 SMS text message sent to patient Are you eligible for your covid spring booster, pneumococcal or shingles vaccine? NHS Lothian Vaccination Team will be at SPACE Craigmillar, 11 Harewood Road EH16 4NS, on the 12th and 13th June 10am till 1pm and 1.40pm to 4pm. 21/05/2025 Seen in substance misuse clinic Substance misuse Dr Will Chambers
21/05/2025 Comment note Stable. Problem with mirtazapine px at pharmacy. Living in Oxgangs again but doesn't think long term. Thinks likely to be back in area soon. Suggested if still in oxgangs next appt then will need to re-register. Naloxone discussion and Px. BBV discussion. Agreed speak about testing next time. Dr Will Chambers

20/05/2025 SMS text message sent to patient You have an appointment with Dr Chambers tomorrow at 10:15am. Southfield Medical Practice. Do not reply to sms. Ms Eva Tornikoski
02/04/2025 Seen in substance misuse clinic Substance misuse Dr Will Chambers
02/04/2025 Previously injecting drug user Dr Will Chambers
02/04/2025 Comment note Remains stable. Dispute with girlfriend so currently staying in our area again. Px 8 weeks. No appts in 8 weeks so see in 7w. Mental health good, speaking with or getting updates about kids every day. Smoking crack about 4-5 times per month. £50 a go. Says not really doing anything for him. Might consider stopping. See 7w. Dr Will Chambers
26/03/2025 SMS text message sent to patient Please collect your script from the practice today. Dr Chambers will see you next week on Wednesday at 10am. Thank you, Southfield Practice Dr Will Chambers
29/01/2025 Seen in substance misuse clinic Substance misuse Dr Will Chambers
29/01/2025 Drug intake observed Days supervised methadone consumption Dr Will Chambers
29/01/2025 Comment note doing well. living out of area so needs to re-register. Dr Will Chambers
24/01/2025 Administration Called asking if any alternative options regarding collection of prescription due to weather and cancellation of transport. Tried calling to advise that this would be something he would need to discuss with pharmacy. no answer, phone switched off. DG Dr Mhairi Macgregor
04/12/2024 Seen in substance misuse clinic Substance misuse Dr Will Chambers
04/12/2024 Comment note Looks well. New teeth! Sounds different in a good way. Feeling positive about the future. Moving into a house in oxgangs soon. Happy about this. Agreed to continue his script until he moves and then will need to re-register. Dr Will Chambers
23/10/2024 Seen in substance misuse clinic Substance misuse Dr Will Chambers
23/10/2024 Comment note Stable. Occassional crack cocaine use. Denies H or vallium use. Chat about the future. Keen to just keep as he is for now. Spoke to kids gradnmother which was positive. Kids don't want to speak to him but for reasons he can understand and keen to make things work long term. Happy with this. Dr Will Chambers
11/10/2024 SMS text message sent to patient Building work at Southfield Medical Practice from 14/10. See our website for more info https://southfieldmedicalpractice.scot.nhs.uk/mountcastle-building-works/ {Patient Group Active Mobile} Mr Geddes Derek
18/09/2024 Seen in substance misuse clinic Substance misuse Dr Will Chambers
18/09/2024 Comment note Doing well. No opiates. Continues to intermittently use crack. Finds meetings helpful but remains difficult to abstain. Planning on attending the gym. Support worker looking to get him a pass. Dr Will Chambers
21/08/2024 Seen in substance misuse clinic Substance misuse Dr Will Chambers
21/08/2024 Comment note Smoking crack about very couple of weeks. remains in temp accomodation in Leith. keen to reduce to 90mls methadone. Says heroin not an issue. Would like to stop using crack as his girlfriend is abstinent and feels needs to be abstinent to maintain relationship. See in 4w. Dr Will Chambers
09/08/2024 Administration NOS Patient staying in Leith in temp accomodation. Needs to pick up locally. Remainder of script cancelled and new script until he sees me next in just under 2 weeks. Dr Will Chambers
24/07/2024 Seen in substance misuse clinic Substance misuse Dr Will Chambers
24/07/2024 Comment note Doing well, abstinent from H. Now at Cameron toll (short term) so collecting script isn't an issue. Says infrequent crack use. Usually when he is with people who are using. Remains with partner who is abstinent and helps him to be abstinent. Uses when he's not with her. Script issued. Also haemorrhoids giving him bother. Px for anusol HC due to itching. Encouraged to eat high fibre diet, says moving bowels fine. See 4w. Dr Will Chambers
12/07/2024 Telephone encounter Tried again, no answer. Await contact from patient. Looking to change chemist for script as staying near the Gyle. Dr Will Chambers
12/07/2024 SMS text message sent to patient A doctor tried to call you. Please call us back if you still require support. 0131 549 7340 Southfield Medical Practice .Do not reply to sms Dr Will Chambers
26/06/2024 Seen in substance misuse clinic Substance misuse Dr Will Chambers
26/06/2024 Comment note Doing well. Now living in travel lodge with girlfriend. No longer staying with cousins. Used crack once in the last week, no heroin. Much better than previous. Girlfriend abstinent, has her own struggles but says he admires her strength. Sounds a positive person in his life. See 4w. Dr Will Chambers
25/06/2024 Administration NOS Says methadone script run out. Unclear if has had dose today or not. Script should have finished on today's dose and then has appt with me tomorrow. Tried to call but no answer. Await contact from patient. Dr Will Chambers
29/05/2024 Seen in substance misuse clinic Substance misuse Dr Will Chambers
29/05/2024 Comment note Continues to use crack 3-4 times weekly. Staying with cousins who are using. Seeing resource worker tomorrow who is trying to find him alternative accomodation. Denies heroin use. Took 4mg vallium this morning before court. See 4w. Tox done. Dr Will Chambers
15/05/2024 Seen in substance misuse clinic Substance misuse Dr Will Chambers
15/05/2024 H/O crack cocaine misuse Smokes cocaine Dr Will Chambers
15/05/2024 H/O crack cocaine misuse Smokes cocaine Dr Will Chambers
15/05/2024 Comment note Struggling. Used crack once since we last spoke. Denies vallium or heroin. Feeling low as time mostly unoccupied and surrounded by cousins (where he is staying) who are using. Not helpful for his recovery. Still no contact with kids. Needs to remain drug free for the family courts. Needs to attend recovery cafe etc as part of his CPO. Discussed the difference in my mind to doing this because he wants to vs being pushed. Acknowledges this and says smart recovery helpful in prison. Sent info for this again. See 2w. Dr Will Chambers
15/05/2024 SMS text message sent to patient https://smartrecovery.org.uk/ Dr Will Chambers
26/04/2024 Administration Message left by pharmacy that patient had reported feeling suicidal - attempted to phone patient to make further enquiries but phone answered by patient's cousin who advised that mobile number in records actually cousin's mobile number - however cousin gave alternative mobile number stating this was patient's correct mobile number - attempted to phone patient on alternative number but only able to obtain voicemail - await further contact at present time. Dr Stuart Blake
17/04/2024 Administration NOS Missed appt. Script done unseen. See in 4w at next available late morning appt. Dr Will Chambers
27/03/2024 Seen in substance misuse clinic Substance misuse Dr Will Chambers

27/03/2024 Comment note Punched in the face after cousin's son convicted for 6 rapes (sentences to 15 years yesterday). Empathy given. Keen to reduce a further 5 mls. Says heroin absintent and benzos minimal. Occassional use of 2/4mg when late for script. See 3w. Px 95mls. Mirtazapine to 30mg as not doing much at 15mg. Dr Will Chambers

14/03/2024 Seen in substance misuse clinic Substance misuse Dr Will Chambers

14/03/2024 Previously injecting drug user Dr Will Chambers

14/03/2024 Drug intake observed Days supervised methadone consumption Dr Will Chambers

14/03/2024 Family circumstance NOS Dr Will Chambers

14/03/2024 Comment note Denies street benzo use or H use. Says tired and stressed with court committments, job centre etc. Time otherwise unoccupied. Offered to get him in touch with Billy Crombie to see if he could help him get to some meetings or to the Bothy. Can't give me an up to date number today so agreed to do this next time. See 2w. Daily dispense. Continue mirtazapine. Dr Will Chambers

14/03/2024 SMS text message sent to patient Dr Chambers will see you at 4pm today. Thank you. Dr Will Chambers

28/02/2024 Seen in substance misuse clinic Substance misuse Dr Will Chambers

28/02/2024 Comment note Short spell in prison actually seems to have helped him. Feeling much better. Feels chaotic +++ before prison, now in a much better state. Gained 4 stone. Keen to reduce script by 10ml. Not getting on well with sertraline. Prefers to try mirtazapine. No sertraline in 2 days. Try 15mg mirtazapine and see me in 2 weeks to review. Kids grandmother now has full parental rights, he needs to go through the court if he wants to see them. Dr Will Chambers

16/02/2024 Telephone encounter Out of prison this AM needing methadone, see note prison, Px issued and appnt with WC a week on Wed. Dr Peter Dorward

16/02/2024 Telephone encounter Says released from prison this am and needs Px. Nothing from proson-- asked that he call prison so taht they can send us info. Dr Peter Dorward

29/09/2023 Third party encounter Spoke with SW Debbue Houston, didn't attend CPO appt. Needs to engage with them or risks custody. See at next planned appt. Dr Will Chambers

27/09/2023 Seen in substance misuse clinic Substance misuse Dr Will Chambers

27/09/2023 Comment note Attended at 1715 looking for script. Due to see DTTO on Friday. Social worker is Debbie Houston, she has informed me DTTOs currently not in operation. Has community payback order which means he wont see a nurse or doctor at DTTO but will have an allocated SW. Explained to Lee I don't think I can continue to prescribe for him unless he engages with DTTO. If he's not seeing them or missing appointments I will need to ask the hub to take over his prescription. Px 1 week, needs to come and see me next week. Dr Will Chambers

21/09/2023 Seen in substance misuse clinic Substance misuse Dr Will Chambers

21/09/2023 Comment note Released from prison. Parental rights given to maternal grandparents of his children. Upset at this, feels he was a good day. Appreciates he isn't in a state to look after his kids at present. Says heroin use not such an issue but using more street vallium and gabapentin. Remains at high risk of drug related death. Has CPO appt today and then appt with DTTO next week. Script issued. See next week. Dr Will Chambers

21/09/2023 Administration NOS 07775064143 - Ronda McKenzie (cousin). Dr Will Chambers

21/09/2023 Administration NOS Looking for script. Needs to come and see me this afternoon. Dr Will Chambers

12/09/2023 Outpatient clinic letter received Kardex as per Lothian prison services 30.8.23Detox diazepam script 15mg bd, 10mg bd, 5mgbd, 5mg od, stop during stayContinue: Methadone 110ml dailyStart: Thiamine 100mg tds, note no alcohol status recorded. Ms Kirsty Gillen

11/09/2023 Telephone encounter Looking for script - released today from custody. Taking methadone 110mls regularly. No other illicit substances whilst in custody. Note recent documents confirm methadone at 110ml. Cont on daily supervised. Appt made w WC for r/v in wed am clinics. Dr Mhairi Macgregor

11/09/2023 SMS text message sent to patient A Doctor tried to call you, please call us back if you still require support.0131 549 7340 Southfield Medical Practice Dr Mhairi Macgregor

06/09/2023 Administration NOS Clinical Letter Mrs Catherine Campbell

30/08/2023 Administration NOS In prison. Medication form completed to allow for prescription to be given. Dr Will Chambers

16/08/2023 SMS text message sent to patient Please collect your prescription from Southfield practice today. Your next appointment with Dr Chambers is 10am on the 30th of August. Thank you. Dr Will Chambers

16/08/2023 Administration NOS Missed appt see next available late morning appt Dr Will Chambers

19/07/2023 Seen in substance misuse clinic Substance misuse Dr Will Chambers

19/07/2023 Comment note Struggling with mental health. Injecting twice weekly (more I suspect). Offered to refer him to community drug problem service for additional support. Agreed. Also small abscess on right shin - px fluclox. Seb dermatitis - capasal. Haemorrhoids - macrogol for constipation. See 4w. Dr Will Chambers

21/06/2023 Consultation Stable. Infrequent use. Used this morning when feeling low about his kids. See 4w. Not ready to reduce. Not interested in meetings or recovery activities. Dr Will Chambers

21/06/2023 Seen in substance misuse clinic Substance misuse Dr Will Chambers

31/05/2023 Seen in substance misuse clinic Substance misuse Dr Will Chambers

31/05/2023 Comment note Looks well, in good spirits compared with last time I saw him. Missed appt this morning, apologised for this, says he was in police custody (he says case of mistaken identity). Wanting custody of his children so liaising with social worker in England. Keen to stay clean for these purposes. Last smoked heroin 4 days ago. No injecting in last few weeks. Suggested we do a tox in 3 weeks. Not interested in fellowship/NA just now. Doesn't think there is anything else we can do to help, says it needs to come from him. Dr Will Chambers

24/05/2023 SMS text message sent to patient Hi Lee your prescription is ready for collection at Southfield Medical Practice Mrs Lynn Donnelly

24/05/2023 Administration NOS Script issued unseen. See 1w. Dr Will Chambers

24/05/2023 Did not attend - no reason Dr Peter Dorward

11/05/2023 Administration NOS Missed appt. Presented to desk asking for script, which is due. Unable to see due to limited time. Continue daily dispense on current dose and next available appt with me booked. Dr Will Chambers

04/05/2023 Seen in substance misuse clinic Substance misuse Dr Will Chambers

04/05/2023 Comment note See PD entry re murder of mother of his children. Says children were up here with him but now back down in England with mother's family there. Feels intense guilt re death of ex-partner and concerned that the perpetrators could be looking for him. Taking 10mg diazepam daily. Discussed risk of drug related death high if using heroin, taking methadone and using vallium. Says using vallium to cope with mental strain at present. Says only used heroin once in the last week, that was today. Wanted some company. Sometimes thinks about suicide but denies suicidal intent at the moment. Feels he would reach out for help if he did think about hurting himself. Aware he can call us or NHS 111. See next week. Thinks funeral in on the 11th. Appt booked for 10th. Dr Will Chambers
04/05/2023 Consent given for communication by SMS text messaging Dr Will Chambers
04/05/2023 SMS text message sent to patient test Dr Will Chambers
04/05/2023 SMS text message sent to patient Please email photos to clinical.s70126@nhslothian.scot.nhs.uk. Please read www.cdpb.co.uk/consent.pdf. Consent is implied if you send photos. Dr Will Chambers
02/05/2023 Telephone encounter Needing Px. Ex partner murdered by her sister, witnessed by one of his children. has 3 chuildren now staying with him (15,14 and 9 YO) Thye aren't in school, schooling being arranged. Px issued for 3 days, needs face tot face for longer Px and need to establish whether SS are involv ed (I think that thye need to be.) Dr Peter Dorward
21/04/2023 Telephone encounter Called-- ex partner murdered, says needs to sort Px -- presumably for funeral?? but didn'ta answer, message sent. Dr Peter Dorward
21/04/2023 SMS text message sent to patient A Doctor tried to call you, please call us back if you still require support.0131 549 7340 Southfield Medical Practice Dr Peter Dorward
04/04/2023 Comment note More stable, using less, x 2 last 2w not injecting which is good. Plan is to become abstinant whyilst his cousin is in prison. See in 1/12 Dr Peter Dorward
21/03/2023 Consultation On 110 ml, minimal benefit, had a few days not using, buyt determined that knows what he needs to do and that he doens't want to be referred on, wanbts to be seen in 2w for f/u. Appnt made3 review in 2w. Dr Peter Dorward
14/03/2023 Seen in substance misuse clinic Substance misuse Dr Peter Dorward
14/03/2023 Comment note Still injecting most days, not stanble 95ml feels 110 would be enough-- that is what he was on before. DEclines referal to Hub. High risk of drug related death. Using benzodiazepines on top of H. Inc to 110ml daily suypervised and see 7 days. Dr Peter Dorward
28/02/2023 Comment note Better today, stuill using, needs 95ml, happy to do that. see in 2w. Long conversation re aspirartions and plan to be abstaining, reason is to be the kind of parent he wants to be for 3 kids-- whi he no longer sees. Appnt 2w. Dr Peter Dorward
23/02/2023 Seen in substance misuse clinic Substance misuse Dr Peter Dorward
23/02/2023 Comment note Reviewed VMI on 70 but not there yet, not using every day. Able to respond with humour and not drug seeking. Ink to 85ml and see Tuesday. Dr Peter Dorward
21/02/2023 Consultation 50ml nowhere near enough, injecting H won't let me see sites. Inc to 70ml and see in 2 days. Dr Peter Dorward
17/02/2023 Seen in substance misuse clinic Substance misuse Dr Peter Dorward
17/02/2023 Comment note Fell off Px 2 days using mixture H and methadone 50ml of cousins, very unbstable and at great risk of death through misadventure. Re-start on 50ml daily sup and review Tuesday. Tox done. Dr Peter Dorward
17/02/2023 Telephone encounter Called having missed appnt 2 days ago. No methadone now for 48 hrs. Will need to be re-titrated as on very high doses, very unstable and high risk of death from misadventure. See me this PM for face to face. Dr Peter Dorward
16/02/2023 Telephone encounter Can't contact patient. Unable to do script. await contact. Dr Will Chambers
10/02/2023 Administration NOS Missed appt see next week. Dr Will Chambers
12/01/2023 Administration NOS Can't go back to usual pharmacy. Needs to go elsewhere. Mackinnon's scritp cancelled. Will take new script to Musselburgh. Dr Will Chambers
13/12/2022 Seen in substance misuse clinic Substance misuse Dr Peter Dorward
13/12/2022 Previously injecting drug user Dr Peter Dorward
13/12/2022 [X]Mental and behav dis due to use of cocaine: harmful use Sniffs cocaine Dr Peter Dorward
13/12/2022 Drug intake observed 28: Days supervised methadone consumption Dr Peter Dorward
13/12/2022 Comment note Appears abstinant, but admits before tox that used H and valium last night-- not nbotherd to to. Px issued 2m. 2. Pain R groin denies any jagging. o/e Small soft femoral mass, non tender, reducible, no real cough impulse. Imp. Femoral hernia, needs referal. Warnbed re signs incarceration. Dr Peter Dorward
12/12/2022 Telephone encounter Note past hx of left sided DVT - apparently presenting symptom of DVT had been left groin pain - now has right groin pain (which patient suggests has been ongoing for approx 1/12) - suggests that resemblance between current pain affecting right groin and pain affecting left groin at time DVT diagnosed (though current right groin pain less severe) - denies any swelling of right groin or right lower limb - denies any recent IV drug use - note also continues on apixaban though does state that can forget to take apixaban intermittently (most recently forgot 2/7 ago) - discussed - description not convincing of likely DVT - however agreed that review appropriate - has appt in 2/7 with Dr Chambers but states that unable to attend this appt as clashes with appt scheduled at Job Centre - agreed to appt tomorrow with Dr Dorward. Dr Stuart Blake
10/11/2022 Administration Asking for sick line with change iof Dx. Unclear what he intends but to review at next face to face. Dr Peter Dorward
19/10/2022 Seen in substance misuse clinic Substance misuse Dr Peter Dorward
19/10/2022 Family circumstance NOS Dr Peter Dorward
19/10/2022 Comment note On his way to court, unclear nature of ioffences but engaging in crime to get money for drugs. NOt using H he says but cocaine, and benzodiazepines which he is trying to reduce. Px issued daily supervised. Might well be put on DTTO. Dr Peter Dorward
05/10/2022 Administration NOS DNA appt with PD this AM. Script issued unseen. 1w see PD. Dr Will Chambers
28/09/2022 Telephone encounter Called asking to change pharmacists as being beaten up poutseide L+G. To do. See in 1w. Dr Peter Dorward
11/08/2022 Seen in substance misuse clinic Substance misuse Dr Peter Dorward
11/08/2022 Comment note Relapsed to injecting, tox done, using H, benzodiazepines and cocaine, attribtues to stresses with Ex. Commisedrated but i thik this is all really worrying, and would be better managed at CDPS but patient declines-- so carry on Px. wants put up but I've really reached the limites of what I can sa\fely and competently prescribe. See in 8w. Warned at high risk of drugs related death.

