Dear DAVID ANDREWS

INVITATION TO ATTEND DIABETIC EYE SCREENING

Some people with diabetes can develop a condition affecting the eye called retinopathy, which can lead to partial loss of vision or possible blindness. Research has shown that regular screening for retinopathy in people with diabetes, and treatment for those affected, can reduce the risk of people losing their sight.

As part of a national screening programme for people with diabetes, you will be invited annually, depending on your last screening outcome, to arrange and attend an appointment for diabetic eye screening. This screening appointment will involve the photographing of each eye using a digital camera.

We may need to put eye drops into your eye(s), in which case you should note that your vision could be blurred for 4 - 6 hours, therefore it would not be advisable to drive after your appointment. If you wear spectacles, please remember to bring them with you.

Please call 01382 633956 Between 9am and 12 noon
Outwith these hours or if we are busy please leave Name, D.O.B & Phone Number.
Alternatively you can email us on tay.eyescreening@nhs.scot, with the above details

You may receive a text appointment reminder to your mobile. We are introducing this service currently. You can opt out of this service by calling Please call 01382 633956

Yours sincerely

Amanda Griffin (Programme Manager NHS Tayside)
Do you normally attend by patient transport? Please call 0300 123 1236 to arrange this.