11/08/2022 Comment note Relapsed to injecting, tox done, using H, benzodiazepines and cocaine, attribtues to stresses with Ex. Commisedrated but i thik this is all really worrying, and would be better managed at CDPS but patient declines-- so carry on Px. wants put up but I've really reached the limites of what I can sa\fely and competently prescribe. 10/08/2022 Administration phoning saying DNA as at jobcentre- reception inform me that PD wants to see, appointment tomorrw 1 day supplied Dr Aileen Telfer

10/08/2022 Did not attend - no reason Dr Peter Dorward

21/07/2022 Telephone encounter Attemepd return call re change to px. Dr Peter Dorward

21/07/2022 SMS text message sent to patient A Doctor tried to call you, please call us back if you still require support.0131 549 7340 Southfield Medical Practice Dr Peter Dorward

30/06/2022 Telephone encounter Says he needs a sickline asap for today for dwp appt tomorrow, says he can't work due to blood clots on his legs - Discussed with patient and explained we do not usually issue sicklines for dwp appointments - if they need additional information from us they will contact us directly. Pt understanding of this. Dr Rachael Craig

14/06/2022 Comment note Not seen as off sick, Px issued fo 6w and see on return. Dr Peter Dorward

26/04/2022 Seen in substance misuse clinic Substance misuse Dr Peter Dorward

26/04/2022 Comment note Still struggl;ing would like unc to 110 daily supervised, still abstaining other than valium which he can't stop. Discused apixaban use, and corerct dosage. Needs BBV's-- appnt for bloods, and Hep V immunisation-- didn't ciomplete course. Dr Peter Dorward

14/04/2022 Telephone encounter)Off to a funeral over Easter, caled L&G to organise pick ups. Dr Peter Dorward

12/04/2022 Telephone encounter DNA requires Px issued and see in 2w. Dr Peter Dorward

12/04/2022 Did not attend - no reason Dr Peter Dorward

05/04/2022 Telephone encounter Back in Edinburgh-- family bereavement, needs Px, see in 1w. Needs assessemnt of response to 100ml Px. Dr Peter Dorward

08/03/2022 Comment note See hosp letter, DVT, now going to Dad's in Selkirk, abstained for 4 days now, but struggling, needs put up, happy to inc to `100ml and see when returns from Selkirk. C/W daily supervised indefinitely, Dr Peter Dorward

05/03/2022 Deep vein thrombosis above knee - left Ms Lynn Ross

03/02/2022 Seen in substance misuse clinic Substance misuse Dr Peter Dorward

03/02/2022 Drug therapy Take Home Naloxone = YES Dr Peter Dorward

03/02/2022 Drug intake observed Days supervised methadone consumption Dr Peter Dorward

03/02/2022 Comment note Reports to be more satble and not asking for inc methadone, using H, cocain, valium but believes use more in control. Has prenoxad already. Dr Peter Dorward

02/02/2022 Telephone encounter claims not to know he had appointment yesterday agree script 1 day but needs to see PD mane- appointment arranged Dr Aileen Telfer

18/01/2022 Did not attend - no reason Dr Peter Dorward

05/01/2022 Overdose of drug overdose valium Dr Mhairi Macgregor

21/12/2021 Seen in substance misuse clinic Substance misuse Dr Peter Dorward

21/12/2021 Seen in substance misuse clinic Substance misuse Dr Peter Dorward

21/12/2021 Injecting drug user Dr Peter Dorward

21/12/2021 Comment note Pleased to be abstinant for 9w from H, still twice weekly cocaine and valium 10mg od. Tox done., Off to see family for 7 days Px issued for 7days pick up see in 1/12 keen to go up-- to consider but needs to be tied to abstaining cocaine and diazepam, ideally. Dr Peter Dorward

16/12/2021 Telephone encounter Px request-- issued for 1w,m see next Tuesday Dr Peter Dorward

21/10/2021 Telephone encounter Attempted call back re cellulitis and antibiotics. Message left. Dr Peter Dorward

21/10/2021 SMS text message sent to patient A Doctor tried to call you, please call us back if you still require support.0131 549 7340 Southfield Medical Practice Dr Peter Dorward

19/10/2021 Consultation Came for meth Px, has relapsed to IV drug use, jagged in groin now has infection. o/e Apyrexial. sweaty P 90 reg BP 130/80 Sats 97% widespread cellulitis and abd wall genitaliea and ant thigh. Imp. Cellutlitis, ? necrotising fasciitis. Expklained need for hospital Rx with attendant risks of death, major surgery. patient prefers oral antibiotics and follow up (?!) He clearly understands the implications. To call thursday. Dr Peter Dorward

14/10/2021 Telephone encounter Px issued 1w unseen, appnt·Tuesday. Dr Peter Dorward

17/08/2021 Seen in substance misuse clinic Substance misuse Dr Peter Dorward

17/08/2021 Comment note Using less cocaine and less valium feels more stable less inclined to go up in methadone., Tox done and see in 2/12. Objevtively way more stable than before. Dr Peter Dorward

05/08/2021 Telephone encounter Further DNA-- needs 1w Px needs to be seen face to face as clearly quite chaotic and at risk. Dr Peter Dorward

28/07/2021 Telephone encounter missed appoint yesterday as in police custody agree 1 week supply and see PD next week Dr Aileen Telfer

27/07/2021 Did not attend - no reason Dr Peter Dorward

01/07/2021 Seen in substance misuse clinic Substance misuse Dr Peter Dorward

01/07/2021 [X]Mental and behav dis due to use of cocaine: harmful use Sniffs cocaine Dr Peter Dorward

01/07/2021 Comment note Using cocaine, valium, says wants to go up but already on 95, says no H but says supply of coaione may have been cut with H. Sounds failry chaotic. Tox done. Essentially wants to inc methadone to try to reduce valium, but using valium because miserable and using cocaine. Sounds like poly drug issue but agreed that if caan becaome abstinant from ciocaine could consider inc methadone but not above 110ml. See 1/12 and everytnhing contingent on -ve tox. Dr Peter Dorward

17/06/2021 Telephone encounter Patient booked in for appnt for review, Px isued meantime. Rece[ptionist to inform of appnt Dr Peter Dorward

Microscopy, culture & sensitivities

01/11/2025 Urinary microscopy, culture and sensitivities = Urine culture No growthUrine samples for culture and sensitivity testingshould be sent using red topped boric acid universalcontainers filled to the fill line. The use of boricacid improves the quality of test results and reducesthe number of false positives. If the sample is lessthan 15ml continue to use a white topped universal.Samples should be refrigerated if there is ananticipated delay in transport.; Urinary MC&S

Patient: GILROY, LEE **Sex:** Male

Report to: Dr Peter S Dorward

Address: Southfield M P (Mountcastle)

Taken: 01/11/2025 10:55

Received: 02/11/2025 13:22

Clinical Details: Haematuria

Date Reported: 03/11/2025

Senders ref:

Lab. Ref. No.:MU700043F Spec.:Mid stream urine

Urine culture
No growth
Urine samples for culture and sensitivity testing should be sent using red topped boric acid universal containers filled to the fill line. The use of boric acid improves the quality of test results and reduces the number of false positives. If the sample is less than 15ml continue to use a white topped universal. Samples should be refrigerated if there is an anticipated delay in transport.

History

GP- PLEASE CONSIDER REFERRAL FOR CTKUB ?RENAL COLIC; ALSO FBC & U&E AS PER REFHELP. MANY THANKS.

44YOM seen at RIE Base
1 day history of left sided loin pain and visible haematuria
No fevers or chills but did have cold/flu like symptoms 2 days ago (now improved)
Throbbing sensation in penis
No frequency/urgency/dysuria
Blood is faint red at the start of micturition, no clots
Never had this before
Feels able to empty bladder
Pain currently 1-2/10 severity, was up at 7/10 this morning but took 2 paracetamol with good relief
No new testicular lumps/swelling/pain

PMH- on methadone OST, says stable at 90mls, prescribed by own GP. Also depression. No history of renal colic/stone disease
Meds- methadone, mirtazapine
NKDA (according to pt and ECS)
SH- lives with partner, not currently working, smokes 10 cigarettes per day, no reg alcohol

Examination

Appears clinically well and comfortable walking to consulting room
T 36.2 HR 67 Sats 95% BP 127/84 RR 18
Abdo soft, mild tenderness LLQ, no guarding nor peritonism
No palpable masses
No palpable bladder

Urine dip- blood ++++ (microscopic), nil else

Diagnosis

Suspected renal colic (first presentation)

Treatment

Systemically well/haemodynamically stable and pain currently 1 or 2/10 severity with paracetamol alone.
Discussed impression of possible kidney stone - pt has heard of this- partner has had it.
He is happy to go home with strong worsening advice and analgesia, and plan to contact own GP on Monday for consideration of CTKUB.
Advised if symptoms progress or worsen, or develops fevers/chills/vomiting, or pain is unmanageable- to present to A+E.
Provided with prescription for diclofenac (says ok with meds like ibuprofen, but has previously had reflux not associated with NSAIDs) - so shared plan for PPI cover. Advised reg paracetamol alongside but no ibuprofen if taking diclofenac. Have held off DHC prescription given level of pain currently; also on OST so likely best avoided if possible.
Encouraged good hydration.
MSU sent for completeness, advised result will go to own GP.
Pt seems happy with plan and clear on robust safety netting.

Prescriptions

Omeprazole 20mg gastro-resistant capsules 1 capsule - ONCE a DAY - oral 14.00

Subject: Medication Confirmation Request
Attachments: 20230830094719857.pdf

Good morning,

I called this morning regarding a patient who has come into our custody over night who is registered with yourself. The patient is Lee Gilroy, DOB 29.9.81.

Since this is now confirmed verbally by your helpful reception staff, I have attached the treatment and medication confirmation request for that we use within HMP Edinburgh. I kindly ask that this be completed and returned at your earliest convenience as to ensure the continuity of this patients care during his stay with us.

Many thanks,

Rachel

Hi Nina,

I think its best if we cancel the referral. The patient isn't willing to engage with the recovery hub at this stage.

I'll reassess his level of risk at our next appointment and decide where to go from here.

Thank you,
Will

Hi Will,

I don't think we can really send a keyworker out without explicit consent from the patient.

If the patient is unstable and using substances in a risky (and potentially fatal) way, then secondary care would be the most appropriate setting for them – and if they are at significant risk of overdose then they don't really have a choice where they are seen, as we have to manage them safely.

With best wishes,
Nina

Hi Nina and Stephanie,

Apologies I didn't get back to you Stephanie.

I think Lee would benefit from some secondary care input but he isn't as keen as I am. If a keyworker was able to reach out to him to offer taking over his care he may be more receptive, Would this be possible? If he refuses then I don't think there is much more you can do.

Thanks again,
Will

Subject: Referral query - urgent

Dear Dr Chambers,

Re: Lee Gilroy CHI 2009811259

You made an urgent referral for the above patient to our service on 19/07/23. As my colleague Stephanie Easton advised on 20/07/23, if a patient is unstable then we would take over their opiate replacement prescription to stabilise their substance use with CPN keyworker support, and could then offer psychiatric review and psychology involvement as appropriate. We would not be able to offer these things whilst a patient was unstable as they would most likely be ineffective. I am aware that the patient prefers his opiate replacement to remain under your care, but I would recommend secondary care – at least for a period of time - in order to help him stabilise.

Given your concerns about this patient's level of risk, please could you let us know as soon as possible how you would like to proceed? My colleague has tried to contact you several times about this patient, but we have not heard back.

With best wishes,

Dr Nina Webb

Dear Dr Chambers,
If this patient is seeking psychological support; a mental health assessment and stable on his prescribed ORT dose, then he should be referred to general adult psychiatry. If he is unstable and you wish us to stabilise his drug use we will take over prescribing of his methadone to do so.
Please could you let me know how you wish to proceed.
Best Wishes
Stephanie

Dear Dr M MacGregor

Presentation: Pain in hip / leg / knee / ankle / foot, S: DVT B: Patient complaining of right leg pain and swelling. On apixaban for a DVT in left leg. Pains shooting down both legs. Missed a few days of medication but now has medicaltion again. A: RR: 16 Sa

CLINICAL NOTES:

Clinical note: PC:

Painful knees

HPC:

Since DVT earlier this year has felt pain in knees radiating into calves bilaterally - feels pain when mobilising, gets worse with increased distance walked

3/7 Hx of worsening Sx - he relates this to having a half dose of Apixaban on Wednesday to Friday.

He reports that his R leg was slightly more swollen over the past few days

At present - no pain at rest, nil redness, not swollen
Nil SOB
Nil chest pain

Background:
Ex-IVDU - on methadone
DVT in February - 10mg Apixaban BD

Medications:
Methadone

Drug allergies:

NEWS 0
R leg - not swollen, calf and ankles same size as L, nil erythema, non-tender

Investigation results:
Nil

Diagnosis:
MSK pain

Treatment and management plan (as d/w cons Craig Davidson):
Home with advice to seek physio

History

40 year old patient on methadone.
Had a left sided DVT in Feb 2022 related to drug injection.
On apixaban 5mg bd and has forgotten last x3 evening doses of apixaban.
Both lower legs swollen since yesterday R worse than L. C/o pain behind both knees and some calf muscle tenderness. Redness of the skin above R ankle.
No fever, no chest pain, no SOB.
Tells is no longer injecting iv.
PMH drug dependence on methadone. L sided DVT
Drugs/allergies as per ECS

Examination

Diagnosis

??possible R sided DVT/non compliance with DOAC

Treatment

I advised could be another DVT and should be seen/D dimer considered.
He did not want to go to WGH and prefers RIE.
I advised him to go to A+E, RIE.

Date of most recent COVID-19 swab: 05/03/22

ACTION REQUIRED FROM GP
Reduce dose of apixaban to 5mg BD in one week

FOLLOW UP BEING ARRANGED BY HOSPITAL: Nil

LIST OF OUTSTANDING RESULTS / OP INVESTIGATIONS
Nil

PLEASE CC THIS LETTER TO:
Ambulatory care for DVT follow up in 3 month's time

Dear Doctor,

ADMISSION SUMMARY AND TREATMENT:

Mr Gilroy self-presented to A&E on the night of 04/03/22 with a swelling in his left groin, as well as pain in that area which had been present for 1 week prior. He also reported some dizziness, a reduction in appetite, as well as occasional sweats/fever. Assessment revealed a tender, hard, left groin swelling in the groin, and swelling in the left calf and thigh. Lower limb doppler revealed a left leg DVT. He was then transferred to the care of the medical team in AMU, and was commenced on treatment dose dalteparin.

Subsequent CT angio lower limb was done to rule out a pseudoaneurysm, scan revealed inflammatory stranding with some subcutaneous gas, ?infection ?related to recent injection. Inflammatory markers normal with no temp spikes. Unlikely infected thrombus.

Lee reports last injecting heroin 1 week prior to his presentation. He has been counselled on the risk of bleeding whilst on apixaban, especially in the context of IV drug use. He tells us that this has been a wake up call and is adamant that he will not continue iv drug use. Declined further referral to DLN, aware of community drug liaison services and reports he has stopped before. Also describes a good relationship with his community pharmacist.

Medically fit for discharge home on 6/3/22 with follow up in ambulatory care in 3 months time.

RELEVANT INVESTIGATION RESULTS:

Imaging:
05/03 - Venous US doppler left leg - 'Left above-knee DVT extending up to the left CFV but not affecting it.'
05/03 - CT angiogram of lower limb - enlargement of left common femoral vein, containing gas, concerning for infected thrombus

SIGNIFICANT OBSERVATIONS AT DISCHARGE:
BP at am of 06/03 - 107/66
Borderline bradycardia throughout AMU stay at ~50bpm
Apyrexial

CHANGES MADE TO CARE ARRANGEMENTS/ DNACPR STATUS/ ANTICIPATORY CARE PLANNING:

Nil

Thank you for your ongoing care of this patient.

Yours Sincerely,

Sammir Bushara
Final year medical student

E) Abdomen and calves SNT

Tender ill-defined hard left groin swelling, not particularly fluctuant

Left leg neurovascularly intact, pedal pulse present

Lactate normal
Cannulated and awaiting rest of bloods

Given Oramorph, and 10mg of Diazepam

DDx: ?groin abscess, ?pseudoaneurysm

Plan: referred to surgical team as per pathway

Zaid Ibrahim
ED Locum

0124:
Dr J Carter A&E Consultant

I have spoken to Lee and examined him
4x4cm brawny oedema left groin, very tender. Clinical signs of dusky left lower limb. Palpable foot pulses.

IMP
Lee has a groin swelling and clincally has a DVT in his left lower limb. I can't exclude a pseudoaneurysm, abscess or small collection.
PLAN
As per (Consultant agreed) Painful Groin pathway - OOH - Refer to Gen Surg - admit to SAU
He may have a DVT but he still needs admitting under surgeons as per pathway

0222
Well's score 5
Treatment dose dalteparin prescribed (weight 59.6kg) to cover for ?DVT until daytime when can get CT to exclude non-DVT causes

Yours Sincerely,

Dr Zaid Ibrahim, Doctor

CLINICAL INFORMATION

Reason for Referral: ?Femoral hernia

Main Referral Text:

Dear colleague,

I would be grateful if you would see this 40-year-old who presents with a three week history of discomfort in the right groin, not associated with any specific injury.

He has a history of DVTs, and a history of intravenous drug use, but has been abstinent from this for sometime.

On examination, he has a small area of localised swelling, inferior to the inguinal ligament, and medial to the femoral artery. It is reducible, and is non-tender, and there is little by way of cough impulse.

He is not overweight, but has early COPD.

Clinically, I thought he had a femoral hernia, and I would be grateful if you could be seen promptly as an outpatient.

With Best wishes

Dear Dr M MacGregor

Presentation: overdose/taken valium/broken ribs

CLINICAL NOTES:

Clinical note: PC

OD

HPC

Attends in police custody. Altercation last night where Lee was punched or kicked in the ribs. Subsequently took 7x2mg diazepam tablets around 8pm. Denies taking any other medication. Concern from police about how drowsy Lee was.

Rousable to pain. States that he remembers everything from last night. Has pain in left side of his chest after being attacked.

Denies cough/haemoptysis/abdominal pain. Passing urine and stools normally. Denies being

unwell prior to being hit last night.

PMH
Chronic lower back pain
On methadone program

DH Methadone, nil else regular

SH Smoker. Denies alcohol use. Occasionally take diazepam tablets.

O/E
Drowsy - rousable to painand speaking with GCS 15 however immediately drowsy again.
Left anterior chest wall tenderness. No surgical empysema or bruising. Chest clear, no wheeze. RR 16, sats 99% OA.
HS I+II+0, calves SNT, no pedal oedema. HR 62, BP 110/78
Abdomen SNT.
No evidence of head injury. PERL. CN II-XII NAD. FROM 4 limbs. GCS 15 although remains drowsy soon after arousal.

Inv
CXR - NAD
Bloods - NAD

Imp
?Rib fracture and OD - remains too drowsy for discharge

Plan
1) Admit toxicology ward. Discharge once more alert.

Birrell EM ST1

Update - Birrell EM ST1
On review at 0430 Lee was easily rousable and GCS 15. Has been in police custody since 8pm and so has had >6 hours post ingestion of benzodiazapine. Safe for discharge.
Simple analgesia for rib injury and worsening advice regarding chest wall injury.

Yours Sincerely,

Dr David Birrell, Doctor

DO YOU NEED A TRANSLATOR? YES/(NO)

With the changes to the Data Protection regulations in May 2018 we will no longer be able to contact patients regarding appointments or use information to support you through other NHS services without informed consent.

K.I.S summaries are a way of providing your medical information to key services (within the NHS) when it is required or you are unable to consent at the time. (Please see the poster on the wall to the right for full details).

To allow this service to continue we would ask that you complete the consent question as part of the self check-in process.

We also have written copies that can be signed if you would prefer to complete this at the reception desk.

If you have any additional question please ask our receptionist.

Kind Regards

Southfield Medical Practice.

GDPR CONSENT AND K.I.S SUMMARY CONSENT FORM

I have read and understood the ways my information will be used and I consent to it being used for these purposes. I also consent to Southfield Medical Practice using my email and mobile number to contact me in the future for appointment and treatment reminders.

Is this your first registration with a GP since leaving the Armed Forces?* ☐ Yes ☐ No

Postcode*

3. VOLUNTARY AUTHORISATION FOR ORGAN OR TISSUE DONATION

I would like to join the NHS Organ Donor Register as someone whose organs may be used for transplantation after my death.
Please tick the boxes that apply. Your consent to organ donation will be shared with NHS Blood and Transplant together with the information you have provided in Section 1 including your name, gender, date of birth address and CHI number. For more information on being an organ donor or privacy, please ask for the leaflet on joining the NHS Organ Donor Register or visit www.organdonationscotland.org

Any of my organs and tissue ☐ Or my

Kidneys ☐ Eyes ☐ Heart ☐ Lungs ☐ Liver ☐ Pancreas ☐ Small bowel ☐ Tissue ☐

Notes on tissue - heart valves and corneas come under the 'heart' and 'eyes' boxes respectively so the 'tissue' box covers donating other types of tissue, such as your tendons.

Patient signature _____ Date

NHS Confidential: Personal data about a patient

4. HOW WE USE YOUR INFORMATION

The information you have provided will be used by the GP Practice to carry out its various functions and services including scheduling appointments, ordering tests, hospital referrals and sending correspondence.

Your information, including your name, gender, date of birth and address, will be passed to NHS National Services Scotland where it will be held on the Community Health Index (CHI). This information is used to register you with the GP Practice, transfer your medical records between GP practices in the UK, make payments to GP Practices for medical services provided, and to process and issue medical cards, medical exemption certificates and entitlement cards.

NHS National Services Scotland shares information about you within NHSScotland to assist in the provision and improvement of NHS services and the health of the public. When we do this, we make sure that the information which identifies you as a person and your health information are separated or anonymised. Health condition and treatment information which could identify you will not be used for research purposes by the NHS unless you have consented to this.

For more information on how NHS National Services Scotland uses your personal information visit www.nhsnss.org. If you have any queries or concerns about how your personal information is used by the NHS please ask for the leaflet 'Confidentiality – it's your right', visit the NHS Inform website at www.nhsinform.co.uk/rights/ or ask your GP surgery.

NHS National Services Scotland is the common name of the Common Services Agency for the Scottish Health Service.

5. PATIENT DECLARATION

I declare that the information I have given on this form is correct and complete. I understand that, if it is not, appropriate action may be taken.

To enable NHS National Services Scotland to confirm my eligibility to lawfully register with a GP and for the purposes of prevention, detection, and investigation of crime, relevant information from this form will be disclosed to the NHS Business Services Authority, NHS National Services Scotland, the Home Office, Identity and Passport Service, HM Revenue and Customs, the General Register Office and Local Authorities.

Patient/Patient's representative signature [signature] Date 18-03-2021

Representative's name (if applicable)

Relationship to patient (if applicable)

6. FOR PRACTICE USE

GP reference number 48771 GP name Dr MacGregor

Practice code Mileage (No.) Road Water Footpath

Identification seen - do not take or retain photocopies

Please initial each relevant box (it is recommended that at least one form of identification is seen to positively identify the applicant)

23/04/2019 EMIS Consultation Record Comment=Entry by Kevin Heaney, Substance Misuse Nurse - noted that patient was positive for heroin at last toxicology. He had disclosed cocaine use but not heroin. Will need to see patient at appointment to discuss and to re-test as he will need to go on daily supervised consumption of methadone is if continues to use heroin. I attempted to reach him by phone today but no answer. PLEASE GIVE HIM AN APPOINTMENT IF HE CALLS FOR PRESCRIPTION AND ONLY ISSUE SUPPLY TO TAKE HIM UP TO THE TUESDAY OR FRIDAY AFTER NEXT APPOINTMENT. I note that social work had contacted Riverside MP in March - Lee has given permission to discuss. I called social work today to check if any active involvement with Lee's children but I was told no social worker at present for Lee Gilroy (16.02.09), Lennon Gilroy (25/11/13) or Leonie Gilroy (3.2.07). Need to monitor heroin and cocaine use however and respond if there are concerns presenting - report to social work if child welfare concerns. : LOCATION=The Riverside Medical Practice : LOCATION_TYPE=Main Surgery Dr Administrator Administrator
23/04/2019 Task COMPLETE Patient Id : 21472 Lee Clark Gilroy DOB : 20/09/1981 Tel. 01316658458 SCI Report 211932 Hi kevin, sample shows heroin. Wonder if safest to move to daily dispensing? so stepping up even from the increased dispensing we agreed on the other day? Thanks J [11/04/2019 18:45] Recipients: Mr. Kevin Heaney [23/04/2019 15:49] Mr. Kevin Heaney I think we need to repeat toxicology - only one swab done since Sept 2017 so we need to establish if this is regular use or an isolated incident. I note that he missed methadone one day recently as he had to go to hospital - from records, it looks like he was in withdrawal from opiates. We have made a pain clinic referral to look into impact of pain upon him. I am wary of doing more in terms of supervision at his point as it could be isolated use and we may risk upsetting his ability to cope if he has to go to pharmacy every day while in pain. 3 children in the house. No current social work involvement - checked today. I think we need to monitor use of drugs - toxicology within next 2 or 3 weeks and if not isolated incident then change to daily supervised consumption and tell him we need to discuss with social work again. To have short prescription only and an appointment - I note he has not booked in to see me before prescription is due and I am very keen that he does not use duty system to continue to obtain prescriptions without monitoring of drug use. Kevin Heaney [Complete 23-04-2019] Mr. Kevin Heaney Dr Kevin Heaney
23/04/2019 Seen in substance misuse clinic (Drug Misuse) Ms Lynn Ross
08/04/2019 EMIS Consultation Record Comment=Patient has handed back prescription which was due to start on 5th April for diazepam and methadone so have cancelled this one and new script done (see previous notes). : Medication= Methadone 1 Mg/Ml Oral solution 2520 ml 90ML5 DAILY DISPENSE MONDAY AND THURSDAY. TO START 8/4/19. ALLOW FOR SHOP CLOSURE - GORDONS : Medication= Diazepam Tablets 2 mg 112 tablet FOUR TABLETS DAILY - DISPENSE WEEKLY TO START MON 8/4/19 : LOCATION_TYPE=Duty Admin Dr Susannah Ewens
08/04/2019 EMIS Consultation Record Comment=Patient was due to collect methadone and diazepam on Fri 5th April but didn't make it (as was at hospital with a relative), and eskside couldn't dispense it on sat as nil on script allowing this, he took script to gordons but problem scanning it so didn't get it there? has bought methaodne and diazepam over weekend instead and taken same dose. Wants to go to gordons instead of eskside from now on. Spoke to eskside who confirmed they did not dispense any methadone or diazepam fri/sat and if any scripts are still running they will cancel them as patient now wants to go to gordons, if patient brings back his prescription that was due to start on 5th i'll do new scripts to start today dispense monday and thursday from gordons, await patient coming in with old script. : LOCATION_TYPE=Duty Telephone Dr Susannah Ewens

04/04/2019 EMIS Consultation Record LOCATION_TYPE=General Practice Surgery Dr Joanna Stenke
04/04/2019 EMIS Consultation Record Comment=Seen by Kevin Heaney and discussed with Dr. Malakoty - patient was at pain clinic but discharged due to non-attendance - patient asked for re-referral. Patient has complained of lower back pain, pain in legs and has very prominent spidery looking veins on right foot ankle/calf. Previous IVDU in leg. Denies current drug use. Last tox in 2017 so done routine one today - patient admitted using cocaine 'once recently'. I had already expressed my view that we need to prescibe within clinical guideline and dispense 350ml or less if we can at any time - unless there was some specific valid reason not to - patient could not give any reason other than he felt he should have it once a week as that is what he prefers. Given recent drug use and opportunity to improve patient/child/public safety I told patient we will change it to dispensing twice a week, Tuesday and Friday from next prescription. : LOCATION=The Riverside Medical Practice : LOCATION_TYPE=Main Surgery Dr Administrator Administrator

19/03/2019 EMIS Consultation Record Comment=Entry by Kevin Heaney, Substance Misuse Nurse - patient missed his appointment with me yesterday and called today asking me to call back - two numbers given to me via task system - the mobile number has an unavailable tone so seems that may no longer be an active number - the landline rang on both occasions I called but nobody is picking up. Patient will require to have his methadone and diazepam prescriptions continued when due - I am sure he will contact the practice again when he realises that is needing attended to. When he calls please book him in again to see me. I note he missed his last pain management appointment and seems to have been discharged from that service. This is unfortunate from an opiate replacement review perspective as he is being dispensed 630ml of methadone weekly and it is better practice to dispense 350ml or less unless there are very good reasons (perhaps pain/limited mobility might be one we would take into consideration with this) - consideration to be given to pain/mobility issues and at next review we could look at this, and if we should dispense twice a week instead. I note that he is in Whitecraigs and no pharmacy there. : LOCATION=The Riverside Medical Practice : LOCATION_TYPE=Main Surgery Dr Administrator Administrator

20/12/2018 EMIS Consultation Record Comment=Patient seen by Kevin Heaney, Substance Misuse Nurse - Lee spoke from the outset about pain issues - he said he could not sit down for consultation and stood for 25 minutes while we spoke. His partner Laura Metcalfe was due in before him - he mentioned this and said that she was at home with one of their children. He said she normally gives him a lift in the car but he got a taxi today. I asked about pain clinic non-attendance that lead to discharge - he said he would like re-referred and claims non-attendance was due to being unable to use public transport. He denies drug use for last 14 years. Lee showed me both lower legs -slightly dry and red looking, perhaps a little puffy in appearance - not an acute issue he said - I note that he has already been asked to book in to see GP about this - he reminded him to do this. Lee asked about sick line being re-issued - I will leg GP know he is looking for this. To have prescriptions for methadone 90ml daily and diazepam 2mg x 4 tabs daily for 4 weeks on weekly dispense. Patient to see GP before he next attends to see nurse at Substance Use clinic. : LOCATION=The Riverside Medical Practice : LOCATION_TYPE=Main Surgery Dr Administrator Administrator

13/01/2017 EMIS Consultation Record Comment=TEL ADV 13/01/2017 17:55:47 Routine 13/01/2017 Yes Patient Id : 21472 Lee Clark Gilroy DOB : 20/09/1981 Tel. 01316658458 PT IS HAVING ISSUES AT PHARMACY RE METHADONE - HE WONT ABLE TO GET HIS SCRIPT UNTIL WEDNESDAY 665 8458 Says turned away from eskside as partner was 4 mins late to collect his methadone, says has been told cannot get any more until Wednesday, it is now after 6pm and eskside closed (I have called them and no answer), I do not feel it would necessarily be appropriate for me to do a script to take to another chemist without speaking to eskside and in any case is after 6pm so no way of getting a script to him and as controlled drug fax would not be accepted. As after 6pm little I can do tonight for this, aware of NHS 24 as needed and suggest attend eskside tomorrow to try and resolve issue, agreed to fax letter to eskside making them aware of NHS 24 if they need GP advice tomorrow but I don't feel I can make any recommendations as I haven't been able to speak to them - Lee accepting of this, I have sent fax to this effect. : LOCATION_TYPE=Duty Telephone Dr Susannah Ewens

18/09/2015 EMIS Consultation Record History=call from pharmacist concerned about how much peptac and ranitidine Lee is getting through. Litres of peptac a month and today told her he was taking 3x 300mg ranitidine a day and it wasn't touching pain and keeping him up at night. He was advised to see dr about it but pharmacist concerned that he may just ignore the issue and wanted to let us know. : Comment= advised to keep encouraging him to attend , pt will need to come in for methadone script at some point anyway so can discuss it then if doesn't attend before. : LOCATION_TYPE=Third party Consultation Dr Catriona Kennedy

Request for Urgent Prescription

On rare occasions, a patient may have forgotten to order their prescription and feel they need an "urgent prescription". Due to the large number of patients at the practice the emergency GP and the staff are usually very busy throughout the day and workload has to be prioritised according to medical need. Because of this, urgent prescription request are not easy to provide.

Repeat prescriptions are ready to collect at the Health Centre within 48 working hours. "Special Requests" are usually available within 48 hours, although may take slightly longer as the Doctor will need to spend some time to check the prescription is OK to issue. "Special Requests" are medications that are not on repeat prescription, as they are being monitored more closely by the doctor.

The decision regarding the urgency of the prescription lies solely with the emergency GP. Very few medications are genuinely urgent and patients will come to no harm by missing them for a few days. It is unfortunate that doctors have to refuse requests, but only by doing this can priority medical care be given to genuine medical emergencies.

The most common requests for urgent prescriptions are for anti-depressants. It is very unlikely that the emergency doctor will consider these to be urgent. No harm will come from missing these tablets, although it should be recognised that anxiety surrounding this can heighten patient concern.

The emergency doctor will be aware of the urgent request shortly after the request is made, to allow a brief assessment of urgency. It is very likely that the prescription will not be dealt with for a considerable length of time and receptionists should not be asked to "chase up the doctor" for the prescription.

If a patient feels that the request has been unfairly rejected, the receptionist can offer an urgent triage call back. This will almost certainly be with the same emergency doctor who has already assessed the prescription request.

The prescription request (whether issued or rejected) will be handed to the patient by the attending receptionist. Doctors cannot carry out this task as discussion regarding prescriptions cannot occur in public areas for reasons of confidentiality.

First Name LEE GILROY Surname GILROY

Date of Birth 20/09/81 Contact Tel No. 0131 665 8458

PRESCRIPTION ITEM REQUIRED	PREPARATION (eg. cream, pill)	DOSE (eg. 100mg, 50mg, 50ml)
METHADONE	LIQUID	90 MLS
DIAZIPAM	TABLET	10 MILLIGRAMS

YOU WILL ONLY BE GIVEN A 3 DAY SUPPLY TODAY – A ROUTINE ORDER FORM IS ATTACHED, WHICH YOU WILL NEED TO COMPLETE TO GET YOUR NORMAL PRESCRIPTION.

I confirm that I have read and understood the above and that my request for an urgent prescription may be declined. I agree to wait in the Health Centre until the duty doctor is available to review my request.

Request for Urgent Prescription

On rare occasions, a patient may have forgotten to order their prescription and feel they need an "urgent prescription". Due to the large number of patients at the practice the emergency GP and the staff are usually very busy throughout the day and workload has to be prioritised according to medical need. Because of this, urgent prescription request are not easy to provide.

Repeat prescriptions are ready to collect at the Health Centre within 48 working hours. "Special Requests" are usually available within 48 hours, although may take slightly longer as the Doctor will need to spend some time to check the prescription is OK to issue. "Special Requests" are medications that are not on repeat prescription, as they are being monitored more closely by the doctor.

The decision regarding the urgency of the prescription lies solely with the emergency GP. Very few medications are genuinely urgent and patients will come to no harm by missing them for a few days. It is unfortunate that doctors have to refuse requests, but only by doing this can priority medical care be given to genuine medical emergencies.

The most common requests for urgent prescriptions are for anti-depressants. It is very unlikely that the emergency doctor will consider these to be urgent. No harm will come from missing these tablets, although it should be recognised that anxiety surrounding this can heighten patient concern.

The emergency doctor will be aware of the urgent request shortly after the request is made, to allow a brief assessment of urgency. It is very likely that the prescription will not be dealt with for a considerable length of time and receptionists should not be asked to "chase up the doctor" for the prescription.

If a patient feels that the request has been unfairly rejected, the receptionist can offer an urgent triage call back. This will almost certainly be with the same emergency doctor who has already assessed the prescription request.

The prescription request (whether issued or rejected) will be handed to the patient by the attending receptionist. Doctors cannot carry out this task as discussion regarding prescriptions cannot occur in public areas for reasons of confidentiality.

NHS Confidential: Personal data about a patient

Request for Urgent Prescription

On rare occasions, a patient may have forgotten to order their prescription and feel they need an "urgent prescription". Due to the large number of patients at the practice the emergency GP and the staff are usually very busy throughout the day and workload has to be prioritised according to **medical** need. Because of this, urgent prescription request are not easy to provide.

Repeat prescriptions are ready to collect at the Health Centre within 48 working hours. "Special Requests" are usually available within 48 hours, although may take slightly longer as the Doctor will need to spend some time to check the prescription is OK to issue. "Special Requests" are medications that are not on repeat prescription, as they are being monitored more closely by the doctor.

The decision regarding the urgency of the prescription lies solely with the emergency GP. Very few medications are genuinely urgent and patients will come to no harm by missing them for a few days. It is unfortunate that doctors have to refuse requests, but only by doing this can priority medical care be given to genuine medical emergencies.

The most common requests for urgent prescriptions are for anti-depressants. It is very unlikely that the emergency doctor will consider these to be urgent. No harm will come from missing these tablets, although it should be recognised that anxiety surrounding this can heighten patient concern.

The emergency doctor will be aware of the urgent request shortly after the request is made, to allow a brief assessment of urgency. It is very likely that the prescription will **not** be dealt with for a considerable length of time and receptionists should not be asked to "chase up the doctor" for the prescription.

If a patient feels that the request has been unfairly rejected, the receptionist can offer an urgent triage call back. This will almost certainly be with the same emergency doctor who has already assessed the prescription request.

The prescription request (whether issued or rejected) will be handed to the patient by the attending receptionist. Doctors cannot carry out this task as discussion regarding prescriptions cannot occur in public areas for reasons of confidentiality.

First Name LEE Surname GILROY

Date of Birth 20-09-81 Contact Tel No. 0131 665 8488

PRESCRIPTION ITEM REQUIRED	PREPARATION (eg. cream, pill)	DOSE (eg. 100mg, 50mg, 50ml)

A COPY OF THE FOLLOWING LETTER HAS BEEN SENT TO YOUR PATIENT:

Patient: Gilroy, Lee **DOB:** 20/09/1981
Address: 85 Whitecraig Road, Whitecraig, Musselburgh, Midlothian, EH21 8NF

Dear Mr Gilroy

Notification of Removal From the Clinical Psychology Outpatient Waiting List

Specialty: Clinical Psychology

We want to give patients more choice about the date and time of their appointments and so we recently asked you to contact us to agree a convenient date and time. As we have not heard from you, we assume that you no longer require to be seen and we have removed you from our waiting list.

Your maximum guaranteed waiting time no longer applies.

We have sent a copy of this letter to your GP. If you think that you still need to be seen, please get in touch with your GP who will contact us again if necessary.

Yours Sincerely,

Appointments Secretary

Dear Dr L Brassington,

I would like to refer the above patient to the Psychology Pain & Dependency Clinic. He is a patient of Dr Renee's who has chronic low back pain and is on a reducing Methadone Maintenance Programme. He was initially seem on November 2017 having suffered back pain for approximately three years which came on suddenly when he was lifting something. The pain has not really resolved and he now feels that most things he does like walking, housework & sitting all exacerbate the pain. He has been seen by physiotherapy in the past and he does try to continue with some exercises. He was previously very fit.

Lee lives at home with his wife and three children and their dog. He has been clean from illicit drug use for approximately 13 years.

Since attending the Pain Clinic he was trialled on Duloxetine which did not agree with him and he was given a TENS machine which he does find of benefit and is keen to continue with its use. He is also on Methadone 90mls taking this as 45mls in the morning and 45mls in the evening and Diazepam 8mgs.

He has been given advice about self-management resources such as the Pain Toolkit and he would be keen to look further in to this. He remains very distressed with the pain today, but states that he is not really keen to take any further medication.

Lee certainly does have muscle spasm in the paraspinal area and I have given him some aromatherapy gel to trial and suggested he continue with the TENS machine and the exercises he has previously learned. When we discussed the role of psychology and pain management he is keen to take this forward and would possibly be a good candidate in the future for the Pain Management Programme, but he initially feels he would prefer to be seen on a one to one basis.

About your patient

Full Name: Mr Lee Gilroy

NINo: JW091400A

Date of birth: 20th September 1981

Address: 85 Whitecraig Rd, Whitecraig, Musselburgh, Midlothian, EH21 8NF

Dear Doctor,

Your patient is being assessed for Universal Credit and we need to find out whether they are able to do any work. By completing this form and providing factual information you will help our Healthcare Professional staff decide whether your patient needs a face-to-face work capability assessment and if so support that assessment.

Please note

- NHS doctors have a **contractual obligation** to provide the information requested without charge.
- The form should be completed from your medical records. A separate examination is not necessary.
- It is acceptable for you to delegate completion of the form to your practice nurse but you must confirm your authorisation by signing at the end.
- Your patient has given consent to allow us to approach you for this information, in accordance with GMC guidelines.
- An online version of this report which can be completed electronically and printed is available at **https://www.gov.uk/government/publications/esa113-interactive-for-use-by-healthcare-practitioners**
- **A fully completed form may help inform the face to face work capability assessment or may mean that your patient will not need a further assessment. It will also help us to make a more informed decision on benefit entitlement.**

COMPUTER PRINTOUTS

You can send us a computer printout of the appropriate part of the patient record if you wish, but you will still have to complete any sections of the form where the answer is not clear from the printout. We are only able to accept information directly relevant to our enquiries. If a printout is available, please make sure it includes the following:

- Active problems;
- Current medication with last prescribed date;
- Details of the last three consultations. Please remove any third party data.

If you have any queries about this form please phone the number above. If you would like to discuss anything with our Healthcare Professional staff, please phone the number above and ask for a member of the Healthcare Professional staff on the customer service desk. If there is any medical evidence that you think would be harmful to your patient's health, please give us this information on a separate sheet of paper so that it can be withheld.

Please reply within 5 working days. A business reply envelope is enclosed for your use.

Thank you for your help.

Yours sincerely,

Miss Amanda Bray

Your reply.

Please answer the following questions from the information which is currently available to you.

If you need more space for any of your answers, please continue at Part 7.

1 When did your patient last see a GP?

16 / 01 / 18

2 Current conditions affecting ability to work:
Please give us details of those conditions which may have significant effect on the person's capacity to work. Include:

- Relevant symptoms and signs, including side effects of medication, with dates. For mental health conditions, please provide brief mental state examination findings, if available.
- Past, present and planned investigations and management, including medication, where relevant.

If you are sending a computerised printout of current medication you do not need to list this here.

*Please complete **both sides** of this form,*
and return the completed form in the supplied envelope - with the above address showing in the window

About your patient

Full Name: Mr Lee Gilroy

Address: 85 Whitecraig Rd, Whitecraig, Musselburgh, Midlothian, EH21 8NF

NINo: JW091400A

Date of birth: 20th September 1981

Dear Doctor,

Your patient is being assessed for Universal Credit and we need to find out whether they are able to do any work. By completing this form and providing factual information you will help our Healthcare Professional staff decide whether your patient needs a face-to-face work capability assessment and if so support that assessment.

Please note

- NHS doctors have a **contractual obligation** to provide the information requested without charge.
- The form should be completed from your medical records. A separate examination is not necessary.
- It is acceptable for you to delegate completion of the form to your practice nurse but you must confirm your authorisation by signing at the end.
- Your patient has given consent to allow us to approach you for this information, in accordance with GMC guidelines.
- An online version of this report which can be completed electronically and printed is available at https://www.gov.uk/government/publications/esa113-interactive-for-use-by-healthcare-practitioners
- **A fully completed form may help inform the face to face work capability assessment or may mean that your patient will not need a further assessment. It will also help us to make a more informed decision on benefit entitlement.**

COMPUTER PRINTOUTS

You can send us a computer printout of the appropriate part of the patient record if you wish, but you will still have to complete any sections of the form where the answer is not clear from the printout. We are only able to accept information directly relevant to our enquiries. If a printout is available, please make sure it includes the following:

- Active problems;
- Current medication with last prescribed date;
- Details of the last three consultations. Please remove any third party data.

If you have any queries about this form please phone the number above. If you would like to discuss anything with our Healthcare Professional staff, please phone the number above and ask for a member of the Healthcare Professional staff on the customer service desk. If there is any medical evidence that you think would be harmful to your patient's health, please give us this information on a separate sheet of paper so that it can be withheld.

Please reply within 5 working days. A business reply envelope is enclosed for your use.

Thank you for your help.

Yours sincerely,

Miss Amanda Bray

Dear Dr Stenke

I saw Lee in my Nurse-Led Pain & Dependency Clinic today. He was supplied with a TENS machine and instructed in its correct use.

He tells me today that he had trialled the Duloxetine but it upset his stomach and it has now been stopped. He ad trialled it for approximately two and a half weeks and did not receive any pain relief.

All his other medications remain the same and I said that I will review him again in approximately 6 weeks time to see how he is managing.

Yours sincerely

Patient	Lee Gilroy 85 Whitecraig Road Whitecraig Musselburgh EH21 8NF	**CHI** **Date of Birth / Age** **UHPI**	**2009811259** 20/09/1981 (36 years) 700009150B
Specialty	Chronic Pain	**Attendance Date**	02/11/2017
Consultant	Dr Joanna Renee		

Dear Dr Stenke

Problems:

1. Chronic low back pain.
2. On methadone maintenance programme.

Plan:

1. For trial of duloxetine starting 30 mgs od titrating weekly as tolerated to 90-120 mgs.
2. For review by our CNS with a view to review medication and issue with a TENS machine.
3. I have given him some self management resources such as pain tool kit.
4. In future we will consider treatment with capsaicin cream and possibly some psychology input.

Thank you for your referral of this 36 year old man who has had back pain for about 3 years. The pain initially came on when he was lifting and he experienced a shooting pain down the centre of his back and down his right leg. At the time he thought he had sciatica. This has not really resolved and he gets a constant cramp across the lower back. In the morning he has a pain deeper in his back which feels like he has been wounded. The pain is increased by walking, using public transport and doing housework such as hoovering and washing the dishes. He also has a lot of difficulty sitting. The pain is reduced by supporting his back and by massage. Unfortunately the pain often wakes him at night and he has a very poor sleep. He said he does get emotional about his pain basically as it restricts him doing things such as

playing with his children. He also has some embarrassment around his disability and fear of making things worse. He currently lives with his wife and 3 children and they have a dog.

He currently takes methadone 95 mls as prescribed by the GP. He was previously on 150 mls. He doesn't notice if the methadone is particularly helpful for his pain. He tells me he has been clean from illicit drug use for 13 years now. He is also reducing his diazepam which is now at 8 mgs. He picks his prescription up twice weekly. He has tried cocodamol and ibuprofen which have not been helpful and he has no known drug allergies.

He is otherwise well apart from suffering a traumatic fracture to his foot many years ago which he is hoping to get fixed in the future. He sees physiotherapy for his back and gets some exercises. He feels that his back pain is about the same or even worse since doing these.

On examination he stood for the entire consultation and had difficulty with all ranges of movement to his back. He had trouble with forward flexion. He was very tense in the lumbar area and had some paraspinal tenderness. He also had some midline tenderness and some evidence of allodynia but no hyperalgesia or wind up and SLR was negative.

We talked a little about the mechanisms of chronic pain and our apporach to management today. It would be worth trialling him on some duloxetine as outlined above. Mr Gilroy actually turned up on a day that wasn't his appointment so we fitted him in and therefore I hoped that would re-attend to see our CNS and she will issue him with a TENS machine and review his medication. I believe he is currently receiving physiotherapy locally so would hope he would get some advice about pain management within this such as pacing and managing flare ups. In the future we may address some of his thoughts and feelings with our pain psychologists though doesn't seem to need this at present.

Yours sincerely,

Outpatient Clinic Letter

Patient	Lee Gilroy 85 Whitecraig Road Whitecraig Musselburgh EH21 8NF	**CHI** **Date of Birth / Age** **UHPI**	**2009811259** 20/09/1981 (36 years) 700009150B
Specialty	Orthopaedics	**Attendance Date**	06/10/2017
Consultant	Lesley A Berry		

Dear Dr Stenke

Mr Gilroy unfortunately attended late for his appointment so his assessment was restricted to a subjective examination. He attended clinic today with 3 problems, firstly a 3-4 month history of right elbow pain which came on for no particular reason. Secondly a left knee dysfunction dating from when he was 14-years-old and he fell landing on glass which stuck into the patella tendon and the inferior section. He did not seek medical intervention as at the time he had a chaotic lifestyle and was regularly drug using.

He also reports low back pain of sudden onset dating from April 2015 when he was lifting boxes at work. At the time his GP arranged an MRI scan the MRI scan reports minimal non-compressive degenerative changes only and that there was no cause for the buttock or leg pain that he experienced at the time. He is under the impression that the MRI scan showed compression and that there is significant degeneration. He tells me he does not get any leg pain related to the back pain but sometimes gets left buttock pain. He tells me his low back pain is constant.

He tells me the elbow pain and knee pain do not wake him at night but the low back pain regularly wakes him at night and he sleeps in a half lying position. He tells me that the knee pain is aggravated by sitting and going up and down stairs. His elbow pain is aggravated by gripping and lifting. And both of these problems are improved with rest. His low back pain he feels is worse with sitting and is improved with movement. He denied any early morning stiffness related to his low back pain.

He also denied any symptoms of cauda equina. He tells me he is now an ex-drug addict and has been clean for 13 months and is continuing to wean from his Methadone. We were unable to complete

anymore of his examination today because he was late so I have rebooked him and we have agreed that at this appointment we will conduct the objective examination and put a treatment intervention plan in place. Review appointment given.

Yours sincerely

e-signed

Dear Dr Stenke,

A COPY OF THE FOLLOWING LETTER HAS BEEN SENT TO YOUR PATIENT:

Patient: Gilroy, Lee **DOB: 20/09/1981**

Dear Mr Gilroy

Outpatient Appointment Letter

Please find details below of an CDPS Appointment that has been arranged for you.

Specialty and Consultant: **Chronic Pain, Dr Joanna Renee**
Date and Time: **Thursday 2 November, 2017 at 1:30 pm**

The clinic is located within the Outpatient Department at the Leith Community Treatment Centre.

If you are unable to attend this appointment for any reason, please contact the Office on 0131 536 6230 to arrange a more suitable date. You should also contact us if your personal details change, e.g. Address, GP, etc. If you fail to keep this appointment without notifying this Department in advance, you will not necessarily be given another. In the unlikely event of the clinic being cancelled, an alternative appointment will be sent to you.

Yours sincerely,

Appointments Officer.

CLINICAL INFORMATION

Reason for Referral: TO: MUSCULOSKELETAL OPD @ ROODLANDS HOSPITAL please

Main Referral Text: I would be grateful if you could see this 35yr old man, who has had several months of pain in the right elbow radiating down the forearm, which clinically seems to be consistent with tendonitis. This has been deteriorating and now he is struggling to have any meaningful function of the right arm. He is unable to tolerate any oral anti-inflammatories, but is using an anti-inflammatory gel and tubigrip for support.

In addition, he has a chronic problem going back many years in his left knee involving the infra-patellar tendon area, where he had a laceration from glass which has healed leaving a swelling. He has had pain in the left knee for years, and intermittently feels that his knee locks. He is keen to see if any specific treatment options might be available for this, and I wonder whether a steroid injection may be an option to explore.

I am very grateful for your opinion.

Many thanks.

Dear Dr Stenke,

A COPY OF THE FOLLOWING LETTER HAS BEEN SENT TO YOUR PATIENT:

Patient: Gilroy, Lee **DOB:** 20/09/1981
Address: 85 Whitecraig Road, Whitecraig, Musselburgh, Midlothian, EH21 8NF

Dear Mr Gilroy

Notification of Removal From the Chronic Pain Outpatient Waiting List

According to our records you have failed to attend for your appointment as detailed below:

Specialty: Chronic Pain

In view of our waiting list, we are not routinely arranging second appointments. We have therefore removed your name from our waiting list.

We have copied this letter to your GP. If you still need treatment please get in touch with your GP who will contact us again if necessary.

Yours sincerely,

Appointments Office.

GP: Dr JE Stenke
Riverside Medical Practice
Musselburgh Primary Care Centre
Inveresk Road
Musselburgh
EH21 7BP

Procedure date
22nd November 2016

Priority: Elective

Hospital: Roodlands Hospital

Referring Cons: General Practitioner (Direct Referral)

Consultant/Endoscopist
Dr Alan Shand
Nurses: Nathalie Bernard
Dianne Gill

Instrument
WGH 092 GIF-H260 2244092

Premedication
Xylocaine (Spray) 130 mg

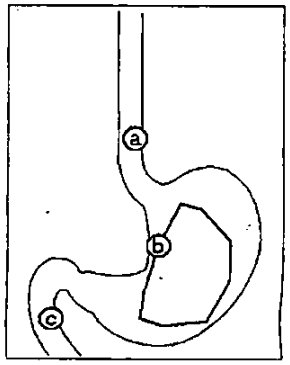
Indications
Reflux symptoms.

Report
The procedure was completed successfully.
Apparent mucosal junction at 40cm from the incisors.
STOMACH. Gastritis: mild erythematous/exudative with no bleeding within (b).
Result of urease test within (b) proved negative for Helicobacter pylori.

Diagnosis
OESOPHAGUS. Oesophagitis/reflux.
STOMACH. Gastritis.
DUODENUM. Normal.

Follow up
Return to the referring GP.

Advice/comments
Well tolerated procedure. Mild oesophagitis in spite of lansoprazole. Mild gastritis. I think the methadone probably causes a bit of delayed gastric emptying which will worsen reflux. Suggest working to reduce methadone dose from current 135ml/d. If this fails to help a trial of esomeprazole 40mg od would be appropriate +/- ranitidine 150mg at night



a: *Lower oesophagus (photographed)*
b: *An area extending from the middle body through the upper body and lower body*
c: *Second part (photographed)*

Specimens taken
Urease: H.pylori negative (site b)

CLINICAL INFORMATION

Reason for Referral: Pain Clinic

Main Referral Text:

Dear Team

This man was referred by my colleague Dr Stenke in Oct 2016. He tells me that he defaulted his appointment as he was finding himself to busy with family commitments.

He was in to see me to complain that his chronic back pain is really getting him down and is making him feel tense and irritable.

Non steriodals are contraindicated due to a recent finding of oesophagitis and as you will know he is on quite a high dose of Methadone.

See enclosed original referral and Lee promises he will attend this time.

Many thanks.

Request for Urgent Prescription

1344

On rare occasions, a patient may have forgotten to order their prescription and feel they need an "urgent prescription". Due to the large number of patients at the practice the emergency GP and the staff are usually very busy throughout the day and workload has to be prioritised according to **medical** need. Because of this, urgent prescription request are not easy to provide.

Repeat prescriptions are ready to collect at the Health Centre within 48 working hours. "Special Requests" are usually available within 48 hours, although may take slightly longer as the Doctor will need to spend some time to check the prescription is OK to issue. "Special Requests" are medications that are not on repeat prescription, as they are being monitored more closely by the doctor.

The decision regarding the urgency of the prescription lies solely with the emergency GP. Very few medications are genuinely urgent and patients will come to no harm by missing them for a few days. It is unfortunate that doctors have to refuse requests, but only by doing this can priority medical care be given to genuine medical emergencies.

The most common requests for urgent prescriptions are for anti-depressants. It is very unlikely that the emergency doctor will consider these to be urgent. No harm will come from missing these tablets, although it should be recognised that anxiety surrounding this can heighten patient concern.

The emergency doctor will be aware of the urgent request shortly after the request is made, to allow a brief assessment of urgency. It is very likely that the prescription will **not** be dealt with for a considerable length of time and receptionists should not be asked to "chase up the doctor" for the prescription.

If a patient feels that the request has been unfairly rejected, the receptionist can offer an urgent triage call back. This will almost certainly be with the same emergency doctor who has already assessed the prescription request.

The prescription request (whether issued or rejected) will be handed to the patient by the attending receptionist. Doctors cannot carry out this task as discussion regarding prescriptions cannot occur in public areas for reasons of confidentiality.

First Name LEE Surname GILROY

Date of Birth 20/09/81 Contact Tel No. 0131 665 8688

PRESCRIPTION ITEM REQUIRED	PREPARATION (eg. cream, pill)	DOSE (eg. 100mg, 50mg, 50ml)
METHADONE	LIQUID	135 MLS
VALLIUME	PILL	15 MG

YOU WILL ONLY BE GIVEN A 3 DAY SUPPLY TODAY – A ROUTINE ORDER FORM IS ATTACHED, WHICH YOU WILL NEED TO COMPLETE TO GET YOUR NORMAL PRESCRIPTION.

I confirm that I have read and understood the above and that my request for an urgent prescription may be declined. I agree to wait in the Health Centre until the duty doctor is available to review my request.

Signed [signature] Date 21/09/16

CLINICAL INFORMATION

Reason for Referral: REQUEST FOR ASSESSMENT PLEASE

Main Referral Text: I saw this 35yr old man in our GP practice again this week, and one of the things he was keen to discuss was his ongoing chronic back pain. He has had referrals on more that one occasions to your service previously, and when I last wrote to you at the end of 2015 - you kindly wrote back to highlight that he had not attended three consecutive appointments in the preceeding 4-months, wasting a huge amount of resources and clinic time. You had said at that time that you did not feel that you wanted to add him back onto your waiting list, but if there was any evidence that could indicate that he would have a better chance of attending any following appointment, that you would reconsider this.

He has asked for a further referral to your service. We discussed at length the waste of resources that he had caused previously and that really it was inappropriate to refer him again if there was not a clear intention and plan for him to engage/attend appointments offered, and that it was unacceptable if he kept wasting everybody's time effectively. He did acknowledge this and says that previous a big barrier in attending your service had been his lack of transport, and due to his chronic pain he struggles with using public transport. He says now that his girlfriend has a car and that this is a big change, as he is now more mobile as she can drive him to appointments etc. He assures me that he will attend an appointment if offered one for your service, and in view of the change in his circumstances I really hope that he may follow through on this.

I wonder if you would be so kind as to give him one more chance to attend your clinic.

Many thanks.

Mode of Arrival	Private Transport		
Source of Referral	General Practitioner		
Discharge Date	20/07/2016		
Discharge To			

Dear Dr FF Nally

Presentation: piles

Clinical note: 34 year old male

Several year hx of haemorrhoids. 2/7 hx of worsening anal pain, no PR bleeding or discharge. No fever or systemic upset. Seen by GP who referred patient to Gen Surg at RIE for tx of thrombosed haemorrhoid. Gains some relief from Anusol cream. Longstanding hx of constipation.

PMH: IVDU
Meds: Methadone, Cocodamol, GORD - awaiting OP UGIE

O/E: T 37, P 72 SR, BP 106/59, Sats 96% RA, RR 14/min. Tender purple thrombosed external haemorrhoid at 9 o'clock. Able to WB but appears uncomfortable.

PLAN: Advised that usually mx of these is conservative. Provided Instillagel for topical application, advised re: regular applications of frozen ice packs (20min on, 20min off) and given Lactulose to soften his stool. If not improving over next few days, to see GP and for referral to the Colorectal Surg at WGH.

**Note to GP: Please refer stable surgical patients directly to that team rather than through the Emergency Department. In this case, that would be the colorectal registrar at WGH, who

NHS Confidential: Personal data about a patient

would have advised of conservative mx, without need for A&E assessment. In cases where same-day surgical opinion is needed, if the patient is referred by phone by the GP, they will not need to wait hours in A&E for doctor assessment and then surgical referral from us. Unfortunately letter alone is not accepted as a route of direct referral by the surgical team though this is appreciated for further information, thank you.**

Yours Sincerely,

Dr K Rebecca Cranfield, Consultant

CLINICAL INFORMATION

Reason for Referral: URGENT REQUEST PLEASE

Main Referral Text: This 34yr old man has been referred previously to your service regarding symptoms of heartburn, abdominal pain and vomiting. I believe that he did not attend an appointment in Feb 2016, but tells me that since then he did attend for endoscopy but that this could not be performed because he had had some coffee to drink. He is really struggling with symptoms and wonder if you would consider providing him with a further appointment.

The main issues are of heartburn and abdominal pain with vomiting. This is very severe on days when it occurs, but he can have days when he is fine. There is no blood in the vomit. He tends to be very constipated, but is on Methadone and moves his bowels twice per week sometimes with some red blood. He also has haemorrhoids, which are presumed the reason for this. He has tried Omeprazole and Ranitidine and is currently on Lansoprazole, but is using a maximum dose of Peptac with this and is still struggling. His H.pylori is negative.

I would be very grateful for an appointment for endoscopy +/- review for him, as you feel is appropriate.

Many thanks.

Dear Dr Stenke

LEE GILROY **85 WHITECRAIG ROAD, WHITECRAIG, MUSSELBURGH, EH21 8NF**
700009150B **CHI: 2009811259**

You referred this man because of quite chronic and severe heartburn but he didn't attend today. I haven't arranged any further appointments. As you know, persistent uncomplicated dyspepsia or heartburn is not an indication for upper endoscopy in young adults without any concerning symptoms. If it has not already been done I would recommend a Helicobacter test and treat approach.

Yours sincerely

DR IAN PENMAN
CONSULTANT GASTROENTEROLOGIST

Dear Dr Stenke

LEE CLARK GILROY, 85 WHITECRAIG ROAD, MUSSELBURGH EH21 8NF. DOB: 20/09/81

Thank you for your letter of 23rd December 2015 requesting a further new patient appointment for Mr Gilroy. You may not be aware that he has not attended three consecutive appointments in the last four months which represents two and a quarter hours of clinic time wasted.

I have not added Mr Gilroy to our waiting list, but if some evidence could be presented that indicates that he has a high chance of attending this clinic then I would be very happy to reconsider.

Yours Sincerely

DR IVAN MARPLES
Consultant in Anaesthesia & Pain Medicine

CLINICAL INFORMATION

Reason for Referral: UPPER GI ENDOSCOPY

Main Referral Text:

Dear Team

I would be very grateful if this man could be seen for consideration of an upper GI endoscopy. He has had heartburn for many years but it has got to absolutely awful levels at this point with his drinking about a litre of peptac every couple of days. In addition he has been taking Ranitidine 300mg twice a day.

Given the uncontrolled nature of the symptoms and the escalation over the last month, I would be very grateful if he could be seen relatively soon for clarification of any underlying pathology.

Many thanks.

CLINICAL INFORMATION

Reason for Referral:	URGENT PHYSIOTHERAPY
Main Referral Text:	Dear Team This man is awaiting a routine appointment for the physio service but I would be grateful if this could be expedited if possible to urgent. He is struggling increasingly with his sciatica pain and management of this is difficult. It has been felt that he would benefit from more urgent physio input. He was referred in September and I believe is awaiting an appointment still. Many thanks.

Dear Team

RE:	**Lee Clark GILROY**
DOB:	**20/09/1981**
CHI:	**2009811259**
Address:	**85 Whitecraig Road, MUSSELBURGH, EAST LOTHIAN, EH218NF - T: 01316658458 Mob: 07971697066**
UHPI:	

I would be grateful if this man could be re-appointed to the pain clinic waiting list as he unfortunately did not receive the appointment letter for the recent apparent missed appointment.

I would be very grateful if he could be sent another appointment.

Yours sincerely,

Dr Joanna Stenke

CLINICAL INFORMATION

Reason for Referral:	REQUEST FOR ASSESSMENT APPOINTMENT PLEASE
Main Referral Text:	I would be grateful if this 34yr old man could be offered a further appointment for the Pain clinic. He had failed to attend appointments offered by your service, but is apologetic for this and does feel that he needs input from your team. He is struggling increasingly with severe chronic back pain. He states to me that he will definitely attend any further appointment offered him and I wonder if he could be given a further chance. Many thanks.

MRI Spine Lumbar/Sacral

Clinical details

MRI Spine Lumbar/Sacral
Dear TeamTHis 33 year old man has a 4 week history of sciatica type pains but has now developed pain into both legs. He describes pins and needles in both of his buttocks are there is no definite sensory defect on exam.He is extremly uncomfortable in any position and I am concerned that he may have a nerve root compression, I would be grateful for an MRI to confirm this.Many thanks. / MRI Lumbar Spine

Report
Images are moderately degraded by patient movement.

There is a vertebral body haemangioma at L4 (of no clinical significance) otherwise normal marrow signal. Normal vertebral alignment and vertebral body heights. No paravertebral soft tissue abnormality.

In the lower thoracic spine there are mild non-compressive disc degenerative changes at T11/12 and T12/L1. In the lumbar spine there are minimal non-compressive disc degenerative changes at L4/5 and L5/S1. Normal spinal canal diameter. All neural exit foramina are widely patent. Normal appearance of lower thoracic cord, conus (at L1) and cauda equina.

Opinion: Minimal non-compressive degenerative changes only. No cause for buttock or leg pain has been found.

Reporting Radiologist: Dr Z Morris

CLINICAL INFORMATION

Reason for Referral: REQUEST FOR ASSESSMENT PLEASE

Main Referral Text: I wonder if you would kindly see this 33yr old man, who is on a regular Methadone Programme prescription of 135mls daily and Diazepam 30mg daily. He is pretty stable on these prescriptions, however, unfortunately he has had problems with severe lower back pain. A recent MRI [report attached] shows disc degeneration at his thoracic and lumbar spine, but not nerve compression. The plan is for physio referral, but I wonder if you would kindly advise us regarding appropriate analgesia. Unfortunately, Cocodamol and Diclofenac are barely touching the pain and I would appreciate your advice regarding appropriate options, considering his Methadone.

Kind regards.

Dear Dr Gowing

LEE GILROY 85 WHITECRAIG ROAD WHITECRAIG MUSSELBURGH EH21 8NF DOB 20.09.81

Mr Gilroy was due to be seen for assessment in the Pain Clinic today. Unfortunately, yet again, he failed to attend nor did he contact us to say he wished a further appointment. In addition to the appointment that he failed to attend today he previously failed to attend a new patient appointment on 06 August and cancelled at short notice a previous appointment on 16 July having confirmed attendance several days beforehand. Clearly he struggles to attend. In view of our increasing waiting list I would not plan to offer him a further appointment but would be happy to discuss his management either on our email advice service which is lothianchronicpainservice@nhslothian.scot.nhs.uk or our SCI gateway advice service.

Kind regards.

Yours sincerely

CLINICAL INFORMATION

Reason for Referral: MRI Lumbar Spine

Main Referral Text: Dear Team

THis 33 year old man has a 4 week history of sciatica type pains but has now developed pain into both legs. He describes pins and needles in both of his buttocks are,there is no definite sensory defect on exam.

He is extremly uncomfortable in any position and I am concerned that he may have a nerve root compression, I would be grateful for an MRI to confirm this.

Many thanks.

Dear Dr Grandison,

A COPY OF THE FOLLOWING LETTER HAS BEEN SENT TO YOUR PATIENT:

Patient: Gilroy, Lee **DOB:** 20/09/1981
Address: 85 Whitecraig Road, Whitecraig, Musselburgh, Midlothian, EH21 8NF

Dear Mr Gilroy

Notification of Removal From the Orthopaedics Outpatient Waiting List

According to our records you have failed to attend for your appointment as detailed below:

Specialty: Orthopaedics

In view of our waiting list, we are not routinely arranging second appointments and we have therefore removed your name from our waiting list.

We have copied this letter to your GP. If you still need an appointment please get in touch with your GP who will contact us again if necessary.

Yours sincerely,

Appointments Officer
Tel: 0131 242 3417/3451/3529/3543

The time that you have to wait for hospital appointments in Scotland is getting shorter.

You can usually expect to receive your hospital appointment within weeks of being referred by your GP.

To help us treat you faster than ever before, please tell your GP practice if:

- you change your address or phone number; or
- there are any dates when you will not be able to go to hospital, for example, because you are going on holiday.

Please contact the hospital if:

- you know you cannot keep the appointment you have been offered (the hospital will then be able to offer your appointment to another patient); or
- you change your address or phone number.

A missed appointment is a wasted appointment and can lead to longer waiting times for all patients.

If you have an appointment, make sure that you can keep it. If not, let the hospital know.

If you do not turn up for your hospital appointment:

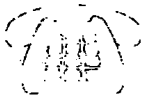
- the hospital will tell your GP that you did not go to your appointment;
- you and your GP will then have to assess whether you still need to go to hospital; and
- if you are referred to hospital again, your total waiting time will be longer because you did not go to your original appointment.

If your GP or the medical staff at the hospital think that you need urgent treatment, you will always be seen as soon as possible.

NHS Confidential: Personal data about a patient

Patient checklist

- ☐ Make sure your GP practice has your correct address and phone number.
- ☐ Tell your GP practice if there are any dates when you will not be able to go to hospital.
- ☐ Contact the hospital as soon as possible if you cannot make the date they have given you.
- ☐ Make sure you know where to go for your hospital appointment and how to get there.
- ☐ Allow enough time to get to your appointment on time.



This leaflet has been produced by The Scottish Government in partnership with NHSScotland.

NHS SCOTLAND

We know that not everyone is able to contact the hospital by phone. Please make sure your GP practice knows if you need any help with communication (for example an interpreter or a sign language interpreter). Your GP practice can then tell the hospital what help you need when they refer you for an appointment.

We can provide this leaflet in different languages, larger print or Braille (English only). For information on how to get a translation of this leaflet, please phone the number below.

CLINICAL INFORMATION

Reason for Referral: URGENT REQUEST FOR ASSESSMENT PLEASE

Main Referral Text: Please may I refer this 33yr old man with a history of PR bleeding. He presented today with fresh red PR blood and also anal discomfort. He told me that he thought that he had piles, and that in the past he believes that he has felt an external pile and he seems to have been empirically treated with pile creams and suppositories in the recent weeks. He tells me that intermittently he has been getting intermittent bleeding over the past 6yrs now, although it does not appear that he has had any secondary care investigation to date. He is on a Methadone prescription and his bowels tend to be constipated, and at present he does report passing pellet like motions. He tells me that he tries to avoid straining but sometimes this is inevitable.

On examination, there is no obvious evidence of an external pile nor could I see an obvious fissure. On PR exam there were no obvious masses or abnormality.

I have continued his topical pile preparations and have suggested that we try to get his bowels a little bit more regular with some Lactulose. However, in view of his lengthy history and without definite cause for the PR bleeding, I thought it probably best to refer.

Kind regards.

Additional information

Smoking history (Encounters):Current smoker Date recorded:17-Jul-2012

NHS Confidential: Personal data about a patient

SUPERVISED CONSUMPTION OF METHADONE

Supervised consumption of methadone helps confirm that you are taking the prescribed dose and helps check that the dose is correct (i.e. neither too high nor too low). It also helps ensure that the prescribed dose is not being shared, swopped or sold.

***** EVEN A SMALL DOSE OF METHADONE CAN KILL SOMEONE NOT USED TO TAKING IT *****

In Lothian you are required to have a period of supervised methadone consumption every year. Before this starts you are offered a 'Drug Amnesty' – that is a chance to explain if you have not been taking the full amount of methadone prescribed for you. If the dose you are prescribed is more than you have actually been taking the prescription can be changed to the correct safe dose. Discussing this now will not affect your treatment programme and your methadone will not be stopped although the dose may be changed.

The Pharmacy you will attend for supervised methadone consumption is: ESKSIDE .

If two or more supervised methadone doses in a row are missed the pharmacist will notify the prescriber and the prescription may be stopped. The pharmacist will also notify the prescriber if they have concerns about:

- **the safety of a child in your care.**
- **any unacceptable behaviour at the pharmacy.**
- **you appearing to be intoxicated with alcohol or drugs which may result in your methadone dose being withheld.**

You may be required to show photographic or other ID every time you have your Methadone consumption supervised. (If using photo ID it is recommended that you leave it at the Pharmacy during supervision period).

REMEMBER -

- **If you are taking methadone it is dangerous to also take ALCOHOL or street drugs such as DIAZEPAM (valium), HEROIN or other OPIATES (e.g. DIHYDROCODEINE).**
- **Taking alcohol and other drugs on top of your prescription may impair your ability to function and look after children safely. It also increases your risk of overdose.**
- **You may overdose and die if you take a higher dose of methadone than you are used to.**

BY SIGNING THIS FORM YOU AGREE TO THE FOLLOWING STATEMENTS -

- **I understand the dangers of taking more than my usual amount of methadone.**
- **The dosage stated, 140 mg, is the normal amount that I take, my body is used to this dose [tolerant] and I am prepared to take this under supervision at the Pharmacy.**
- **I will attend the Pharmacy within the times agreed between myself and the Pharmacist.**

CLINICAL INFORMATION

Reason for Referral: REQUEST FOR ASSESSMENT PLEASE

Main Referral Text:

Many thanks for seeing this 32 yr old man, who has recently become a father again and is on a Methadone maintenance prescription as well as Diazepam - he is currently stable.

He has a history of a calcaneal fracture 2003, sustained whilst he was evading the Police and jumped over a wall to find a greater drop on the other side. He has been experiencing greater problems over the last year or so with more pain. He is tender laterally and over his peroneal muscles on that side, and is limping. I asked him to go for an x-ray, but sadly he has not done that so far. He cannot tolerate anti-inflammatories due to GORD despite PPI cover.

I wonder whether you would be kind enough as to see him, with review x-rays on arrival in your Department, so that we can ascertain whether it is just physiotherapy that he requires or whether your more expert intervention is required.

Many Thanks.

Kind regards.

Dear Dr Grandison,

A COPY OF THE FOLLOWING LETTER HAS BEEN SENT TO YOUR PATIENT:

Patient: Gilroy, Lee **DOB:** 20/09/1981
Address: 43 Delta Road, Musselburgh, Midlothian, EH21 8HA

Dear Mr Gilroy

Notification of Removal From the Orthopaedics Outpatient Waiting List

According to our records you have failed to attend for your appointment as detailed below:

Specialty: Orthopaedics

In view of our waiting list, we are not routinely arranging second appointments and we have therefore removed your name from our waiting list.

We have copied this letter to your GP. If you still need an appointment please get in touch with your GP who will contact us again if necessary.

Yours sincerely,

Theresa Trotter

CLINICAL INFORMATION

Reason for Referral:	REQUEST FOR ASSESSMENT PLEASE
Main Referral Text:	Many thanks for seeing this young father, who is about to have a 3rd enter the family sometime soon. He complains of symptomatic haemorrhoids for the past few years. He has the undernoted medical history and I wonder whether you would be able to see him with a view to discussing surgical options. Many thanks.

08/02/2012 Consultation 1st part breath test 9.19 Mrs Brenda Rolland
01/02/2012 Telephone encounter Rajput locum duty: ran out of ranitidine & script done as documented. Dr . Male Locum
27/01/2012 Telephone encounter "629 4267 advice re stoping medication before breath test"Does not feel he will manage off medication before test. Will try or can try gaviscon. Should still attend for test anyway Dr S Agarwala
12/01/2012 Consultation 1) Reflux Sx not helped by lanasoprazole anymore. Taking ranitidine again and is helping. Continue pending breath test2) Generally sticking to diazepam 30mg daily. Stress with father in jail and at risk of harm. No family support after he left Laura beforer/v 6/52 when I return3) Undisplaced # base R 5th MC. Had splint but DNA follow. Slow improvement. Still sore. No further treatment likely to help. Will observe Dr S Agarwala
12/01/2012 Consultation (Substance misuse) Dr S Agarwala
10/01/2012 Telephone encounter Triage "629 4267 re want like to speak with you re stomach"Clarithromycin made him feel sick so did not have full course h. pylori eradication. Ongoing Sx. Awaits breath test. Seeing me later in week Dr S Agarwala
06/01/2012 Telephone encounter Recurrence of dyspepsia - has had eradication in November . Breath Test then see. may need Endoscopy. Unhappy as has long Hx of heartburn , vomiting etc and HP only diagnosed when he came to this practice. Wants to make a Complaint and advised accordingly . Has lansoprazole meantime. BR will organise test and call patient. Dr K Carr

Dear Mr Gilroy

Mr Lee Gilroy **DOB-CHI: 20/09/81 1259** **NHS No: 746/81/240**

I have to inform you that Eskbridge Medical Practice, Musselburgh Primary Care Centre, Inveresk Road, Musselburgh, EH21 7BP has requested me to remove your name(s) from its national Health Service list of patients. The reason for your removal is due to your persistent failure to attend appointments despite previous warnings and also your breech of patient contract.

Your name(s) will be removed from the practice's list on 26th July 2012.

It is in your best interest to seek acceptance on to the list of another General Practice as soon as possible. To do this you should take your medical card(s) to the practice of your choice and ask to be accepted on to their practice list. Alternatively you may complete form GPR which is available at the practice.

If you are having difficulty finding a new General Practice, please write to this office as soon as possible requesting that you be assigned to a local practice. A letter will then be sent to you providing you with the name of the practice to which you have been assigned. I must advise that as assignments are made on a strictly rotational basis you will have no choice in the practice to which you are assigned.

Yours sincerely

LOTHIAN TEAM

Copy to Practice for information. It would be appreciated if, immediately following expiry of your responsibility, the appropriate medical record was returned to this office quoting the above reference.

CLINICAL INFORMATION

Reason for Referral: ORTHOPAEDIC SURGERY

Main Referral Text:

Dear Doctor

I wonder whether you would be able to see this 30 year old gentleman who is on the Methadone programme and stable currently on his maintenance prescription who has previously been a heavy intervenous drug user. The state he was in when he fractured his right calcaneum in 2004 when he was registered in the Kirkliston Practice, he was under the influence of intervenous heroin and therefore refused to stay in hospital or have any follow up for what was planned – operative repair.

Unsurprisingly since then he has complained of pain and stiffness in his right foot when walking. He is certainly more stable medically and turns up to his appointments on time, has had Hep B immunisations in his previous practice last year. He is now realising the ways he was 8 years ago and wonders whether there is anything that can be done for the pain and stiffness although clearly we are assuming a window has been missed for him for operative intervention but I would appreciate if you would see him with a view to symptomatic advice and whether he perhaps he needs any orthosis to help with his pain and stiffness.

Many thanks.

Dear Mr Gilroy

I am writing further to our telephone conversation on the 13th July to confirm that I have written to NHS Lothian asking them to remove you from our Practice List. The reason for this is that you have continued to miss your appointments. You have therefore breeched the conditions of your drug treatment agreement that you signed when you joined the Practice.

You will receive notification from NHS Lothian in due course. In the meantime I advise that you register with another GP Practice.

Yours sincerely

Dr S Agarwala

Dear Dr Agarwala

Mr Lee Gilroy, 74 Windsor Park, Musselburgh, EH21 7QP
UHPI:700009150B, DoB: 20/9/1981, CHI: 2009811259

This 30 year old man has a previous history of intravenous drug abuse. He has not abused drugs intravenously for the last eight years but is taking Methodone and Diazepam. As you said in your letter, he has a 4½ year history of heartburn with regurgitation and these symptoms are worse when he lies down. Unusually, the Omeprazole and Lansoprazole have not helped at all but he does find that Ranitidine at quite high doses affords some relief. There are no alarm features such as dysphagia. In addition he has a typical abdominal pain that isn't typical of ulcer disease or of irritable bowel syndrome.

There are no findings within the abdomen.

Clearly he may well have significant and resistant gastro-oesophageal reflux disease and obviously should undergo endoscopy with this in mind. There are challenges; particularly he, I am sure, will be a difficult subject to endoscope even with optimal sedation. Therapeutically I think he is also going to be challenging, in particular if he does not have a large hiatus hernia or evidence of oesophagitis then response to anti-reflux operation will be poor. I fear, therefore, that he may have a form of difficult dysfunctional dyspepsia but clearly have an open mind and it is obvious that we do need to undertake endoscopy at least to clarify matters.

Yours sincerely

Dr KEL PALMER
Consultant Physician

Dear Dr Agarwala

SALUS CASE MANAGEMENT SERVICES – DEA Programme
NAME: Lee Gilroy ADDRESS: 74 Windsor Park
D.O.B: 20/09/1981

The above client has been referred to Case Management Services via the DEA Programme project. They have consented to a Case Management assessment in order to address current health issues.

The service is delivered by a Case Manager who will offer a holistic assessment to determine the patient's current health needs in relation to their health and wellbeing.

The service is intended to support the patient's health and wellbeing, as well as their social and emotional needs, with referral to other services such as counselling, physiotherapy and lifestyle coaching where appropriate. The Case Manager remains a central point of contact supports the client throughout.

We aim to work in collaboration with our partners in health; therefore, if you have any questions with regard to this referral or if you wish to provide us with any information you feel may be relevant to aid the assessment process and support your patient, please do not hesitate to contact us on 01698 206361.

If we do not hear from you we shall assume you are agreeable to us proceeding with this referral.

Yours sincerely

CLINICAL INFORMATION

Reason for Referral: Persistent Gastro-Oesophageal Reflux

Main Referral Text:

Dear Doctor

This 30 year old man complains of severe heartburn over the last 5 years. He was treated with Omeprazole 20mgs twice daily last May, without much benefit. In November, he was commenced on Lansoprazole 30mgs twice daily, but again did not find this helpful. He was found to be H.Pylori positive and had eradication therapy. He then went on to have a negative Breath Test.

More recently, he has found that Ranitidine has been more effective, but the effect quickly wears off. He continues to experience severe heartburn associated with vomiting and he is increasingly concerned that there is something more serious going on.

He has a history of drug dependency, but is currently stable of Methadone 160mls daily and Diazepam 30mgs daily.

I would be grateful if he could be considered for endoscopy now.

Many thanks.

Dear Ms Tulley

LAURA METCALFE, 18.6.78
LEE GILROY, 20.9.81
LEOMI GILROY, 3.12.07
LEE GILROY, 16.2.09

Thank you for your recent letter regarding this family.

I started prescribing for both parents last May when they registered with the practice. At this time, Laura told me that she had been stable on 35mls of Methadone daily for some time. Her last urine toxicology was in May 2011 and this did confirm that she was stable. They were having some difficulties in their relationship last year and they separated for a while but they are now back together again. Certainly Laura was under a lot of stress at the time.

I see Laura regularly and her last appointment was on 16th January. She admitted to me that she had been using Diazepam because of the stress of recent problems with her partner Lee. She asked if I would prescribe her Diazepam as well and I agreed to do this on the basis that we would reduce her dose every month with a view to stopping it.

When I first met Lee last May, he was being prescribed 35mls Methadone daily, although he was having to use extra. He has had his Methadone increased gradually and he has been prescribed 160mls daily since last July. He picks up his Methadone on Mondays, Wednesdays and Fridays. His last toxicology on 11th August showed that he was stable on his Methadone. He admitted to me in October that he was taking up to 200mgs of Diazepam daily. I initially declined to prescribe this for him because of the amount and instead referred him to the Substance Misuse Service. They felt that it was more appropriate for him to attend MELD and he was therefore referred to them instead. He was not keen on attending MELD and managed to reduce the Diazepam himself to 40mgs daily. I started to prescribe him Diazepam 30mgs daily dispensed 3 times weekly on 15th December. Again, the plan is that there will be a reduction every month with a view to stopping this.

I have seen both children informally, primarily when she has attended. They have both looked healthy and well looked after. Laura brought Lee junior to the surgery appropriately on 8th September because he was unwell with chickenpox. Leomie has not had to attend the surgery with any problems. She was seen by Speech & Language Therapy at Edenhall on 3rd October. It was felt that she did not require any therapy.

There have been some recent difficulties in Lee and Laura's relationship. This does seem to have caused them a lot of stress and resulted in them having to start using Diazepam. They do obviously care very much for their 2 children and seem to be committed to trying to make things work for the sake of the children. I do, however, have some reservations about the level of support they have and their ability to manage when things are not going so well. I do think that Social Work should have some involvement given the previous history with the other children. I do not have any specific concerns about their 2 children, but I do think this needs to be monitored.

Yours sincerely

Dr Simon Agarwala

Dear Dr Agarwala,

A COPY OF THE FOLLOWING LETTER HAS BEEN SENT TO YOUR PATIENT:

Patient: Gilroy, Lee **DOB:** 20/09/1981
Address: 74 Windsor Park, Musselburgh, Midlothian, EH21 7QH

Dear Mr Gilroy

Notification of Removal From the Orthopaedics Outpatient Waiting List

According to our records you have failed to attend for your appointment as detailed below:

Specialty: Orthopaedics

In view of our waiting list, we are not routinely arranging second appointments. We have therefore removed your name from our waiting list.

We have copied this letter to your GP. If you still need treatment please get in touch with your GP who will contact us again if necessary.

- Prison ☐
- Other ☐

Voluntary service ☐
Education ☐
Housing ☐
Other *(specify)*

CO-OCCURING HEALTH ISSUES *Tick all that apply*

Drug related physical health ☐
Mental health ☐
Alcohol ☐
Other *(specify)*

3) CONTACT WITH THIS SERVICE / REFERRAL TO OTHER SERVICES

Your Institution Code 2G396

Contact name / worker name M. SAGHAIR

Date contact first made (this episode only) - include letter/ phone referrals 03/05/11

Date first appointment offered 03/05/11

Date this assessment completed* (If assessment not completed, date last seen) 20/09/11

Has client been referred to another drug treatment or rehabilitation service? Yes ☐ No ☑

If yes, please provide date of referral

and name of service referred to

Is client being actively treated/cared for by this agency? Yes ☑ No ☐
If no, please provide reason (tick all that apply)

Received required support ☑
Unplanned discharge ☐
Disciplinary discharge ☐
In prison ☐
Deceased ☐
Currently on service waiting list ☐
Other *(specify)*

date of discharge

Has client been referred to a moving on/reintegration service Yes ☐ No ☐

If yes, please provide details (tick all that apply)

Employability or similar ☐
Education/training ☐
Housing ☐
Social Work ☐
Other *(specify)*

4) PREVIOUS CONTACT WITH SERVICES

Previous contact with any drug treatment services Yes ☑ No ☐

If yes, year of last contact 2006 Age when help first sought 24 years

5) AGE PROFILE

Age when first started using illicit drugs 15 years

Age at onset of problem illicit drug use 15 years

6) PRESCRIPTION DRUGS PROFILE (CURRENT)

Give details of current prescription related to treatment of addiction

None ☐ Not known ☐ Details verified? Yes ☑ No ☐

If none or not known, go to section 7

	Drug name	Daily dosage (mg)
Main drug	METHADONE	65
Drug 2		
Drug 3		
Drug 4		

7) ALCOHOL PROFILE (PAST MONTH)

Consumed alcohol? Yes ☐ No ☑

If Yes complete the details below. If NO, go to section 8

In a typical day how many units did the client usually have? units

How often did client have an alcoholic drink?

Every day ☐
3 - 4 days per week ☐
2 - 3 days per month ☐
5 - 6 days per week ☐
1 - 2 days per week ☐
about one day a month ☐

Tear here

Please return top copy using envelope provided

NHS Confidential: Personal data about a patient

8) ILLICIT DRUGS PROFILE (PAST MONTH) including solvents & OTC medicine taken inappropriately

Used in past month? Yes ☑ *show details* No ☐ *go to section 9*

	Drug name	Route(s) e.g. IV/ IM/ smoke/ swallow/ inhale/ snort How often i.e. daily/ most days/ weekends/ weekly/ fortnightly/ monthly				In a 'typical' drug using day	
		Main route	How often	Other route	How often	Quantity e.g. mg/ml/oz/binge	Spend £
Main Drug	METHADONE	ORAL				35 MG	
Drug 2							
Drug 3							
Drug 4							
Drug 5							

9) INJECTING/ SHARING DETAILS

EVER	Yes	No	IN THE PAST MONTH	Yes	No
Injected	☑	☐	Injected	☐	☑
If no go to section 10					
Always used new equipment first	☑	☐	Always used new equipment first	☐	☐
Used a needle or syringe that someone else has used	☑	☐	Used a needle or syringe that someone else has used	☐	☐
Lent someone else a needle or syringe which client has used	☑	☐	Lent someone else a needle or syringe which client has used	☐	☐
Used the same spoon, filter or water as someone else	☑	☐	Used the same spoon, filter or water as someone else	☐	☐

Age first injected 23 years

10) BLOOD BORNE VIRUSES

Tested for:	Yes	No	Date of last test (m m y y y y)
Hepatitis B	☑	☐	
Hepatitis C	☑	☐	
HIV	☑	☐	

	Yes	No
Has client been at risk since last test?	☐	☑
Has client completed a course of vaccination for Hep B?	☐	☑

11) SOCIAL PROFILE (CURRENT)

ACCOMMODATION

- Owned/ Rented ☐
- Supported accommodation (drug related) ☐
- Residential rehabilitation ☐
- In prison ☐
- Homeless - (Temporary)/ Unstable accommodation/ Hostel ☑
- Homeless - Rooflless ☐
- Other (specify) ☐

LEGAL SITUATION *Tick all that apply*

- None ☑
- Case pending ☐
- DTTO ☐
- On probation/ subject to supervision order ☐
- In Prison ☐
- Other (specify) ☐

LIVING SITUATION *Tick all that apply*

- With spouse/ partner ☐
- With parents ☐
- Alone ☑
- Other (specify) ☐

LIVING WITH OTHER DRUG USERS

- Yes ☐
- No ☑
- Did not wish to answer ☐

HAS CLIENT BEEN IN PRISON IN PREVIOUS 12 MONTHS?

Yes ☐ No ☑ Did not wish to answer ☐

How long since release ☐

Name of Prison of release ☐

EMPLOYMENT/ EDUCATION

- Employed (paid or unpaid) ☐
- Support into employment ☐
- Unemployed ☑
- Never employed ☐
- Long term sick/ disabled ☐
- School ☐
- Excluded from school ☐
- Full time education/ training ☐
- In Prison ☐
- Other (specify) ☐

DRUG USE FUNDED BY *Tick all that apply*

- Employment ☐
- Crime ☐
- Debt ☐
- Benefits ☐
- Sex work ☐
- Did not wish to answer ☑
- Other (specify) ☐

12) DEPENDENT CHILDREN

	Yes	No
Does client have dependent children *If yes provide age of each child in table*	☑	☐
Is client or their partner pregnant?	☐	☑

	Child one	Child two	Child three	Child four	Child five	Child six
Living with own children						
Own children living elsewhere	3	2				
Living with partner's children

Treatment Agreement

Date: 24/5/2011

This document describes the contract that you and the surgery are entering into to help manage your drug dependency. The surgery staff will treat you with respect and dignity. You will be involved in a full assessment which makes sure that decisions on your care and support are based on your needs. You will receive a written Personal Plan and we will work with you to achieve the jointly agreed actions in your plan.

The service provided to you will respect your confidentiality. Following the guidelines in place to protect children the professionals involved in your care may have to share information that would help to ensure the safety of a child.

You will be able to access safe, quality surroundings when being treated by the surgery and to help maintain this standard for all staff and patients we ask you to:

1. agree to attend appointments promptly and quietly.
2. agree to behave with respect and courtesy to staff and other patients using the surgery.
3. agree to attend appointments unaccompanied whenever possible.
4. accept responsibility for turning up for appointments on time.
5. agree to attend only the doctors mentioned below except for unrelated medical emergencies.
6. agree not to use emergency appointments, house calls or the out-of-hours medical service to discuss medication prescribed to help treat drug dependence.
7. agree to be responsible for your prescription and medication and recognise that, once issued, these cannot be replaced.
8. understand that you may be required to take your medication under supervision if requested by the doctor.
9. understand that if you do not attend the chemist regularly to collect your medication, your prescription may be stopped.
10. agree to information that might help to protect the safety of a child being shared with other relevant professionals if a member of the surgery staff feels this is necessary.

Safe use of medication

- *Any medication prescribed to you is for your use only: you must not give it to anybody else.*
- *It is your responsibility to store it safely, preferably in a locking cupboard or box.*
- *If you are starting methadone treatment, you will need to attend the agreed chemist daily and take your methadone under supervision. The chemist may ask you for proof of I.D.*
- *If relevant, you are responsible for notifying the DVLA that you are on treatment: they will determine your fitness to drive.*
- ***Methadone can kill someone who is not used to taking it, and a very small amount can kill a child. You must make sure that your methadone cannot be taken by a child or another adult.***

My Doctors name is:	DR J. AGARWAL
In his/her absence I will consult:	DR. S JHA

I have read the above rules, I understand what they mean, I agree to abide by them and realise that if I do not, it may not be possible to remain in treatment at the surgery.

CLINICAL INFORMATION

Reason for Referral: Drug dependency - referral to stabilise diazepam use

Main Referral Text:

Dear Colleague

This 30 year old man joined my practice in May, having moved through from Livingston. He has been misusing drugs since the age of 15 and started injecting Heroin at the age of 20. He has not injected for 6 years now. He previously attended the North West Locality Clinic in 2007 for a couple of years and was stabilised on Methadone 100mls daily. He then tried to come down too quickly. Whenever I first met him, he was being prescribed 35mls daily, but was having to buy extra. His toxicology at the time confirmed that he was not using any other drugs. He gradually increased his Methadone until he became stable. He was reluctant to go over 100mls daily, but accepted that this was necessary for him to become stable. He is currently prescribed 160mls Methadone daily dispensed, Monday, Wednesday and Friday. He appears to have been stable on this dose over the last 4 months.

He lives with his partner, Laura and their 2 children. He separated from his partner a few months ago and during this time, he started to take Diazepam. He is now back with Laura, but continues to buy Diazepam, up to 100mgs per day. He is now asking if it is possible for me to prescribe Diazepam for him and I am not happy to do this. I had initially wanted to refer him to your service when he first saw me but he was very reluctant to attend either yourselves or MELD. He would like some help to try and reduce his Diazepam use because he has recently admitted to some criminal activity to fund his habit and he wants to try and avoid this in future.

I also see his partner Laura who has been stable for some time on a Methadone prescription and I currently do not have any concerns regarding the children.

I would be grateful if you could see Lee with a view to helping him with his Diazepam dependency. I will, of course, be happy to take over prescribing his Diazepam if you can manage to reduce the dose he is taking.

Many thanks.

Investigations

Description	Result	Date
Date of assessment :	2011-05-03	
Will practice take over care after treatment	Yes	

stabilised? :	
Previous drug treatment? :	Yes
Service :	NW Locality Clinic 2007 to 2009
Date :	2007-12-14
Age when first used illicit drugs :	15
Age of onset of problem drug use :	15
Current prescribing for drug misuse? :	Yes
Details, including current dispensing arrangements and pharmacy :	Methadone 160mls daily dispensed Mon, Wed, Fridays
Consumed alcohol? :	No
Details :	Diazepam up to 100mg daily
Details :	First injected aged 20. Last injected 6 yrs ago
Details :	BBV testing negative September 2009Has had incomplete courses Hep B vaccination in the pastCurrently having a course of vaccination with Twinrix
Details (accommodation/living situation/employment/legal etc as relevant) :	Lives with partner Laura and their 2 children
Accomodation :	Living with own children
Age :	3
Accomodation :	Living with own children
Age :	2
Is patient or their partner pregnant? (Referral will be prioritised)? :	No
Involvement of Social Work, Health Visitor or other agencies - give details :	Social work have ongoing input. Health visitor Lyn Ireland.

Dear Mr Gilroy,

Thank you for letting us know that you've changed your address.

You do not need to take any further action for most of your Halifax and Bank of Scotland accounts.

However, if you hold any of the products listed below and you have **not** advised us of your new details separately, please call us on the number(s) shown. That way we can make sure all your records are updated and that all correspondence will be sent to this address from now on.

I hope you enjoy your new home and if there is anything we can help you with in future, please don't hesitate to contact us, or call into your local branch.

Yours sincerely

Mike Regnier
Personal Current Account Director

SUPERVISED CONSUMPTION OF METHADONE

Supervised consumption of methadone helps confirm that you are taking the prescribed dose and helps check that the dose is correct (i.e. neither too high nor too low). It also helps ensure that the prescribed dose is not being shared, swopped or sold.

***** EVEN A SMALL DOSE OF METHADONE CAN KILL SOMEONE NOT USED TO TAKING IT *****

In Lothian you are required to have a period of supervised methadone consumption every year. Before this starts you are offered a 'Drug Amnesty' – that is a chance to explain if you have not been taking the full amount of methadone prescribed for you. If the dose you are prescribed is more than you have actually been taking the prescription can be changed to the correct safe dose. Discussing this now will not affect your treatment programme and your methadone will not be stopped although the dose may be changed.

The Pharmacy you will attend for supervised methadone consumption is: Houden H.C. Pharmacy

If two or more supervised methadone doses in a row are missed the pharmacist will notify the prescriber and the prescription may be stopped. The pharmacist will also notify the prescriber if they have concerns about:

- **the safety of a child in your care.**
- **any unacceptable behaviour at the pharmacy.**
- **you appearing to be intoxicated with alcohol or drugs which may result in your methadone dose being withheld.**

You may be required to show photographic or other ID every time you have your Methadone consumption supervised. (If using photo ID it is recommended that you leave it at the Pharmacy during supervision period).

REMEMBER -

- **If you are taking methadone it is dangerous to also take ALCOHOL or street drugs such as DIAZEPAM (valium), HEROIN or other OPIATES (e.g. DIHYDROCODEINE).**
- **Taking alcohol and other drugs on top of your prescription may impair your ability to function and look after children safely. It also increases your risk of overdose.**
- **You may overdose and die if you take a higher dose of methadone than you are used to.**

BY SIGNING THIS FORM YOU AGREE TO THE FOLLOWING STATEMENTS -

- **I understand the dangers of taking more than my usual amount of methadone.**
- **The dosage stated, 35 mg, is the normal amount that I take, my body is used to this dose [tolerant] and I am prepared to take this under supervision at the Pharmacy.**
- **I will attend the Pharmacy within the times agreed between myself and the Pharmacist.**

Patient's signature _____ Date 21.10.10.

Dear Dr Zawhtet

RE: Mr Lee Clark Gilroy DOB: 20/09/1981
ADDRESS: 59 Granby Avenue, Howden, LIVINGSTON, EH54 6LD

IN PROFESSIONAL CONFIDENCE

Medical information that we have received about your patient confirms that the recommended medical standards for a driving licence can be satisfied, subject to a medical review in 1 year.

Should your patient's medical condition relapse or worsen, the patient must tell us again. Your patient has been told to do this. If the patient is either unwilling to take advice or, due to the underlying condition, is unable to understand the advice, you can contact us on 01792 761119. I appreciate that you may wish to consult a medical defence organisation or the GMC, "Confidentiality" booklet, before taking such a step. Any notification, which DVLA receives, is treated in the strictest confidence.

Should there be any doubt as to the standards of fitness to drive, these are published in the "At A Glance Guide To the Current Standards of Fitness To Drive". If you do not have a copy, the Guide can be accessed on DVLA's web site at www.direct.gov.uk/driverhealth.

Questionnaire to assess your patient's medical fitness to drive

PLEASE GIVE DETAILS TO THE MEDICAL ADVISER USING A SEPARATE SHEET, IF NECESSARY. FOR MEDICO-LEGAL REASONS, PLEASE GIVE YOUR PATIENT'S FULL NAME, ADDRESS AND DATE OF BIRTH.

1 In the past three years, has the patient demonstrated persistent drug misuse? NOT KNOWN REGISTERED HERE FEB 2009 — YES ☐ NO ☐

If YES,

a) Is this misuse controlled? YES ☑ NO ☐

If YES, how long has this been controlled? 1 Years | Months

b) Give full details and confirm type of drug(s) LOW CURRENTLY UP WITH

2 Has there been drug dependency in the last three years? YES ☑ NO ☐

If YES,

a) How long has this been controlled? DISCHARGED FROM COUNSELLOR MARCH 2009

b) Give full details and confirm type of drug(s) METHADONE SEE OVERLEAF

3 As a result of drug/illicit substance misuse, has your patient required treatment? YES ☑ NO ☐

Please give details and dates including the name and address we should contact for further information

4 Has your patient been diagnosed with a psychotic illness in the last three years related to drug misuse? YES ☐ NO ☑

If YES, please GIVE

a) Diagnosis and date diagnosed

b) How long has the mental state been stable? Years | Months

5 To your knowledge, is the patient continuing to use illicit/street drugs in addition to those prescribed? YES ☐ NO ☑

If YES, please confirm

a) Name of drug(s)
b) Frequency used
c) Date last used

DG2 GILRO809201LC9ZM

6 Is your patient currently on a supervised drug treatment programme? (Oral testing undertaken by drug treatment clinics would be acceptable evidence for licensing purposes.) YES [✓] NO [ ]

If **YES**, please confirm

i Name of drug METHADONE
ii Current dosage 35 ML
iii Route of administration ORAL
iv Date treatment started PLEASE CONTACT LOCALITY CLINIC.

a Has the patient co-operated with the treatment plan? YES [✓] NO [ ]

b Please provide dates and results of random urine testing over the last 12 months. (Favourable routine/random quarterly drug testing which should include the testing for amphetamines, benzodiazepines, cannabinoids, cocaine metabolite, methadone metabolite, ecstasy, opiates and where indicated, buprenorphine.)

16 JUL 2009 METHADONE ONLY IN URINE

7 Is your patient currently on any other prescribed medication? YES [ ] NO [✓]

If **YES**, please specify, including dosage

8 Does your patient have a history of:

a) alcohol misuse in the last six months? YES [ ] NO [✓]

b) alcohol dependency in the last three years? NOT KNOWN YES [ ] NO [ ]

If you answer **YES** to either a) or b), how long has it been controlled?

NOT SINCE 2009

c) Has your patient required detoxification from alcohol? YES [ ] NO [ ]

If **YES**, please give the date/dates of treatment. NOT KNOWN

9 Is there any other medical condition likely to affect safe driving? YES [ ] NO [✓]

If **YES**, please specify

DG2 GILRO809201LC9ZM

10 Please give the name(s) and address of any other relevant Doctor/Specialist involved in your patients treatment. Dr. John Budd, Lead Practitioner, North West Locality Clinic, Dears Pharmacy, 645 Ferry Road, Edinburgh, EH4 2TX.

Previous GP. Practice - Kirkliston Medical Practice, 50 The Glebe, Kirkliston, EH29 9AS

Dear Dr Zawhtet

RE: Mr Lee Clark Gilroy DOB: 20/09/1981
ADDRESS: 59 Granby Avenue, Howden, LIVINGSTON, EH54 6LD

Please fill in the enclosed medical questionnaire and return it in the envelope provided. The medical condition of drug misuse has been declared.

There is no need for you to see your patient to fill in the questionnaire as this can be done from their notes. If this questionnaire does not allow you to give sufficient details, please also send any relevant hospital reports or a letter providing the information.

The GMC and BMA have given agreement that the DVLA no longer needs to provide the patient's written consent. This is in-line with GMC guidance on confidentiality (para 34 (b)), which states that doctors can accept assurance from an officer of a government agency that the patient has given consent. Therefore, as an officer of the Government I offer my assurance that your patient has provided the department with their consent to disclose this information, sight of which is available on request.

To avoid delays, if you are unable to return the questionnaire for any reason, within the next 21 days, could you let us know either by phone, fax or e-mail.

We will pay £39.00 when we get the questionnaire and invoice. If you are VAT registered we will pay the fee plus VAT at the standard rate on receipt of a VAT invoice which should be sent with the filled in questionnaire.

Please note that your patient can request copies of any medical documents which are held at DVLA unless is specified in writing that releasing this information could cause serious harm to your patient.

An executive agency of the Department for Transport

Your patient may be entitled to drive whilst we are awaiting your reply and this might have an impact on road safety.

Rev Dec 09

Yours sincerely,

M. T. Slee

SUPERVISED CONSUMPTION OF METHADONE

...ed supervised consumption of methadone in order to reduce the number ...akage and to ensure that the methadone programme continues for those who need it.

You are required to have a period of supervised consumption. Before this starts, we offer everyone a **"Drug Amnesty"** - that is, an opportunity to tell us if you have not been taking the full amount of Methadone prescribed for you. The last thing we want to do is to put your life at risk by making you **take** more than the amount you are accustomed to taking. **50 mg can kill someone not used to taking it.**

Therefore, if the dose you are prescribed is more than you have actually been taking, we want you to tell us now so that we can change the prescription to the correct dose. This will not prejudice your treatment programme, no-one else will be informed and your methadone will not be stopped, although your dose may be altered.

In addition to make sure that no-one else gets your methadone, you will be required to show **photographic identification** every time you have your methadone consumption supervised.

We want you to sign this statement to say that:

I. I understand the dangers involved in taking more than my usual amount of methadone.

II. The dosage stated, 85 mg, is the normal amount that I take, to which I am tolerant, and which I am prepared to take under supervision at the pharmacy.

III. I understand that I must show photographic identification every time I have supervised consumption.

Signed (patient) .....

I confirm that I have discussed this fully with the patient

Signed (Doctor) .....

Date 18/7/08

Remember:

taken under medical supervision methadone can reduce harm

bought on the street methadone can kill

It is dangerous to take other street drugs such as valium, heroin, other oplates or alcohol along with methadone.

CONTRACT for the Prescription of Addictive Medication

NAME: LEE CLARK GILROY

NAMED DOCTOR: LAW-HTET

DEPUTY DOCTOR: DR. MAXWELL

We are willing to issue prescriptions for your addictive medication if you accept these rules:

1. I will attend only the *named doctor* or in his or her absence, the *deputy doctor* regarding my addictive medication prescription.
2. I will make routine appointments in good time to receive my prescription unless my doctor has issued the prescription in another way.
3. I will attend my appointments on time and will cancel in good time if I am unable to attend.
4. I agree not to use emergency appointments, housecalls or ~~WESTDOC~~ LOCS contacts to discuss my prescription.
5. I agree not to upset the receptionists or other people in the waiting room.
6. I agree to be responsible for my prescription and medication and recognise these will not be replaced for whatever reason.
7. I agree to regular monitoring of my medication consumption as arranged by my doctor. This may include random urine testing and/or supervised consumption of medication.
8. I agree to attend the CDPS regularly. IF RELEVANT
9. I realise if this contract is not followed my prescription may be discontinued and I may be asked to register with another practice.

I have read the above rules. I understand them and I agree to abide by them.

Re: Lee Gilroy, 15 Cleric's Hill, Kirkliston, EH29 9DP
D.O.B: 20.09.1981 CHI: 2009811259

Following the phone to the Clinic from last week, I understand that Lee has now registered with your practice and that you have agreed to take on prescribing of his Methadone maintenance treatment.

Lee has actually done very well since his attendance here at the Clinic and has been gradually reducing his Methadone dose down initially from 100mls+ of Methadone to his current dose of 35mls daily. He currently picks this up on a weekly basis and his next prescription is due to start on Thursday 5th March 2009. Lee is currently in employment, his partner Laura Metcalf, I believe is also registered with your practice and she is also currently stable in Methadone maintenance treatment. They have one small baby just over 1 year old and Laura is currently pregnant again. Health Visitors have been closely involved with this family and there have been no child protection issues identified. Lee's last toxicology result at the end of January confirm his stability and I note that he hasn't had supervised consumption for some time due to the fact that he is working and there are problems in terms of distance they live from their Chemist.

If you require any further information, please contact me on details provided.

Yours sincerely

Dr. John Budd

Dear Doctor Lee,

I am pleased to inform you that I am now discharging your care from my case load and the North West drug Locality Clinic.

Your treatment has now successfully transferred to your GP at Howden Health Centre Livingston. They have agreed to take over your prescribing as of Thursday 5th March when you next prescription is due. I hope you continue to make progress.

May I take this opportunity to wish you and your family all the very best for the future.

Yours sincerely

Re: Lee Gilroy, 15 Clerics Hill, Kirkliston, EH29 9DB
D.O.B: 20.09.1981 CHI: 2009811259

I am just writing to update you on Lee's progress here at the North West drug Locality Clinic

Lee is making good progress and he is now reducing his **Methadone and he is currently at 70mls daily.** Lee has been in employment and he currently is in what sounds like a temporary job, but looking for permanent work. Lee has identified his goal as that of coming of all Opiates and maintaining abstinence. We are support him with regard to this and I will keep you posted with his progress.

Yours sincerely

Dr John Budd
Lead Practitioner
North West Locality Clinic

P.s. I have no child protection concerns with regard to Lee and Laura Metcalfe's pregnancy.

History of Presenting Complaint

This 26 year old fractured his right calcaneum 4 years ago but refused fixation at the time because he was under the influence of IV heroin. He has had recurrent sprains of his right ankle since then he tells me and has sprained it again this week. He has lateral malleolar tenderness and swelling anterior to the malleolus but is able to weight bear. In view of his recurrent ankle sprains, he would appreciate your advice. He is now on methadone.

Dear Dr. O'Halloran,

Re: Lee Gilroy, 15 Clerics Hill, Kirkliston, EH29 9DB
D.O.B: 20.09.1981 CHI: 2009811259

Lee has been referred in to the North West drug Locality Clinic having completed his DTTO. Lee is **currently stable on 100mg Methadone daily.** His partner is due to have a baby, and indeed may have already just had one, in the last week or two. Lee is currently in employment and is looking to better himself through gaining a better job. It is likely that he will remain on maintenance treatment for the foreseeable future.

Yours sincerely

JPERVISED CONSUMPTION OF METHADONE

Supervised consumption of methadone helps confirm that you are taking the prescribed dose and helps check that the dose is correct (i.e. neither too high nor too low). It also helps ensure that the prescribed dose is not being shared, swopped or sold.

***** EVEN A SMALL DOSE OF METHADONE CAN KILL SOMEONE NOT USED TO TAKING IT *****

In Lothian you are required to have a period of supervised methadone consumption every year. Before this starts you are offered a 'Drug Amnesty' – that is a chance to explain if you have not been taking the full amount of methadone prescribed for you. If the dose you are prescribed is more than you have actually been taking the prescription can be changed to the correct safe dose. Discussing this now will not affect your treatment programme and your methadone will not be stopped although the dose may be changed.

The Pharmacy you will attend for supervised methadone consumption is: Howden H.C. Pharmacy

If two or more supervised methadone doses in a row are missed the pharmacist will notify the prescriber and the prescription may be stopped. The pharmacist will also notify the prescriber if they have concerns about:

- **the safety of a child in your care.**
- **any unacceptable behaviour at the pharmacy.**
- **you appearing to be intoxicated with alcohol or drugs which may result in your methadone dose being withheld.**

You may be required to show photographic or other ID every time you have your Methadone consumption supervised. (If using photo ID it is recommended that you leave it at the Pharmacy during supervision period).

REMEMBER -

- **If you are taking methadone it is dangerous to also take ALCOHOL or street drugs such as DIAZEPAM (valium), HEROIN or other OPIATES (e.g. DIHYDROCODEINE).**
- **Taking alcohol and other drugs on top of your prescription may impair your ability to function and look after children safely. It also increases your risk of overdose.**
- **You may overdose and die if you take a higher dose of methadone than you are used to.**

BY SIGNING THIS FORM YOU AGREE TO THE FOLLOWING STATEMENTS -

- **I understand the dangers of taking more than my usual amount of methadone.**
- **The dosage stated, 35 mg, is the normal amount that I take, my body is used to this dose [tolerant] and I am prepared to take this under supervision at the Pharmacy.**
- **I will attend the Pharmacy within the times agreed between myself and the Pharmacist.**

Patient's signature _____ **Date** 21.10.10.

Dr. Tim Barnes

Address and phone number, for duration of supervision:		**Prescriber contact details (Stamp or sticker):**	78255 42889 Howden Health Cen Howden Road West Livingston West Lothian 01506 423800

I have discussed the above points with this patient: _____
(Signed - doctor/nurse/pharmacist)

NB: One copy for patient's records and one for Pharmacist with prescription.

IPERVISED CONSUMPTION OF METHADONE

ed supervised consumption of methadone in order to reduce the number eakage and to ensure that the methadone programme continues for those who need it.

You are required. to have a period of supervised consumption. Before this starts, we offer everyone a **"Drug Amnesty"** - that is, an opportunity to tell us if you have not been taking the full amount of Methadone prescribed for you. The last thing we want to do is to put your life at risk by making you take more than the amount you are accustomed to taking. **50 mg can kill someone not used to taking it.**

Therefore, if the dose you are prescribed is more than you have actually been taking, we want you to tell us now so that we can change the prescription to the correct dose. This will not prejudice your treatment programme; no one else will be informed and your methadone will not be stopped, although your dose may be altered.

In addition to make sure that no-one else gets your methadone, you will be required to show **photographic identification** every time you have your methadone consumption supervised.

We want you to sign this statement to say that:

I. I understand the dangers involved in taking more than my usual amount of methadone.

II. The dosage stated, 85 mg, is the normal amount that I take, to which I am tolerant, and which I am prepared to take under supervision at the pharmacy.

III. I understand that I must show photographic identification every time I have supervised consumption.

Signed (patient) .....

I confirm that I have discussed this fully with the patient

Signed (Doctor) .....

Date 16/7/03

Remember:

taken under medical supervision methadone can reduce harm

bought on the street methadone can kill

It is dangerous to take other street drugs such as valium, heroin, other opiates or alcohol along with methadone.

HOWDEN HEALTH CENTRE

CONTRACT for the Prescription of Addictive Medication

NAME: LEE CLARK GILROY

NAMED DOCTOR: LAW-HTET

DEPUTY DOCTOR: DR. MAXWELL

We are willing to issue prescriptions for your addictive medication if you accept these rules:

1. I will attend only the *named doctor* or in his or her absence, the *deputy doctor* regarding my addictive medication prescription.
2. I will make routine appointments in good time to receive my prescription unless my doctor has issued the prescription in another way.
3. I will attend my appointments on time and will cancel in good time if I am unable to attend. LUCS
4. I agree not to use emergency appointments, housecalls or ~~WESTDOC~~ contacts to discuss my prescription.
5. I agree not to upset the receptionists or other people in the waiting room.
6. I agree to be responsible for my prescription and medication and recognise these will not be replaced for whatever reason.
7. I agree to regular monitoring of my medication consumption as arranged by my doctor. This may include random urine testing and/or supervised consumption of medication.
8. I agree to attend the CDPS regularly. IF RELEVANT
9. I realise if this contract is not followed my prescription may be discontinued and I may be asked to register with another practice.

I have read the above rules. I understand them and I agree to abide by them.

Personal Capability Assessment

Dear Doctor

Patient's name MR LEE CLARK GILROY

Date of birth 20 / 09 / 1981

This patient has been claiming

- [ ] Incapacity Benefit
- [ ] Severe Disablement Allowance
- [x] National Insurance credits

because they have been incapable of work. We recently assessed their ability to work using the Personal Capability Assessment.

We have decided that your patient is capable of work from and including 15 / 05 / 2007.

This is based on

- [x] the medical examination we arranged that your patient went to on 23 / 4 / 2007.
- [ ] medical information you provided.
- [ ] information that your patient gave us.

This means that you do not have to give your patient any more medical certificates for Incapacity Benefit purposes. But you may need to again if their condition worsens significantly, or they have a new medical condition.

We have sent a summary of the Personal Capability Assessment to your patient.

Yours sincerely

for Manager

Dear Dr Smth

RE: Lee Clark Gilroy D.O.B 20.09.81

D.T.T.O PRESCRIPTION	
Methadone 100 milligrams daily pickups	**Apple pharmacy, 6 Eyre place. Edinburgh.**

Monthly Review

Lee is due to finish an eighteen-month Drug Treatment and Testing Order on the 19th of April 2007. His prescription remains at Methadone 100 milligrams. There are six drug test results available from this review period. Lee tested positive for his Methadone prescription only throughout this review period. He was offered five appointments with myself this month and attended four of these. During appointments Lee has engaged well, presenting as an individual committed to his ongoing recovery from Heroin addiction. I have arranged for Lee to meet with the blood-borne virus Nurse on the 19th of February. A referral is in the process of being made to the Community Drug Problem Service for the transfer of Lee's Methadone treatment. I have recommended that Lee's drug testing appointments now be reduced from weekly to fortnightly.

D.T.T.O TREATMENT PLAN
1. Attend fortnightly drug testing appointments.
2. Attend blood-borne virus testing appointment on the 19th of February.
3. Provide support and encouragement.

Should you require any further information, please do not hesitate to contact me.

Yours Sincerely
Simon Mallon

Dear Dr Marshall

RE: Lee Gilroy D.O.B 20.09.1981

D.T.T.O PRESCRIPTION
Methadone 100 milligrams – daily pick-ups.

Monthly Review
Lee was remanded in Custody on the 17th of August. Prior to this both his punctuality and attendance has been of an unacceptable standard. Lee was offered eight appointments with myself and only attended three. He did however provide a valid explanation for three of these. Lee was also offered an appointment with Dr. Aldridge, which he attended, whereby his use of illicit Benzodiazepine was discussed. There are five drug test results available at this time. One drug test result is from the previous review period and four drug test results are from this review period. Lee is prescribed Methadone 100 milligrams and tested positive for this on all eight occasions. During this review period Lee tested positive for illicit Benzodiazepines, on all five occasion. Within this review period Lee successfully completed the Relapse Prevention Programme, whereby, he actively participated in group discussion and spoke openly in relation to personal experiences and events in his life, which he believes triggered much of his use of illicit substances. Lee is aware that his use of illicit Benzodiazepines has been both chaotic and problematic whilst in the community and in order to progress on the Order he will need to address this.

D.T.T.O TREATMENT PLAN
1. To attend twice weekly for drug testing.
2. To attend a medical review as required.
3. To provide support and encouragement.

Should you require any further information, please do not hesitate to contact me.

Yours Sincerely
Simon Mallon s/N

Dear Dr Morton

RE: Lee Gilroy D.O.B 20/09/1981

CURRENT PRESCRIPTION
Methadone 85 milligrams

Lee is in his first month of an eighteen-month Drug Treatment and Testing Order. Lee is still in the process of Methadone titration and at present is prescribed 85 milligrams, dispensed on a supervised basis. There are five drug test results available to the court from this review period. Lee tested positive for Morphine specific Opiates on all five occasions. This would suggest the use of Heroin. He also tested positive for Cocaine on four occasions and Benzodiazepines (illicit Valium) on two occasions.
Prior to commencing Methadone titration lee tested positive for illicit Methadone on several occasions. These drug test results are consistent with his declared drug use.
Lee's drug use at present is chaotic. His route of use is both intravenous and smoked. Despite this Lee has engaged well and his level of attendance has been satisfactory at this stage in his Order.

TREATMENT PLAN
1. To attend twice weekly for drug testing.
2. Offer medical review as and when necessary.
3. To provide support and encouragement.

Should you require any further information, please do not hesitate to contact me.

Yours Sincerely

Simon Mallon

DTTO

29th November 2005

Dear Dr. R. Wood

RE: Lee Gilroy DOB: 20/9/81

I saw Lee at the DTTO today. He is on an 18 month order which is due to finish on the 19th April 2007. Lee declares using approx. £80 Heroin per day, mostly IV in his arms and legs although he has not started using his groin. He has also been smoking crack; but has managed to cease using this for approx a week. He declares taking 30 to 40mg Diazepam at night to aid sleep.

I have started him on a supervised script of Methadone at Boots, Shandwick Place as of today (Tuesday 29th November 05) and will be reviewing him on a regular basis to titrate his dose.

We will write to you on a monthly basis to update you on his progress; but, should you need further information, please do not hesitate to contact us.

Yours Sincerely

Diagnosis Coding: _
Procedure Coding: _

Dear Dr MORTON,

DIAGNOSIS: RECREATIONAL DRUG USE OF HEROIN.

No specific treatment was required and the patient was discharged.

Patient was detained under the Mental Health Act. No

PSYCHIATRIC ASSESSMENT: This 23 year old man was brought in to hospital by the police after allegedly swallowing 1 gram of Heroin wrapped in an unsealed plastic bag. He was asymptomatic. Physical examination was unremarkable. Abdominal x-ray showed no obvious foreign body. He was admitted to the toxicology unit for observation. He remained relatively hypotensive with BP dropping to 80/40 with no significant evidence of respiratory or CNF depression. His routine bloods were normal. He did not require any further intervention other than some IV fluids. He was given a dose of Naloxone overnight, however, this failed to have any impact on his BP. He was observed for 8 hours but remained otherwise asymptomatic and was therefore discharged the following morning.

Yours sincerely

Dear Doctor,

Your patient has claimed benefit due to incapacity and we now have to assess their capacity to perform any work, not just their own job, using the Personal Capability Assessment procedures. People with certain severe medical conditions can be accepted as meeting the threshold of incapacity for benefit purposes without undergoing the Personal Capability Assessment or, if the assessment has to be applied, without undergoing a medical examination.

From the information you have provided on a medical statement (for example form Med 3), or information otherwise available to the medical officer, it appears that this may be such a case. In order to advise the decision maker in accordance with the law, the medical officer requires further factual information. We would be obliged if you would answer the medical officer's questions overleaf clearly indicating on a separate sheet, any medical evidence that you think would be harmful to the patient's health. An example of what may be harmful information is a diagnosis that is not known to your patient such as malignancy, progressive neurological conditions or major mental illness.

Your patient has given written consent on their claim form to allow us to approach you for this information.

If you have agreed to treat this patient under the NHS (General Medical Services) Regulations 1992 as amended March 1998 and equivalent regulations in Scotland, and have issued, or refused to issue, a medical certificate to them, you are obliged by your terms of service to supply clinical information to a medical officer. A similar obligation applies to most hospital and community doctors working within the NHS. You are not obliged to do this if you have not agreed to treat the patient under the NHS but any information you are willing to provide will be much appreciated. Unfortunately, we will be unable to pay you for it.

A reply within 7 days will be appreciated and a business reply envelope is enclosed for your use. If you have any queries about this form please contact the medical officer at your local Medical Services Centre, see leaflet **IB204** *Guide for Registered Medical Practitioners.*

Thank you for your help.

Yours sincerely

Dear Dr MORTON,

DIAGNOSIS: ALLEGED INGESTION OF WRAPPED HEROIN

This young man had been admitted for observation following alleged ingestion of 2.5gm heroin, double wrapped in plastic. This was apparently taken in an attempt to conceal the drug from the police. He had apparently taken 50ml Methadone earlier. He explained that he usually takes 1 - 1.5gm per day. He had been taken into police custody and was vomiting. However on attendance at the poisons ward he was alert and orientated. Chest and abdominal x-ray appearances were normal.

Following a period of observation he remained well and was discharged, returning to police custody.

Yours sincerely,

SUPERVISED CONSUMPTION OF METHADONE

Lothian Health is introducing supervised consumption of Methadone in order to reduce the number of deaths from Methadone leakage, and to ensure that the Methadone Programme continues for those who need it.

You are required to have a period of supervised consumption. Before this starts, we offer everyone a **'Drug Amnesty'** – that is, an opportunity to tell us if you have not been taking the full amount of Methadone prescribed for you. The last thing we want to do is to put your life at risk by making you take more than the amount you are accustomed to taking. **50mg can kill someone not used to taking it.**

Therefore, if the dose you are prescribed is more than you have actually been taking, we want you to tell us now, so that we can change the prescription to the correct dose. This will not prejudice your treatment programme: nobody else will be informed and your Methadone will not be stopped, although your dose may be altered.

In addition, to make sure that no-one else gets your Methadone, you will be required to show **photographic identification** every time you have your Methadone consumption supervised.

We want you to sign this statement to say that:

I I understand the dangers involved in taking more than my usual Amount of Methadone;

II The dosage state, ... 40 ..... mgs, is the normal amount that I take, to which I am tolerant, and which I am prepared to take under supervision at the Pharmacy.

III I understand that I must show photographic identification every time I have supervised consumption.

Signed: .....
(Patient)

I confirm that I have discussed this fully with the patient

Signed: .....
(Doctor)

Date: ..... 17/10/00 .....

Craigmillar Medical Group Agreement for Prescribing Addictive Medicines

Name Lee Gilhooley Date of Birth 20/09/81

Your Doctor and you have agreed that it is in your best interests, at this time, for you to be prescribed medication th addictive in nature. This prescription has been started because of your use of these addictive drugs, and the aim o prescription is to help you to control your drug use with the assistance of your Doctor.

The prescription should be for your use only, and should not be sold or exchanged for other drugs. In order to help a withdrawals, you should usually spread the drugs out over the day and not take them all at once. Also, once you stabilised on your prescription, you and your Doctor will look at ways of helping you to reduce the amount of drugs you with the ultimate aim of your becoming drug free.

The staff at this surgery have a lot of experience of working with drug dependence. We know that problems can ari relation to organising your prescription and appointments. If you are to receive a prescription for addictive drugs, you accept the following rules:

1. Your prescription will be organised by your doctor at a routine appointment. Emergency appointments, housec telephone calls and messages, cannot be used to discuss your prescription UNDER ANY CIRCUMSTANCES.

2. The making and keeping of appointments is your responsibility only. Please do not blame anyone else if this goes wr

3. When you need your prescription renewed, you should see only the Doctor in charge of prescribing for you. In absence you will have a named second Doctor who can deal with this for you.

4. The prescription and the medication are your responsibility. ONCE ISSUED, YOUR PRESCRIPTION WILL NOT REPLACED UNDER ANY CIRCUMSTANCES. For this reason, there is no point in wasting time on the telephon at the Surgery, trying to get it replaced.

5. For the convenience and safety of patients and staff, noisy, disruptive or aggressive behaviour will not be toler Patients who behave in this way will be asked to register with another surgery.

6. TO EASE CONGESTION IN THE WAITING ROOMS, PLEASE TRY TO ATTEND YOUR APPOINTME UNACCOMPANIED WHENEVER POSSIBLE.

Once your prescription has been issued, there should be no change in the dispensing arrangements until your next rou appointment. The only way a change can be made is by your making a routine appointment to see your own Do LEPHONE CALLS AND MESSAGES ABOUT THIS WILL NOT BE ACCEPTED

agreement is important if you want to continue to receive a prescription from this surgery. The prescription and ment are to help you deal with your drug dependence. IF THE RULES ARE BROKEN, THEN YC CRIPTION MAY BE STOPPED.

The Doctor responsible for my prescription is Dr Wood

In their absence my second ~~doctor~~ is Ian Dawson

d and understand the above agreement and will abide by its terms

Guidelines on monitoring of drug misuse in Scotland

Please read the SMR23 notes for completion which have been distributed with the blank forms. These give more detailed guidelines on how to complet form SMR23. Copies of the Notes for Completion can be obtained at the address given below.

Who should use this form ?

This form (SMR23) should be used by all projects and professionals other than registered medical practitioners. Registerec medical practitioners should use form SMR22.

When should a form be completed ?

A form should be completed for every 'new' problem drug user who attends the agency. This includes only those problem drug users who are attending the particular agency for the first time ever, or, they have attended before but not within the previous six months. It is essential that the initials, date of birth and gender of the client are completed on the ISD copy as they are necessary in order to minimise the risk of double counting people seen by several agencies/practices.

Should all 'new' contacts be included?

Yes, all 'new' contacts should be reported. This includes the normal face-to-face contacts as well as telephone contacts. However, in practice a telephone contact should only be included provided that enough information is obtained to complete an SMR23 form ie. a telephone assessment. Letter only and third party contacts, such as those with parents, are not recorded.

Definitions

A 'problem drug user' is defined as 'any person who experiences social, psychological, physical or legal problems related to intoxication and/or regular excessive consumption and/or dependence as a consequence of his/her own use of drugs or chemical substances'. The Database defines 'drugs' as 'any drug including solvents and tranquillisers and including alcohol only where it is used in combination with other drugs (ie used as a secondary drug). Tobacco is excluded'.

Please ensure that:

(1) the initial of first name and initial & 4th character of the last name have been copied into the relevant boxes as shown.
(2) if the first part of the postal district is complete that it is in the correct format.
(3) the date of birth and sex are complete.
(4) the 'current' or 'significant (within the past 12 months)' drug use is listed.
(5) details on injecting/sharing are given.

Example

DRUG PROFILE Has client used drugs in the past month? Yes ☑ *list current drug use below*
No ☐ *list significant drug use(within the past 12 months) below*

	Drug Name (include each drug used, prescribed or not)	Prescribed? (Yes/ No/ Both)	Route(s)	How often? (daily/ weekly/ monthly/ occasionally)	For Local Use A	For Local Use B
Main Drug	HEROIN	NO	IV	DAILY		
Drug 2	TEMAZEPAM	NO	O	WKLY		
Drug 3						
Drug 4						
Drug 5/Alcohol	VODKA	NO		WKNDS		

Where should the form be sent?

The completed form (top copy) should be returned to ISD in the reply paid envelopes provided. The back copy should be kept with the client's notes (if required). Partially complete forms may also be returned to ISD (please see the *Notes for Completion* for further information).

Enquiries and supplies of forms

Any enquiries about the Database should be made to:
Scottish Drug Misuse Database, Information & Statistics Division, Trinity Park House, South Trinity Road, Edinburgh, EH5 3SQ (phone 0131-551 8715).

Further supplies of forms, reply paid envelopes and *Notes for Completion* can also be obtained at this address.

Saturday	heroin 1 bag + joints	Smoked it	I felt quiet stonded	because I had I bag in my Pocet	girlfriends house	Girlfreind
Saturday	heroin 1 bag 2 joints	Smoked it	I felt Oko	because I was. Rattelin	girlfriends house	Girlfreind
13:30 Sunday	heroin 1 bag + joints	Smoked it	I felt quiet stonde	because I had I left over	Girlfriends house	Girlfreind
17:30 Sunday	heroin 1 bag +2 joints	Smoked it	I felt really stonde	because I was Going to sleep	Girlfriends house	Girlfreind
Sunday/Monday 22:00	heroin 1 bag 3 joints	Smoked it	I felt Oko	because I was Rattelen	girlfriends house	Girlfreind
monday	heroin ½ bag 1 joints	Smoked it	I felt really stonde	because I Need that amount	Girlfriends house	Girlfreind
monday	heroin ½ bag 1½ joints	Smoked it	I felt O.K	because I was Rattelen	Girlfriends house	Girlfreind
Tuesday	heroin 1 bag +1 joints	Smoked it				Girlfreind

When to complete a form

Complete form SMR24 for every 'new' problem drug user that attends your service, at the first face-to-face contact that provide information. Include telephone contacts only if enough information can be obtained. Exclude all letter only and third party co

Who completes forms

All medical practitioners and other professionals who are engaged in the treatment of 'problem drug users'.

Database definitions:

Problem drug user *Any person who experiences social, psychological, physical or legal problems related to intoxication and/c excessive consumption and/or dependence of his/her own use of drugs or chemical substances.*

New drug users *Those attending the service for their drug misuse problem for the first time ever or after an interval of at least si*

Illicit drugs *Any illicit drug including solvents, tranquillisers and over the counter medicines taken inappropriately. Includ only when used in combination with other drugs. Tobacco is excluded.*

Prescribed drugs Include: *any drug used in the treatment of addiction, i.e. substitute prescribing, drugs to treat withdrawal sy anti-depressants and anti-psychotics.*

Exclude: *drugs used to alleviate the medical effects of drug misuse, e.g. TB, abscesses, Hep C.*

Please ensure that:

- All the critical data items are complete: initials, date of birth, sex and main illicit drug (unless drug free) or main prescribed c ISD will contact services if any of these are missing or unclear.
- The initials and 4th character are clearly written in capital letters and in the correct order, i.e. first name and then surname.
- If the postal sector is not specified, it is important that other address items are provided. This will allow derivation of the pe council area of residence, in order to meet requirements for local information.
- There are no discrepancies between the routes of the illicit drugs listed and the injecting details, as they both refer to the pe drug using behaviour during the past month.

Examples

5. PRESCRIPTION PROFILE (CURRENT): give details of current prescription related to drug misuse — None ☐ Not known ☐

	Drug Details		Prescriber (✓)				Weekly consumption	
	Drug Name	Daily dosage (mg)	Person's GP	Specialist service	Prison doctor	Other doctor	No. of days supervised	No. of days unsupervised
Main Drug	METHADONE	30 mg		✓			5	2
Drug 2	PROZAC	20 mg	✓				0	7
Drug 3								

7. ILLICIT DRUGS PROFILE (PAST MONTH): list illicit drugs (include OTC medicine taken inappropriately) — Illicit drug free for the last month (✓) Yes ☐ go to Injecting / Sharing details — No ☑ show det below

/	Drug Name	Route(s) e.g. IV / IM / smoke / swallow / inhale / snort		How often? e.g.daily / most days / weekends / weekly / fortnightly / monthly / less often than monthly	In a 'typical' day		Ce us
		Main	Other		Number of times	Total quantity e.g. G / mg / ml / oz / units / binge	
Main Drug	HEROIN	IV	SMOKE	MOST DAYS	3	1G	
Drug 2	CYCLIZINE	IV		DAILY	1	100 mg	
Drug 3	METHADONE (top up)	SWALLOW		WKLY	1	20 mg	
Drug 4	COCAINE	SNORT		WKNDS	4	1G	✓
Drug 5							

Where to send the forms

Keep the carbonised copy of the form and send the top copy to ISD Scotland in the pre-paid addressed envelopes provided. Pai completed forms can also be returned to ISD, provided the critical items are included (see above)

Detailed guidelines

Detailed guidelines on the completion of form SMR24, including definitions, are available from ISD at the address below or on the national website: **www.drugmisuse.isdscotland.org/sdmd/sdmd.htm**

CLINICAL NOTES

HISTORY
This 17 year old lad attended A&E following an injury tohis right leg sustained last night when he was accidentally shot with an airgun. He did no realise until today that he had been shot.

OE
NV intact foot with no foot drop. Entry wound about 2 1/2cm above and posterior to the fibular head. The pellet was palpable.

XRAY of his leg confirmed the presence of a FB and this was removed under LA along the entry wound.

The wound was left open and the patient provided with 5 day course of [illegible]

Light dressing applied and arranoements made to see him again in REVIEW CLIN in three days' time to ensure that there is no infection.

DR MACKIE AMT

REVIEW CLINIC 10 02 99

This gentleman failed to attend his Reg Review clinic appt., and I assume therefore that his wound is healing nicely. We have made no further arrangements to see him.

Dear Dr Cole

Re: ***Lee Gilroy (20.9.81)***
8/8 Magdalene Drive, Edinburgh EH15 3DE
Portobello High School

On the morning of Sunday 16 June at 11.45 a.m. I was contacted by Gill Lawrence of the emergency duty social work team. Lee had telephoned the police from a phone box at 12.30 a.m. alleging that his step-father Findlay Klee had attempted to strangle him. Lee was then picked up by the police and taken to the police station and thereafter spent the rest of the night with Out Workers at Howdenhall Unit. Mr Klee was interviewed by the police that night and admitted that there had been an argument during which he had grabbed Lee's neck but there had been no attempt to strangle him whatsoever and it had merely been an episode in the heat of the moment and there had never been any similar episodes. By the following morning Lee was stating that indeed there had been an argument during which his step-father had grabbed him but there had never been any similar incidents and there had not been an attempt at strangulation. Lee was very keen to return home. According to the social work team the family had been drinking.

I thereafter examined Lee at the Out-Patients of the Royal Hospital for Sick Children where the above story was obtained from both Lee and the accompanying social worker Gill Lawrence.

On examination Lee was a co-operative pleasant boy who was quite quiet but did not appear to be unduly distressed. Height 34.5kgs, weight 145.3cms both well below the 3rd centile. He had 3 superficial scratches on the right cheek, which Lee stated had been obtained by play fighting with his aunt earlier the previous day. In addition to this on the left side of his neck he had 3 superficial abrasions each 1 x 1.5cm in area which were red in nature with a small 1 x 1cm area of petechia adjacent to the upper mark posteriorly. There was no evidence of any bruising. There were no corresponding marks anteriorly or on the right side of the neck. There was no bruising elsewhere on the limbs or torso. No facial petechia, palatial petechia or rash or haemorrhages. Ear,

nose and throat were clear with no evidence of any squint. In the cardiovascular system a short ejection systolic murmur was noted with no radiation and good volume femoral pulses. Blood pressure 100/70. He did have bilateral course rhonchi at both bases and I believe he was receiving antibiotics for chest infection. Alimentary system was entirely normal. Genitalia were pre pubertal. Power tone co-ordination reflexes and fundi were entirely normal.

At this examination I felt that the abrasions to the left side of the neck were compatible with the history of his being grabbed but not of direction strangulation attempt. This agrees with the history given latterly by Lee and by his step-father who had not been in communication in the interim since the original allegation.

We therefore agreed at this point that Lee would go to the Out Workers at Howdenhall again until the family situation had been sorted out.

I thereafter discussed Lee with Trish McFadyen of Craigentinny Social Work Department who have had long standing involvement with Lee and his family. I also note from our files that there had been previous difficulties with Lee being out of control of his parents and in the neighbourhood in general with episodes of theft and vandalism. One year ago residential schooling had been recommended but because of improvements in the situation this has been put on hold. Over the intervening year things have progressed very well for Lee until the last 2 weeks when his mother became very ill and required hospitalisation. During this time supervision appeared to be patchy and he had not been attending school. Trish McFadyen of the Social Work Department from Craigentinny is to visit the family on the afternoon of 17.6.96 to ascertain the way forward.

It is of note that Lee's growth is well below the 3rd centile and this will be monitored through the school.

Many thanks.

Yours sincerely

Sue Bloomfield

Dear Dr Cole

LEE GILROY, 10/16 MAGDALENE AVENUE, EDINBURGH

Lee was initially seen on 25.9.93 with an undisplaced fracture of the left radius. This was treated with a below elbow plaster.

Despite several attempts Lee has not been brought to fracture clinic for review of this fracture. We are unsure at time as to whether the plaster has come off but if it has one can only assume that all is well. Should there be a further problem we would be happy to review him.

Yours sincerely

26/9/93 Lee Gilroy 10/16 Registered Nurse

N6·80Pm. c/o. 24/9/93 (R)forearm plaster applied at RHSC.
He had had paracetamol but his arm was v. pai
RHSC had suggested IBUPROFEN for analgesia but he
not given it (I appreciate this was an OTC)d
after a 12 year old would have up to 6 paracetam
= 24hr.

O/E child whimpering on examination
distal end of plaster cast, capillary refill normal
proximal end plaster patent, causing pressure
at radial aspect + noted hard edge at
base at dorsal aspect
Lee also identified slight ache of pain = 1" proximal from
area probably causing pressure.

Advised taking child to RHSC for possible plaster trimming
or padding. Mother asked if he could do it but I
didn't think it a good idea.
Mother asked how he would get to RHSC I suggested would
be OK to go by bus.
Mother said she could get off the bus, should she call
an ambulance. I advised that emergency ambulances were
not for cases like this.
She asked if she could trim it herself but I advised this
may not be a good idea: there would be hard, sharp
edges which could damage the skin.
She said if there was a problem with the plaster could it
be the hospitals fault. I advised not - plasters sometimes
needed readjusting.
She said she would take him tomorrow but I recommended
recommend he should go this evening.
She said she could not take him tonight: she
gave 2 reasons:
She didn't have the bus fare
She has a hair appointment (during my visit I saw 3

other events in the homeland, the man whom I took to be Lee's father, a man who was helping Lee's father with the decorating & another woman)

She said to me,
"Call yourself a doctor?"
She said to Lee,
"There you are, that's your doctor for you".

I felt that Lee had been caught between 2 events, the doctor who did not get him an ambulance because she did not think he merited the use of emergency services on medical grounds, and his mother, who for some reason, did not feel able to take him to hospital like tomorrow.
However, the homecoming demonstrated that she knew she could call an ambulance if she so wished so I did not believe she would ignore his need.

EDINBURGH

10th October 1984

Dear Dr. Cole,

RE: Lee Gilroy, 92/5 Niddrie Marischal Crescent, Edinburgh
Date of Birth - 20.9.81

I visited this Low Birth Weight baby at home on 5.10.84. Lee who was born prematurly weighing 1.46 kgs is now a true age of three years. He looks healthy, is growing well and systematic examination revealed no abnormality. Developmentally he is making normal progress. He trots around freely, can jump on two feet and can stand on one foot momentarily. He handles toys well and was able to build a tower of nine cubes and a three cube bridge. He held a pencil high up the shaft in a fisted grasp and was able to copy a circle but could not imitate a cross or a man. He does not yet know any nursery rhymes and has not yet begun to count. He does however have a good vocabulary and converses freely in well formed short sentences. He is reliably toilet trained both day and night and can go to the toilet on his own.

I understand he will be starting at Greengables Nursery School next week and I am sure that he will behefit greatly from this. I will see him again in one year.

yours sincerely,

Flora McPhail

Dr. Cole.
1 Craigmillar Castle Road,
EDINBURGH

Dear Dr. Cole,

Re: Lee Gilroy. 92/5 Niddrie Marischal Crescent,
Edinburgh. Date of Birth 20.9.81.

I visited Mrs. Gilroy and Lee at home on 30.10.83 when Lee was a true age of just over two years. He is reported to have kept well and presented no problems over the past six months. He sleeps throughout the night and seldom reuires a day time rest. His appetite is good and eats everything put before him, feeding independently with a spoon and fork. He walks and runs steadily, can negotiate steps and seat himself on a chair. He shows good manipulation, was able to complete a simple formboard and build a tower of six cubes. His speech is developing satisfactorily, he has a good vocabulary, vocalises all his needs and is joining two and three words together.

On examination, he looked well, he was a good colour, he was warmly clad, active and energetic. No abnormality was detected in any system and his growth over the past six months has been satisfactory. His development over the past six months has been appropriate to his age. I will see him again in one year.

Yours sincerely,

Flora McPhail

1 Craigmillar Castle Road,
EDINBURGH.

Dear Dr. Cole,

Re: Lee Gilroy, 11/6 Niddrie House Gardens, Edinburgh.
Date of Birth - 20.9.81

I visited the Gilroys at home on 7.4.83. Lee you will recall was born prematurely weighing 1.46 kgs. He is now a true age of 18 months. On examination I found him to be healthy and his developmental progress was in keeping with his age.

As you will know the family have recently had a fire in their home and are temporarily re-housed in an adjoining flat. The family seem to be coping quite well with the upheaval and certainly Lee is making good progress. I will see him again in 6 months time.

Yours sincerely,

Flora McPhail

Dear Dr CAmpbell

Lee Gilroy, 11/6 Niddrie House Gardens, Edinburgh
20.9.81

This baby was admitted on 24.2.83 for incision and drainage of a peri-anal abscess. This was carried out under general anaesthetic. Post-operatively there were no complications. The wound was well healed on discharge, 3.3.83. The District Nurse will attend to the wound.

Yours sincerely

M WARDLAW
Surgical Paediatric House Officer

Report re Family Gilroy - G.P. Dr. Cole.

Mrs. Elizabeth Gilroy - D.O.B. 24.05.64
Mr. Robert Gilroy - D.O.B. 29.12.60
Lee - D.O.B. 20.09.81
Robert - D.O.B. 01.09.82

Baby Lee born pre-term at ? 30-37 weeks gestation. Assisted undiagnosed breech with F.A.C.H. Manual removal of placenta. Birth asphyxia. Jaundice (Phototherapy). Necrotising enterocolitis. Aspiration Pneumonia. Anaemia. Patent ductus arteriosus Anal fissure. Birth weight 1.640 kg. No ante-natal care prior to birth.

Baby Robert born pre-term at 34 weeks gestation. S.V.D. Birth asphyxia. Pneumonia. Prophylactic phototherapy. Birth weight 1.580 kg. No ante-natal care prior to birth

The Family Gilroy have been known to me since 31.12.81 when I took over from my colle Mrs. Giglia Sprigge, who visited the family after the birth of the Gilroy's first chi "Lee" on 20. 9.81.

I found Mr. & Mrs. Gilroy's attitude rather anti-authority, but I have never been ref entry at either home I visited. They are both immature, and manage their money inadequately.

Mrs. Gilroy's mother is very supportive, though she works. Her father is unemploye often at home at 35 Niddrie Marischal Green, where I usually find information re the whereabouts of Mrs. Elizabeth Gilroy and babies if I do not find her at her home at Niddrie House Gardens.

My visits have been as follows since baby Robert's birth:-

13. 9.82. No reply. Message left. Baby in Special Care Unit.

14. 9.82. No reply.

21. 9.82. Baby still in Special Care Unit. Mother visiting daily according to fathe

29. 9.82. Baby still in Special Care Unit.

6.10.82. No reply.

7.10.82. No reply. Message left. ?Electricity still cut off. Window broken.

11.10.82. Saw mother and father at mother's sister, Mrs. Clark, 5/3 Tweedsmuir House Poor house conditions. House overcrowded. Baby staying in hospital. Electricity still cut off - hence reason why Mr. & Mrs. Gilroy and Lee are at C/o 5/3 Tweedsmuir House.

14.10.82. 'Phone call from Social Worker, Alison Guthrie. I informed her re situati Electricity bill not paid and the window still broken. Mr. & Mrs. Gilroy the bill is not theirs! Baby will remain in hospital.

18.10.82. 'Phone call from Social Worker. Baby taken home on Saturday 16.10.82 by parents. Was fit to be discharged.

Case /

Case Conference to be held on Friday, 22nd October, at 9.30 a.m.

I went to Grandmother's house and gave her Aptamil packets - baby milk for baby. Mother still at sister's with baby, usually at grandmother's house the time I call. Electricity to be re-connected at 4 p.m. No reply at Tweedsmuir House.

19.10.82. Saw mother at home. Baby at sister-in-law's, Mrs. Jacqueline Gilroy, 11/ Tweedsmuir House. Electricity re-connected yesterday. Window still broke I went along to Housing Maintenance Department and asked for window to be fixed as there was a very new baby in the house.

Baby taking feeds well according to mother. Aptamil 3½ ozs x 6 feeds plus Abidec and Iron.

22.10.82. Case Conference at Royal Infirmary which started earlier than informed, at 9.15 a.m.

26.10.82. Mother and baby out. Message given to young brother that I had called. mother to attend Baby Clinic held at Doctor's Surgery.

27.10.82. Saw mother and baby Robert at Clinic. Baby's weight 6lbs. 5¾ozs. (naked).

Taking Aptamil 5ozs x 5 feeds. Baby looks well, well dressed, clean and wrapped up. Gave Mrs. Gilroy 4 packets of Aptamil. Mother going to hospi for review. Window fixed last Thursday.

5.11.82. No reply. Message left to come to Clinic next Wednesday. Later in the da 'phone call from Dr. Bisset - mother did not attend Clinic appointment at hospital.

8.11.82. Saw baby at home. Looks fine. Taking feeds well. Advised mother to keep appointment at hospital. Mother said the reason that she did not keep hos appointment on 27.10.82 was that Lee was not well and instead of going to hospital she came home.

10.11.82. 'Phone call from Social Worker. Message to ring back.

11.11.82. Rung Miss Guthrie, Social Worker, back re failed appointment.

12.11.82. Mother out. Left message for her to keep next appointment. Handed in wri message to husband's young male friend that it was important Mrs. Gilroy s keep hospital appointment.

I enquired re baby Robert. He was at Mrs. Jacqueline Gilroy, sister-in-la

Mrs. Jacqueline Gilroy is a sensible young mother with a one year old daug Amanda - D.O.B. 1.10.81 whom I have visited at home when keeping check on baby's milestones. Home conditions good.

The Notification visit for Lee was done on 10.11.81 at maternal grandmothe 55 Niddrie Marischal Green by Mrs. Sprigge, Health Visitor. Follow-up arr at Child Welfare Clinic, S.M.M.P.

He was admitted to City Hospital on 18.12.81. Discharged on 30.12.81.

He was admitted to City Hospital via R.H.S.C. with day history of diarrhoe latterly with vomiting.

When /

When Baby Lee was discharged, stools were still positive with E Coli. Shoul isolated from other children. On no medication.

Mrs. Gilroy failed to bring Lee to the S.M.M.P. Baby Clinic on four occasion Was last seen November 1981. No further appointments sent. The baby was or term follow-up of low birth weight infants and visited at home on 25th Febru 1982 and 7.10.82 by Senior Medical Officer, Dr. McPhail. Child to be seen a in 6/12.

My visits to Baby Lee. Not at home when visited by Miss Wilkinson, Health Visitor. Prior to my visit, Baby Lee had had 9/52 check by Medical Officer Doctor's Surgery on 25th November 1981.

31.12.81. Seen at maternal mother's house, 35 Niddrie Marischal Green. House crowded sisters and children.

Baby looking well, taking S.M.A. feeds 5-5½ ozs. x 4 hourly. Advised mother sterilisation of teats and bottles and to keep feeding bottles away from oth children.

Showed mother how to bath baby, by bathing baby myself. Invited mother to C

Home conditions poor - House fairly warm - Advised re keeping baby warm, hyg etc.

20. 1.82. 'Phone call from Miss Wilkinson, Health Visitor, re baby follow-up at S.M.M. To be reviewed February 1982.

Saw Mrs. Gilroy's sister at our Baby Clinic held at our Doctor's Surgery. G Mrs. Gilroy the message to tell Mrs. Gilroy to contact S.M.M.P. re baby's reviewing appointment.

27. 1.82. Seen at Clinic. Weight 9lbs. 13ozs. Mother coping.

9. 3.82. S.M.M.P. letter. Baby reviewed at home on 25th February 1982 by Dr. McPhail Senior Medical Officer. Systemic examination revealed no abnormality. In v of low birth weight he should not have pertussis or measles immunisations. reviewed at one year.

11. 3.82. Home visit. Lively baby. Sits with support. Babbles. Hearing Test satisf Taking feeds well.

Mother coping in spite of poor home conditions.

24. 3.82. Seen at Clinic. Weight 12lbs. 5ozs. Baby looks well. Mother coping - May new house.

28. 4.82. 7/12 check at Surgery defaulted.

7. 4.82. Seen at Clinic. Weight 12lbs. 4½ozs. Has had a bad cold. All right now. not attend hospital appointment. Advised to 'phone and make new appointment

19. 5.82. Seen at Clinic. Weight 13lbs. 11ozs. Advised re immunisation. Made appoin for next week.

2. 6.82. Seen at Surgery. Weight 14lbs. 13 ozs.

6. 7.82. Seen briefly at Social Work Department, Greendykes. Baby fine.

11.10.82. /

11.10.82. Seen at sister's flat, 5/3 Tweedsmuir House. House crowded. Stark naked c sofa. Not walking yet. Smiling. Unable to examine child properly. Miles not all reached. Hearing Testing not satisfactory - too distracted. 14/12 at Surgery for 10th November 1982. Did not attend checks for both babies.

19.10.82. Seen at own home. Asleep on sofa. Looks well - well clothed. Flat warm, reasonably tidy. Advised to come to Clinic.

Has had no immunisations yet.

Up to now I have had no concern re physical wellbeing of both babies.

Dr. Cole.
1 Craigmillar Castle Road,
EDINBURGH

Dear Dr. Cole,

Re: Lee Gilroy. 11/6 Niddrie House Gardens.
Edinburgh 9. Date of Birth - 20.9.81.

I visited this low birth weight baby on 7.10.82. Mrs Gilroy had recently defaulted the Low Birth Weight Clinic with Lee and was not at home on previous occasions when Miss Wilkinson or I had called but we heard from the health visitor that she was staying with her sister at the time as her own electricity had been cut off and I was able to see the baby there, although the conditions in the house were very poor and the house was very overcrowded at the time of my visit so it was difficult to do a full assessment. However, Mr and Mrs Gilroy were both present and told me that the baby generally kept well although he has a mild upper respiritory tract infection at present.

He is reported to take a full mixed diet and to sleep thoughout the night. Father said that there were no worries about the baby but Mrs Gilroy mentioned that Lee seemed only to be awake for four or five hours each day and slept the rest of the time. When I saw him he looked well, was a good colour, active and alert and was laughing, smiling and vocalising freely.

Systematic examination revealed no abnormalities apart from catarrh and a nasal discharge and a slight rash around his mouth from teething. He was able to sit securely, is crawling on all fours and can pull himself to standing and walk with one hand held. He is beginning to use a few words with meaning and to shake his head for 'no' and will obey simple commands.

He certainly did not seem excessively sleepy at the time of my visit but clearly his opportunities for play or any other form of stimulation are very limited in the present environment. As you will know there is now a new baby in the family which is at present in the Elsie Inglis and will shortly be due to come home.

Mrs Gilroy said that Lee had had no immunisations as yet and I have stressed the importance of this. I hope to see Lee again in six months time.

Yours sincerely,

Flora McPhail

Dear Dr. Cole,

Re: Baby Gilroy, c/o Clark, 55 Niddrie Marshall Grove, Edinburgh. Date of Birth - 20/9/81

Mrs. Gilroy has failed to bring Lee to the Child Welfare Clinic at Simpsons on the last four occasions and the last time we saw him was in November, 1981. I have sent no further appointments to Mrs. Gilroy.

Yours sincerely,

Robert Hume.
Senior Lecturer.

Dear Dr Cole

RE BABY LEE GILROY c/o 35 NIDDRIE MARISCHALL GREEN EDINBURGH
DATE OF BIRTH - 20.9.81

As you know Lee was born at the Simpson weighing 1.460 Kgs. at about 36 weeks gestation. In view of his low birth weight he is included in the longterm follow-up of low birth weight infants and I visited him in connection with this at home on 25.2.82 when he was a true age of 20 weeks.

As you will know Mrs Gilroy and the baby are staying with Mrs Gilroy's mother who is clearly very supportive and takes most of the responsibility to ensure that appointments are kept. Neither she nor Mrs Gilroy had any anxieties concerning Lee and reported that he was feeding well on SMA and is now taking solids 3 times daily. There has been no vomiting and he is currently having one normal motion daily, although he was reported to have been in ECH a month ago with an episode of diarrhoea.

On examination he was alert and interested, was just beginning to reach out and grasp objects, although his mother volunteered that he had never had a rattle or anything to hold and that she was thinking of getting him one. He followed well through 180° and located sounds promptly on both right and left sides. He was able to sit propped for quite long periods with only minimal lumbar curve and no head wobble. Systematic examination revealed no abnormality.

Mrs Gilroy had as yet given no thought to the baby's immunisations and I have told her that it would be appropriate for him to start these and that in view of his low birth weight, I would recommend that he should not have the pertussis or measles immunisations, but should have the others in the usual way. I will see Lee again when he is a true age of 1 year.

Yours sincerely

Flora McPhail

26th April, 1982

Dr. Cole,
Craigmillar Castle Terrace,
Edinburgh.

Dear Dr. Cole,

Re: Baby Gilroy, c/o Clark, 35 Niddrie Marshall Gdns, Edinburgh. Date of Birth - 20/9/81

This baby was born to a 17 year old mother primigravida; blood groupAB Pos. During pregnancy mother had been admitted in June at the end of the first trimester with vaginal bleeding. She was admitted at 30 weeks gestation with spontaneous rupture of membranes three days prior to admission. An undiagnosed breech presentation and baby was born assisted breech delivery with forceps to the after coming head. Baby's birthweight 1.46 kgs and apgar score was 2 at 1 min intubated and extubated at 3 minutes apgar score 7 at 5 mins.

On initial examination temperature was 34.8°; severe bruising of head and buttocks; gesational assessment 30 weeks. Baby was admitted to Special Care Baby Unit. He was nursed in 35% oxygen and commenced on prophylactic phototherapy. Investigations at this time showed normal coagulation screen; haemoglobin 15.4gms/dl; white blood count $9.5 \times 10^9/l$ blood culture was negative andinfection screen was negative. While awaiting results of infection screen and in view of the prolonged rupture of membranes baby was commenced on prophylactic Penicillin. He was nursedin oxygen for the first 48 hours, was initially tachypnoeic but this soon settled.

(1) Jaundice: Phototherapy was commenced immediately after birth; serum bilirubin rose to 145 mmls/l on 24/9/81. Investigations showed baby's blood group to be A Pos; direct coombs test negative; urine for reducing substances negative. Phototherapy was discontinued on 26/9/81 when the serum bilirubin was 84mmls/l thereafter the bilirubin continued to fall. It was thought that the extensive bruising at the time of delivery was responsible for this jaundice.

(2) Nectrotising Enterocolitis: On 26/9/81 baby was not so well, he had bradycardic episodes; did not tolerate his feeds had become hyponatraemic. Later the same day he also had rectal bleeding; his abdomen was distended and was tender on palpation but there were no masses palpable. Abdominal X-rays were taken which showed intramural gas and thickened loops of bowel and a diagnosis of necrotising enterocolitis was made. In view of this he was commenced on intravenous feeding; cocktail; Vamin and Intralipid; Gentamicin and Penicillin were continued. He was commenced on Metronidazole. The nasoduodenal tube was removed and there was nil by mouth. He continued on intravenous feeding for the next few

days. A full infection screen at this time was negative and by 27/9/81 his abdominal X-ray showed an improvement. Hisabdomen became soft, was no distended and his general condition improved. Heinitially received intravenous feeding by peripheral line and on 29/9/81 a long intravenous feeding line was inserted via his right saphenous vein. This was removed on 2/10/81 and thereafter he again had peripheral intravenous feeding. Oral feeds were gradually reintroduced and on 5/10/81 Gentamicin and Penicillin and Metronidazole were discontinued. He had had no further rectal bleeding from the time of initial diagnosis and at the time of starting feeding again his abdomen was soft with no distension and no tenderness.

(3) Aspiration Pneumonia: On 26/10/81, the day on which he firsT became unwell, he hada bradycardic episode following a major apnoeic episode and at this time aspirated gastric contents. He was intubated and gastric content aspirated from below his cords. In view of his general poor state he was commenced on CPAP 4 cms in 70% oxygen and his blood gases were satisfactory. His chest X-ray showed consolidation collapse of his right upper lobe and increased markings in his left mid and upper zones. He was given regular physiotherapy and his chest gradually improved, his CPAP was reduced and he was extubated on 28/9/81 and thereafter maintained in headbox oxygen; oxygen was discontinued on 4/10/81 and at this time his chest was clear.

(4) ? Septicaemia: On 2/10/81 he had a major apnoeic bradycardic episode which responded to stimulation and there were no abnormalities found on examination. However at this time he had a longline intravenous feeding line in situ and in view of the possibility of septicaemia this was removed. A lumber puncture showed 15 white cells and many red cells and no organisms and there was no growth on culture. Blood culture was negative and full infection screen was negative. He was at this time on Penicillin andGentamicin and Metronidazole and these were continued. The long intravenous feeding line subsequently grew staph albus but blood culture did not grow staph albus which was sensetive to Gentamicin and no other antibiotics were given.

(5) Patent Ductus Arteriosis: On 3/10/81 he was noticed to have bounding pulses with a grade 2/6 ejection systolic murmur in the second left intercostal space. A diagnosis of patent ductus arteriosis was made. There was no evidence of cardiac failure and over the next few weeks his ductus murmur became less prominent but was still present at the time of discharge.

(6) Feeding: Baby Gilroy was initially fed by nasoduodenal tube He tolerated his feeds well during the first few days of life. However, at the onset of necrotising enterocolitis his naso/duodenal feeds were discontinued and he was fed intravenously. After two weeks his nasogastric feeds were introduced which he tolerated well. These were gradually increased then he was weaned to bottle feeding. At the time of discharge from Hospital he was bottle feeding 4 hourly.

(7) Anaemia: At the time of his initial test he was anaemic haemoglobin being 11.1 gms/dl and he was given a top-up transfusion. He had a further topup tranfusion on 3/10/81 and again on 26/10/81. At the time of discharge from Hospital his haemoglobin was 10.5 gms/dl with a reticulocyte count of 1.2%

(8) Persistent Rectal Bleeding: On 24/10/81 he had intermittent pyrexia. At this time there was no abnormality found and full infection screen proved negative. The pyrexia continued and on 27/10/81 he commenced bleeding per rectum. The blood was mainly on the outside of the stool;

SIMPSON MEMORIAL MATERNITY PAVILION

PAEDIATRIC DEPARTMENT

Tel: 229 2477 Ext. 2691

Lauriston Place,
Edinburgh,
EH3 9EF

Baby Gilroy (Contd.) T 0593

The stools were normal in colour and consistency. His abdomen was soft; not distended and there was no masses. PR. showed an anal fissure. Rectal bleeding persisted; stools remained normal but in view of the possibility of a stricture due to necrotising enterocolitis a barium enema was performed on 3/11/81 which was normal. By 6/11/81 he had had no further rectal bleeding; his anal fissure was healed.

At the time of discharge from Hospital he still had a patent ductus murmur audible; his weight had risen to 2.47Kgs; alkaline phosphatase was 1165 units/l;. Anxiety was felt over baby's future in view of his adverse social circumstances and Mrs. Gilroy was resident for 48 hours prior to his discharge.

Medication on Discharge: Abidec 0.6 mls daily.
Ferrous Sulphate 30 mgs b.d.

Final Diagnosis:
(1) Prematurity.
(2) Prolonged Rupture of Membranes.
(3) Jaundice.
(4) Necrotising Enterocolitis.
(5) AspirationPneumonia.
(6) Patent Ductus Arteriosis.
(7) Persistent Rectal Bleeding.

Follow-up has been arranged at the Child Welfare Clinic.

Yours sincerely,

Alison James

Alison M.G. James.

Dear Dr. Symonds,

Lee Gilroy (20.9.81),
35 Niddrie Marischal Green, Edinburgh.

Diagnosis: E. coli 0111 gastro-enteritis.
Admitted : 18.12.81. Discharged: 30.12.81.

This three-month old child who was born 10 weeks prematurely was admitted via the Royal Hospital for Sick Children with a two-day history of diarrhoea, latterly with vomiting.

On examination he was a well looking child with low grade oral thrush but the rest of the examination was within normal limits.

With appropriate fluid management he made a gradual recovery. Enteropathogenic E. coli 0111 were isolated and at the time of discharge the stools were still positive for this organism but the parents have assured us that there will be no contact with other children.

We had difficulty with the parents in that they are both young and indeed were reading comics at the time of the child's admission. Within a day of admission they wanted to take the child to London by car to stay with relatives, despite the atrocious weather conditions at the time. After a good deal of "straight talking" they allowed the child to remain in hospital but as soon as he was well we had no choice but to allow him to return home. We were told that they would not be taking the child down to London but I would not be surprised if they have disregarded our advice in this respect.

Yours sincerely,

Philip D. Welsby
Consultant Physician.

Guidelines on monitoring of drug misuse in Scotland

When to complete a form

Complete form SMR24 for every 'new' problem drug user that attends your service, at the first face-to-face contact that provides e information. Include telephone contacts only if enough information can be obtained. Exclude all letter only and third party conta

Who completes forms

All medical practitioners and other professionals who are engaged in the treatment of 'problem drug users'.

Database definitions:

Problem drug user *Any person who experiences social, psychological, physical or legal problems related to intoxication and/or excessive consumption and/or dependence of his/her own use of drugs or chemical substances.*

New drug users *Those attending the service for their drug misuse problem for the first time ever or after an interval of at least six r*

Illicit drugs *Any illicit drug including solvents, tranquillisers and over the counter medicines taken inappropriately. Include only when used in combination with other drugs. Tobacco is excluded.*

Prescribed drugs Include: *any drug used in the treatment of addiction, i.e. substitute prescribing, drugs to treat withdrawal syn anti-depressants and anti-psychotics.*

Exclude: *drugs used to alleviate the medical effects of drug misuse, e.g. TB, abscesses, Hep C.*

Please ensure that:

- All mandatory and critical data items are complete: initials, date of birth, sex and main illicit drug (unless drug free) or main scribed drugs. ISD will contact services if any of these are missing or unclear.
- The initials and 4th character are clearly written in capital letters and in the correct order, i.e. first name and then surname.
- If the postal sector is not specified, it is important that other address items are provided. This will allow derivation of the pe council area of residence, in order to meet requirements for local information.
- There are no discrepancies between the routes of the illicit drugs listed and the injecting details, as they both refer to the pe drug using behaviour during the past month.

Examples

5. PRESCRIPTION PROFILE (CURRENT), give details of current prescription related to drug misuse

	Drug Details		Prescriber (✓)				Weekly consumption	
	Drug Name	Daily dosage (mg)	Person's GP	Specialist service	Prison doctor	Other doctor	No. of days supervised	No. of days unsupervised
Main Drug	METHADONE	30 mg		✓			5	2
Drug 2	PROZAC	20 mg	✓				0	7
Drug 3								

7. ILLICIT DRUGS PROFILE (PAST MONTH), illicit drugs (include alcohol, solvents & OTC medicine taken inappropriately) — Illicit drug free for the past month (✓) Yes ☐ *go to Injecting / Sharing details* No ☐ *sh be*

	Drug Name	Route(s) e.g. IV / IM / smoke / swallow / inhale / snort		How often? e.g. daily / most days / weekends / weekly / fortnightly / monthly / less often than monthly	In a 'typical' day	
		Main route	Other route		Number of times	Total quantity e.g. G / mg / ml / oz / units / binge
Main Drug	HEROIN	IV	SMOKE	MOST DAYS	3	1G
Drug 2	CYCLIZINE	IV		DAILY	1	100 mg
Drug 3	METHADONE (top up)	SWALLOW		WKLY	1	20 mg
Drug 4	COCAINE	SNORT		WKNDS	4	1G
Drug 5
